THE LABOUR GAZETTE

JULY, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JUNE, 1911.

I.—GENERAL SUMMARY.

THERE was general activity in nearly all branches of industry throughout Canada during the month of June. Prospects of an abundant harvest continued to be exceptionally good, sufficient rains having fallen during the first two weeks of the month to insure every prospect of good yields. While the coal mining industry in Alberta and Eastern British Columbia was impeded by labour disturbances, there was on the other hand exceptional activity in the coal mines of Nova Scotia. In all branches of manufacture prosperous conditions prevailed, and arrangements were being made for the establishment of many new industries. The general tone of the lumber trade was healthy. Unskilled labour was well employed, railway construction absorbing a large number of men. Generally speaking all classes of labour were well employed, except in a few cases; the supply of labour generally equalled the demand though arrangement for the additional help which will be required later in the season had not been completed. Returns of immigration, trade and transportation continued to show large increases over those of the preceding year.

Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which

was received at the Department of Labour during June, 1911.

Building trades.—Bricklayers and masons (225) at Calgary, Alta., received an increase from 62½ to 67½ cents per hour. Bricklayers and masons (forty) at St. Thomas, Ont., received an increase of 2 cents an hour making an advance from \$21.60 to \$22.68 per week. Carpenters (300) at Hamilton received an increase from 35 to 40 cents an hour in May and June. Bricklayers (fifty) at Brandon, Man., received an increase in wages amounting to from 60 to 65 cents per hour for a nine-hour day. Plasterers (500) at Montreal, Que., were granted an increase from 40 cents to 45 cents per hour and a reduction in working hours of from nine to eight hours a day, the change to take effect September 1. Carpenters (1,500) at Montreal received a general increase of ten per cent. in wages. The mean rate of pay advanced from 30 cents to 33 cents per hour for a nine-hour day. Increases, taking effect April 16, were granted to employés of the Pacific Coast Construction Company as follows: Labourers (100) from \$2.50 to \$2.75 per day; blacksmiths (six) from \$3.50 to \$3.75 per day; drillers (nine) from \$3 to \$3.25 per day, and cement workers (three) from \$3.25 to \$3.50 per day.

Metal trades.—Electrical workers, interior wiremen (fifty) at Calgary, Alta., were granted an increase from a sliding

scale of 35 to 50 cents, to a minimum scale of 50 cents per hour.

Food and tobacco preparation.—Thirty-four brewery workers at Ottawa received an advance amounting to from \$12 to \$13 per week, to date from July 1. It was also agreed that their hours would be reduced from sixty to fifty-five per week, taking effect from January 1, next. Eighty-five brewery workers at Hamilton received an advance from \$12 to \$13 per week and a reduction from fifty-nine to fifty hours per week.

Railway service.—Freight handlers and checkers (twenty) at Ottawa received an advance from a scale of \$1.55 to \$1.65 per day to a scale of \$1.65 to \$1.75 per day.

General transport.—Conductors and motormen (twenty-five) at Guelph, Ont., received an advance of 1 cent per hour, from a scale ranging from 15 to 18 cents per hour to one ranging from 16 to 19 cents per hour.

Public employes.—The maximum salaries of six teachers of the Collegiate Institute at Sarnia, Ont., were advanced from \$1,600 to \$1,800, \$1,500 to \$1,600, and from \$1,000 to \$1,200 per annum. the actual increase being \$50 per year.

Miscellaneous.—Broom tyers (nine), at Toronto, Ont., received an increase in wages from \$9 to \$12 per week, taking effect from June 1, 1911.

Unskilled labour.—Labourers (fifty) in the employ of the corporation of St. John, N.B., received an increase in wages from \$1.50 to \$1.75 per day, taking effect from June 12, 1911.

Interruptions to Industry.

Among industrial establishments, &c., destroyed by fire or through other causes, during June, 1911, as reported in the press of the Dominion, the following may be mentioned:—

Nov Scotia.—Box factory and tower at Bedford, loss \$18,000; University buildings at Wolfville.

Prince Edward Island.—Steamship *Ben Earn* with cargo of coal ran ashore at Cape Negro, near Shelbourne, N.S.

New Brunswick.—Two barns, contents, live stock and implements at Bloomfield Ridge, loss \$3,000. Barn at St. John, loss \$2,000. Hotel at Dartmouth, loss \$3,500. Hotel at Bath, loss \$10,000.

Quebec.—Twelve buildings, farms, dwellings, and factories, at Bedford, loss \$25,000; seventeen dwellings

and three stores at Calumet, loss \$30,000; woods and thirty houses at Gunning Cove and Churchven; wood fibre mill at Hull, loss \$2,000; potteries at Little River, loss \$20,000; dwelling and store at Montreal, loss \$8,000; carpet factory at Montreal, loss \$7,000; factory at Montreal, loss \$3,000; tenement at Montreal; five buildings at Montreal, loss \$25,000; grocery shop and dwelling at Quebec, loss \$18,000; laundry at Quebec, loss \$10,000; barns at St. Gabriel de Brandon, loss \$15,000; stables, shops and dwellings at Ste. Phillippe de L'Prairie, loss \$15,000; steamship at Valleyfield, loss \$25,000; creamery building at Sutton Junction, loss \$3,000; rooming house at Montreal, loss \$2,000; hardware store and cloak making establishment at Montreal, loss \$50,000; church struck by lightning and burned, Montreal, loss \$200,000; church at Waterville, \$6,000; Grand Trunk Station, loss, unknown; house and barn at Ste. Edward de Napierville, loss \$2,000; stables at Montreal, loss \$3,000; paint varnish factory at Montreal, loss, unknown; collision of the steamers *Aranmore* and *General Wolfe* in which the latter boat with full cargo was sunk.

Ontario.—Two shops and telegraph office at Alexandria, loss \$15,000; business block at Clayton, loss \$30,000; grain storehouse at Clandeboye, loss \$2,000; fire in mine at Cobalt, loss \$16,000; sawmill at Chatham, loss \$3,000; dwelling at Eglinton, loss \$3,000; foundry at Fort William, loss \$25,000; barn at Inglewood, loss \$5,000; planing mill and machine shop at Morrisburg, loss \$7,500; general store at Mandomuin; warehouse at Ottawa, loss \$100,000; factory at Orangeville, loss \$60,000; store and dwellings at Ottawa, loss \$8,000; store and apartments at Rainy River; brewery at Toronto, struck by lightning, loss \$15,000; clothing factory at Toronto, loss \$35,000; carpenter shop and storehouse at Toronto, loss \$15,000; varnish factory at Brantford, loss \$2,000; barns at Aylmer, loss \$7,000; hotel, general store and a residence, at Clarksburg, loss \$10,000.

Manitoba.—Business block at Shoal Lake, loss \$18,000; stores and dwellings at Winnipeg, loss \$3,000.

Saskatchewan.—Store at Qu'Appelle, loss \$5,000; hardware store and lumber yard at Swift Current, loss \$100,000; general store and warehouse at Regina, loss \$10,000; hardware store at Regina, loss \$30,000; barn and granary and ten horses, loss \$3,000; barn and eight horses at Francis, loss \$4,000.

Alberta.—Coal mine at Lethbridge, loss unknown.

British Columbia.—Lumber mill at Revelstoke, loss \$50,000; garage at Vancouver, loss \$120,000; shingle mills at Port Moody, loss \$20,000.

Conditions in the Industries and Trades.

Conditions of employment during June in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received by the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Excellent conditions prevailed throughout the Dominion with regard to agriculture. In the report of the Census and Statistics monthly for June, conditions are summarized as follows:—

The season this year has been favourable for field crops in all parts of Canada, and excellent reports have been received from all the provinces. The lowest percentage of condition is made for fall wheat, which suffered from inadequate protection in the winter months, and also to some extent from spring frosts. The areas of fall wheat are greater than last year by 4'50 per cent. and of spring wheat by 13'70 per cent. The total area in wheat is 10,503,400 acres, as compared with 9,294,800 in 1910 and 7,750,400 in 1909. The per cent. condition of fall wheat at the end of May was 80'63, and of spring wheat 96'69. The area in oats is 10,279,800 acres and its condition 94'76, as compared with 9,864,100 acres and 93'95 per cent. condition last year. Barley and rye each show a small decrease in area, but the condition is higher than at the same period last year. Slight decreases are also reported for areas of peas, mixed grains and hay and clover, with per cent. condition of over ninety. Hay and clover have a reported condition of 91'45 for the Dominion, being practically 100 in Manitoba, Saskatchewan and Alberta. The area of the field crops named is 32,051,500 acres for 1911, compared with 30,554,200 acres for 1910 and 28,194,900 acres for 1909. In the provinces of Manitoba, Saskatchewan and Alberta the area in wheat, oats and barley was 3,491,413 acres in 1900, 6,009,389 acres in 1905, 11,952,000 acres in 1909 and 13,809,300 acres in 1910, and it is 15,355,500 acres this year. The increase of these crops from 1900 to 1911 was 2,663,699 acres in Manitoba, 7,364,315 acres in Saskatchewan and 1,836,073 acres in Alberta.

The Fruit Crop Report, No. 2, issued by the Department states that both the month of May and the first week in June were too hot and dry for ideal conditions for fruit. The growth was fair and the rain came soon enough in June to prevent any serious check. During the first half of the month, the growth in eastern Canada was phenomenal. Weather conditions in British Columbia were also good. Nova Scotia reported a full crop in early fall and winter apples. There was a shortage of some varieties in Ontario; no district, however, reported a failure. A medium crop of pears was anticipated. The prospect for peaches was good, except in British Columbia where the crop will be light. Prospects are for a good crop of plums and grapes.

Bulletin No. 83 of the Department of Agriculture and Immigration of Manitoba states that the total crop area in that province is 6,032,037 acres, compared with 5,596,061 acres in 1910. The growth of crops has been phenomenal, and the indications are that there will be a very large yield.

Progress was reported in the formation of the Saskatchewan Co-Operative Elevator Company, twenty-five locals having been formed by June 13. The first general meeting was appointed to be held in Moosejaw on July 6.

The demand for farm labour in nearly all sections of Canada has been heavier this season than in any previous year. Fears were entertained that the supply for the harvest will be inadequate though no definite estimate of supply and demand was as yet available.

Fishing.

The fishing industry in the Maritime Provinces was only fair, the catch of lobsters being light, but there was some compensation in the higher prices obtained. Mackerel and cod were scarce, but some good hauls of mackerel were made near Halifax.

The spring salmon run in British Columbia has been light.

Lumbering.

The lumbering trade in Ontario was rather quiet during the first half of the month. It was reported to be somewhat affected by disturbed conditions in the United States. Many mills in Quebec were late in starting on account of the low water, causing a delay in getting out logs. Rains came, however, about the first of June and by the middle of the month most of the logs had been got out. Lumber was scarce with a tendency to higher prices. In New Brunswick, most of the St. John River drives had reached the main river during the last weeks of May and a summer of activity is expected. In Western Canada conditions showed little change from last month, being on the whole favourable with the outlook for a good fall trade.

On June 22-24 the Pacific Logging Congress was held at Vancouver, B.C. Representatives were present from the States of California, Oregon, Washington, Idaho and Montana, as well as from the Province of British Columbia. The object of the Congress is to promote a greater knowledge of the science of logging.

Mining.

The coal mining industry in Nova Scotia continued very active, the settlement of the strike at Springhill, N.S.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, active, very active; (2) quiet and very quiet.

3. Hotel and restaurant employes were very active.

4. Paperhangers and decorators were quiet.

on May 27 leading to increased production. Owing to the continuance of the strike of coal miners in eastern British Columbia and Western Alberta, the fuel production of that district was greatly curtailed. On Vancouver Island, however, the trade was better than in May. It was reported that in the lode mining camps the effects of the strike were not so great as had been feared. Promising conditions prevailed in the metalliferous mines in the Nelson division, by the boundary district and Similkameen. Elsewhere in Canada production was steady with little change from the conditions reported in May as prevailing in eastern Quebec, Cobalt, Porcupine and other mining districts.

Manufacturing.

Activity continued to prevail in the manufacturing industry throughout the country.

A successful "Made in Canada" fair was held in Vancouver, B.C.

Railway Construction.

Great activity prevailed in railway construction during the month. Though the amount of work under way is larger than in any previous year, the supply of labour was on the whole adequate in Western Canada, where the camps were for the most part working with their full quota of men. Branches were rapidly being completed in Western Canada by the Canadian Northern Railway Company, and it was anticipated by the Company that from 700 to 800 miles of new lines would be added to their system in the three prairie provinces during the year.

General Transport.

Railway earnings showed an increasing tendency during the month. The carrier trade on the Canadian side of the Great Lakes and through canals was brisk, the principal companies engaged stating they had plenty of trade to handle, the vessels were carrying full cargoes. The ships engaged in the passenger service on the Atlantic were bringing large num-

bers from Europe; and it was reported that all steerage berths were booked up to midsummer.

Under date of June 8, the following circular was issued by the Board of Railway Commissioners of Canada:

You are hereby required to file with the Board within sixty days from the date of this circular, a statement showing the number, class and weight of each locomotive on your line, and whether or not equipped with dump ash pans to avoid the necessity of men going underneath the locomotive.

Under date of May 30, the following order was issued by the Board of Railway Commissioners of Canada, upon the application of the Michigan Central Railroad Company, and to more clearly define the meaning of Circular No. 60, issued March 7, 1911, regarding reports of accidents at highway crossings.

It is ordered that where an accident has happened subsequent to January 1, 1905, or hereafter happens, at a highway crossing by a moving train causing bodily injury or death to a person using such crossing, and the Company immediately protects such crossing by a watchman, such protection will be regarded as satisfactory to the Board until the Company is able to make report, and the Board has the accident investigated and the crossing inspected, or until further Order.

The Trades.

Building.—There was continued activity in the building trades in most localities. In a few places, however, operations were impeded by labour disturbances, Vancouver being the most seriously affected in this respect. On the whole the amount of building in progress is largely in excess of last year, with the result that nearly all classes were very actively employed.

Metal and Woodworking.—Activity prevailed in the metal and woodworking trades throughout the Dominion.

Printing and allied trades.—Printing and allied trades enjoyed a month of activity.

Clothing.—Journeyman tailors and garment workers were well employed. Conditions were somewhat quiet among boot and shoe workers. At Quebec, shoe factories were quiet, but somewhat more active conditions prevailed in Ontario.

Leather.—The leather trade was active in most localities.

Food and tobacco preparation.—Bakers, confectioners, and butcher workers were

well employed. Cigar and tobacco makers, also, had a good month.

Miscellaneous.—Hotel and restaurant employes, and retail clerks were well employed. The tourist season was opening.

Unskilled labour.—Unskilled labour was well employed. In most localities the supply of and demand for this class of labour were about equal.

Canadian Trade and Revenue.

Foreign and Imperial trade.—During May, 1911, the total value of imports entered for consumption in the Dominion of Canada was \$43,257,805, compared with \$38,637,294, in May, 1910. During the two months ending May, 1911, the total value of imports amounted to \$74,936,779, compared with \$69,319,732 in the two corresponding months of the previous year. The total value of domestic exports during May was \$20,155,756, compared with \$18,347,432 in May, 1910. During May there was an increase in exports in the products of the mines, agriculture, and manufactures, and a decrease in the products of the fisheries, forests, animals and their products, and miscellaneous merchandise compared with May, 1910. The grand total of Canadian trade for May, 1911 was to the value of \$67,748,232, compared with \$59,187,972 in May, 1910.

In the reports of the Canadian trade commissioners issued during June, an account is given of the conditions and requirements of the lumber market in Mexico. It is stated that the total consumption of products of the forest in that country are comparatively small. The imports of oak and pine for construction lumber during 1909-10, amounted to 289,830 metric tons valued at \$2,467,000 of which the United States supplied 275,000 tons, valued at \$2,388,000, and Canada 2,956 tons, valued at \$26,700. The imports of furniture amounted to \$723,200, of which the United States supplied \$509,000, while Canada's share was \$77. An analysis of the trade with Canada during the last fiscal year shows a net increase of \$6,500,000 in trade within the British

Empire over the previous year, and an increase of \$75,000,000 or over eighteen per cent. in trade with foreign countries. Trade commissioners for Canada were recently appointed to Buenos Aires and Rio de Janeiro, in South America. A ready sale of agricultural and dairy machinery is reported in Denmark.

Domestic trade.—Trade conditions were generally satisfactory, and there was an optimistic tone owing to the excellent outlook for crops throughout the Country.

The bank statement for May showed an increase in deposits and a decrease in circulation and current loans. The circulation of notes amounted to \$81,862,218, compared with \$89,796,521 in April. Bank deposits amounted to \$860,993,354, compared with \$847,787,299 in April. The current loans in Canada amounted to \$708,093,677, compared with \$712,093,758 in the previous month.

Notes.

Mr. Robert Edgar has been appointed secretary of the Bureau of Labour of Ontario.

The seventh annual convention of the Canadian Retail Coal Association was held at Toronto, Ont., on June 14.

The fourth annual convention of the Canadian Gas Association was held at Quebec on June 15.

A convention of Master Plumbers and Steamfitters of Canada was held at Port Arthur, Ont., during the week beginning June 12.

A convention of the Chief Constables' Association of Canada, was held at Ottawa, Ont., during the last week of June.

Incorporation was granted to a firm, capitalized at \$3,500,000, for the purpose of carrying on an extensive bread industry. This company absorbed a number of well known-known bread businesses in Montreal, Toronto and Winnipeg.

Towards the close of the month a mine of the Port Hood and Richmond Railroad and Coal Company at Port Hood, N.S., was destroyed by inundation of the sea. The cause of the disaster was not ascertained.

II.—REPORTS OF LOCAL CORRESPONDENTS.

DURING the month of June, the Department of Labour received the resignations of Mr. A. B. Jones, correspondent of the *Labour Gazette* at Saskatoon, Sask., and Mr. J. P. McMurphy, correspondent at New Westminster, B.C.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions were very active throughout the month, and business generally was brisk. Abundant rains refreshed the country and prospects point to good crops. The iron and steel trades, the coal industry, shipping, manufacturing, and the building trades were all busy. The fishing industry is the only one facing failure, for the season so far has been poor.

All the Dominion Collieries worked steadily and the output up to the end of June is 320,000 tons ahead of last year. It is expected that the output for 1911 will exceed that of 1908, which was the largest for these collieries, by 300,000 tons.

Owing to an accident in January last, No. 3 Colliery, Sydney Mines was disabled, which led to a decrease in the output of the Nova Scotia Collieries. It is confidently expected, however, that before the end of the year, the coal output of this Company will exceed that of last year, the May and June outputs being larger than in 1910.

Since the re-lining of the blast furnace at Sydney Mines, the output per day increased from 150 to 250 tons. This is very satisfactory and the iron output for May showed 6,500 tons; steel, 5,000 tons. Trade prospects are good with this Company.

The Sydney Steel Works had a good month and were active in all departments. The completion of construction of the Turbo-electric plant with that of the wire nail mill is being rapidly pushed

ahead. The transmission line to electrify the pumping station will be completed shortly.

Trade prospects for the Sydney works are not so bright as in the past and broken time may occur at the rod mill during July. The demand for steel billets is poor while there is only a fair demand for steel rails.

Shipping was very brisk during the month, and will, no doubt, continue active during the navigation season. Transportation by rail was fairly heavy.

The building trades had a good month, and with the erection of the Dominion Steel Company's General Offices, the Sydney theatre, the Slag Company plant, new stores and residences, the labour supply was well absorbed. The wholesale and retail trades had a good month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The spring opened cold and dry, and the continued drought retarded the growth of the crops, especially the hay crop, but heavy rains began to fall early in the month, and had a good effect upon the country.

Fishing.—Lobster fishing was fair, and with the high prices, those engaged will do fairly well. So far mackerel have been scarce and fishermen are very much disappointed. Cod-fishing was little better than mackerel. It is too early in the year to report failure, but so far the local fishermen have not met with success.

CONDITION OF PARTICULAR TRADES.

The various branches of skilled labour were actively employed and unskilled labour was in good demand.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Work throughout this town and district continued brisk in all the several

departments. Coal mines were working full time. All the mines here reported a shortage of workmen. The outputs and shipments for the month of May showed an increase of about 16,000 tons over the corresponding month of 1910. The building trade was about normal. At Stellarton, New Glasgow and other places throughout the district, the building trade was brisk with no surplus of men. The town of Stellarton is putting in an extension to its water system to supply town water to the new houses erected by the Acadia Coal Company in the Ashfelt district. New Glasgow is also contemplating making large extensions and improvements in its town water system. Farming, brick yards and other outside industries were well employed, and reports obtained during the early part of the month showed that labourers were scarce in these industries.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This industry throughout the district was very brisk. The scarcity of rain during the months of May and June has, no doubt, made it necessary to expect a lighter hay crop this year than last year.

Lumbering.—With the exception of shipping last season's cut to the various markets, this industry is at present quiet.

Manufacturing.—All the several branches were actively engaged.

Mining.—This industry in the town and district is, at present, very brisk. Shipments, for the five months ending May 31, 1911, were about 260,000 tons, being an increase of about 60,000 tons over the corresponding months of 1910. The Acadia Coal Company is erecting large brick and other buildings at the Allen shafts to install a large electric plant and other machinery. Improvements are also going on at its other mines, above and below ground.

Railway construction.—It is contemplated to extend the railway to County Harbour, Guysborough County, in the near future. Men are working repairing fences and other work. Men are also employed on gravel trains

renovating and repairing the road-bed along the railway.

CONDITION OF PARTICULAR TRADES.

All the skilled and miscellaneous trades were well employed. Unskilled labour was also active, but not in excess of demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

June was an improvement, industrially speaking, over May. There were more men employed in building trades, on city works, street cleaning and sewer building. Manufacturing was fully up to the average, and was more active than in the corresponding month of 1910. In the work of completing contracts, that of the new Y.M.C.A. showed much progress, and is being rapidly proceeded with. The building trade, as far as new contracts are concerned, was not marked by the commencement of sufficient buildings to warrant any immediate activity in this line. During the month several permits were issued for dwellings as well as for some stores and warehouses, &c., to the value of about \$50,000. As to the future, there are no signs, at present, to indicate anything abnormal, although the building government piers and buildings, and the erection of a new market building, may cause increased activity at any moment.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Late June wholesale prices were as follows:—

Butter, creamery, prints, 25 cents.
Butter, creamery, boxes, 24–25 cents.
Butter, creamery, 30-lb., tubs, 25 cents.
Butter, dairy, ordinary, 19–21 cents.
Butter, dairy, prints, 22–23 cents.
Cheese, large (new), 12½–13 cents.
Cheese, twins, (new) 13½ cents.
Eggs, fresh, 19 cents.
Beef, forequarter, 7–8½ cents; hindquarter, 8–11½ cents.
Lamb, cold storage, 13 cents.
Mutton, 7–9 cents.
Veal, 6–8 cents.

Hams, smoked, 15-17 cents; fresh, 16 cents.
 Bacon, roll, 12 cents; side, 18 cents.
 Turkey, 16-18 cents per lb.; geese, 16 cents per lb.;
 ducks, 17 cents; fowl, 12½-16 cents.
 Potatoes (P.E.I.), bag, \$2.50.
 Potatoes (N.B.), bag, \$2.50.

Fishing.—Local fishermen made several stops of mackerel, yielding good returns, lots of 800 pounds, 7,000 and 10,000 mackerel being taken. Much of the fish was exported.

Manufacturing was fully maintained.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were more active than in May. Carpenters had a fair month. Lathers and plasterers were quiet. Painters were active. Plumbers and gasfitters were quiet. Stonecutters were dull. Builders' labourers showed an improvement over May. Electrical workers were quiet. Boilermakers had a fair month. Other lines were about normal. Printers and pressmen were fairly active. Bookbinders were not as busy as in May. Tailors were not as active as usual, owing, principally, to cool weather. Boot and shoemakers had an average month. Barbers were busy. Hotel employés, theatre employés and laundry workers were active. Railroad men had a fairly active month. Ship labourers and longshoremen were not as busy as in May. Unskilled labour showed activity to a greater degree than in May.

DISTRICT NOTES.

Lunenburg.—Several vessels have arrived at Mahone Bay from the Banks, viz.:

	Quintals of fish.
<i>Goldie Belle</i>	400
<i>Eva Beauche</i>	400
<i>Nellie Louise</i>	500
<i>Iona W.</i>	400
<i>Calavera</i>	400
<i>Grace Darling</i>	400

The schooner *Otokia*, recently launched, left June 19 for the Banks, other vessels are expected back daily.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during the month of June has been exceptionally good, and there has been a steady demand for masons, stone cutters, carpenters, and other tradesmen in the building line. Building operations were fairly extensive and gave employment to a large number of hands. The Canadian Car & Foundry Company, are building new work shops to replace those destroyed by the recent fire. The new shops are to be of cement re-inforced by steel, but it is not expected that they will be ready for occupancy until September. The Atlantic Auto Company is building a large brick garage for general repair work, and will furnish work to quite a number of men during the summer months and to a limited number of men during the whole year. As mentioned above, the building trades were very active. The building operations going on in Amherst at the present time will total, when the structures are completed, about two hundred thousand dollars. The wholesale and retail trade reported business rather quiet and will probably remain so during the holiday months. There is a growing sentiment among our business men in favour of spending a large portion of their time during July and August at the sea side and many of them have cottages at the seashore, twenty miles from Amherst. Most of the business men own motors, and spend their nights and a portion of the morning at their summer homes. This has a natural tendency to lessen business somewhat during the latter portion of June, July and August. It may be put in as evidence of how well the business men of the town are doing when Amherst claims to lead Canada in the way of motor owning. With a population less than ten thousand, there are fully one hundred motors owned by citizens of the town, representing probably an expenditure of one hundred thousand dollars. The rates of wages have undergone no material change this year. As reported last month the Springhill strike is over and it is satisfactory to note that an optimistic feeling prevails throughout the town. The strike lasted

for twenty-two months, probably the longest strike in the history of Canada. The Company are endeavouring to find employment for the men as rapidly as possible and it is felt that there will be no further trouble. Different officials of the Dominion Coal Company have visited the property, and there are many reports current with regard to the further development of the important Springhill coal area.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—It is too early to state, so far as this section of the Province is concerned, just what the outlook for the crops is at present. The seeding season was very favourable, but the early part of June was very dry and vegetation developed very slowly. During the past fortnight, however, abundant showers have fallen and the farmers are confident that the outlook for the crops is good. Farm produce of all kinds, with the exception of hay, commands high prices and the local market will take more than the farmers are producing.

Fishing.—The only fishing of importance at this time of the year in Cumberland County is lobster fishing. The catch this season has so far been very small. Owing to the ice on the coast, the packers were not able to run their lines until ten days or a fortnight after the opening of the season and the indications are just now that the lobster packers along the Northumberland Strait will have a very limited catch and that the operation will not be a financial success.

Lumbering.—The lumber cut during the past winter was exceptionally heavy. In Cumberland County alone there were probably over forty million feet cut by our different operators. Unfortunately, just now the market is dull and the shippers find it a difficult matter to charter boats to transport their lumber to the European market. It is feared that a large quantity of lumber will have to be held over until another year and some of the dealers anticipate a loss in the season's operation.

Manufacturing.—Work has been proceeding steadily in all our industries. In

fact, taken generally, conditions are better in town from a manufacturing standpoint than they have been for some years. A number of car builders were thrown out of work by the fire in the Canadian Car & Foundry Company, last month but have found employment elsewhere and with this one exception all our other manufacturing plants are operating steadily. Some of them are working night work and the new buildings for the Canadian Car Company, are being pushed forward as rapidly as possible, so that by September it is anticipated that the car builders will be back at work again.

Mines.—The Springhill strike is over and during this current month the Company took back over seven hundred of the strikers and are planning to take the remaining three hundred and fifty or four hundred back as rapidly as places can be found for them in the mine.

At the Joggins Colliery work progressed very favourably. The output of the company is being gradually increased and satisfactory development work is done. The Eastern Coal Company and the Great Northern Coal Company, are experiencing financial difficulties. The Eastern suspended operations altogether and in the last week of the month the limited number of men working with the Great Northern also ceased work. Neither of these collieries, however, employ any great number of men.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were well employed. Carpenters and joiners had abundant work. Lathers and plasterers will have steady work from now on. In painting and paper hanging there was but little doing. Plumbers were busy. Stone cutters were well employed. Iron moulders had steady work. Iron workers and helpers also were steadily employed. Machinists, engineers, and electrical workers were very busy and boiler makers working night and day. All branches of wood workers were well employed. Upholsterers reported business dull. Varnishers and polishers had steady work but only a limited number

are employed in this vicinity. Car builders had steady work in the passenger department but work on freight cars was very slack. Printers were very busy and pressmen were steadily employed. Journeymen tailors had steady employment. Confectioners reported business good. Butchers and meat cutters were fairly active and ice cutters fairly busy. Trunk and bag makers were well employed. Barbers were busy. Clerks and stenographers were well employed. Furriers reported business dull. Hotelmen reported business fairly active. Unskilled labour was well employed.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR,

The general condition of the labour market during June was satisfactory, the demand being in excess of the supply, in some places, for example, on the Elmira branch railway, the contractor had to import men from the other provinces. This work, the breakwater at Tracadie, near Zion Church, new jail, annex to Notre-Dame Convent, the remodelling of the Royal Bank, Charlottetown, gave employment to different classes of workmen. There were also a number of residences in course of erection in city and county. Wholesale and retail merchants reported business good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—After a strenuous period of getting the crops planted, the farmer has settled down to routine work again. Dairying, which is becoming one of the most important industries, is receiving much attention at present. Despite the short pasturage, early in the summer, due to the prolonged drought, the yield of milk was larger than at the same period last year.

Fishing.—The lobster season which opened the last week in April, has only about a fortnight to run. The catch on

the whole will be below that of last year. Lobsters and mackerel are the two kinds of fish which are receiving most attention at present.

Manufacturing.—The few factories in this province, where agriculture is the occupation of four-fifths of the people, have been carried on under normal conditions, supply and demand being well balanced.

Railway construction and employment.—The building of the Elmira branch line was the principal railway work under construction. In the general operation of the road conditions were normal.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers and plasterers, were busy. Painters, decorators and paper hangers, plumbers, gas and steamfitters, stone cutters and builders' labourers were active. Iron moulders, workers and helpers, machinists and engineers, steam engineers, electrical workers, sheet metal workers were active. Bicycle workers were busy. Woodworkers, upholsterers, carriage and wagon makers and car builders were active. Printers, pressmen and bookbinders were active. Journeymen tailors, garment workers and boot and shoe workers were active. Bakers and confectioners, butchers, tobacco workers, tanners, curriers, leather workers, saddlers, barbers, clerks and stenographers, delivery employes and hotel employes were active. Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, and trackmen, freight handlers, steamboat men and firemen, ship labourers, longshoremen, teamsters and expressmen had a good month. There was activity in the various branches of unskilled labour.

MONCTON, N. B. AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Active conditions prevailed in nearly all branches of labour during June

though possibly the volume of employed was hardly up to the mark of June, 1910. Local supply has in most cases been sufficient to meet the demand. Excavation for the foundation of the new wing to the Intercolonial Railway general offices has begun and preparations for the erection are rapidly advancing. Tenders for the erection of a fire station upon High Street are being called for and work will commence at an early date. About fifteen dwelling houses are in course of construction and considerable repair and extension work under way. The Paul Lea Woodworking Company report active conditions and an increased staff. A new passenger coach for the New Brunswick Coal and Railway Company has just been constructed by this Company. The Lewisville Brick and Mercantile Company report a large increase in output over last season and employ a staff of about twenty-five employés. Active conditions are reported from Mirwin Bis-cuit factory, New Brunswick Wire Fence Company, Acadia Barrel factory, and Abrams Machine shop. Normal conditions prevail in the Record Foundry, the Humphrey woollen mill and the cotton factory. About twenty-five men are employed upon permanent sidewalk work and about ($\frac{1}{4}$) one quarter of a mile laid. Some fifty hands are also engaged in laying gas mains and street railway work. The rate of taxation this year is 2.22 as compared with 2.02 last year, and the total tax levied is \$116,144 as against \$103,856 in 1910, being an increase of \$12,287. Customs duties for May amounted to \$5,308 as compared with \$4,229 in 1910. Wholesale and retail trade was up to the average and rents steady. No unrest in labour circles was reported and no change in hours of labour noted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very active during the entire month. Farmers' help was in good demand and with supply insufficient. Dry weather during the first half of June, while favourable for seeding operations, checked the growth of the grass materially, but the situation

was relieved by copious showers during the latter part of the month.

Fishing.—Conditions were quiet in this industry.

Lumbering.—The rise of the water in the various streams during the last week of the month brought much of the stranded lumber down to the mills and the prospects of the summers' cut were safe.

Mining operations were quiet.

Railway construction and employment.—The estimates for the month of May for work done upon the New Brunswick sections of the Grand Trunk Pacific Railway amounted to \$36,975. There was no expenditure upon contract No. 1, Moncton to Chipman, which is virtually completed and ready for operation. A number of excursions from Moncton to Chipman over this section have already been made.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet, carpenters fairly active, and painters and decorators busy. Plumbers were fairly active, stone cutters quiet, while builders' labourers were in moderate demand. The various branches of the metal, engineering and shipbuilding trades operating here reported steady conditions. Woodworkers, carmen and coo-perage employés were active and upholsters busy. Printers, pressmen, bookbinders and photographers were active. Journeymen tailors, garment workers, milliners and milliners' apprentices were active. Bakers and butchers had steady conditions. Leather workers and saddlers were active. Barbers, theatre employés and laundry workers were active. Clerks and stenographers were busy. All classes of railway operating staff were active. Freight handlers, teamsters and expressmen were busy. Local supply of unskilled labour was fully sufficient for the demand.

DISTRICT NOTES.

Sackville.—The Fawcett Foundry Company and the Enterprise Foundry Company reported steady conditions. A. E.

Wry Company, Limited, reported steady conditions in boots and shoes and very active conditions in harness lines. Building conditions were fairly active and construction work upon the public wharf advanced rapidly. A spur line has been built from the New Brunswick and Prince Edward Island Railway to the Freestone quarry and several carloads shipped. At Woodpoint quarry about twenty-five men were employed and one schooner loaded.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During the month of June an improvement was noticeable in the labour market, and a large amount of repairing and remodelling was carried on. The James Pender Company, Limited, is making extensive repairs to its buildings, and a new brick building, eighteen by forty-three feet, on a concrete foundation, for the galvanizing plant, will be built. McLean, Holt and Company's foundry on City Road was damaged to the extent of \$300 by fire on June 8. Incorporation is authorized of the Canada Nail & Wire Company, Limited, with a capital of \$800,000, to operate the Maritine Nail Works in St. John; the Thompson Coal and Brick Company, Limited, Sussex, with a capital of \$24,000, to carry on a general mining business; and the Sackville Concrete Company, Limited, with a capital of \$6,200, to carry on a business in concrete at Sackville. The Bank of New Brunswick will open branches in Yarmouth and Montreal. The Edward Partington Pulp and Paper Company has purchased the property at Union Point known as the West Head Eddy. The land will be utilized in connection with the large paper mill that is to be built on the Point, work on which it is expected will be started shortly. The Gordon Nail works at West St. John will be removed to Calgary. The city cashier paid out \$10,448.90 to civic employes as wages for the four weeks ending June 15. Bank clear-

ings for the four weeks ending June 21 were \$5,716,969, and for the corresponding period last year \$5,915,045, being \$198,076 less in 1911 than in 1910, and \$2,635,511 less than during the five weeks ending May 25 of the current year. Savings Bank deposits during the month of May were \$101,717.76. The withdrawals were \$115,059.81. The Customs receipts for the month of May were \$107,949.31, an increase of \$17,621.32 over the same month of last year. The Inland Revenue receipts were \$15,150.25 for the month of May, an increase of \$2,016.64 over May of last year. All the leading business houses will close at one o'clock on Saturdays during the months of June, July and August.

On June 9, fifty men in the employ of the water and sewerage department of the city went on strike for an increase in wages. They were receiving \$1.50 per day and demanded \$1.75. The men had sent in a petition for an increase in pay, and it was reported on favourably by the Board. They were unaware of this and walked out to enforce their demands. On the chairman of the Board being informed of the situation he granted the increase and the men returned to work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The indications are that there will be a good harvest this year, the recent rains being of great benefit.

Fishing.—The harbour fishermen reported salmon as being plentiful.

Lumbering.—It is estimated that there are about 70,000,000 feet of logs in the booms of the St. John River Log Driving Company. About forty per cent. of the logs cut will be hung up on the head waters of the St. John River.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, painters and decorators, stone cutters, builders' labourers were active. Plumbers and gas and steam fitters were busy. Iron moulders were active. Machinists and engineers, steam engineers, electrical workers and line-

men were busy. Blacksmiths and boilermakers were active. Sheet metal workers were busy. Woodworkers were busy, and shingle weavers active. Printers, pressmen and bookbinders were busy. Journeymen tailors were busy. Bakers and confectioners were busy and cigar makers active. Brush and broom makers were busy. Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen and freight handlers, steamboat men and firemen were busy. Ship labourers were dull. Street railway employés, teamsters and unskilled labour were busy.

DISTRICT NOTES.

Fredericton.—The annual meeting of the shareholders of the Hartt Boot and Shoe Company was held June 21. A dividend of six per cent. was declared. The business of the past year showed an increase of twenty per cent. above the previous year, and the output for the twelve months amounted to \$350,000. The company has adopted the union stamp of the boot and shoe workers' union, and the outlook for the present year is bright.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market has been exceptionally quiet for the time of year on account of the cold spring. There was no freshet and the spruce logs did not come down until the heavy rains towards the first of June, so that the mills were idle until late though they are all running now, some of them day and night. Then most of the idle men among the labouring class were given employment. Business generally is quiet especially among the mechanics.

Considerable repairs were undertaken; there were also a number of barns erected. Beyond this, there was little building going on. The Edward Sinclair Company have erected several houses for their employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were through seeding, and the prospects were rather bright. Grain was looking fine, on account of the cool dry weather in May. The hay was only fair but haying will be early.

Fishing.—The catch of shad and mackerel was very good and the quality fine, but the salmon was not as plentiful as last season, but better than at the first of the catch.

Lumbering.—The lumber merchants were feeling a little hard just now as it has cost them much more to get the logs to the boom than usual and the price of sawn lumber is not good. The market seemed over stocked, and there was very little shipping.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were practically idle. Plasterers are doing a little, but not rushed. Painters were more fortunate as there is something doing in their line. Plumbers were busy as there is much more doing in that line than there used to be.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of June was a very busy one, in the building trades especially, there being quite a number of new buildings being erected, as well as extensive repairs. This, taken in conjunction with the paving of the streets upon a large scale, the amount to be expended under this latter head being approximately \$300,000, made the demand for labour, including the unskilled class, very brisk. Prospects for a continuance of activity in this line are good, the Quebec City municipality having called for tenders for the laying of a new main from Lorette to the city. The commencement of work in the Transcontinental workshops and the building of the station in the near future gives additional ground for this

expectation. The destruction, by fire of two large establishments, one a corset and cardboard box factory, and the other a laundry, had the effect of throwing some out of employment temporarily, but the firms were rapidly re-organizing and taking on their former employes after securing temporary quarters.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busy seeding and those who had this work finished early have benefitted by the plentiful rains of June. The crops in the surrounding country looked beautiful and were much further advanced than ordinarily at this season of the year.

Lumbering.—All the big saw-mills started upon their season's cut, the only exception being a couple of saw and rossing mills that are affected by the new regulations prohibiting the export of pulpwood cut on Crown Lands.

In *railway construction*, a very good start was made upon the new road to connect St. Joachim, the present terminus of the Quebec Railway Light and Power Company (St. Anne Road), with Murray Bay and eventually with the Saguenay. This road had gangs of men working at both ends.

CONDITION OF PARTICULAR TRADES.

The building trades were busy, with the exception of the gas and steam fitters, who were quiet. The metal, engineering and shipbuilding trades were also busy, as were woodworkers. Printers, pressmen and bookbinders were actively employed. Tailors and garment workers were busy, but boot and shoe workers were dull. Bakers, butchers, meat cutters and cigar makers were quiet. Ice cutters and drivers were busy. The leather trades were dull. All classes of railroad employes, such as conductors, engineers, firemen, trainmen, switchmen, freight handlers, telegraphers, and street railway employes were busy. Ship labourers and longshoremen were active. The supply of unskilled labour was equal to the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The same condition, so far as demand for labour is concerned, prevailed, as during the month of May. All outside work was being rushed, and many new buildings, both private and business blocks, are in course of erection. The St. Charles Seminary is adding an addition that will cost at least \$80,000. The Street railway has a large force of men re-laying the car tracks and extending the system. The water department of the city has under construction a large reservoir, while a Belleville firm has the contract for a new dam and power-house for the city on the Magog river. With the above and other work there is a keen demand for unskilled labour. Farmers complain that help is very scarce, and with haying about to start, this will be a serious inconvenience in many sections. The various machine shops, factories, &c., are all running full time, and there is plenty of work ahead. The Sherbrooke Power & Railway Company has purchased the Stanstead Electric Light Company, and is negotiating with the North Hasley Electric Company for its plant. The acquisition of these plants will give the Sherbrooke concern a direct line to Stanstead, and it will be in a position to furnish light to the towns and villages along the route. At the same time power will also be furnished to manufacturing concerns. Wholesale and retail trade was reported good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy. Haying began towards the latter part of the month, but many complain of the scarcity of help. The hay crop is reported good, and other grain and root crops promise well.

Lumbering.—Lumbering is practically at a standstill, although several of the large concerns have gangs of men in the

woods preparing for next season's work.

Manufacturing. — All branches of manufacturers were fully employed, and all departments were running to their full capacity.

Mining. — Mining operations were rushed to the limit. At Eustis copper mines the demand was for more men. The asbestos properties in Thetford and Black Lake have a full force employed.

Railway construction and employment. The Sherbrooke Power & Railway Company is still employing a large force of men relaying and extending its tracks.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were busy. Iron moulders, machinists and iron workers were busy. Electrical workers and linemen were very busy. Jewellery workers were busy. The wood working and furnishing trades were busy. Printers, pressmen and bookbinders were busy. Journeymen tailors and garment workers were active. Bakers and confectioners were busy, and cigar makers active. Miscellaneous workers were busy. Railway men were active during the month. Unskilled labour was in demand and scarce.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Skilled and unskilled labour were well employed during the month, employment being more abundant than in the previous month or in the corresponding month of last year. For the first time in several months the supply was not equal to the demand. Good progress was made with the erection of the Wayagamack Pulp & Paper Company's Mills.

All the saw-mills started early in the month sawing logs and have been running full time since. There is no exceptional activity in any particular trades, but they are all active, and

wholesale as well as retail trades report a good month.

There were no changes in rates of wages or hours of labour during June and the best of understanding prevailed between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop looked well, and grain prospects were good. The dairying industry was flourishing, with excellent pasturage.

Fishing.—Fishing was dull during June.

Lumbering.—Saw mills were in running order early this month and have been running to their full capacity ever since.

Manufacturing.—All factories were busy and running full time.

The aldermen unanimously came to a decision in regard to the construction of a street railway for this city, but will wait till after municipal elections, which will be held July 10, before they start on the work.

CONDITION OF PARTICULAR TRADES.

All those employed in the building trades had plenty of work, as the contractors were short of men during most of the month of June. Iron moulders, workers and helpers were very busy. Core makers, machinists and engineers, also. Electrical workers and linemen were active. Boilermakers, sheet metal workers, bicycle workers and horse-shoers had plenty of work ahead. All employed in the woodworking trades or furnishing trades report a good month. Printers, pressmen and bookbinders were well employed. Journeymen tailors, garment workers, glove makers and boot and shoe workers were active the whole month. There was plenty of work for bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers, ice cutters and drivers were very busy. Tanners and curriers were quiet, but leather workers and saddlers were busy. Barbers, clerks and stenographers were fairly employed. Delivery employés were active, furriers rather quiet. Hotel, restaurant and theatre

employés were busy and laundry workers also. Railroad conductors and all others employed for the railroad companies were active this month and steamboat employés were still more busy. Cab-drivers, hackmen, carters, teamsters and expressmen report a good month. There was a good demand for unskilled labour which exceeded the supply this month.

DISTRICT NOTES.

There is plenty of work this month in the whole surrounding district and especially in the building trades. The saw mills were also short of hands.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during June was better than in May. The building trades had an exceptionally active month. Several new buildings were started as well as considerable repair work. Work on the Normal School being built on the land belonging to the Sisters of the Presentation was making slow progress on account of the scarcity of labour. In the building trades the supply does not meet the demand. The sash and door factories had enough work on hand to keep their staffs fully employed. The boot and shoe industry was quiet. The O. Chalifoux & Son Company has bought a site in Ward 5 and will build large shops. The iron and leather industries were active. The musical instrument factories were busy and worked full time, with increased staffs. The biscuit factory had a good month. A new company has been formed for the manufacture of biscuits and pastry of all kinds. The dairy industry was much more active than at the same time last year. About 62,000 boxes of cheese were shipped to England during the third week of May. Business, wholesale and retail, was good. Banks reported a good month, and collections easy. There was no change in the rates of wages or hours

of labour. The relations between capital and labour were cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The general condition of agriculture was good. Frequent rains did much good to the hay and other crops. Pressed hay was still in good demand, selling from \$10 to \$13 a ton, according to quality. Mixed clover sold for \$9.50 to \$10, and clover for \$7 to \$7.50. Butter remained at 22–25 cents a pound. Fruits and vegetables were plentiful, but prices were very firm. Farm hands were scarce. Farmers offered from \$2 to \$2.50 per day of ten hours, with board, but the demand still exceeded the supply.

CONDITION OF PARTICULAR TRADES.

All the building trades were fully employed. Iron moulders, iron workers and helpers, machinists, engineers, steam engineers, electrical workers, blacksmiths, boilermakers and horseshoers were fairly active. Woodworkers, upholsterers, varnishers, polishers, woodcarvers and pattern makers were well employed. Printers, pressmen and bookbinders had a very active month. Journeymen tailors and garment workers were well employed. Boot and shoe workers had a quiet month. Bakers, confectioners, butchers, meat cutters, ice cutters and handlers were very active. Tanners and curriers were a little more active than in the preceding month; the other leather trades were fairly well employed. Barbers, clerks, delivery employés, hotel, restaurant and laundry workers were active. All railway employés were very active. Cab drivers, hackmen, carters, draymen, teamsters and expressmen were well employed. Unskilled labour was very active and in great demand.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Activity prevailed in most branches of industry, and orders came in plentifully. Several dwellings and commercial build-

ings are under construction, giving employment to labourers and the various building trades. Outside of the government shipyards, the other yards have little to do at the present time, and this will continue until next fall when the river fleet comes into winter quarters. Navigators are satisfied with their business so far, and the prospects for the balance of the summer are promising. Dry goods merchants and milliners did a good business during the month. The grocery trade also was good. The Quebec, Montreal & Southern Railway Company is building a new station. The Company has been obliged to put on additional freight trains to accommodate the local trade.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers anticipate good crops. The recent rains have done much good. The price of meat is still high, but eggs, butter and vegetables are abundant and sell at fair prices.

CONDITION OF PARTICULAR TRADES.

Jewellers, silversmiths, carriage and wagon makers and boot and shoe workers had plenty of work. Hotel and restaurant employés, barbers and laundry workers were steadily employed.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market continued active during June. A large number of men were employed by the corporation building cement sidewalks and paving streets. Work on the new Cluett & Peabody building was progressing rapidly. Skilled workmen were in demand and some were imported from abroad. Several dwellings were in course of construction, and a number of repairs were going on. The new factory will employ 1,000 hands from the start, and everybody wants to have a house to let. Work on the public bridge

between St. Johns and Iberville has been suspended for an indefinite period. Navigation, which had been inactive on account of the Whitehall canal not being opened in June, has now resumed its normal activity. Business, both wholesale and retail was very good. Banks report a good month. There was no trouble between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Prices of farm products were as follows: Hens, \$1.50 to \$1.75 a pair; ducks, 75–80 cents each; turkeys, \$2.50–\$3 each; chickens, 80–90 cents a pair; fresh pork, \$8–\$8.50 per cwt.; beef, \$8–\$9 per cwt., with an upwards tendency. Hay sold for \$12.50–\$13 per ton, and large quantities were shipped by boat.

Fishing.—The Iberville fisheries gave good returns, fish being very plentiful.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators and plumbers were very active. Stone-cutters and builders' labourers were active. Iron moulders, iron workers and helpers, coremakers, machinists, engineers, electrical workers and linemen reported a very active month. Shipwrights, ship carpenters and caulkers had a quiet month. Tinsmiths, tool sharpeners, horseshoers and jewellers were active. Woodworkers, upholsterers, varnishers and polishers, wood engravers, carriage and wagon makers, pattern makers, coopers and gilders reported a good month. Printers, pressmen, electrotypers, bookbinders, steel and copper-plate printers and photo-engravers were well employed. Journey-men tailors, garment workers, hatters and glove makers had steady work. Bakers and confectioners, butchers and meat cutters, ice cutters and handlers and tobacco workers were active. Tanners, curriers, leather workers and saddlers reported a good month. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and laundry workers were well employed. Railway conductors, locomotive engineers and fire-

men, telegraphers, trainmen, switchmen, trackmen, freight handlers, steamboat men, ship labourers, longshoremen, cab drivers, hackmen, carters, draymen, teamsters, expressmen and unskilled labourers were all well employed.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Work is constantly increasing, more particularly in the building trades, the members of which were all employed during the month, with the exception of plasterers and labourers, a few of whom were still out of work. The City of Montreal has just awarded contracts aggregating nearly one million and three quarters, work on which will commence without delay, and it is contemplated to build a ten-storey hotel and a large theatre, so that Maisonneuve workingmen seeking employment will be able to find plenty of work in the city during the summer season and until late in the fall. All the manufacturing establishments and business firms were in full activity. Collections were easy, and the system of cash sales is making considerable headway.

CONDITION OF PARTICULAR TRADES.

The building trades were well employed, with the exception of plasterers. Machinists, electrical workers, linemen, stove mounters, blacksmiths, tinmiths and horseshoers were in demand, the other metal trades being active. Car builders and wagon makers were in demand and upholsterers active. The printing and allied trades were very active. Journeymen tailors were in demand, the other clothing trades active. Bakers and confectioners were in demand, ice handlers and cigar makers busy. The leather trades were busy. Barbers, clerks, stenographers, delivery employés were in great demand. Carters and draymen were in demand. Unskilled labour was not fully employed, but will be so in the near future.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Customs receipts have been increasing this year at the rate of about sixty per cent. over last year. The amount received during May was \$1,727,948, as against \$1,534,283 during the same month of 1910. Bank clearings for May exceeded two hundred million dollars, making a new record. The figures were as follows:—

May, 1911.....	\$209,694,401
“ 1910.....	161,199,401
“ 1909.....	144,131,938

For the last week of the month, bank clearings aggregated \$48,881,334, as against \$39,440,539 for May, 1910. Although 136 building permits were issued in May of this year more than in the corresponding month of last year, for new buildings and repairs, the total value was \$6,060 less. One hundred and sixty permits for repairs were issued, valued at \$278,245, as against 124 permits, valued at \$128,585, in May, 1910. Permits for new buildings to the number of 429 were issued, representing an aggregate value of \$1,424,895, as against 329 permits, valued at \$1,580,615 last year. The total number of permits issued in May was 589, valued at \$1,703,143, as against 453 permits, valued at \$1,709,300 in May, 1910. The value of permits issued since January 1 was \$5,524,936, as against \$4,641,626 for the same period last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Activity prevailed in this industry.

Manufacturing.—Most manufacturing establishments were active.

Railway construction was good.

CONDITION OF PARTICULAR TRADES.

The various skilled trades, as well as unskilled labour, were actively employed.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was well employed during June. There was a marked improvement over the corresponding month of last year. The advent of settled weather and the water on the rivers keeping high, gave steady employment outdoors and in the mills. Factories and mills were working full time with their full complement of hands. Booth's and Eddy's establishments were the principal employers of labour, and they stated that they had more orders in hand than they could possibly attend to with their mills running all the time. This same state of affairs did not exist at the cement works where the production has been reduced considerably since the forming of the merger. A local company has acquired some ground not far from the merger's properties and it is expected this will have the result of reducing the market price of cement, besides giving employment to some of the labourers from the old works, who were discharged at the time of the merger.

It is expected that the Corporation of Hull will spend \$150,000 this year for municipal works, divided as follows: \$42,000 for the construction of two fire stations; \$100,000 for the extension of the waterworks, changing of some pipes, putting additional hydrants and general overhauling of the waterworks service; also \$8,500, to change the water pipe on Brewery Street and Chelsea road. By-laws passed in order to borrow this money on the sale of City bonds were adopted by the City Council and will be submitted to the vote of the tax-payers on July 10. It is likely that the tax-payers will vote in favour of these by-laws.

Building operations were very brisk and no tradespeople were idle.

The Ottawa Improvement Commission has voted \$4,000 towards embellishing the grounds near the City Hall, in view of an extension of the driveway through

Hull, following the banks of the Ottawa River as far as the Gatineau. Now that the principle of voting money for Hull is admitted, it is expected larger sums will be voted next and coming years. Farmers were very busy, negotiations being well advanced and the crops being large.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Conditions in local industrial and business circles were favourable to the employment of labour during June. Civic improvement work was prosecuted as vigorously as in the previous month, between 900 and 1,000 men being engaged. There was a fair demand for farm hands, following the good weather for crops. The Canadian Northern Railway Company started grading and construction work on its new line near Ottawa and contractors placed orders for hundreds of workmen with local hiring agents. The wages offered are \$2.25 per day of ten hours, the employer agreeing to board the men at 50 cents a day. Enough men had not been secured at the end of June. Some other large employers report the supply of men about equal to requirements. The Rescue Mission, which takes care of idle men of scant means, reflects a more prosperous state among this class than at this time last year. Temporary work offered inmates in the Mission keeps the number there employed almost steadily. Statistics compiled at the beginning of the month showed that Ottawa bank clearings for May, 1911, totalled \$18,545,542 compared with \$16,440,843 in May, 1910. The first three weeks of June, 1911, showed a drop of \$1,000,000. The Ottawa Customs receipts for May, 1911, were \$114,200 or \$7,000 more than the previous May. There were 124 building permits issued in May, 1911, as to seventy-eight in May, 1910. There is a smaller proportion of large structures this year. The total value of the 124 permits is \$538,445, while the value of the seventy-

eight was \$651,150. The city engineer's report showed a total of \$230,886 spent on asphalt pavements last year. Eleven miles of concrete walk were laid costing 16.4 cents per square yard, an advance of .3 cents over the previous year on account of increased cost of labour and material. About two-thirds of a mile of plank walk was laid. Following the formation of a union among the employés, the Capital Brewing Company granted an increase of \$1 per week to thirty-four employés and agreed to reduce the hours of labour from sixty to fifty-five per week after December 31. A movement is under way in another local brewery to secure better terms also. The Grand Trunk Railway Company advanced the wages of twenty freight handlers 10 cents a day and upwards. This followed the resignation of some twenty employés who had made a demand for advance in wages. These men named a date for a reply from the Company, and on not being granted their request on that date, they quit work. Three clerks in the city assessment office were advanced in wages from \$40 to \$50 per month on the recommendation of their chief. Five city foremen applied for increases but no action has been taken. The Ottawa Publicity Commission voted \$300 to the Model Homes Association to be used as prize money to further develop the scheme of plans for workingmen's houses. Controller Hastey offered a free site and \$1,000 if the Association will use it to erect a model \$1,000 home. Daylight saving, which was tried successfully in a few of the printing establishments last year was inaugurated again on June 1. Employés work from 7 to 4 instead of 8 to 5.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The month of June was favourable to crops, dairying and early vegetable trade. Meats kept up a stiff price and beef cattle were eagerly sought by jobbers. Eggs were 2 cents a dozen dearer than in May. Hay sold for \$10 and \$12 per ton and potatoes \$1 per bag. Strawberries maintained a good price.

Lumbering.—Sawing was hampered in some of the small mills, owing to the difficulty of getting logs. The 1911 cut of logs was held back on some of the streams, but in most instances the log supply carried over from the previous year is sufficient to keep the mills going. Pulp wood was also delayed at some points.

Railway construction and employment.—The Canadian Northern Railway Company gave out contracts for several ten mile sections of its Ottawa-Toronto line and work is active near Ottawa. The Canadian Pacific Railway Company and Grand Trunk Railway Company which some time ago prohibited the receiving of freight after 5 p.m. have countermanded this order and will receive goods up to 6 p.m. as formerly. The change brought a protest from local merchants and shippers. When freight is received up to six, freight handlers are called upon to work overtime.

CONDITION OF PARTICULAR TRADES.

The building trades were busy. Electrical workers and linemen had an active month. Tool sharpeners are actively engaged. Woodworking and furnishing trades enjoyed a continuance of the steady employment of the previous month. Printing and allied trades and clothing trades were well employed during the month. The ice trade was busy. The absence of some families from the city reduced work slightly in food preparation. The leather trades were active. Barbers, clerks, and delivery employés were steadily employed. Those engaged in transport were actively employed. Unskilled labour for railway work was in demand.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was not any marked change in the condition of the labour market here, as compared with the previous month. Toward the end of the month a resumption of the difficulties between

the masons and stonecutters, as to jurisdiction over certain work occurred, and the difficulty between the mason's helpers and the local contractors remained largely unsettled. As a result, building operations were retarded, or stopped entirely, to the extent of half a million dollars. Although the tourist traffic has only just commenced, and notwithstanding an extremely cool month of June, the various railroad and steamboat companies reported traffic very heavy for the month. The coal schooners running out of Kingston have made good time, and as a result a large supply of coal is being secured. Sometimes three or four vessels arrive at practically the same time, and then it is found very difficult to get enough men to unload. The grain for which let passers were issued at the local office through the St. Lawrence canal en route to Montreal, for the month of May amounted to \$1,778,628 bushels. The amount of coal was 4,587 tons. Collections at the Inland Revenue office for May were: Spirits, \$4,857.87; malt, \$1,287; tobacco and cigars, \$2,065.36; bonded factory (vinegar), \$254.79; methylated spirits, \$26.14; other receipts, \$25. Total, \$8,516.16. The import duties collected at the local Customs House during the month of May, amounted to \$21,754.73, or, about \$5,000 more than during the same period last year. The Canada Gazette contains a notice of letters patent on June 9, incorporating a company, headed by the Hon. William Harty, M.P., to carry on business as manufacturers of locomotives at Kingston, under the name of the "Canadian Locomotive Company, Limited," with a capital stock of \$3,500,000, divided into 3,500 shares of \$100. During the month the annual military camp was carried on with a large attendance of officers and men. There were no further strikes, lockouts, or changes in the rates of wages, or hours of labour reported. During July the early closing of stores will be resumed as last year.

CONDITION OF LOCAL INDUSTRIES.

Farmers, manufacturers, miners, railway employes, lumbermen, fishermen,

and all other industries reported an active month.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet. The metal, engineering, shipbuilding and wood working trades reported an active month. Printers, clothiers, bakers, butchers, ice cutters, cigar makers, tanners and curriers, broom makers, clerks, delivery employes, furriers, hotel, restaurant and theatre employes, as well as all branches of the transportation business, and unskilled labour reported an active month.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was well employed during the month and indications are that it will continue so for some time. All the industries were working full time and some of them were working at night to catch up with orders. The Quaker Oats Company, owing to the building of their new warehouse will begin their heavy running season two months earlier this year than formerly. Extensive additions have been made to the Peterborough creamery, a large and commodious structure for ice storage purpose erected and a new system of cold storage has been installed. Contracts have been let for the erection of the new Protestant Hospital. Building operations will be commenced at once. The Otonabee Power Company has recently acquired about fifty acres of land between dams four and five and will erect a power plant large enough to develop the total flow of the Otonabee; the stated cost of their new work will be upwards of \$200,000. The Union Bank of Canada intends to open a branch in Peterborough.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were somewhat quiet. Crops promise to be abundant and fruits will be very plentiful.

Lumbering.—Lumbermen were very active floating down logs. All the large mills of the district have commenced cutting.

Manufacturing.—Conditions continued active, and all the factories were working steadily.

CONDITION OF PARTICULAR TRADES.

The building trades were very active during the month of June. Some interruption to the work was occasioned by a shortage of brick, but the difficulty was soon overcome. Iron moulders and core makers were active. Machinists and engineers were well employed. Electrical workers and linemen were very active. Metal polishers, buffers, platers and brass workers were busy. The woodworking trades were all actively employed. Printing and allied trades were very active. Journeymen tailors and garment workers were busy. Bakers, confectioners, butchers and meat cutters were active. Leather workers were active. Textile workers were busy, carpet weavers were working overtime. Railroad and street railway workers were active. Teamsters and expressmen were busy. Unskilled labour had plenty of work.

DISTRICT NOTES.

Port Hope.—The Canadian Cannery Company have purchased the Brewery property on Caven street, and will have it renovated and up-to-date machinery installed, and, in addition to canning fruit, will manufacture catsup and pickles.

Whitby.—Two important by-laws were carried; one to have the Seymour Electric Power Company supply power to the town and one to establish a free library.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of June was a busy one in nearly all lines of trade and industry, both skilled and unskilled workers being

well employed. Immigrants continued to arrive, many of them remaining in the city and generally obtaining work. The building trade continued very active. The number of building permits issued during May was 1,258, representing an approximate value of \$2,643,755, as against 956 permits, representing a value of \$1,870,350, for May, 1910. The number of permits issued during the period of five months ending May 31, was 2,691, representing a value of \$9,555,513, as compared with 2,148 permits, representing \$7,518,098, for the corresponding period of last year. The City's Electrical Department has announced its rates for electric lighting and power. The rates for the lighting of residences are from forty to fifty per cent. lower than the rates of the Toronto Electric Light Company and the commercial power rates from thirty to fifty per cent. lower. The street railway receipts for May were \$406,884, of which the city's percentage was \$81,376, as compared with total receipts \$361,254, and civic percentage of \$57,737, for May, 1910. The inspectors sent out by the Medical Health Department to investigate housing conditions have condemned as unsanitary about 400 houses, and notified the owners to put them in proper condition.

The property on the north side of Adelaide Street situated immediately east of the Post Office, having eighty feet frontage has been purchased by Hon. J. H. Phippen and Noel Marshall for \$80,000. A modern office building, ten storeys high, will be erected on the site.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy and help much in demand. The hay crop, some of which has been got in was unusually light and it appeared likely that there would be a considerable shortage. The prospects for the grain crop were generally favourable, but continued dry weather had retarded the growth of root crops and small fruits.

Manufacturing.—Active conditions generally obtained with plenty of orders, the Western demand being stimulated by the prospects of an abundant harvest. The National Iron Works has begun

making shipments by water from its new wharf at the foot of Cherry Street, and is forwarding extensive consignments of iron pipes to the West. The Russell Motor Car Company is making heavy shipments of automobiles, including a car-load for Australia, where their business is greatly increasing. Plans for a floating dry-dock to be constructed by the Polson Iron Works, Limited, are now before the Dominion Government for approval. It will be a steel structure weighing 2,250 tons, capable of accommodating a vessel of 4,500 tons, and the cost is estimated at \$1,250,000. The Fletcher Manufacturing Company have purchased the factory of the Standard Silver Company on Hayter Street for \$52,000. W. R. Brock has purchased the factory of the E. W. Gillett Company, Limited, on King street, East, with a frontage of fifty feet, for about \$200,000, which will be converted into a factory for the manufacture of dry goods.

CONDITION OF PARTICULAR TRADES.

All classes engaged in the building trades have had plenty of work. Moulders, machinists, blacksmiths, boiler makers and sheet metal workers had a good month. Electrical workers were very busy, owing to the demand created by the Hydro-Electric transmission system. On June 12, 150 electrical workers employed by eighteen firms went out on strike for an increase of wages from 35 to 40 cents per hour. A number of the employers conceded the raise asked, the men returning to work. Brass workers, jewellers and silversmiths were active. Furniture workers, cabinet makers, carriage makers and other wood workers had steady employment. Piano workers were fair. Printers, pressmen, bookbinders and lithographers were well employed. Custom tailors were active. Garment workers were fairly well employed. Boot and shoe and hat and cap workers were active. Bakers, confectioners, butchers and brewery workers were steadily employed. Cigar makers had a good month. Harness and leather workers were active. Railway and street railway men, expressmen and teamsters had plenty of work. Sailors and longshoremen were fair.

Hotel and restaurant employes, barbers and laundry workers were busy, especially during the latter part of the month. Unskilled labour was in good demand.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

June was, in every way, a satisfactory month from the industrial point of view. There were no idle working-people and no unsatisfied demand for labour. The outlook is good. A small factory was established for the manufacture of aluminum goods. Machinery was installed in the fire-arms sight factory. General transportation was active and commercial and financial conditions quite satisfactory. City taxpayers will vote on by-laws to raise \$45,000 for a new trunk sewer and \$15,000 for enlargement of the city hall. Tenders were invited for laying 50,000 square feet of concrete walk, and 2,500 feet of curb. Plans were prepared for a skating rink of large size. Extensive improvements will be made to the city post office. A large force of men was employed at the driving park, extending the track and erecting new grand-stands, stables and fences. The first grand circuit race meeting will open on July 10. The strike of Michigan Central trackmen was settled, and that of carpenters at Welland ceased to disturb the industrial situation. The Ontario Power Company laid off a considerable number of men from the construction staff, chiefly unskilled labourers. Contractors on the Niagara boulevard employed large numbers of teamsters, concrete workers and labourers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers were busy. Strawberries, the first fruit crop, yielded well and prices were high. Hay was a fair crop. Wheat promises a medium yield.

Manufacturing—concerns were all busy. Several were running overtime.

Railway traffic on both steam and electric lines, was heavy.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and painters were reported very busy, and lathers, plasterers and plumbers busy. Builders' labourers were quiet. Though a number of small buildings will be completed in a few weeks, several new structures, including a store and office building and a factory extension, have been contracted for, and the outlook for the building trades is fairly good. All the metal-working trades were active. Journeymen tailors were busy, and hat makers and neckwear, suspender and shirt employes were very busy. Fruit canneries, several of which have been enlarged since last season, commenced their busy time and will give a great deal of employment for four or five months. The shredded wheat factory was running to its extreme capacity. Barbers, office employes, salespeople and delivery employes were busy. There was a demand for hotel and restaurant employes. Laundry workers were busy. Steam and electric railways were employing full complements of men of all classes. Passenger traffic was particularly good. The depression in lake navigation had not yet affected business via the Welland canal, and steamboat lines running from Niagara-on-the-Lake and summer resorts on Lake Erie were very busy. Unskilled labour was generally well employed.

DISTRICT NOTES.

Niagara-on-the-Lake.—A by-law was carried granting a franchise to the Frontier Electric Railway to build a line from this place to Niagara Falls. Two militia training camps were held during the month. Summer navigation lines were busy, and summer hotels did a heavy business.

Bridgeburg.—The staff of the foundry is now over 200 men, and still increasing.

Fenwick.—A site was purchased for a large new cannery for fruit and vegetables.

Port Robinson.—A cooperage and woodenware factory is to be started.

Fort Erie and Crystal Beach.—The summer resorts opened with large crowds, and a large number of persons are employed in hotels and places of amusement.

Port Colborne.—Shipping interests reported a very serious depression of business everywhere on the Great Lakes, but Welland canal traffic was very good. Local building operations were more active. A shortage of workmen's dwellings was reported.

Welland.—A \$40,000 contract was let in connection with the new waterworks plant. Further contracts will be awarded soon. A statement was issued by the journeymen carpenters' union that all the men who struck because of the wage dispute in May had secured employment at the new scale of 35 cents per hour.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

June has proved to be one of the busiest months in nearly all lines of industry. Very few men were to be found idle, and all trades were actively employed. The building trades were rushed and unable to handle all the trade required of them. A bonus was paid in some cases over and above the union scale of wages to secure hands. Civic improvement work has begun to be an important item in the employment of labour and will increase as the season advances.

The new steamer *Dalhousie City*, built by the Niagara, St. Catharines & Toronto Railway Company, to ply between Port Dalhousie and Toronto was completed, and makes her first trip on July 1. Business, wholesale and retail, was good. The usual Wednesday half-holiday during June for certain stores and shops prevailed again this year, and will continue during July and August. Those stores and shops which have enjoyed Wednesday half-holidays during July and August other seasons will this year close at 12 m., instead of 1 p.m., as previously.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers were busy, and everything points to another very successful season.

Manufacturing.—The various factories were active, with good prospects of a busy season. The canning factories were in full operation.

CONDITION OF PARTICULAR TRADES.

Building trades were all busy, principally engaged in the erection of dwelling houses, of which there is a scarcity. Metal and engineering trades were fairly active. Woodworking and furnishing trades were busy. The allied printing trades were all busy. Journeymen tailors and boot and shoe workers were busy. Bakers, confectioners, butchers, meat cutters, ice cutters and drivers, cigar makers and tobacco workers were fairly active. Tanners and curriers, leather workers, saddlers and trunk and bag makers were busy. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés and laundry workers were active. Transportation was busy, the volume of trade having increased in all lines. Unskilled labour was well employed for the month.

DISTRICT NOTES.

Port Dalhousie.—The labour market was active, with conditions of employment good. The Maple Leaf Rubber Company was calling for additional help.

Merriton.—All classes of labour were well employed for the month.

Thorold.—All mills and factories were running full time, and labour was well employed.

HAMILTON, ONT., AND DISTRICT.

Mr. William T. Cooper, correspondent reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during the month of June showed an improvement over that of the previous month. Outside civic work progressed

rapidly. The weekly pay-list of the works department is increasing each week. During the week ending June 17 it reached over \$13,000, the greatest in the city's history. Building permits for the month of May showed an increase of more than 165 per cent. over the corresponding month a year ago, and those issued during June will also show a big increase over the same period last year. The expert engaged by the City to report on the cost of a municipal power, light and distribution plant, with hydro-electric power, reported as follows: A street lighting system of modern type, at a cost of \$240,906; a residence lighting system, connecting 1,000 consumers, at a cost of \$67,731; a power system to serve any applicant within city limits, at a cost of \$55,725; and a commercial lighting system, at a cost of \$66,041. Ratepayers will vote on July 25, on a by-law to raise \$502,000 for such a plant, and on one to purchase property on Euclid avenue, adjoining the City Hospital, at a cost of \$20,000. Plans have been prepared for the widening and deepening of the canal at the beach, and it is estimated that the ultimate cost of the work will be in the neighbourhood of three-quarters of a million dollars. The Ontario Bread Company, Limited, has been incorporated and has an authorized capital of \$40,000. The new firm already has two bread factories in the city and is installing the most modern machinery. The Dominion Soap Company, of Hamilton, has been incorporated, with a capital of \$100,000. The Hamilton Land & Building Company has also been incorporated, with a capital of \$200,000. The Standard Cable Company, of Pittsburgh, will erect a half-million dollar plant here, employing 300 men at the outset, and later on expect to have 500 at work. A permit has already been taken out for the first of its buildings, a brick factory, to cost \$100,000. The Taylor Manufacturing Company, of Princeton, Ind., a concern which manufactures clothing store equipment and fixtures, will build a factory here. In the meantime, the premises formerly occupied by the Hamilton Mirror Plate Company have been secured, and operations will be commenced shortly. About

fifty hands will be employed at first, and that number will be increased to 100 when the new factory is erected. The Boston Insulated Wire & Cable Company, to employ from fifty to seventy-five men, and The Mayo-Brown Company, of Spokane, Wash., have also commenced operations here.

Bank clearings for the four weeks ending June 3, 10, 17 and 24, as compared with those of the same weeks last year, were—

1911.	1910.
\$2,170,590	\$1,966,221
2,786,912,	1,793,267
2,552,743	1,859,327
2,154,730	1,916,907

Customs collections for Hamilton during the month of May amounted to \$162,745.84, an increase of \$30,523.27 over the same month last year. Summer trade is now moving well, there being a good demand for both wholesale and retail lines. Some of the local bakers have reduced the price of bread from 6 cents to 5 cents per $1\frac{1}{2}$ lb. loaf. The credit price remains at 6 cents per loaf. Twenty men employed by the City as garbage collectors went on strike on June 7, after having been refused an advance in wages from \$2 to \$2.25 per day. The men returned to work the next day, on the understanding that their request would be considered by the works committee. No action has been taken by the committee as yet on the matter. The members of the local carpenters' unions who went on strike on May 1 have all found employment with other employers at 40 cents per hour, the price demanded from the Master Carpenters' Association.

The Fire, Police and Jail Committee held a special session on June 19 behind closed doors to investigate complaints made by local firemen to the effect that they were required to bale hay, paint stations and do other work in connection with the department which should be done by outside tradesmen. It is expected that in future tenders will be called for when such work as painting is to be done. Principals of the Hamilton Public schools have asked the Board of Education that their salaries be increased, alleging that the salaries paid do not

compare favourably with those paid in other cities.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in this district report that crops have been considerably hampered by the continued dry weather, and that there will be a shortage of straw. Hay is very light in the surrounding country. Fruit-growers reported having gathered only about half the strawberry crop, owing to the lack of rain. Indications are that there will be a bumper crop of raspberries. Tomato, cabbage and bean plants have suffered more than usual this year, owing to grubs and cut worms. Farm help is scarce.

Manufacturing has been carried on during June with the same steadiness that has characterized it during the past few months.

Railway construction.—The Canadian Pacific Railway Company has started work on its line from here to Guelph, and the work is being rushed from both ends in an effort to complete it by the end of the year.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had plenty of work on hand, but were hampered considerably by having to wait for brick and lime. Carpenters, lathers and plasterers, plumbers and gas and steamfitters were well employed. Moulders, machinists, electrical workers, and horseshoers had a fair month. Woodworkers and carriage and wagon makers had a busy month, while pattern makers were fairly busy. Printers and pressmen had steady employment. Journeymen tailors found work rather quiet toward the end of the month. Garment workers were busy, and boot and shoe workers fairly so. Cigar makers found trade rather quiet, a number of them being laid off for a week. Tobacco workers had steady employment. Brewery workers have received an increase in wages and a reduction in hours of work. Barbers reported having had the best month in the history of the trade. Broom makers were fairly busy. Railway employes, steamboat men, street

railway employ  s, teamsters and expressmen report having had a busy month. Unskilled labour found steady employment; the supply being equal to the demand.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

June was a good month for all classes of labour, better than the preceding month and the corresponding month of last year. The building trades were particularly busy. Many dwellings, principally for workingmen, are being erected, and the demand is increasing. Many houses are rented long before they are finished and as a consequence of the demand, rents are going up from \$1 to \$2 a month.

The iron and fabric trades were also very busy, many employ  s in the latter working overtime. The Massey-Harris Company, Limited, has commenced the erection of another large warehouse.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners were very busy. The hay crop was light. Strawberries were plentiful, but cherries will be scarce, owing to late frosts affecting the blossoms.

Manufacturing.—Manufacturers generally were very busy, and overtime would be worked in some cases if it were possible.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators and paper hangers, plumbers, gas and steamfitters were very busy. Iron and brass moulders, coremakers, machinists and engineers, electrical workers, linemen, metal polishers, buffers and platers, stove mounters, blacksmiths, boilermakers and sheet metal workers were very busy. Horseshoers were busy. Woodworkers, carriage and wagon makers, pattern makers and coopers were very busy. The printing and allied trades were active. Tailors and tailoresses were busy, as also

were shoe workers. Bakers and confectioners were very busy. Cigar makers and tobacco workers were fairly active. Leather workers and saddlers were busy. Barbers, clerks, delivery employ  s, hotel and restaurant employ  s were steadily employed. Laundry workers were busy. Railway trackmen were active, freight-handlers being exceptionally busy. Street railway employ  s were steadily employed. Teamsters and draymen were very busy. Unskilled labour was in demand.

DISTRICT NOTES.

Paris.—The factories and mills were very busy. Labour generally was well employed.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during the past month has been very active, both for skilled and unskilled labour, and especially so for those engaged in the building trades. The contract for the new isolation hospital has been let, at a cost of \$17,500, also the contracts for the new jail and jailer's residence, at a cost of \$27,277; the work in each case to be completed as soon as possible. Manufacturing concerns were all running full time, with orders coming in satisfactorily. Wholesale and retail merchants reported trade rather quiet. Customs returns for the month totalled \$16,997.54, an increase of \$1,016.29 over the corresponding month of last year. The June excursions to the Ontario Agricultural College were not so well patronized as during former years, owing to the increase in railway rates. Retail clerks have been granted their usual Thursday half-holiday during July and August. The directors of the Guelph Radial Railway Company have voluntarily granted an increase of one cent per hour to their employ  s. The minimum wage according to the new scale is 16 cents per hour, and the maximum, 19 cents. With this exception there have been no changes in rates of wages or hours

of labour. The new Canadian Pacific Railway passenger station has been completed and opened for traffic, and a gang of men are at work increasing the freight yards, by putting in new sidings. The Grand Trunk Railway Company has also a large staff of men at work building retaining walls for the raising of their tracks, and putting in traffic subways.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters and plumbers were active and in good demand; in fact there was no need for any idle men in the building trades, the demand being greater than the supply. Iron moulders reported a fair month. Tube-mill workers were very busy. Electrical linemen were also very busy. Machinists, metal polishers and stove mounters reported a fair month. Blacksmiths and horseshoers were well employed. Woodworkers in sash and door factories were very active. Piano and organ workers and sewing machine makers reported a good month. Carriage makers were very active. Printing and allied trades had no idle men. Journeymen tailors had a fair month, but garment workers were very busy. Bakers, confectioners, hotel and restaurant employes and teamsters. Unskilled labour was active with the demand in excess of the supply.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

All classes of labour were fully employed, and there was a demand for unskilled labour, also for experienced carpenters for outside work. The activity of the labour market will exceed that of the previous month and compare favourably with that of the corresponding month of last year. Good progress was made on the new buildings under construction, especially those of the Kaufman Rubber Company, the Lang Tanning Company, the L. McBrine Com-

pany, Western Shoe Company, Walker-Bin Company, and the Plate Glass Company. The addition to the Berlin Interior Hardwood Company was completed toward the close of the month. There were nineteen building permits issued during the month, valued at \$28,510, one being for a broom factory of one storey high for Jacob Schiebel. Transportation, shipments and bank clearings were also favourable. Business, wholesale and retail, reported healthy conditions. There were no changes in rates of wages or hours of labour, though the keen demand for help caused some unrest, many changing their places of employment during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were engaged in their usual marketing. They reported that the hay crop would be light but that fall wheat was looking good, as was spring grain. The prospects of the apple crop were not very favourable, nor of cherries, plums and pears. Strawberries were a light crop, owing to the dry weather.

Lumbering.—Owing to the advance in the price of lumber, there was very little shipped.

Manufacturing.—All manufacturing establishments were very busy.

Railway construction and employment.—Construction work on the People's Railway was at a standstill.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades had a very busy month and active conditions prevailed among the metal, engineering, woodworking and furnishing trades. Printers, pressmen and bookbinders were busy. Tailors, garment workers, hat makers, glove makers, and boot and shoe workers had a busy month. Those employed in food preparation were busy and ice cutters and drivers, cigar makers and tobacco workers were active. Tanners, leather workers, saddlers and trunk and bag makers were unusually busy. Barbers, broom makers, clerks, stenographers, hotel and

restaurant employés, laundry workers and suspender makers were active. Railway employés, freight handlers, street railway employés, cab drivers, draymen, teamsters and all engaged in transportation were active. Unskilled labour was fully employed, the demand exceeding the supply.

WOODSTOCK, ONT., AND DISTRICT.

Mr. John Markey, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was very little change in industrial or business conditions since last month. Business generally was very good and fully up to the standard of a year ago; several industrial concerns reported marked improvement. Most of the factories were busy, and the outlook was reported to be most encouraging. There was a more or less constant demand for skilled labour, both in wood-working and in iron working establishments, but the scarcity of such labour has not yet become an urgent problem. Of unskilled labour there seemed to be plenty. There was a good deal of complaint of the scarcity of female labour. Both the local biscuit factory and the knitting factory are frequently in need of girls. There is also a demand for boys to learn trades. Most of the farmers were busy with their root crops, hoeing and cultivating. Haying has already begun here and there, and will soon become general. Most of the farmers were fairly well supplied with help, but there was a scarcity in some quarters. The west and the local factories have lately taken away so many men that at least some of the farmers in this district find themselves short-handed with the approach of harvest. The building season opened late, but the record promises to be very good. There were a few new factories and several private residences of a good class erected. The total is likely to be considerably in excess of last year. There was plenty of work for all who offered themselves in the building trades, but there was no very serious complaint of scarcity of men. There

is promise of a new automobile factory here. It is said that the necessary local capital has been subscribed and that the factory is practically a certainty.

CONDITION OF PARTICULAR TRADES.

There promises to be more than usual activity this year in the building trades. Bricklayers, masons, carpenters and joiners, lathers and plasterers, painters and decorators were all busy and with prospects of a busy and steady season. Plumbers, stone cutters and builders' labourers were steadily employed. Iron moulders, iron workers and machinists generally were busy. There was a demand for skilled mechanics, including machinists and men skilled in iron working. Blacksmiths were steadily employed. Bicycle workers were busy. Woodworkers were all busy, including upholsterers, varnishers, carvers, carriage and wagon makers, painters and finishers. There was a demand at one of the wagon factories for painters and stripers, and for a few additional finishers at the piano factories. Printers and pressmen were busy. Tailors and garment makers were busy and steadily employed. The clothing trade is undergoing a change here. One of the largest clothing houses in the city is trying the experiment of having all its ordered clothing made out of the city, orders and measurements being taken here and sent elsewhere. Bakers, butchers, confectioners and cigar makers were steadily employed. Tanners and leather workers are steadily employed. Barbers, clerks and delivery employés were busy. All the available unskilled labour was employed.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During June all classes of labour were busy and fully employed. There was a demand for skilled and unskilled labour, and good progress was made in new buildings under construction. Building per-

mits for the month of May totalled \$20,514. Work on the dredging of the river goes steadily on, the staff of workers having been increased in order to get the work finished during the summer. Reports from the various factories were that business was very good. Wholesale and retail merchants reported trade excellent. The customs returns for the port of Stratford for the month of May were \$16,399.01, an increase of \$2,439.20 over the same month of 1910. No changes in rates of wages or hours of labour and no trouble in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were very busy with the usual work for this time of the season. Some market prices were as follows:—

Eggs, 18 cents per dozen.
Butter, 18 to 20 cents per pound.
Chickens, 50 to 75 cents, each.
Potatoes, 75 cents per bag.
Hay, \$8 to \$10 per ton.
Wheat, 80 cents per bushel.
Oats, 35 cents per bushel.
Barley, 45 cents per bushel.
Peas, 65 cents per bushel.

Manufacturing.—All manufacturing establishments were actively employed.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers, painters, paper hangers, plumbers, gas fitters, stone cutters, builders' labourers and all engaged in the building trades were busy. Iron moulders, workers and helpers were active. Machinists, steam engineers, electrical workers and linemen were busy. Blacksmiths and boilermakers were active. Jewellers did a good trade. Woodworkers, upholsterers, varnishers and polishers were active. Carriage and wagon makers and coopers were busy. Printers were fairly well employed. Journeymen tailors and garment workers were active. Factory workers were busy. Bakers, confectioners and butchers had a very good trade. Ice dealers were busy. Cigar makers were active. Leather workers and harness makers were busy. Barbers, clerks, delivery employes, hotel

and laundry workers were very busy. Railway conductors, engineers, firemen and trainmen were active; freight handlers were busy and cab drivers, draymen and teamsters were well employed. Unskilled labour was active.

DISTRICT NOTES.

St. Mary's.—The Town Council has let the contract for the building of a bridge of reinforced concrete and cement over Trout Creek, and the building of seventeen miles of new cement walks, which will mean an expenditure of \$15,400, and the employment of a large number of men.

LONDON, ONT., AND DISTRICT.

Mr. A. Wootton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market was very similar to the preceding month, and in almost all lines considerable activity was displayed. A considerable amount of work is being done on the down town streets, in the way of asphalt paving, &c. In the different factories business was brisk, and a great demand was felt for female help, one firm offering the initial wage of \$6 to girls over twenty, and \$5 to those over sixteen, and in addition a percentage of earnings. The May building permits exceeded all previous records and amounted to nearly \$200,000. The City has decided to lay nearly a mile more of asphalt roads, and also a couple of miles of large mains for waterworks purposes. The Canadian Pacific Railway Company's roundhouse is being pushed along rapidly, and over 200 men are employed about the new works. The County Council are to expend \$64,000 for new bridges.

Two labour troubles commenced in this city during the month. On June 5, about sixty iron moulders went on strike, because of the refusal of their employers to accede to their demand of a reduction of hours from ten to nine per day. No settlement has yet taken

place. The men refused an increase in pay, they desiring the shorter work day. On June 6 a construction gang employed by the street railway company laying brick between tracks, &c., quit work because their demand for an increase from 16 to 18 cents per hour was refused. On the following morning the Company took some back at the increased rate and secured some new men to fill the places of those on strike. Work continued as usual.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crop outlook for this district is of the best, and a good crop of fruit is expected. A demand for experienced farm help is felt, and farmers are using every endeavour to get them.

Railway construction and employment.—The Canadian Pacific Railway Company is going along steadily with the improvements in the London yards, and have also work trains out, ballasting their line from here to Windsor.

CONDITION OF PARTICULAR TRADES.

Although a large number of permits were taken out, considerable of the large work is being done with cement, and only residences with brick; for this reason, bricklayers were not rushed with work. Carpenters were busy. Lathers and plasterers found trade only fair. Paper hangers were busy, as were also stone cutters and builders' labourers. The strike of the iron moulders affected conditions somewhat, but business generally was brisk. Iron workers were busy. Electrical workers and linemen were exceptionally busy keeping up with the demand for hydro power. Metal polishers were busy. Carriage and wagon workers were busy. Car builders reported a considerable number of men leaving, and others taking their places at the Grand Trunk Railway Company's shops. Coopers were busy. Printers and pressmen reported trade fair. Tailors, boot and shoe workers were very busy. Garment workers were busy. Bakers and confectioners were busy, and re-

ported not enough female help. Cigar makers reported trade fair, although one large shop shut down for about ten days, having too much stock on hand. Tanners and curriers were very busy. Railway train crews reported a very good month, with a lot of freight moving. Street railway employes were busy and put in a lot of overtime. Teamsters were busy. Unskilled labour was fairly well employed. The influx of immigrants from the British Isles fully supplied any demand for this class.

DISTRICT NOTES.

Goderich.—English capitalists visited this locality, having in view the establishing of a mammoth salt works by the Hodgkinson process. The Kensington Furniture Company which was partly destroyed by fire lately is being rebuilt.

St. Mary's.—A \$500,000 cement works is to be established in this town; one hundred acres of land have been acquired for this purpose, and the town is guaranteeing the bonds of the Company to the amount of \$40,000.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market was quieter during the month of June than it had been for the past three months. In the building trades work progressed favourably, but there appeared to be a surplus of unskilled labour.

On the Wabash and Pere Marquette railways traffic was active, and men employed in the traffic departments were kept busy. Further reduction was made in the working staff of the Michigan Central railway, notwithstanding that business compared favourably with the corresponding month of last year. General retrenchment appears to be in order on the Michigan Central, but it is generally believed that the lay-off of employes will be of short duration. Street rail-

way business was considerably better than usual. Normal conditions prevailed in local industries.

Agriculture.—Farmers in this district reported the crops as looking well. Rain was needed, and with a supply the prospects are good for a splendid harvest. Small fruits were showing up well. Apples were scarce.

CONDITION OF LOCAL INDUSTRIES.

Normal conditions prevailed in the local industries; the men being well employed for a summer month.

During the month the bricklayers were given a two cent an hour increase in their wages. Thirty men were affected by the change.

CONDITION OF PARTICULAR TRADES.

Mechanics in the building trades have been kept well employed during June. Iron moulders, machinists and boiler-makers were well employed in the local railway shops. Journeymen tailors reported a fair month. Bakers, confectioners and cigarmakers were busy. Regular men employed on the railways reported a fair month's time. Spare men were not well employed, and reductions were made in the ranks. Unskilled labour was not in demand during the month. There appeared to be a surplus in the supply.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

General activity prevailed in all branches of the labour department during the whole of June, noticeably in the different branches of the building trades; an addition to the Manson Campbell Fanning Mill Company, \$5,300; International Harvester Company \$12,000 and \$60,000; J. D. O'Keefe, abattoir, \$33,000; American Pad and Textile Company, \$45,000; Westman Bros., \$5,000; Western Bridge and Equipment Company \$15,000. The Board of Education has accepted plans

for a new school building, estimated cost \$25,000, which, along with a large number of other private residences under way makes prospects good for a busy season. Factories in all branches are working to their full capacity. A scarcity of labourers has been a hindrance to a number of the large contractors, who were unable to secure the number of men required. No strikes were reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have completed the cutting of hay which will be very light throughout the district. Wheat, corn and spring crops will be above the average. Many farmers report a scarcity of harvest hands.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters and joiners report an excellent month. Lathers and plasterers were active. Painters and paper hangers were very busy with plumbers active and builders' labourers very busy. All branches of the iron trade reported activity in all departments. Sash and door makers and carriage workers were very busy. Printers and allied tradesmen were fairly busy. Journeymen tailors were slack. Carters, teamsters and draymen were in demand. Unskilled labour was not equal to the demand.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was no change in the labour market from the preceding month. Conditions, generally, were busy and, on account of the difficulty of obtaining men, manufacturers were working overtime. The building contractors were rushed with work. A total of thirty-six permits was taken out in the city during the month of May, the total valuation being \$69,790, as compared with seventeen permits issued in May, 1910, at a cost

of \$21,580. The D. M. Ferry Seed Company of Detroit, Michigan, are asking for tenders for a large building to cost between \$35,000 and \$40,000, which is to be completed by the end of the year. The wholesale and retail merchants reported trade active.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the dry weather crops were not so well advanced as was expected. Hay was only about half a crop. Corn was doing fairly well. Fruit showed a fairly good crop.

Manufacturing.—Retail lumber dealers and manufacturers were very busy.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy and carpenters and joiners were in demand. Lathers, plasterers and painters were very active. Plumbers and steam fitters were very busy. The metal and engineering trades were busy and no trouble was experienced in finding employment. Woodworkers upholsterers and carriage and wagon makers were well employed. Printers and pressmen were busy. Journeymen tailors reported trade good. Garment workers were always in demand. Owing to the warm weather the bakers and confectioners were very busy. Leather workers were well employed. Clerks, delivery employes and hotel and laundry workers were busy. Transportation employes were all fully employed. Freight handlers were in demand. Unskilled labour was well employed.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The demand for labour in all lines was brisk. Sidewalk and sewer construction have caused a big demand for unskilled labour. The building trades were very busy. Other skilled trades fully occupied. *Agricultural* conditions were good. Fishing and mining were normal with *manufacturing* brisk.

The town of Steelton has let a contract for a sewer outlet at a cost of \$14,500. This, with other sewer and sidewalk work has caused a brisk demand for unskilled labour. The Algoma Central Railway is advertising for tenders for the extension of its line from the Canadian Pacific Railway Company's main line to the National Transcontinental Railway, a distance of over 100 miles. The town is experiencing the best year of its history.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was very little change in labour conditions in this district since the previous month. Work was quiet and nothing advancing very rapidly. Many workers have left the cities, for the west, principally, and the labour market was consequently relieved from a great surplus, although the demand for men was not sufficient to keep all the workers fully occupied. Compared with the same month last year there was a great difference in the amount of work going on, in favour of last year. No new industries were started, but the Western Dry Docks celebrated its first launching of a large steel steamer on Tuesday, June 27. This is the first vessel built and launched at the docks; some three hundred men are engaged at the works. There was no exceptional activity in any particular trade. Commercial activity, as evidenced by extent of transportation, shipments, etc., has been normal for this time of the year, as also have the wholesale and retail trades. There have been no changes in rates of wages or hours of labour except in regard to the coal handlers, whose dispute was settled under the Industrial Disputes Act. The board on the Electrical Workers, meeting under the same Act, came to a decision the last week in June, and the City of Port Arthur signed the agreement on June 29, and the City of Fort William on June 30, together with the

men. By this agreement the electricians of Fort William will be brought up to the level of those of Port Arthur; the men of Port Arthur are as they were, but the rates are uniform in the two cities, which is a great advantage for the utilities and workmen of both cities.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Many residents who have farms in the vicinity are away, and this year, owing to the rainy season, the hay crop promises to be exceedingly good. This will be welcome to homesteaders for the reason that there has been no hay crop for the last two years.

CONDITION OF PARTICULAR TRADES.

All building operations were quiet. Docks and other works are projected but have not yet been started, consequently all building trade operatives are going slowly. All other trades and all lines of business were quiet.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows: —

GENERAL CONDITION OF LABOUR.

Conditions have not materially changed during June. Complaints of inability to get employment are not to be found, and so far there has been no pronounced difficulty on the part of the employers in getting the help they require. Crop conditions are, however, being kept in view. Good weather continues and the prospects of an exceptionally heavy crop—greater than the West has yet had—are materially enhanced since last month. If favourable conditions during July continue the labour situation will be one of the very gravest character. Last year's crop was moved with difficulty, although it was a light one. This year, however, it will be approximately twice as great as that of the previous year. A good crop necessitates more labour in every field of activity. Railroads require more men to get their tracks in condition to carry heavier traffic, indus-

tries are stimulated and railroad construction likewise. All these simultaneously make demands upon the labour market with the result that a serious situation will be created.

Wholesalers, although the crops are so very promising, are somewhat disappointed with the volume of business. Bank clearings for the first weeks of June, however, show a very satisfactory increase. The total for May at Winnipeg was \$99,142,864 as compared with \$70,380,883 for May, 1910.

It is estimated by the bankers in Winnipeg that the clearings for the first half of the present year at Winnipeg will be approximately twenty-four per cent. above those for the corresponding period of a year ago. There has been some unrest between the builders and the bricklayers and stone masons' union. It appears that the result of the last agreement between the Builders' Exchange and the union in question was that on the first of January of the present year the rate per hour should be raised from 62½ to 67½ cents. This advance was not granted. Amongst the men the reason for this breach of the agreement, generally accepted, is that the employers refused the advance because of the action of the Bricklayers' Union in fining certain men for having attempted to form another union at the time a strike was called on the Lyall contract in Winnipeg. The men have had several meetings recently and as a result it is reported a strike is imminent. It is learned, however, that there is some difference of opinion among the men themselves as to the advisability of a strike at the present time.

Employés of hotels and restaurants have held meetings recently with a view to formally organising a union. This decision has been arrived at, but as yet no officers have been elected. It is stated that most of this class of employés work from ten to fourteen hours a day and seven days a week.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—At present those who have given the question of procuring

labourers to assist in harvesting the crop in August and September estimate that at least 40,000 men will be required. It is felt that already a heavy crop is assured and that if the present favourable weather conditions continue it will be phenomenally large and much larger than it has hitherto been. Estimates of the wheat yield alone are in the neighbourhood of 200,000,000 as compared with an actual yield last year of 115,000,000 bushels. Procuring enough labour is the question uppermost in the minds of the larger class of farmers and those interested in the handling of the crop.

In the immediate locality of Winnipeg the season has been excellent for the market gardeners and already the early garden produce is being marketed.

Building.—The permits for May totalled \$2,229,480, as compared with \$2,104,450 for May, 1910. Approximately, permits to the extent of \$1,000,000 are being held up because of some conflict between the authorities and prospective builders of apartment houses respecting the interpretation of the new building by-law in regard to this class of structure.

During the early part of June a large number of new buildings were permitted and it is expected that the volume of building will be greater during the ensuing months than during those in the earlier part of spring.

Engineering trades.—Although many of the shops are busy the volume of work is not so large as anticipated and one or two of the larger concerns are not employing so many men as they did a year ago.

Railway construction and employment.—Although the amount of work being done during the present year is much greater than last year, or in any previous year, the supply of men has been fairly well up to the demand. The reason for this is said to be that so many experienced men from the United States are available because of dullness in railroad construction in that country.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR

The supply of labour for all purposes seemed fully equal to the demand during the past month. There has, however, been no considerable unemployment, the supply and demand seeming nearly to equal one another. Many of the new buildings are showing good progress. The concrete work of the Canadian Northern Railway Company's hotel has reached the sixth storey. The hospital for the insane is almost one storey high. Good progress has also been made on the new fire hall, and on the International Harvester Company's new building. The Canadian Pacific Railway is advertising for tenders for a new passenger station for Brandon. The Railway Commission has decided that the transfer railway shall be located on Twenty-fifth street, and the construction has already been started. By a vote of the ratepayers, the City Council was authorized to purchase steel rails costing \$25,000, to be placed on the streets that are being paved this summer. It has not been finally decided whether the City should have a municipal owned street railway or whether a franchise should be given. At present an English syndicate is endeavouring to secure a thirty years' franchise. The labour market was quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops showed a better condition than in any previous year. The rainfall has been abundant, and with warm weather the conditions have been ideal.

Manufacturing.—All manufacturing firms reported business good and working full time.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and carpenters were busy. Lathers and plasterers were

active. Painters, plumbers, stone cutters, builders' labourers, iron moulders, machinists and electrical workers were busy. The printing and allied trades were busy. Bakers were active. Cigarmakers, railway employes and unskilled labour were busy.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeill, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Throughout the past month all branches of labour have been well employed, there being little or no change over the preceding month, but conditions were more favourable than in the corresponding period of last year. Though the city is full of activity, still the supply is equal to all demands. Work on the street railway continues to go ahead with much rapidity, one outstanding feature being that traffic is suffering but very little in consequence. Ample labour has at all times been available throughout. Both wholesale and retail trade was reported very satisfactory. The contract for the new Union Station has been let and the excavation started; when completed it will be 60 feet deep, 316 feet long and three stories high, and it is considered will be the best of its kind west of Winnipeg.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crop prospects for this year throughout the Province were very bright, and farmers at this early stage of the growing season were prognosticating a thirty-bushel crop. For some time past, ideal weather conditions have prevailed, and this favourable state of affairs is accountable for the grain being twenty-five to thirty inches in height. One of the surest indications of the healthy condition of the wheat, is the tremendous business being done by the hail insurance men.

CONDITION OF PARTICULAR TRADES.

The bricklayers and masons have been fairly active during the month, though

at times, owing to shortage of material, several jobs came near a standstill. Carpenters and joiners, lathers and plasterers were active. The demand for painters and paper hangers was not so great in the latter as in the former part of the month; nevertheless, a busy time was experienced throughout the month. Plumbers were active, stone cutters were fair, while builders' labourers were active and in fair demand. Machinists and steam engineers were active, also electrical workers and bicycle workers. All branches of the printing trade reported an active month, also journeymen tailors and garment workers. Bakers and confectioners were busy. Barbers were well employed and in slight demand. Clerks, stenographers and delivery employes reported a good month. Hotel and restaurant employes were very active. Laundry workers were well employed. Freight handlers were very busy, the increased traffic rendering it necessary to add to the present staff. Cabdrivers, hackmen, draymen and teamsters had an active month. Unskilled labour found employment easy to secure, but at no time was the demand greater than the supply.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There has been considerable activity prevailing in most trades during the past month. Owing to a great influx of workmen there is still a surplus on the market among many trades. There are a great many bricklayers, masons and stonecutters idle at present. Excavations and foundations for many large blocks are being rapidly proceeded with and shortly it is expected that many of the unemployed tradesmen will be at work. The value of the 314 building permits was \$1,826,220, as against \$573,486 for June, 1910. Bank clearings for June were \$16,834,994, whilst for June last year they stood at \$13,055,062.

There were 457 persons who took up homesteads during the month, while

248 pre-emptions were filed. It has been definitely decided by the Gordon Wire and Nail Works, of West St. John, N.B., to erect a factory in this city.

Wholesalers and retailers report trade brisk and considerably better than during June, 1910. On June 1, the bricklayers and masons, who had given notice of an increase of wages from 62½ cents to 70 cents per hour and negotiations proving futile, came out on strike. The Builders' Exchange refused to offer above 66¼ cents per hour. The Union succeeding in getting the whole of the employers (excepting two) to sign an agreement for two years to pay 67½ cents per hour; they therefore declared strike closed on June 12, ignoring the Builders' Exchange. The electricians were on strike for eight days and resumed work upon an agreement of 50-cent per hour minimum. Their former wages ranged from 35 to 50 cents per hour. There was a strike of all workmen on the New King George Hotel, owing to non-union electricians being employed; also the discharge of the carpenter foreman. They again resumed work on June 23, on condition that it be strictly a union job and the same conditions observed. The foreman was not reinstated. The following day the plumbers and steamfitters were notified by the foreman their wages would be reduced from 60 cents to 57½ cents per hour, so they refused to start and after further negotiations with the proprietor they returned to work on June 27 at their former rate of 60 cents per hour.

The metal workers failing to effect an amicable settlement for an increase of wages from 42½ cents to 50 cents per hour, came out on strike on June 23 and are still out. A meeting of the Calgary cooks took place on June 21 for the purpose of clearing out the yellow labour in the hotels. Several hotels and restaurants have already engaged white cooks, and others promise to follow after the Fair. On June 29, the stonecutters of this city and Glenboro quit working stone for the new fire hall, on account of such work being sub-let. Also on the same date the carpenters

on the new Costello block quit, refusing to work with a coloured man on the job.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and stonecutters had a fair month. Carpenters and joiners were active. Lathers and plasterers were well employed. Painters and plumbers were busy. Engineering trades were well employed. Metal workers were busy till strike occurred. Electricians and linemen were busy. The printing and allied trades were active. Journeymen tailors and garment workers were active. Bakers, butchers and meat cutters were well employed. Cigar makers were active. Miscellaneous trades were busy. Leather trades were quiet. Builders' labourers were busy. There is a surplus of unskilled labour.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

An increased demand for unskilled labour improved the condition of the labour market over the previous month, and a comparison with the same month last year also showed an improvement. Building operations were delayed by shortage of cement, but the situation was relieved, and there was again great activity in the building trades. At present it is practically impossible to obtain either any kind of business premises for rent, or residences. A very large number of houses are being built, and many heavy business blocks and warehouses are under construction or in immediate sight. The natural result of so much building and the acute demand for buildings, has been to promote a very healthy demand at increasing values for all reasonably well situated business or residential property. The returns for the month of May and the corresponding month last year are as follows:—

May, 1910 May, 1911 Increase

Customs returns.....	\$ 26,180	\$ 61,710	135½%
Building permits.....	231,055	504,425	118 %
Bank clearings.....	5,368,879	9,247,284	72 %
Post office (stamps only)...	6,011	8,750	45½%

Street Railway—

Passengers carried.....	292,714	488,320	66½%
Revenue.....	\$ 12,896	\$ 20,422	58 %
Homestead entries.....	584	794	36 %

Work was progressing favourably on the Canadian Pacific Railway high level bridge, and the city let the contract for a bridge over the Saskatchewan in the east end. The special committees of Edmonton and Strathcona, which were appointed to discuss the terms upon which the amalgamation of the two cities will take place, have come to a final settlement as to the issues involved, and an agreement embodying the terms will be prepared and submitted to the ratepayers for their adoption. Wholesale and retail trade was very good. All classes of labour were well employed, supply and demand being well balanced with the exception of a small surplus of unskilled labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crop statistics, as completed by the provincial department of Agriculture indicate that the areas sown to wheat and oats alone are greater this year than the total of the acreage from which crops were harvested in 1910; not only is the actual acreage increase phenomenal, but the conditions of the crops are such that a yield exceeding by a very wide margin the yield per acre in 1910 may be expected.

Railway construction and employment.

—The greatest activity prevailed in railway construction in Northern Alberta. A large number of labourers who were unemployed during the month of May have secured employment which will last until frost sets in. According to contractors' reports steel will be laid on the Edmonton to Athabasca Landing line by August 1.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of June has been a far better month than May for labour. With the exception of some classes in the building trades and miners, it has been the month of the year. The supply has been equal to the demand, but all classes have been fairly well employed, although not so well as last year. Work on the overhead bridge has started and is being pushed ahead. This is being erected jointly by the Canadian Pacific Railway Company and the city. The laying of additional cement sidewalks has been commenced by the contractors. An addition is being built to the Taylor Milling Company's building; this is to provide space for the separate grinding of feed. There are two dust collectors to be installed in the mill. The estimate for these additions is \$5,000. Both the two milling plants in Lethbridge were working double time. The brickmaking industry was busy. An order for one million bricks has been received from Calgary. Both the coal companies at Diamond City and Chinook are making brick, the latter for their own use, the former for shipment to Calgary. Bank clearings for the week ending June 21 were \$681,349.34, as compared with the week before, which amounted to \$558,296.37, an increase of \$73,052.97. There was no unusual unrest in labour circles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Up to the present this has been the most remarkable season for crops. There has been some complaint of cut worms destroying the crop and in some instances periods of heat and drought had a bad effect on winter wheat, but there was also an abundance of rain and prospects for a good crop are excellent.

Mining.—There are only two small coal mines in operation at present. There are some new companies boring for coal west of the city of Lethbridge. The work of extending the underground workings at the Lethbridge collieries is proceeding.

CONDITION OF PARTICULAR TRADES.

Employment for bricklayers and masons was very poor, though a little better than during the month of May. There was more work for carpenters during June than in May. Complaints were heard that strangers were obtaining most of the work at lower wages. Lathers and plasterers had a poor month. Painters were fairly well employed. Plumbers were rather dull, as were gas and steamfitters and stone cutters. Builders' labourers reported rather better conditions than last month. Comparing the season with last year work in Lethbridge was not up to the average. Printers and pressmen were busy. Bakers, butchers, icemen, hotel and restaurant employés, draymen and teamsters were busy. Unskilled labour was very well employed.

DISTRICT NOTES.

Pincher Creek, Alta.—Fall wheat from 18 to 24 inches high, it is well stooled, and the condition is A1. Spring wheat 8 to 10 inches high, and in good shape. Hay crop was never better. No damage from any source whatever. Ideal growing conditions, namely, hot showery weather. Stock rolling fat as pastures are very heavy.

Macleod, Alta.—Grain crops in this district in good condition, but slow in development on account of lack of rain. Tuesday night heavy thunder showers passed over, which will be of considerable value, normal amount of moisture not yet fallen, however. Fall wheat was never better, spring wheat and oats in good shape, but at a standstill. Some damage by cutworms has led to a number of fields being plowed up, and re-seeded. Slight damage reported by hail.

Cardston, Alta.—Winter wheat racing along and is 2 feet high with a good prospect. Spring grain all doing well, but not so advanced in proportion. Acreage not reduced by rain, but some sown later, namely, barley, and oats. Rain sufficient but not too much, show-

ers now travelling about. Prospects all around excellent. Grass cattle getting into fine shape. No damage to crops so far, except a little from cut worm, will want some more rain later for spring grain.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market throughout the Kootenay district during the month of June was quiet, because of the continuation of the coal miners' strike in East Kootenay and Alberta, though apart from this the conditions throughout the quartz mining portion of the district were fairly good. The building permits issued last month showed an increase over those for May, 1910, of about 240 per cent. The total permits issued aggregated in value \$16,945, compared with \$6,965 for the same month last year. The customs receipts at the Port of Nelson for last month showed a large increase over those of May, 1910. The Customs collections for the month were \$13,225.63, compared with \$6,938.14 for the same period last year, the increase being over eighty-one per cent. Several rich strikes of free-gold ore have been reported recently in the Ymir and Sheep Creek districts. The Slocan country generally is looking more prosperous than it has for years and it seems evident that a survival of the mining industry in that famous silver-lead camp is just beginning. Mr. T. M. McFarlane, a recent arrival from Mexico, proposes to grow orchids near Nelson where he has purchased land, and has 3,000 plants en route from Mexico. This will be a new industry for the Kootenay.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The prospects for the strawberry crop seem favourable and the fruit growers' union has leased the McDonald warehouse. The Canadian Pacific Railway Company is placing

the barge service on Kootenay Lake to accommodate the small fruit growers.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of June has seen the activity of the early spring continuing with unabated vigour. Although the completion of a number of grading contracts is announced, a further number of contracts have been let, and on every hand there are indications of undiminished activity. The strike at present on in Vancouver is having little or no visible effect upon the labour situation here. There are few idle men in town, work seems plentiful and wages good.

Throughout the district there are many indications of a busy summer and fall. At many points careful and systematic road work is being carried on, which will, when finished, leave the district thoroughfares in excellent shape for farm and auto traffic.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—With the appearance of fine weather all vegetation is growing rapidly. Indications are good for a bumper hay crop, while all the cereals give excellent promise. A good average fruit yield is expected throughout the district.

Fishing.—The salmon fishing industry, although showing some slight improvement, is not as good as has been looked for. Cod, halibut and sturgeon are rather plentiful and the supply is equal to the demand.

Lumbering.—All the mills are running full time, and while stocks are slightly heavier than at this time a year ago, the demand looked for will, if it materializes, more than absorb the product. British Columbia lumbermen are looking for a brisk season and the local mills are expecting to do their full share of business. An order-in-council has been received from Ottawa, giving the necessary permission to proceed with the

work of damming the Nicomeke and Serpentine Rivers. This scheme will protect 22 square miles, or about 14,000 acres, of the best agricultural land in the Province from the destructive floods, which have in past years visited it as a result of the tide backing up the waters of these rivers and inundating the surrounding country.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

On June 5, a general strike commenced in the building trades, which have been practically at a standstill ever since. The bricklayers, however, did not join the strikers, and a number of non-union men were employed at construction work. There are now about 4,000 men on strike belonging to the following unions:

Amalgamated Carpenters, six branches.
 Brotherhood of Carpenters, Locals No. 617, No. 1435;
 North Vancouver; No. 1208, South Vancouver.
 Structural Iron Workers, No. 97.
 Architectural Iron Workers and Housesmiths, No. 116.
 Cement Workers, No. 140.
 Steam Engineers, No. 397.
 Electricians, No. 621.
 Elevator Constructors, No. 26.
 Wood, Wire and Metal Lathers, No. 207.
 Hod Carriers and Builders' Labourers, No. 23.
 Painters, Decorators and Paperhangers, Local 138.
 Machinists, No. 182.
 Plumbers, Steamfitters and Steamfitters' Helpers, No. 170.
 Plasterers, No. 89.
 Sheet Metal Workers, No. 280.
 Shinglers, No. 1.
 Granite Cutters.
 Stone Cutters.
 Marble Cutters, No. 92.
 Marble Cutters' Helpers, No. 93.
 Tilelayers, No. 62.
 Glass Workers, No. 40.

Besides, it is estimated that there are 5,000 others out of work, principally new arrivals. Building operations are therefore proceeding in a very small way. Master builders, formerly employers of union men only, were compelled to close down or adopt the 'open' shop principle. The strong contractors state that they are suffering no inconvenience and the strike officials proclaim that all building operations have been stopped, and at labour headquarters a feeling

of buoyancy prevails. No prospects are in sight for an immediate settlement. The unions meet daily and also the members receive their strike benefits.

The Vancouver Employers' Association assert the following objects: (1) to protect their members in their right to manage their respective businesses, in such lawful manner as they may deem proper; (2) the adoption of a uniform system, whereby members may ascertain "who is and who is not worthy of employment;" (3) the investigation and adjustment, by the proper officers of committees of the Association, of any question arising between members and the employes, when such question shall be submitted to the Association for adjustment; (4) to endeavour to make it possible for any person to obtain employment, without being obliged to join a labour organization, and to support such persons in their efforts to do so if discriminated against by union labour; (5) to protect their members in such manner as may be deemed expedient against legislative, municipal and other political encroachments.

The Employers' Association also state that they have as members ninety per cent. of the representative business houses of the City. John McMillan, secretary Executive Committee of the Vancouver Building Trades, issued the following statement:—

"1. The agreement between the Vancouver Building Trades Council and the contractors provides for the union shop; agreement to be made for a period of one, two or three years.

"2. All pending disputes regarding hours or wages to be settled by arbitration under the terms of the Industrial Disputes and Conciliation Act, 1907."

It was generally regarded previously that the question was whether the wages of carpenters were to be \$4.50 or \$4.25 for eight hours, as offered by the contractors. The battle is now "open shop" versus "closed shop."

On June 15 it was reported that 1,845 men were on the pay roll of the city and employed on sewer work, street improvement and so forth in eight wards.

The wages paid out totalled \$57,186, which is some \$7,000 higher than ever before; about 1,000 are at street work, 600 in sewer construction, over 300 installing water pipe, bringing the total up to over 2,100. This number does not include labourers employed by contractors doing work for the city. Local improvements, aggregating \$700,000 were authorized at the sitting of the Court of Revision. The largest item is that covering block paving on Broadway, between Scott street and Glen Drive, which is \$129,750. The north-west corner of Granville and Nelson street, 75 feet frontage in Granville street, was sold for \$180,000 by Robt. Kelly. A year ago he purchased it for \$100,000. On June 17, money by-laws, involving an expenditure of \$1,390,000, were carried by the ratepayers as follows:—

1. \$750,000 for sewers—513 to 64.
2. \$10,000 for Seymour Creek water system—499 to 69.
3. \$100,000 for street improvements in city proper—465 to 91.
4. \$30,000 for jail extension—453 to 87.
5. \$50,000 for Isolation Hospital—454 to 97.
6. \$35,000 for Clarke Drive street end—414 to 137.
7. \$75,000 for streets in Hastings—435 to 114.
8. \$75,000 for water service in Hastings—455 to 87.
9. \$115,000 for water service in D. L. 301—466 to 76.
10. \$60,000 for streets and sidewalks in D. L. 301—448 to 84.

The National Finance Company, Limited, has let the contract for a ten-storey office building facing the Canadian Pacific Railway Company's property and Burrard Inlet on Howe Street, costing \$100,000. An apartment building, costing \$70,000 will be erected at the corner of Pendrill and Cardero streets. Wholesale business houses report the strike has not affected business so far. Of course wholesale orders are usually booked a few weeks ahead. Retail merchants are complaining of a falling off in business. Provisions are firm. Vancouver's bank clearances for May, 1910, amounted to \$36,760,680. This was increased last month to \$46,522,543, a gain of twenty-seven per cent. Boilermakers have asked for an increase in wages. At present they receive \$3.75 for nine hours.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chow, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions during June were satisfactory. Building operations continued brisk, a large number of up-to-date residences being under construction. The Canadian Mineral Rubber Company has commenced operations on its large street paving contract, and states that it will employ all available men and teams in the city while the work continues. Owing to labour troubles in Vancouver, and dullness of trade in the American coast cities, there has been a large influx of idle men to this city during the past month. The Victoria Harbour Railway is a new project started by local capitalists, with the object of making Victoria more truly a deep-sea port, and to bring along the water front of the city and to the outer wharves the cars of the various railway lines, and to afford track-age facilities to the various mills, factories and wholesale houses.

Building permits for May amounted to \$287,335, compared with \$280,110 for April, and \$257,290 for the same month last year. The customs receipts for May totalled \$412,333, while for April they were \$338,151, and for May last year, \$227,097. The head tax collected on Chinese amounted to \$262,549, the largest on record. The Hudson's Bay Company has purchased a site and is about to commence the erection of a departmental store in this city, which will be one of the largest in Western Canada. It is stated that construction will commence within a short time. Gault Brothers are erecting a large business block which will be utilized as a dry goods store. The Westholme Hotel has recently been opened. Wholesale and retail trade was in a thriving condition, the retail section having a steady and continuous growth. The City Council has granted the street cleaning staff time and one half for all work done on Sundays and holidays. The teamsters went on strike on June 1 to enforce a demand for pay for holidays which they claimed they were entitled to, under an agreement with the employers, and after being out for two weeks declared the strike off. A large number of the strikers' places

were filled with imported men. The receipts of the timber branch of the Provincial Lands Department for the month of May amounted to \$151,069.75.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops in this district are reported to be in a healthy condition and a fair average yield is expected. The hay crop is now being harvested and is an average one.

Fruit growing.—The strawberry crop is being gathered, the yield being an average one, and owing to a larger area being under cultivation, the total yield will be considerably larger than last year. Prices are firm at from 10 to 12½ cents per 1-lb. box.

Lumbering.—The lumber mills are busy and have all the business at present that they can handle.

Manufacturing.—The various manufacturing factories are all working steadily, employing full staffs.

Sealing.—The catch of the Victoria sealing fleet for the spring cruise totalled 805 skins. There were only four vessels engaged.

Railway construction and employment.—Work on the Canadian Northern is proceeding steadily, a large force of men being employed. The Canadian Pacific Railway Company is about to commence the construction of a branch line from Duncans to Cowichan Lake, a distance of about twenty miles.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, lathers and plasterers were steadily employed, as were also painters, plumbers and builders' labourers. Paperhangers and decorators reported trade as quiet. Iron moulders and machinists reported work as slack. Electrical workers, linemen, and blacksmiths, were steady. Boilermakers and shipbuilders were fairly well employed. Horseshoers were steadily employed. Woodworkers and upholsterers reported work as fair. Work among the printing and allied trades was good. Tailors were dull, garment workers well employed. Bakers, butchers and cigar

makers were steadily employed. Leather workers reported work as about the average. Barbers, clerks, stenographers, waiters, laundry workers, &c., were constantly employed. Steamboat men of all classes, longshoremen, street railway employés, cab drivers, draymen, teamsters, &c., were finding steady employment. Unskilled labour was more extensively employed than at any previous time, with an abundance of men available.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There has been very little change in the labour situation during the month and while there has been a large amount of work going on there have been more men than were required, owing chiefly to the steady arrival of men from the mining districts in the old country. There is exceptional activity among the building trades in this district, and a steady increase in the transportation of merchandise, as well as travellers from the mainland and the American side.

Wholesale and retail dealers report trade steady. There have been no changes in rates of wages or hours of labour during the month. The carpenters and joiners have organized a branch of the amalgamated Society of Carpenters and Joiners.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are quiet waiting for the weather to settle for making hay.

Fishing.—There is no activity among the fisherman outside of catching fish for local use.

Lumbering.—The sawmills of the district are working steadily and the same applies to the logging camps in the district.

Mining.—The coal mines of this city have been working steadily during the month; among the other mines, some have been very slack during the month and some have been pretty steady.

Work is being pushed on tracklaying on the extension to the Esquimault & Nanaimo Railway to Alberni, which will soon be reached. There are several railway survey parties at work on the island on new routes to the north of the island. The sealing station of the west coast of the island is working steadily and having good success. There is a lot of cement sidewalk work going on in this city and at Ladysmith.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons report work as active. Carpenters and joiners are very active, there being no decrease as yet in the amount of building on hand. Lathers and plasterers are active. Painters and paperhangers are very active. Plumbers report work as good. Builders' labourers have been well employed during the month. Blacksmiths and carriage makers were very active. Printers have been active during the month. Cigarmakers report work as steady. Teamsters and expressmen have been active during the month. Unskilled labour has been fairly well employed; that is those who have work, but there are a large number of men around looking for work.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JUNE, 1911.

DURING the month of June two applications for the establishment of Boards of Conciliation and Investigation were received in the Department, as follows:—

1. On behalf of the electrical workers,

members of the International Brotherhood of Electrical Workers of America, Local Union No. 339, employed by the cities of Port Arthur, Ont., and Fort William, Ont. The number of employés affected by this dispute was said to be

thirty-two directly and sixty-six indirectly.

2. On behalf of the electrical workers, members of the International Brotherhood of Electrical Workers of America, Local Union No. 544, employed by the city of Edmonton, Alta. The number of employes affected by this dispute was said to be thirty-five.

Reports Received.

During the month of June reports were received in the cases of the following Boards:—

(1) The Canadian Northern Coal and Ore Dock Company, Limited, of Port Arthur, Ont., and its employes, members of the Coal Handlers' Union No. 319.

(2) Various boot and shoe manufacturers of the City of Quebec and their employes, the firms concerned being the following, namely: The John Ritchie Company, Limited; The William A. Marsh Company, Limited; Gale Brothers; and Mr. J. M. Stobo.

Other Proceedings Under the Act.

In the June number of the *Labour Gazette* reference has been made to the establishment of a Board of Conciliation and Investigation to adjust certain differences between the Canadian Northern Coal and Ore Dock Company, Limited, of Port Arthur, Ont., and its employes, members of Coal Handlers' Union No. 319. At the beginning of the month of June the Board was completed by the appointment of His Honour Judge John McKay, Port Arthur, Ont., as Chairman, the other members of the Board being Messrs. Geo. F. Horrigan and Andrew Boyd, both of Port Arthur, Ont., appointed on the recommendation of the employing Company and the employes respectively.

Reference has also been made in the June number of the *Labour Gazette* to the establishment of a Board of Conciliation and Investigation to adjust certain matters in dispute between the Hudson Bay Mining Company, Limited, of Gowganda, Ont., and its employes, members of Gowganda Miners' Union No. 154,

Western Federation of Miners. The Board, when finally constituted, was composed as follows: Professor John Sharp, New Liskeard, Ont., member appointed on the recommendation of the employing Company; Mr. Duncan J. McDonell, Gowganda, Ont., member appointed on the recommendation of the employes; and Mr. Geo. Ritchie, K.C., Toronto, Ont., Chairman, appointed by the Minister in the absence of any joint recommendation from the foregoing members of the Board. The Board met at Gowganda during June and proceeded with the enquiry. The formal report had not been received in the Department at the close of the month.

In the application for the establishment of a Board of Conciliation and Investigation to adjust certain matters in dispute between the Cities of Port Arthur, Ont., and Fort William, Ont., and their electrical employes, members of the International Brotherhood of Electrical Workers of America, Local No. 339, it was stated that the dispute related to a demand on the part of the employes concerned for increased wages and that a working day should consist of nine hours instead of ten hours as at present in force. The number of employes affected by this dispute was estimated at thirty-two directly and sixty-six indirectly.

A Board of Conciliation and Investigation was established by the Minister of Labour on June 1, and was constituted as follows: Mr. J. Dix Fraser, Port Arthur, Ont., member appointed on the recommendation of the cities of Port Arthur, Ont., and Fort William, Ont.; Mr. C. W. Foster, Fort William, Ont., member appointed on the recommendation of the employes concerned; and Rev. Dr. S. C. Murray, Port Arthur, Ont., Chairman, appointed by the Minister on the joint recommendation of the foregoing members of the Board.

In the application for the establishment of a Board of Conciliation and Investigation for the adjustment of certain differences between the City of Edmonton, Alta., and its electrical workers, members of the International Brotherhood of Electrical Workers of America,

Local No. 544, it was stated that the dispute grew out of a demand on the part of the employés concerned for a change of wage allowance or remuneration of the employés and a change generally of the conditions surrounding their workings in and about the various utilities owned and operated by the City of Edmonton, namely: telephones, electric lights, street railways, and electric power. The number of employés affected by this dispute was said to be thirty-five. A Board of Conciliation and Investigation was established by the Minister on June 2, being constituted as follows: Mr. Arthur W. Ormsby, Edmonton, Alta., member appointed on the recommendation of the City of Edmonton; Mr. W. Symonds, Lethbridge, Alta., member appointed on the recommendation of the employés concerned; and the Honourable Mr. Justice H. C. Taylor, Edmonton, Alta., Chairman, appointed by the Minister on the joint recommendation of the foregoing members of the Board.

I. REPORT OF BOARD IN DISPUTE BETWEEN THE CANADIAN NORTHERN COAL AND ORE DOCK COMPANY, LIMITED, OF PORT ARTHUR, ONT., AND CERTAIN EMPLOYÉS, MEMBERS OF COAL HANDLERS' UNION, NO. 319.

THE Minister of Labour received on June 19 the unanimous report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Canadian Northern Coal and Ore Dock Company, Limited, of Port Arthur, Ont., and its employés, members of Coal Handlers' Union No. 319.

In the application for the establishment of this Board it was stated that the dispute in question related to demands on the part of the employés concerned for increased wages, and increased compensation for overtime, also that members of the Union should not be discriminated against, and that when an agreement was concluded between the parties it should remain in force for a period of one year. The number of employés affected by this dispute was estimated at 150 directly and 200 indirectly.

The Department received word at various times during the month to the effect that the Board which had under enquiry the dispute between the members of the Western Coal Operators' Association and their employés were actively pursuing their work, and a message to the Minister at the close of the month intimated that a conclusion would be likely immediately reached.

The Board which was established under the chairmanship of the Honourable Mr. Justice Teetzel to adjust differences between the Great North Western Telegraph Company and its employés resumed its enquiries, after adjournment, on June 15, the proceedings lasting only a day or two. The Department had been informed by the Chairman of the Board that the matters referred for adjustment had been mostly disposed of, and that the prospects for an amicable arrangement were good. No formal report had been, however, received in the Department at the end of the month.

On May 19 the Minister of Labour established a Board of Conciliation and Investigation to inquire into the matters in dispute. The Board was constituted as follows: Messrs. Geo. F. Horrigan and Andrew Boyd, both of Port Arthur, Ont., members appointed on the recommendation of the employing Company and the employés respectively; and His Honour Judge John McKay, also of Port Arthur, Ont., Chairman, appointed by the Minister on the joint recommendation of the foregoing members of the Board. The Board met on June 2 and continued to hold sittings from that date until June 16, when a settlement was effected of all matters in dispute, an agreement being signed by representatives of the Company and the employés concerned, this agreement to take effect from May 1, 1911, and to continue in force until April 30, 1912. Concessions were made on both sides, the men modifying their demands respecting wages

and compensation for overtime, and the Company, on the other hand, granting the employes' demands that members of the Union should not be discriminated against and that the life of the agreement, when concluded, should be for a period of one year. The Company also agreed to reinstate the five men who were discharged in the month of May, 1911. It was arranged that on the fifteenth day of January, 1912, the General Manager, or other representatives of the Company, would meet with three employes or their representatives for the purpose of drawing up a new agreement to go into effect the first day of May, 1912.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

To the Honourable,
The Minister of Labour,
Ottawa, Ont.

In the matter of the Industrial Disputes Investigation Act, 1907, and of the dispute at the City of Port Arthur; between the Canadian Northern Coal and Ore Dock Company, Limited, employers, and the said Company's employes as represented by the Coal Handlers' Union, No. 319, employes.

The Board of Conciliation and Investigation appointed herein under the provisions of the above-named Act, and composed of Andrew Boyd of Port Arthur, recommended by the employes, George Francis Horrigan of the same place, recommended by the Company, and His Honour Judge John McKay of the same place, appointed on the joint recommendation of the other members of the Board by the Minister of Labour as Chairman of the Board beg to report as follows:—

By mutual agreement we met on the second day of June A.D., 1911, subscribed and took the oaths of office and held two sittings on that date.

The Board met on the fifth and seventh days of June, 1911, endeavouring to bring about a settlement of the differ-

ences between the said Company and its employes, but did not then succeed in doing so.

On the eighth, ninth, twelfth and thirteenth days of June, 1911, evidence was adduced on behalf of the employes and at the close of the evidence a further effort was made to bring about a settlement.

Two sittings were held on the sixteenth day of June, when a settlement was agreed upon in regard to all matters in dispute herein.

The Chairman drew up the agreement and it was duly signed in our presence by all the representatives who appeared before us for the respective parties herein, and a copy of such agreement is herewith transmitted.

The Board are unanimously of the opinion that the agreement effected is fair and reasonable under the conditions prevailing at the Cities of Port Arthur and Fort William.

The Board having concluded its labours agreed upon the above report.

All of which is respectfully submitted.

(Sgd.) JOHN MCKAY,

Chairman.

ANDREW BOYD.

GEO. F. HERRIGAN,

Members of Board of Conciliation.

PORT ARTHUR, June 17, 1911.

Memorandum of Agreement.

Memorandum of Agreement made this sixteenth day of June, A.D., 1911, between the Canadian Northern Coal and Ore Dock Company, Limited, of the first part, and the employes of the said Company engaged as Coal Handlers, of the second part.

The said employes of the second part covenant and agree to and with the said Company of the first part that they will faithfully, honestly and diligently serve the said Company in the capacity of coal handlers at the Company's premises in the City of Port Arthur in the District of Thunder Bay, and obey the lawful and proper orders and directions of the Company's agents and superintendents for

and during such reasonable hours as the Company may have work for the said parties of the second part to perform from the first day of May A.D. 1911, until the thirtieth day of April A.D. 1912, at the following rate of wages, that is to say: twenty-five cents per hour for dock work and thirty cents per hour for boat work during the season of navigation and one and a half time to be paid for work performed on Sundays, and for overtime, that is to say for work performed between seven o'clock in the evening and six o'clock in the morning, and at the rate of twenty-two and one-half cents per hour for work performed between the close of navigation and the thirtieth day of April, A.D., 1912.

The said Company of the first part covenants, promises and agrees to and with each of the parties of the second part that they will employ the said parties for such reasonable hours as they may have work for the said parties to perform as coal handlers during the said period so long as they perform faithful service at the rate of wages per hour hereinbefore set forth and pay such wages so earned each month to each of the said employés on the fifteenth day of each succeeding month.

The said Company of the first part hereby agrees with the parties of the second part that they will re-instate at once the five men discharged in the

month of May, A.D., 1911, and that the members of the Union will not be discriminated against.

The said Company of the first part also covenants, promises and agrees to and with the parties of the second part that on the fifteenth day of January A.D., 1912, at the hour of three o'clock in the afternoon at the Company's office in the said City of Port Arthur the General Manager or other representatives of the said Company will be prepared to meet with three representatives of the said employés and consider, discuss and decide on the schedule of wages payable for the year commencing the first day of May, A.D., 1912.

In witness whereof the said parties have hereunto set their hands the day and year first above written.

(Sgd.) N. N. JORPLAND,

Superintendent of the Canadian Northern Coal & Ore Dock Company, Limited.

(Sgd.) MECHEL PENTO,

G. ROSS,

N. CIACCO.

Representatives of the Employés of the second part.

Witnesses:

(Sgd.) John McKay,

Geo. F. Horrigan,

Andrew Boyd.

II. REPORT OF BOARD IN DISPUTE BETWEEN VARIOUS BOOT AND SHOE COMPANIES OF QUEBEC AND THEIR EMPLOYÉS.

THE report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between various boot and shoe companies of Quebec and their respective employés was received in the Department on June 26th. The firms concerned in the disputes were the following, namely: The John Ritchie Company, Wm. Marsh & Company, Gale Brothers and J. M. Stobo, all of the City of Quebec. The boot and shoe manufacturing industry, not being a public utility, can be referred under the terms of the Industrial Disputes Investigation

Act only by virtue of Section 63 of the statute, which requires the consent to such reference of both parties to the dispute. In the present case the matters set forth in the several applications received on April 3, were referred by joint consent of the parties to a Board of Conciliation and Investigation, and since the various disputes concerned the same industry, the Department corresponded with the various parties to ascertain the willingness of all concerned to have a single board established, the firms agreeing on a representative in common and the employés also nominating the same

person. Under these conditions a Board was established, composed of the following gentlemen, namely: Dr. G. Will. Jolicœur, Chairman, Mr. Félix Marois and Mr. Joseph A. Langlois, all of Quebec. Dr. Jolicœur was appointed on the joint recommendation of Messrs. Marois and Langlois. The number of employés affected by the various disputes was placed at sixty-eight directly and 875, indirectly. The report received was unanimous, bearing the signatures of the three members of the Board, and dealt with the various disputes in turn.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:

(Translation).

QUEBEC, June 24, 1911.

To the Honourable.

W. L. MACKENZIE KING,
Minister of Labour, Ottawa.

SIR,—

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of differences between the following firms: the John Ritchie Company, Wm. Marsh & Company, Gale Brothers and J. M. Stobo, boot and shoe manufacturers, Quebec, and their employés.

After having heard the evidence of both parties in each case and examining the nature of the work of each of the employés concerned, also the methods followed and the prices paid in the boot and shoe factories in Montreal as well as in Quebec, we transmit the following report and the unanimous findings of the three members of the Conciliation Board established under your hand and seal on April 24, 1911.

First—CHARLES GARNEAU *vs.* THE JOHN RITCHIE COMPANY.

The dispute arose as a result of the introduction of a new machine for pressing heels. With the old machine the plaintiff worked for ten cents per case. The new machine requiring two opera-

tions instead of one, he asked twenty cents per case. After having heard the evidence and examined the working of the two machines we have concluded that the work is about the same: a little longer with the new machine, but on the other hand less dangerous. Charles Garneau should be paid twelve cents per case for the two operations on the new machine, or, should he prefer, \$10 per week, if he accepts engagement by the week as his employer, J. Ritchie, offered him before going before a Board of Conciliation. We may add that everywhere else, or nearly everywhere else, this work is done by the week.

This decision is to take effect from the day on which the matter was submitted to the arbitration of the Board composed of manufacturers and workmen, that is to say, from March 7, 1911.

Second — PHIDIME DROUIN, JOS. GOULET & ADJUTOR FORTIN *vs.* WM. MARSH & COMPANY.

The demand of the employés for an increase of \$1 per week, raising their respective salaries from \$11.50 to \$12.50 per week, is granted and the increase is to take effect from April 1, 1911.

Third—GALE BROTHERS *vs.* FERDINAND BÉRUBÉ.

The employer Gale was paying Ferdinand Bérubé fifty cents per case for cutting the front of the heels and sandpapering them, and sandpapering and polishing the heels of children's and young ladies' boots and shoes. The employer Gale considers that excessive, inasmuch as F. Bérubé with his 19-year-old boy makes an average wage of \$38.75 per week, including even the five or six weeks that he does not work during the summer. The Gale firm being the only one in Quebec for this kind of work, our investigation was made chiefly in Montreal, where we were able to obtain information which justifies us in rendering the following decision: The employer Gale shall pay to F. Bérubé forty cents per case for heels and twenty cents per case for spring heels; this decision to take effect forthwith.

The price of forty cents per case for heels shall apply only to heels not more than one inch in height. Over this height, the price shall be fixed in the proportion of one inch one heel.

Fourth—HUBERT BONNEAU vs. J. M. STOBO.

In the settlement of this difference there were two questions in dispute: (1) the question of wages; (2) the upholding of Article 10 of an agreement existing between the employers and employes. After hearing the evidence, and in accordance with the information obtained here in Quebec and in Montreal, we decided the question without reference to this clause 10, which did not appear to us as having a direct bearing on this dispute and which would have hindered both parties rather than have been of use to either. We, therefore, decide that the employer, J. M. Stobo, shall pay to Hubert Bonneau, \$14.00 per week from November 1, 1910, and shall also give him the preference whenever there is work.

As you have already understood from our previous letters, the greatest difficulty in the settlement of these disputes is not so much in the re-adjustment of wages as in the attempt which we have

made to bring the workmen and the employers together. A great deal of the present trouble, we believe, is due to the fact that the two associations have for some years looked upon each other as veritable enemies. We have, therefore, taken advantage of every opportunity that presented itself to point out to the workmen that they should respect the authority of the employer. Have we succeeded in reconciling them? We hope so, but much would still remain to be done. We have, therefore, in concluding our work, informed the two parties that we shall be at their service, if we are needed even after the Board has disbanded.

We shall likewise be ready, Sir, to give you any further information that you may require.

In conclusion we are glad to testify that all parties concerned in the settlement of these differences were ready to give us all the information requested.

Signed at Quebec, June 24, 1911.

(Sgd.) DR. G. WILL. JOLICEUR,
Chairman.

FELIX MAROIS,
Representing the Employers.

J. A. LANGLOIS,
Representing the Employés.

BULLETINS ISSUED DURING THE MONTH OF JUNE BY THE ANNUITIES BRANCH, DEPARTMENT OF TRADE AND COMMERCE, CANADA.

An Excellent Investment.

AMONG the many good provisions of the Canadian Government Annuities Act is that under which a husband and wife, two sisters, or, in fact, any two persons may join in the purchase of what is known as a Last Survivor Annuity, that is an Annuity which will be paid to both so long as both live, and to the survivor so long as he or she lives. For example, a man who is now seventy-one recently purchased a Last Survivor Annuity for himself and sister, two years older, at a cost of \$4,676. This secures them an income of \$500 a year, the first quarterly payment falling due three months from the date on which the

purchase money was paid. Prior to the investment in a Government Annuity the money had been drawing six per cent. interest, or yielding an income of only \$280, so that the increased income will make a vast difference in the comfort and happiness of the Annuitants, while at the same time it will relieve them of all anxiety as to the state of the money market and the safety of the investment.

Any information desired on the subject of Annuities may be obtained by applying to your Postmaster, or addressing the Superintendent of Government Annuities, Ottawa, to whom letters go free of postage.

Providing for the Through Trip.

Life is a journey. This is a trite metaphor, but it is trite because it is true. We are each in charge of an engine, which we call the body, and this engine needs fuel, which we call the necessities of life. There are comforts and luxuries which we all desire, and these we may liken to patent attachments and brass and nickel works which reduce the jolts of the journey or give style to the rolling stock.

We find it easy in youth to provide the coal and water as we go along, and to keep the locomotive looking trim. We fly gaily past those stations which we call birthdays, and willingly pick up passengers here and there for whose comfort and safety we become responsible.

Sooner or later the engine runs into an open switch. You know what that means. If it is along the first part of the trip there are passengers left in need of a conveyance. Life insurance has provided the means whereby the young engineers may guard against an early derailment. The benefits of these provisions cannot be over-rated; he is an imprudent driver who neglects them.

There are other contingencies which may arise before the open switch is reached. One of these is the possibility that the journey for the individual may be longer than the average run, and a point be attained where the hand becomes lax at the throttle, and the worry of where to get fuel for the engine presses hard on the man in charge. This is the contingency that the Government of Canada had in mind when it devised its Old Age Annuity scheme,—a scheme whereby the surplus means of youth, and a wise man will find some way to have a surplus, may be kept in store for the needs of age.

The Government has foreseen your needs, and anticipated the requirements for your journey. You entrust to the Government some of the savings you can make when your supplies are in excess of your demands, and the Government assures you coaling stations beyond the fifty-fifth milestone.

The open switch may not appear in your path until long after the seventieth station has been passed. Nothing is more pitiable than to watch the old engines, which cannot leave the tracks if they wish, trying to ascend the grades at the last stages of the journey of life, or to see some of the passengers, once travelling in comfort, now forced to walk the tracks. Friendly companions may give them a lift, or others may push them along grudgingly as a duty. An Annuity may not restore to you the speed of youth, but it will retain for you its independence. If you are concerned, as you should be, with the problem of how to provide for that "last of life for which the first was made," you should ask for schedules at the Government Annuities Branch, Ottawa.

The Government of Canada has shown its faith in the idea of providing against the needs of the last stages by appropriating \$70,000 annually to educate the people in the habits of thrift. This appropriation is paid out of the revenues of the Dominion, and not one cent of it is repaid out of the purchase moneys received from the Annuitants.

The people of Canada have shown their faith in the scheme by paying in a million dollars to obtain the benefits offered. How many, however, are still running the journey of life blind to the fact that they may need the protection which this scheme affords! Have you the fare for the through trip?

REGULATIONS FOR LOGGING AND MINING CAMPS IN BRITISH COLUMBIA.

THE following regulations for the sanitary control of lumber, mining, and other camps, sawmills and other industries situated in unorganized districts,

went into effect in British Columbia on June 15.

1. Every employer of labour on any work in any lumbering, mining, con-

struction, or other camp, sawmill, or other industry situated in any portion of an unorganized district, shall, upon the establishment of each and every camp or work, forthwith notify the Sanitary Inspector of the Province of the establishment of the same, and when requested to do so shall furnish such particulars as may be required by the said Inspector.

2. The owner, manager, agent, or foreman of any lumber, mining, or other camp, sawmill, or other industry located within an unorganized district, shall, in connection with every such industry or works, be responsible for the execution and enforcement of any regulation herein contained or hereafter to be adopted.

3. If in the opinion of the Sanitary Inspector the site of any camp or works is unhealthy or unsanitary, he may order the removal of such camp or works to some other site to be selected by him.

4. Any house, tent, or dwelling occupied by the employes engaged in any industry located within an unorganized district shall contain sufficient cubic feet of air space for every occupant thereof as may in each instance be deemed necessary by the Sanitary Inspector, and shall further be provided with efficient means of ventilation. The floor of every dwelling shall be constructed of boards or planks, or other material equally suitable for the purpose, raised on supports at least one foot from the ground, and so made that it shall be tight. Every dwelling other than a temporary tent shall be lighted by windows so constructed that they can be opened when necessary.

5. The method of ventilation of every dwelling in which a stove or furnace is used shall be such as will satisfy the Sanitary Inspector. The temperature of the room shall be maintained at from 60 to 65 degrees Fahr., and a shallow pan supplied with water shall be kept on the stove to supply air moisture.

6. Every camp or works of every industry coming under these regulations shall be equipped with a wash-house or laundry containing a stove and tubs for bathing purposes.

7. Every camp or works shall be supplied with a building or tent properly constructed and set apart as a kitchen, and having a dining-room in connection therewith, with proper conveniences for the cleanliness and comfort of the employes.

8. Proper receptacles must be kept on hand into which all refuse, whether liquid or solid, must be placed, and such refuse must be regularly destroyed by fire or removed to a safe distance from any building and be so deposited as to not create a nuisance or contaminate the drinking water.

9. Latrines, earth, or other closets must be located, constructed, and maintained in a manner satisfactory to the said Sanitary Inspector.

10. Stables in connection with any camp or works must be located as not to contaminate the water supply, and must not be less than 125 feet distant from any dwelling or kitchen. This distance may be increased at the discretion of the Sanitary Inspector.

11. The water supply of any camp or works must be uncontaminated and obtained from a source satisfactory to the Sanitary Inspector.

12. Printed copies of these regulations may be obtained from the Sanitary Inspector.

13. Should the Sanitary Inspector find that any of these regulations are not complied with, he may, where necessary, take steps to enforce them, and the expense of such action shall be paid by the employer or his agent.

14. The penalties contained and provided in section 97 of the "Health Act" shall apply to the violations of any of these regulations.

15. The Sanitary Inspector may, where deemed necessary, obtain the services of any Provincial constable or constables to assist him in the performance of his duties and to aid in the enforcement of these regulations.

By Order.

L. T. DAVIS, M.D.,
Sanitary Inspector,
Victoria.

RECENT INDUSTRIAL AGREEMENT.

THE following agreement was made on May 19, 1911, between the Cut Stone Contractors of Toronto, Ont., who were in favour of employing general union stonecutters and the Toronto branch of the Journeymen Stonecutters' Association of North America.

First.—This Agreement shall be for two years dating from May 1, 1911, and three months' notice shall be given by either of the above parties as to any alteration immediately before the expiration of this Agreement.

Second.—That the rate of wages shall be fifty cents per hour for the first year, fifty-two and a half for the second year, the advance to take place on the first day of May, 1912, and that the hours of labour be eight hours per day (from 8 a.m. to noon and from 1 p.m. to 5 p.m.) except Saturday when four hours shall be worked (8 a.m. to noon.)

Third.—That all stonework where a mallet, mash-hammer, and chisel is used, pitched faced ashlar, twelve inches high and upwards and artificial stone included, may be considered practical stonecutting.

Fourth.—That stonecutters be employed to set and fit all cut stone where practicable.

Fifth.—That the above Association will not take part in any sympathetic strike.

This Agreement to be binding on all parties signing the same. Said parties agreeing to use their influence to bring about a Conference of all parties concerned, three months previous to expiration of this Agreement.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of home-stead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

THE total immigration to Canada for the months of April and May, 1911, was 113,155, as compared with 95,771 for April and May, 1910; the increase is eighteen per cent. Of the total arrivals for the two months, 81,344 were at ocean ports as against 61,214 during the corresponding months last year, an increase of about thirty-three per cent. There was a falling off in the arrivals from the United States in comparison with April and May last year, 31,811 as compared with 34,557, about nine per cent. decrease.

RETAIL PRICES OF STAPLE COMMODITIES IN CANADA.

The information in the present article has been furnished by correspondents of the *Labour Gazette*, under detailed instructions from the Department as to sources of information, quality of goods to be quoted, &c.

THE principal changes in retail prices of articles of common consumption in Canada during June, compared with the previous month were, a general increase in the price of eggs, and a decrease in the price of coal due to seasonal causes. There was also a general decrease in dairy products, such as butter and cheese. The movement of rents was upward, wherever there was any change reported. In some districts the general tendencies were counteracted by local conditions. The following notes on changes in the various localities afford an explanation of the increase given in the table on retail prices accompanying this article.

Notes on Retail Prices.

Westville, N. S.—The price of mutton advanced from fourteen cents in May to fifteen cents per pound in June. Salt pork, Canadian mess, declined from seventeen cents to sixteen cents per pound. In dairy butter, in tubs, there was a decrease of three cents per pound.

Amherst, N. S.—Potatoes have advanced and have not been higher for years. Eggs and butter have fallen slightly in price. Lamb was selling at \$2 for a hindquarter and \$1.50 for a forequarter, prices which never before have been reached. All kinds of fish were very expensive, shad selling at from thirty-five to fifty cents each, salmon and mackerel at thirty cents each. Shad and salmon were scarce, and another cause was stated to be that the fish industry was controlled by a number of persons and the local dealers allege they had to pay excessive prices for their purchases.

Halifax, N.S.—Potatoes showed an increase from \$1.25 to \$1.50 per bag, on account of the diminishing supply of old stock. Both hard and soft coal decreased in price owing to the demand being less than in the cold weather, and transportation easier, anthracite being reduced from \$7 to \$6.80 per ton, and

bituminous from \$5-\$5.25 to \$4.75-\$5 per ton in June. These decreases are said to be customary every year, but prices usually advance each month until September. Anthracite coal comes from New York State, and bituminous from Acadian Mines Reserve and Inverness, N.S., the price of these being \$4.75 per ton, and from Sydney and the Cape Breton mines which is sold for \$5 per ton. Fish was selling at the following prices: five cents per pound for cod and haddock, seven cents for steak, and fifteen cents for halibut. Cod and haddock are the kinds most used. Dry salt cod sells at from eight to ten cents per pound.

Charlottetown, P.E.I.—There was a slight increase in the price of potatoes and a slight decrease in the price of eggs, as large quantities were being brought in. No mutton was sold, but lamb, which was just coming on the market, was selling for \$1.20 to \$1.25 a quarter. Codfish was selling at from eight to fifteen cents per pound, and salmon at from eighteen to twenty-two cents per pound.

Moncton, N.B.—There was an increase in the price of lard and sugar, both granulated and yellow, and a decrease in the price of fish and bacon. The slight variations in price from those quoted in May for the various commodities were attributed to an oversupply or an undersupply as the case might be.

St. John, N.B.—There was an increase in the price of prunes, evaporated apples, veal and potatoes, there having been a scarcity in the last two commodities. There was a decrease in the price of lard, butter, eggs, and bacon.

Newcastle, N.B.—Increases in prices were noted for veal, breakfast bacon, and prunes. Salt pork declined from fourteen cents in May to fifteen cents per pound in June. There was also a decrease in the price of lard and butter.

Quebec, Que.—The price of eggs increased from twenty cents in May to twenty-two cents per dozen in June. Fresh pork showed a decrease of one cent per pound, from fifteen to fourteen cents. Creamery and dairy butter both declined two cents per pound, the prices for June

being twenty and twenty-two cents for dairy and twenty-six cents for creamery butter.

Sherbrooke, Que.—The only change in prices noted was an advance in the price of anthracite coal from \$6.80 in May to \$6.90 per ton in June.

Sorel, Que.—The following increases in prices were noted: mutton, ten cents per pound; strong bakers' flour one-half cent per pound; rolled oats one cent per pound; rice one cent; granulated sugar, one-half cent; potatoes from fifteen to twenty cents per bushel; breakfast bacon two cents; lard three cents; fresh eggs, from three to five cents per dozen, and packed eggs five cents per dozen; butter, dairy and creamery, three to five cents per pound; and cheese, one cent per pound.

St. Hyacinthe, Que.—The following articles were reported to have decreased in price in June, compared with May, beef, two cents; veal, two cents; lard, one cent; milk, two cents per quart; dairy butter, six cents per pound and creamery three cents; cheese, two cents; potatoes, fifteen cents per bag. The causes of these increases were stated to be purely local, due to the abundant supply of commodities, and to the fact that the farmers, having finished their wing, came to the market in large numbers.

St. Johns, Que.—There was a general increase in the price of bread, said to be due to an understanding existing among the bakers, of two cents for a six pound loaf and one cent for a one-pound loaf. There was a decrease in the price of milk from seven to six cents per quart, owing to the cows having been put out on pasture at the beginning of the month. The price of anthracite coal increased from \$6.25 in May to \$6.25 per ton in June. The cause of this increase is explained by the fact that in May coal was sold from the pits and in June it was sold from the miners' shed. According to the custom, the price of coal increases twenty-five cents a month until August.

Trois-Rivières, Que.—Potatoes increased in price fifteen cents per bag. Common fish sold for five cents and even for three cents per pound, the choice varieties maintaining their price. Several but-

chers announced a reduction of two cents in all varieties of meat, also for butter and eggs, but this reduction did not appear to be general. The price of anthracite coal was \$7 per ton if delivered in cellars or on the first floor and twenty-five cents a ton additional for each storey above the ground floor.

Ottawa, Ont.—The most notable change in the market was an advance in the price of hindquarters of beef. It was reported that beef was going from the east to the west and draining the usual supply of the local market. Mutton and pork also slightly advanced in price. There was a slight rise in the price of eggs from twenty cents in May to twenty-one cents in June. Dairy offerings were plentiful during June and the low prices of the previous month prevailed. Fish, caught locally, sold for eight cents per pound and upwards, enabling consumers to get cheaper varieties than formerly. There was a decrease in the price of potatoes, which were usually quoted at \$1.25 per bag, having been in May from \$1.25 to \$1.40 per bag.

Kingston, Ont.—Compared with May, there were increases in the price of strong bakers' flour from three cents to three and one-half cents, and in prunes from thirteen cents to fifteen cents per pound. There was a decrease in granulated sugar from six cents to five and one-quarter cents per pound. The price of butter was also reduced, dairy butter being twenty-four cents per pound in May and eighteen cents in June, while the price of creamery butter fell from twenty-nine cents to twenty cents per pound.

Peterborough, Ont.—The markets during June were rather quiet, there having been a fairly good supply of small produce, butter and eggs, &c., while the supply of larger foodstuffs such as potatoes, apples, meat, &c., was rather poor, though the demand was brisk.

Toronto, Ont.—Prices in the retail market were generally steady and unchanged during the month. Eggs were from two to three cents per dozen higher, owing to the temporary falling off in the supply. Butter was cheaper with larger receipts of dairy and grass butter. Creamery butter was not so plentiful as dairy

butter, the lower price of the latter affecting the former. Prunes were four cents per pound higher and very scarce owing to the failure of last season's crop. Pork products remained stationary, though there was a substantial rise in the price of live hogs during the first two weeks of the month, and retailers were expecting an early increase in retail prices.

Niagara Falls, Ont.—There was an increase in the price of granulated and yellow sugar, on account of the canning season. There was also an advance in the price of potatoes on account of the diminished supply.

St. Catharines, Ont.—The following articles increased in price since May: eggs, fresh apples, potatoes, mutton, strong bakers' flour, and there was a decrease in the prices of butter, bacon, family flour. The price of herring decreased from twelve and one-half to ten cents. Evaporated apples and bituminous coal are not sold in St. Catharines.

Hamilton, Ont.—The general condition of the market was steady. Mutton, eggs, and old cheese showed a slight advance owing to seasonal conditions. The price of butter and potatoes lowered slightly owing to the large quantities being offered.

Brantford, Ont.—Eggs were somewhat scarcer and higher in price, being twenty-two cents a dozen, compared with eighteen cents in May. Creamery butter was one cent higher than in the previous month, selling at twenty-five cents per pound, the reason probably being because many farmers are sending their milk to the cheese factories. Old cheese was twenty cents, three cents higher than in May, the increase in price caused by scarcity. There was an increase of \$1 per month in the average rent of workmen's houses, owing to the fact that the demand exceeded the supply.

Guelph, Ont.—There were decreases in the prices of bacon, butter, potatoes, and coal, a more plentiful supply of the first three products being offered, while the decrease in the cost of coal was due to summer prices.

Berlin, Ont.—There was an increase of two cents per dozen in the price of eggs, compared with May. This was attribut-

ed to the fact that egg packers were buying in eggs throughout the district, which caused a shortage of the supply. Lard declined two and one-half cents, selling at twelve and one-half cents per pound, due to a reduction in wholesale price. Potatoes were ten cents per bag cheaper, selling at ninety cents. This was owing to offerings being large.

Woodstock, Ont.—Sirloin steak increased from eighteen cents in May to twenty cents per pound in June, while other cuts remained unchanged. This is attributed to the fact that there was a demand for sirloin steak and the increase appears to have been due to an attempt to create a better demand for other kinds. There was an increase in the price of yellow sugar, twenty pounds for \$1 having been quoted in May and nineteen pounds in June. This is attributed to an increase in the wholesale price. The price of eggs and potatoes increased owing to a diminution of the supply. There was the usual summer reduction in the price of coal. Evaporated apples were quoted at fifteen cents per pound but there was little sale, the price being prohibitive. Old-fashioned dried apple were selling at ten cents per pound.

Stratford, Ont.—There was an increase in the price of eggs from seventeen to eighteen cents per dozen, attributed to the large shipments from that district. Butter declined in price owing to a more plentiful supply. The price of lard decreased from eighteen to seventeen cents per pound owing to the change in price at the pork factories.

London, Ont.—Veal increased in price from twelve cents to fifteen cents per pound owing to a scarcity. There was a decline in the price of potatoes from \$1 to eighty-five cents per bag, owing to the fact that new potatoes would soon be in hand. Pork increased from twenty to twenty-two cents per pound.

St. Thomas, Ont.—There were increases in the prices of fresh whitefish, pork, bacon, eggs, butter and beans, while there was a decrease in the price of rice, mutton, roast beef, lard, new cheese and prunes.

Windsor, Ont.—There was a decline

the price of dairy butter from thirty to twenty-five cents per pound and in creamery butter from thirty-five to thirty cents per pound. Roast beef declined from fifteen to ten to twelve and one-half cents per pound, and mutton from eighteen to fifteen cents per pound. On the other hand, there were increases in prices of salt pork, bacon, and lard. The price of prunes decreased from thirteen to twelve and one-half cents per pound.

Sault Ste. Marie, Ont.—There were increases in the price of mutton, salt pork and potatoes, and a decrease in the price of creamery butter.

Port Arthur and Fort William, Ont.—There were increases in the prices of veal, mutton, granulated sugar and potatoes, and a decrease in dairy butter, in tubs. The general market conditions were normal, the above fluctuations being due to seasonal causes.

Winnipeg, Man.—There were reported increases in the prices of lard, eggs, flour, evaporated apples, potatoes, prunes, and hardwood, while there was a general decrease in the prices of dairy products. Milk declined from twelve to nine cents per quart, dairy butter from twenty-seven to twenty-three cents per pound, and creamery butter from thirty-two and one-half to twenty-five cents per pound, and cheese from eighteen to sixteen cents per pound.

Brandon, Man.—There was an increase in the price of sirloin steak from twenty to twenty-five cents per pound. This was due to a shortage of beef owing to the failure of the grass crop last year. Fresh pork also increased from eighteen to twenty cents per pound.

Regina, Sask.—There was a decrease in the price of breakfast bacon from thirty-five to thirty cents per pound.

Calgary, Alta.—Beef, halibut, butter, and potatoes decreased in price owing to an increased supply.

Edmonton, Alta.—There was an increase in the price of coal from \$3.50 to \$4 per ton; the kind of coal being marketed is lignite, and in explanation of this increase it is stated that the coal operators do not run their mines to full capacity during the summer months.

Lethbridge, Alta.—Fresh pork increased

two cents per pound in June, compared with May prices. Potatoes increased in price twenty-five cents per bag, this being due to the local stock having become exhausted and the need of bringing potatoes from a distance. The price of coal declined from \$6.50 to \$5.50 per ton. This is accounted for by the fact that only two small mines were working, both of which are drift or river bank mines. The difference in price is due to the difference in the cost of hauling, the roads to the mines having been heavy during the wet weather in May.

Nelson, B.C.—The only change in prices was an increase in creamery butter from thirty-seven and one-half cents in May to forty cents per pound in June, and a decrease in potatoes from \$2.75 to \$2.25 per bag.

Vancouver, B.C.—Roast beef increased from fifteen to eighteen cents per pound. From May 15 to June 1, there was a shortage of beef at butchers' stalls. On June 1 the condition in the meat trade was relieved somewhat by a cargo of Australian mutton, and the Swift Company importing beef from Winnipeg, and the firm of P. Burns importing meat from Toronto. Some of the smaller firms imported directly from Omaha, Neb., U.S.A., and the Spencer departmental stores secured their supply from Seattle, Wash. It was stated that wholesale firms for a time could not supply their own patrons who bought at retail rates. On June 16, grass cattle arrived from the Northwest Territories. On June 15, the best cuts were retailing at twenty-five cents per pound. There was also an increase in the price of mutton, fish, fresh eggs, black tea and coffee, while veal, roast beef, lard, and evaporated apples declined in price.

New Westminster, B.C.—The only change noted was an increase in the price of potatoes from \$2.75 to \$3 per bag.

Victoria, B.C.—There was an increase in fresh eggs from thirty-five to forty cents per dozen.

Nanaimo, B.C.—Increases were noted in the prices of evaporated apples, prunes, and potatoes, while rice and sugar declined in price.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 192 individual workpeople in Canada during the month of June, 1911, were reported to the Department of Labour. Of these, eighty-two were fatal and 110 resulted in serious injuries. In addition eleven fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before June, 1911.

In the preceding month there were fifty-two fatal and 121 non-fatal accidents reported, a total of 173, and in June, 1910, there were 168 fatal and 247 non-fatal accidents, a total of 415. The number of fatal accidents reported in June, 1911 was, therefore, thirty more than in the preceding month and eighty-six less than in June, 1910. The number of non-fatal accidents reported in June, 1911, was eleven less than in the preceding month, and 137 less than in June, 1910. Altogether there were nineteen more industrial accidents reported in June, 1911, than in the preceding month, and 223 less than in the same month of the preceding year.

Of fifty-one returns received during the month, giving the ages of the victims of industrial accidents, nine referred to persons under twenty-one years of age, sixteen to persons between twenty-one and forty-five, and eleven to persons over forty-five. Fifteen persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING JUNE, 1911, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total
Agriculture.....	13	14	27
Fishing and hunting.....			
Lumbering.....	7	3	10
Mining.....	8	24	32
Building trades.....	8	4	12
Metal trades.....	15	9	24
Woodworking trades.....	1	4	5
Printing trades.....			
Clothing trades.....			
Textile trades.....		2	2
Food and tobacco preparation.....		1	1
Leather trades.....			
Railway service.....	10	11	21
Navigation.....	4	1	5
General transport.....	4	17	21
Civic employés.....	2	7	9
Miscellaneous.....	5	3	8
Unskilled labour.....	5	10	15
Total.....	82	110	192

A reference to the accidents of the month involving more than two fatalities is as follows:—

Death of Two Railway Employees in Collision, Winro, Sask.

On June 19, a head-on collision took place between two trains at Winro, Sask., in which an engineer was killed and a brakeman fatally injured. Another brakeman had his arm and nose broken. The cause of the accident was due to the east-bound train, which was made up of fifty-eight cars, failing to stop, owing either to a failure of the air-brake or the weight of the train, with the result that it crashed into a lighter train which was on the point of taking the switch to allow the east-bound train to pass.

Death of Three Men at Sault Ste. Marie, Ont.

On June 30, three men were accidentally killed at Sault Ste. Marie, Ont., by the bursting of a large fly wheel in the drying-room at the coke ovens. It was stated that the three victims were about to stop work for the day and were passing the wheel when the accident occurred.

Death of Two Well-diggers near London, Ont.

On June 13, two men were suffocated by carbonic acid gas when engaged in repairing an old well on a farm in Westminster Township, near London, Ont. The accident was not discovered until sometime after they had begun work. When found, one of the men was seen lying at the bottom of the well and the other about twenty-five feet below the surface. The work of recovering the bodies was very difficult as lights could not be used on account of the gas.

Death of Land Clearers at Vancouver, B.C.

On June 25, two men were killed at Vancouver, B.C., by an explosion of powder. They had been carrying on the work of clearing land and kept a store of explosives in the shack in which they lived. The disaster was due to an explosion of this store, but the exact cause was not ascertained.

Death of Labourers at Victoria, B.C.

On June 9, two labourers at Victoria, B.C., met death by suffocation, due to a cave-in of a clay bank where they were working.

Record by Industries and Trades.

A detailed record of the industrial accidents of the month, by industries and groups of trades, is as follows:—

Agriculture.—There were thirteen fatal and fourteen non-fatal accidents in June, 1911, compared with six fatal and eight non-fatal in May, and thirty fatal and twenty-eight non-fatal accidents in June, 1910. Of the fatal accidents, two were caused by lightning, two by kicks from horses, two by falls from wagons, two by an explosion of blasting powder, one each by a runaway, fall from barn, explosion of steam engine, drowning, and by being crushed between barn and hay-rack.

Fishing and hunting.—There were no accidents in this industry in June, 1911, compared with four fatalities in May, and one in June, 1910.

Lumbering.—There were seven fatal and three non-fatal accidents in June, 1911, compared with eight fatal and five non-fatal accidents in May, and eleven fatal and ten non-fatal accidents in June, 1910. Of the fatal accidents, two were caused by drowning, two by being crushed by logs, one each by falling drill, falling on saw, and by being caught in machinery.

Mining.—There were eighteen fatal and fourteen non-fatal accidents in May, and twenty-one fatal and fifteen non-fatal accidents in June, 1910. Of the fatal accidents, three were caused by the bursting of a fly-wheel, two by a premature blast, one each by falling coal, stone and a drill.

Building trades.—There were eight fatal and four non-fatal accidents in June, 1911, compared with one fatal and five non-fatal accidents in May, and six fatal and sixteen non-fatal accidents in June, 1910. Of the fatal accidents, four were caused by falls from scaffolds, one by fall from buildings, two by drowning after falling from bridge and one by a scaffold collapsing.

Metal, engineering and shipbuilding trades.—There were fifteen fatal and nineteen non-fatal accidents in June, 1911, compared with four fatal and twenty-eight non-fatal accidents in May, and eight fatal and fifty-four non-fatal accidents in June, 1910. Of the fatal accidents, ten were caused by electric shock, two by being crushed between cars, and one by being run over.

Woodworking trades.—There were one fatal and four non-fatal accidents in June, 1911, compared with four non-fatal in May, and nine non-fatal in June, 1910. The fatality was caused through crushing by elevator.

Printing and allied trades.—There were no accidents in this trade in the month of June, 1911, compared with nil in May, and thirty-two fatal and sixteen non-fatal accidents¹ in June, 1911.

Clothing.—There were no accidents in this trade during the month of June, 1911, compared with one fatal and one

¹The thirty-two fatalities, and fifteen of the non-fatal accidents, in June, 1910, occurred in the destruction of the *Herald* building, Montreal, by the collapse of a water tank.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES F., No. 93.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF JUNE, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Ste. Thérèse de Blainville, Qué	June 13	1	Killed by lightning.
".....	Campbell Settlement, N.B.....	" 10	1	Thrown from wagon.
".....	Burgess Township, Ont.....	" 7	1	Kicked by a horse.
".....	Minto, Man.....	" 17	1	Killed in a runaway accident.
".....	Caradoc Township, Ont.....	" 21	1	Struck by a bar, fell from joist of barn.
Engineer on steam plough.....	Near Victor, Sask.....	" 16	1	Engine exploded.
Farmer.....	Near Cargill, Ont.....	" 20	1	Fell and was run over by wagon.
".....	Kouchilauguec, N.B.....	" 5	1	Kicked by a horse.
".....	Prince Albert, Sask.....	" 24	1	Crushed between hay rack and barn.
Farmer's son.....	Near Innerkip, Ont.....	" 9	1	Struck by lightning.
Farmer's son.....	Near Lethbridge, Alta.....	" 27	1	Drowned when crossing river.
Land clearers.....	Vancouver, B.C.....	" 25	2	Killed by explosion in a shack.
<i>Lumbering—</i>				
Logger.....	Near Jaffray, B.C.....	" 26	1	Struck by a falling log.
".....	La Patrie, Que.....	" 23	1	Struck by limb of falling tree.
Mill hand.....	North Sydney, N.S.....	" 29	1	Fell across a saw.
".....	Moes River, Que.....	" 2	1	Crushed by a log.
Bateau men.....	Quebec, Que.....	" 24	1	Boat capsized in a sluice and he was drowned.
Mill hand.....	Warsaw, Ont.....	" 24	1	Drowned.
Foreman in lumber mill	Pokiok, N.B.....	" 23	1	Caught in machinery.
<i>Mining and quarrying—</i>				
Stonecutter.....	Glenbow, Alta.....	" 9	1	Crushed by falling stone.
Miner.....	North Sydney, N.S.....	" 15	1	Struck by falling coal.
".....	Cobalt, Ont.....	" 20	1	Struck by a falling drill.
".....	Michipicoten, Ont.....	" 24	2	Killed by a premature blast.
Firemen and labourers of coke ovens.....	Sault Ste. Marie, Ont.....	" 30	3	Killed by bursting of a fly wheel.
<i>Building trades—</i>				
Carpenter.....	Cobalt, Ont.....	" 1	1	Fell from scaffold.
".....	Vancouver, B.C.....	" 9	1	Fell from a building.
Painter.....	Toronto, Ont.....	" 26	1	Fell from scaffold.
".....	Kingston, Ont.....	" 21	1	Fell from scaffold.
Builders' labourer.....	Tod Inlet, B.C.....	" 10	1	Scaffold collapsed.
Structural iron worker	Montreal, Que.....	" 3	1	Fell from a scaffold.
".....	Lachine, Que.....	" 5	1	Fell from bridge and was drowned.
".....	Riverside, Sask.....	" 18	1	Fell from bridge and was drowned.
<i>Metal trades—</i>				
Coremaker.....	Hamilton, Ont.....	" 6	1	Crushed between cars.
Electrical worker.....	Côte des Neiges, Que.....	" 25	1	Killed by electric shock.
".....	Lindsay, Ont.....	" 3	1	Killed by electric shock when installing transformers on pole.
".....	Niagara Falls, Ont.....	" 12	1	Killed by electric shock.
".....	Peterborough, Ont.....	" 15	1	Caught in machinery.
".....	Vancouver, B.C.....	" 9	1	Killed by electric shock when trimming a lamp.
Electric lineman.....	Hespeler, Ont.....	" 21	1	Killed by electric shock when on a pole.
".....	Lambton, Ont.....	" 16	1	Touched a live wire.
".....	Peterborough, Ont.....	" 9	1	Killed by electric shock, power turned on by mistake.
".....	Ottawa, Ont.....	" 24	1	Fell from pole after electric shock.
".....	Nassau, Ont.....	" 18	1	Killed by electric shock when repairing wires.
Labourer in plough works.....	Hamilton, Ont.....	" 20	1	Run over by a car.
Labourer in foundry.....	Toronto, Ont.....	" 24	1	Crushed between cars.
Millwright's helper.....	Hamilton, Ont.....	" 17	1	Fell against a live wire and killed by shock.
Machinist.....	Vancouver, B.C.....	" 20	1	Caught in machinery.

DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLE, SERIES F., No. 93.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF JUNE, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Woodworking trades—</i>				
Carriage maker	Montreal, Que.....	" 2	1	Fatally injured in an elevator.
<i>Railway service—</i>				
Brakeman.....	Niagara Falls, Ont.....	" 10	1	Fell in front of engine and run over.
"	Winroe, Sask.....	" 19	1	Back broken in a collision.
Fireman.....	Iberville Junction, Que.....	" 14	1	Killed in derailment of engine.
Engineer.....	Winro, Sask.....	" 19	1	Killed in a collision.
Fireman.....	Moncton, N.B.....	" 20	1	Fatally injured in a collision.
Track layer.....	Near Woodstock, Ont.....	" 2	1	Struck by an engine.
Construction labourer	Toronto, Ont.....	" 22	1	Run over by a train.
Freight conductor....	Ottawa, Ont.....	" 8	1	Struck by an engine.
Shed foreman.....	Merriton, Ont.....	" 19	1	Struck by an engine.
Night watchman.....	London, Ont.....	" 27	1	Killed in derailling of cars through a collision.
<i>Navigation—</i>				
Longshoreman.....	Montreal, Que.....	" 27	1	Fell into water, struck a log and broke neck.
Scowman.....	Otonabee River, Ont.....	" 24	1	Fell off a scow and drowned.
Deckhand.....	Port Dalhousie, Ont.....	" 25	1	Crushed between steamer and well of lock.
Dredgeman.....	Peterborough, Ont.....	" 25	1	Fell off dredge and drowned.
<i>General transport—</i>				
Teamster.....	Chatham, N.B.....	" 25	1	Caught in machinery.
"	Deloraine, Man.....	" 17	1	Crushed by a barrel.
"	Winnipeg, Man.....	" 27	1	Struck by lightning.
"	Fredericton, N.B.....	" 13	1	Fell from cart, back broken.
<i>Public employes—</i>				
Census enumerator....	Yukon District.....	" 17	1	Drowned.
Constable.....	Red Deer, Alta.....	" 1	1	Shot by a robber.
<i>Miscellaneous trades—</i>				
Sexton.....	St. Lazare, Que.....	" 3	1	Fell from church belfry.
Soldier.....	Niagara Falls, Ont.....	" 8	1	Struck by a falling beam.
Pump inspector.....	Plunkett, Sask.....	" 26	1	Killed by explosion in a well.
Well diggers.....	Westminster Township, Ont...	" 13	2	Suffocated by gas in a well.
<i>Unskilled labour—</i>				
Labourer.....	Hamilton, Ont.....	" 6	1	Struck by a runaway car.
"	Mimico, Ont.....	" 5	1	Struck by engine.
"	Victoria, B.C.....	" 9	2	Suffocated by cave-in of clay bank.
"	Metchosin, B.C.....	" 10	1	Premature explosion of dynamite.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN JUNE, 1911.

Construction labourer ...	Kettle River Valley Line.....	May	1	Struck by a falling rock.
Construction labourer ...	Kettle River Valley Line.....	"	1	Overwhelmed by a slide.
Dredge hand.....	Montreal, Que.....	" 31	1	Fell on a dredge.
Teamster.....	Near Kamloops, B.C.....	"	1	Drowned when watering horses.
Farmer's son.....	Warburton, Ont.....	" 31	1	Fell off land roller and was run over.
Railway employes.....	Vancouver, B.C.....	"	1	Run over by a train.
Railway engineer and fireman.....	Near Ridgetown, Ont.....	" 1	2	Killed in a train wreck.
Electric railway employé	Chilliwack, B.C.....	"	1	Crushed between cars.
Labourer.....	Lachine, Que.....	" 30	1	Crushed by falling stone.
Woodworker.....	Montreal, Que.....	" 8	1	Struck by part of a circular saw which burst.

non-fatal accident in May, and six non-fatal accidents in June, 1910.

Textile.—There were two non-fatal accidents in June, 1911, compared with nil in May and one non-fatal accident in June, 1910.

Food and tobacco preparation.—There was one non-fatal accident, compared with six non-fatal accidents in May, and three fatal and seven non-fatal accidents in June, 1910.

Leather trades.—There were no accidents in June, 1911, compared with nil in May, and nil in June, 1910.

Railway service.—There were ten fatal and eleven non-fatal accidents in June, 1911, compared with eleven fatal and twenty-four non-fatal accidents in May, and twenty-three fatal and nineteen non-fatal accidents in June, 1910. Of the fatal accidents, four were caused by collisions, three by being struck by engine, two by being run over, and one in the derailment of an engine.

Navigation.—There were four fatal and one non-fatal accident in June, 1911, compared with two fatal and three non-fatal accidents in May, and three fatal and nine non-fatal accidents in June, 1910. Of the fatal accidents, two were caused by falls from vessels and drowning, one crushed between lock-gate and vessel, and one by falling in the water and striking a log.

General transport.—There were four fatal and seventeen non-fatal accidents in June, 1911, compared with 2 fatal and thirteen non-fatal accidents in May, and nine fatal and nineteen non-fatal accidents in June, 1910. Of the fatal accidents, one was caused by a fall from wagon, one by lightning, one crushed by a barrel, and one caught in machinery.

Civic employes.—There were two fatal and seven non-fatal accidents in June, 1911, compared with four non-fatal in May, and three fatal and six non-fatal in June, 1910. Of the fatalities, one was caused by drowning and one fatally shot.

Miscellaneous.—There were five fatal and three non-fatal accidents in June, 1911, compared with four fatal and four non-fatal accidents in May, and five fatal and twelve non-fatal accidents in June, 1910. Of the fatalities, two were caused by suffocation in a well, one each by explosion in a well, struck by falling beam, and fall from belfry.

Unskilled labour.—There were five fatal and ten non-fatal accidents in June, 1911, compared with three fatal and two non-fatal accidents in May, and thirteen fatal and twenty non-fatal accidents in June, 1910. Of the fatalities, two were caused by suffocation due to a cave-in, and one each, struck by engine, car, and premature explosion of dynamite.

TRADE DISPUTES DURING THE MONTH OF JUNE, 1911.

WHILE the actual number of trade disputes in Canada during June was less than in May, there was a far greater disturbance of industrial conditions, the number of men out of work and the amount of time lost showing a great increase compared with the previous month. The most serious disputes were in the coal mining district in Eastern British Columbia and Alberta, and in the building trades of Vancouver, B.C.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The number of trade disputes reported to have been in existence in Canada during June

was twenty-seven, a decrease of seven compared with May, but an increase of nine compared with June, 1910. About 208 firms and 15,010 employes were involved in these disputes, about 160 firms and 8,071 employes having been involved in new disputes of the month.

Loss of time in working days.—The loss of time to employes through trade disputes during June was approximately 355,435 working days, compared with a loss of 299,400 days in May, and 75,700 days in June, 1910.

Trades affected by new disputes.—The following table shows the trades affected by new disputes, and the number of employes in each group of trades.

Trades.	No. of disputes.	No. of employés.
Building.....	7	5,791
Metal.....	5	1,510
Clothing.....	2	285
General transport.....	2	320
Unskilled labour.....	2	165
Total.....	18	8,071

Localities affected by new disputes.—The new disputes of the month took place in the following provinces:—

Province.	No. of disputes.
Quebec.....	3
Ontario.....	6
Alberta.....	7
British Columbia.....	2
Total.....	18

Causes of disputes.—The following were the principal causes of the disputes of the month:—

Cause.	No. of disputes.
For higher wages.....	10
Against reduction in wages.....	1
For payment on legal holidays.....	1
Failure to reach agreement.....	1
Alleged violation of agreement.....	1
Against employment of non-unionists.....	2
Against employment of a particular person.....	1
Against sub-letting of work.....	1
Total.....	18

Methods of settlement.—Of the twenty-seven disputes in existence during the month, thirteen were terminated, leaving fourteen still in existence at the end of June. Seven disputes were settled by negotiations between the parties concerned, and six by the resumption of work without negotiations.

Results of disputes.—Four disputes ended in favour of the employers, four in favour of the employés. In two cases some of the employés were successful, and in one a compromise was reached. In one case the result was indefinite, the employés returning to work on promise of consideration of their demands, and in another the result of the dispute was not reported.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes of previous months which were still in continuance during June were strikes of coal miners in Alberta and Eastern British Columbia, and at Bankhead, Alta.; carpenters and joiners at Vancouver, B.C., Hamilton, Ont., and Welland, Ont.; painters at Port Arthur, Ont.; stonecutters and masons at Kingston, Ont.; pulp mill hands at St. George, N.B.; iron moulders at Toronto, and a lockout of carpet weavers at Toronto, Ont.

Strike of Coal Miners in Alberta and Eastern British Columbia.

No settlement was reported in a strike of coal miners in Alberta and the Crow's Nest Pass District of British Columbia, which began on April 1, on account of failure to reach a new agreement, to replace one which had expired on that date. About 6,000 members of the United Mine Workers of America, and 1,000 non-unionists, employés of sixteen companies, were involved in this dispute. Sitzings of the Board appointed under the Industrial Disputes Investigation Act, 1907, were held during the month, but its work had not been concluded.

Strike of Coal Miners at Bankhead, Alta.

No settlement was reported in the case of the strike of coal miners at Bankhead, Alta., who stopped work on April 21, on account of failure to reach a new agreement with their employers. One firm and about 550 men were directly affected by this dispute, and twenty, indirectly.

Strike of Carpenters and Joiners at Vancouver, B.C.

No settlement was reported in the case of a strike of carpenters and joiners at Vancouver, B.C., who went out on April 10, on account of the refusal of the employers to grant a demand for an increase in wages from \$4 to \$4.50 per day.

Strike of Carpenters at Hamilton, Ont.

A strike of carpenters, which began on May 1, at Hamilton, Ont., on account of the refusal of the employers to grant a demand for an increase in wages from 35 to 40 cents per hour, was terminated during June, all the men having obtained work on the terms demanded. About fifty firms and 300 men were originally involved, but on June 1, only forty men were still out, about thirty-five to forty contractors having signed the desired agreement.

Strike of Carpenters at Welland, Ont.

A strike of carpenters was reported to have taken place at Welland, Ont., on account of the refusal of the employers to grant a demand for an increase in wages from 30 to 40 cents per hour. About ten firms and forty men were originally affected by this dispute. It was reported by the Union that on May 22 all but about eight men were working at the increased rate, and by June 12 all the men had returned to work.

Dispute of Stonecutters and Masons at Kingston, Ont.

A dispute affecting the stonecutters and masons of Kingston, Ont., which began on May 1, was terminated on June 30. The dispute arose from conflicting claims between the two unions of stonecutters and masons for the right to do the same class of work. The dispute was settled by the masons accepting the proposal of the stonecutters that the matter as to which class of labour should be employed be left to the option of contractors. Two firms and about fifty men were involved in this dispute.

Strike of Pulp Mill Hands, St. George, N.B.

No settlement was reported in the case of a strike of fifty pulp mill hands at St. George, N.B., which began on April 26, on account of the refusal of the employers to grant a demand for an eight-hour day instead of a day of 11-13 hours, with an increase in the minimum wages.

Strike of Iron Moulders at Toronto, Ont.

No settlement was reported in the case of a strike of thirteen iron moulders in one shop at Toronto, Ont., which began on May 4. This dispute originally involved twelve firms and 269 men, but on May 12 settlement was reached with eleven firms, and 256 men returned to work, having received an advance in wages which they demanded.

Lockout of Carpet Weavers at Toronto, Ont.

No change in the situation was reported with regard to a lockout of 114 carpet weavers employed with the Toronto Carpet Manufacturing Company at Toronto, which took place March 26.

Dispute in the Building Trades at Vancouver, B.C.

On June 5, it was reported that 5,500 men employed in the building trades in Vancouver, B.C., had stopped work, affecting fifty-four firms. It was alleged by the men that the dispute arose from the violation of an agreement by the contractors. No settlement of the dispute was reported during the month, and building operations were almost completely suspended.¹

Strike of Car Workers at Montreal, Que.

On June 12, the employés of two shops of the Canada Car and Foundry Company, in the vicinity of Montreal, went on strike to the number of 1,200, the cause of the dispute being the refusal of the Company to grant a demand of the men for an increase in wages of 4 cents per hour for all employés. Subsequently this demand was reduced to 2 cents per hour. On June 20, the employés returned to work under the former conditions on the advice of Mr. Felix Marois, Registrar of the Councils of Conciliation and Arbitration for the Province of Quebec.

¹A full account of this dispute is given in the monthly report of Mr. George Bartley, correspondent for Vancouver, on another page.

Strike of Teamsters at Victoria, B.C.

On June 1, a strike of about 300 teamsters, involving fifty firms, took place at Victoria, B.C. It was alleged by the men that the strike was declared because the Team Owners' Association had violated an agreement which had been entered into on May 1. By that agreement the men were entitled to pay for legal holidays, but the Team Owners' Association refused to pay for holidays under the new scale, claiming they had never agreed to do so. At first, three firms employing about fifty men were involved, but a week later a general strike of all the teamsters in the city was declared. On June 12, the strike was terminated, a large number of the places of the strikers having been filled by others. Some of the firms took back their old employes. It was stated that a few of the firms insisted on the men leaving their union.

Strike of Electrical Workers at Toronto, Ont.

On June 12, a strike of about 150 electrical workers employed by eighteen firms took place at Toronto, Ont., on account of the refusal of the employers to grant a demand for an increase in wages from 35 to 40 cents per hour. The dispute did not affect electrical workers in the employ of the City corporation, with whom an agreement had been signed two weeks prior to the strike. Some of the men who went out returned to work the following day, their employers having agreed to pay the increased rates. No definite settlement was reported during the month.

Strike of Electrical Workers at Calgary, Alta.

On June 15, a strike of electrical workers took place at Calgary, Alta. It was stated by the union that as a result of the inability of the electrical section of the Calgary Builders' Exchange to come to an amicable agreement it was decided to cease work. It was reported that the men were demanding a rate of 52½

cents per hour for journeymen and 57½ cents per hour for job foreman. About 100 men were involved in this dispute, and no settlement was reported during the month.

Strike of Bricklayers and Masons at Calgary, Alta.

On June 1, a strike of bricklayers and masons took place at Calgary, Alta., in which thirty-five members of the Builders' Exchange and 291 men were involved. It was reported by the union that the dispute was terminated on June 10, an advance of 5 cents per hour having been granted by the contractors individually.

Strike of Iron Moulders at London, Ont.

On June 5, a strike of iron moulders took place at London, Ont., in which three firms and sixty men were involved. The dispute arose from the demand of the men that the minimum wages for a ten-hour day should be paid for a day of nine hours. It was claimed by one of the firms that they had offered an advance of ten per cent. on June 3 to the majority of their men and an advance of about this amount to the rest of the men, but this offer was rejected. No settlement of the dispute was reported during the month.

Strike of Garment Workers at Montreal, Que.

On June 13, a strike of garment workers took place at Montreal in which about 140 employes were involved. According to the employers, the cause of the dispute was a demand for a closed shop. On June 20 it was settled by mutual agreement, but the terms of settlement were not reported.

Strike of Construction Labourers, Toronto, Ont.

On June 1, about 135 labourers employed on the Grand Trunk Railway at South Parkdale, near Toronto, Ont., declared a strike on account of the refusal of the Company to grant a demand for an increase in wages from 17½ to 20

<i>Metal trades—</i>							
Plumbers and steamfitters.....	Against reduction in wages.....	1	" 24	Work resumed at former rate.
Iron moulders.....	Men demanded that a minimum wage for a 10-hour day be paid for a day of 9 hours.....	3	60	" 5	No settlement reported at end of month.
Metal workers.....	For increase in wages from 42½ to 50 cents per hour.....	" 23	No settlement reported at end of month.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employes, or of less duration than 24 hours.

Garbage collectors.	Hamilton, Ont.	For increase in wages from \$2 to \$2.25 per day.	1	20	" 7	" 9	Work resumed on understanding that demands would be considered if one week's notice given.
Unskilled labour—Labourers.	London, Ont.	For increase in wages from 16 to 18 cents per hour.	1	30	" 6	" 7	Increase granted to some; places of others filled.
"	Toronto, Ont.	For increase in wages from 17½ to 20 cents per hour.	1	135	" 1	" 3	Work resumed at old rate.

cents per hour. On June 3, the men returned to work at the old rate of pay, no concessions having been granted.

Strike of Glove Workers at Montreal, Que.

A strike of glove workers took place at Montreal during June. A report received from the employers stated that the dispute began on June 9, involving twenty men, and that the cause was a desire by the men for a change of the foreman and a new scale of wages. They claimed that the strikers had refused an offer they had made, but that the majority returned to work on June 14, under the old scale of wages, the cutting department having been re-organized in the meantime under a new foreman. The employes stated that the dispute began on June 5 and involved 150 men, of whom twenty-five were cutters. According to them the cause of the dispute was a reduction in piece-work prices.

Strike of Labourers, London, Ont.

On June 6, a strike of thirty labourers employed by the London Street Railway

Company took place at London, Ont., on account of the refusal of the Company to grant a demand for an increase in wages from 16 to 18 cents per hour, with Saturday afternoons off. The dispute was terminated the following day, some of the men being granted the increase, while new hands were taken on to replace the others.

Strike of Garbage Collectors, Hamilton, Ont.

On June 7, twenty garbage collectors employed by the municipality of Hamilton, Ont. declared a strike, making a demand for an increase in wages from \$2 to \$2.25 per day. On the following day the men were induced to return to work on the understanding that their demands would be considered by the works committee if they would give one week's notice.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of July, and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during the month of June, 1911.

ONTARIO REPORTS.

Factory Inspection.

Twenty-third annual reports of the Inspectors of factories for the Province of Ontario, 1910. King's Printer, Toronto, 1911. Pages 83.

In the report of Factory Inspectors for Ontario for 1910 it is stated that 452 cities, towns and villages were visited during the year, and inspections were made of 8,954 factories, mercantile establishments and workshops. The employes in these places numbered approximately 233,482 persons. One thousand five hundred and forty-nine inspections were reported in connection with the enforcing of the Act respecting Stationary Engineers. Four thousand two hun-

dred and thirty-three recommendations were made in connection with the following: steam boilers, child labour, elevators, fire-escapes, guards for machinery, hours of labour, ventilation, sanitation, seats for females, mode of wearing the hair and cleanliness.

There were 764 accidents reported during the year, thirty-six of which were fatal. This was an increase over the previous year, and is attributed to a better observance of the law regarding the reporting of accidents rather than an actual increase of accidents.

Reference is made to the manufacture of phosphorus matches, a matter which has been dealt with by the Dominion Government. A number of regulations for lucifer match works, issued by the Factory Inspectors in Great Britain, are given. Reference is made to the dangers to health in the manufac-

ture of brushes, which arise from pitch fumes, bristle dust, and vapors. In order to minimize these dangers it is stated that in the better class of shop a wide mouth furnace is placed over the cauldron of boiling pitch and is connected with the interior by galvanized iron tubes. The danger of anthrax poisoning in brush factories is also mentioned. It is stated that the most frequent cases occur where foreign hides and fleeces are used, and they would be greatly obviated if the hides were dealt with at the point of entry into the country.

With regard to overtime work in factories, it is stated that with few exceptions employers have concluded that it is not in their interests. However, applications for overtime permits in 1910 showed a decided increase over the previous year. This is attributed to an increased demand for the product and a scarcity of female and child labour. The number of overtime permits issued in 1910 was 244, compared with 191 in 1909. Attention is called to the fact that "The Shops Act" does not demand a report of elevator accidents from mercantile houses, although a number of serious and even fatal ones occurred. It is stated that underground workshops were found to be creeping into Toronto, many of which are used as tailor shops. Dr. Bell of the Health Inspector's Department, who accompanied the Factory Inspector, condemned underground workshops as unfit to live in. A number of basement bakeshops were also found. With regard to child labour, it is stated that a meeting was arranged between the truant officers of the City of Toronto and the Department and it was decided that the inspectors of both Departments would hereafter work together, thus guarding against overlapping. A weakness in the law is pointed out in not requiring a proper working certificate. A brief account of Child Labour Law in Ontario is given in the report.

Protection of Children.

Eighteenth report of the Superintendent of Neglected and Dependent Children of Ontario, Toronto, King's Printer, 1911. Pages 122.

The report of the Superintendent of Neglected and Dependent Children

of Ontario for 1910 shows marked progress in the care and protection of children during the year. There are at present seventy-two children's aid societies in Ontario. A new society was organized in the Temiskaming District of Northern Ontario, and the work at Kingston, Ont. was revived on the appointment of an inspector with jurisdiction in the Counties of Frontenac, Lennox and Addington. A large number of immoral resorts where children were concerned were broken up and several men were committed to the penitentiary for leading astray young girls. A number of large gifts were made on behalf of the children during the year. In Toronto, the movement for establishing supervised play-grounds has made great progress, over \$200,000 having been appropriated by the Civic authorities, and \$40,000 having been contributed by private individuals. Promises of help in this direction have been made by other prominent citizens. During the year 758 children were placed in foster-homes by the various societies, but it is stated that children are not available for half the excellent homes that offer. During the year 1,781 delinquent children were dealt with by the courts.

Public Works of Ontario.

Report of the Minister of Public Works for the Province of Ontario for the twelve months ending October 31, 1910. Toronto, King's Printer, 1911. Pages 135.

In the report of the Department of Public Works of Ontario, it is stated that the sum of \$895,923.10 was expended on the erection and maintenance of public buildings. A number of new bridges were built and the drainage of the Rainy River District was continued. Seven townships received aid under the provisions of the Provincial Drainage Aid Act. Under the Colonization Roads Branch, 193 new roads have been constructed; 1,189 miles were repaired, and 101 bridges, aggregating a length of 5,983 feet were constructed. Eighty-one municipalities took advantage during the year of the "Colonization Roads Act," under which the Government contributes a portion of the cost of a road, usually one-half the expenditure.

It is stated that the employment of prisoners in constructing roads was tried with much success, about 100 persons being engaged on road building from Matheson and Kelso into the Porcupine district. Twenty-three miles of new road were stumped, grubbed, and cleared, sixteen miles were graded and cross-laid, and a substantial bridge was erected over the Way-tay-beg River. It is estimated that the saving thus effected was probably \$5,000. The benefit to the physical condition of the men from living a useful life in the open was very great, and the moral effect was markedly beneficial. Upon the discharge of the prisoners they were given the opportunity of working on the roads and were paid the current rates of wages. Many of them secured useful employment in the mining camps.

AUSTRALIAN REPORT.

Industrial Conditions in New South Wales.

Fifth annual report of the Director of Labour, State Labour Bureau of New South Wales, for year ended June 30, 1910 (with appendices). Sydney, New South Wales, Government Printer, 1911. Pages 59. Price 2s., 6d.

The report of the Director of Labour of New South Wales for 1910 contains an account of the functions of the State Labour Bureau with a review of the work carried on during the year, the number of strikes and lockouts, and a brief account of the problem of the unemployed, with which the work of the Labour Bureau is largely occupied.

The work of the State Labour Bureau is summarized under the following headings: A free registry office is conducted in Sydney, with forty-three branch offices in as many chief centres of population. At these, both men wanting work and employers wanting labour may apply. The workmen are assisted to reach employment when found. Railway and steamer fares are issued on credit, repayments being made after the lapse of one month or longer, according to circumstances, and when considered necessary payment is accepted by easy instalments. Occasionally wives and other relatives are removed from one

part of the State to the other; also furniture, farm animals, etc. Rabbit-traps, tents, blankets, and some few other things are advanced on satisfactory guarantee of re-payment.

A pig, poultry, vegetable, and flower farm has been established at Randwick, five miles from Sydney, where destitute men are given lodging, food, and a small money allowance, in exchange for labour or anything they are set to do. The period of residence must not exceed three months, nor re-commence without a similar interval. Usually between forty and fifty men are in residence there.

For the year ending June 30, 1910, the sum of £2,423, 4s, 6d. was received for produce from this farm. A similar labour farm is maintained at Pitt Town, thirty-four miles from Sydney. At this place, there is a small plant for making brooms from millet grown on the farm; a small dairy, a number of pigs and fowls, &c. The produce of this farm for the year ending June 30, 1910, sold for \$2,389, 15s, 5d. On this farm men are enabled to acquire knowledge of various matters, which renders them better fit for employment of various kinds to which they are transferred as the opportunity arises.

Another labour farm, with the new principle of dealing with whole families, instead of with men only, will probably be established in the near future. A feature of these farms is that no officers, except the manager in each case, are generally found necessary. All foremen, clerks, &c., as well as blacksmiths, carpenters and plumbers are usually selected from among those who take shelter.

Food is provided for destitute families, which have an adult male at the head. The head of these destitute families may have three days work in each week at the Randwick depot. He is housed and fed and at the conclusion of three days is given an order for 5s. worth of food. These orders are addressed to approved storekeepers only, and are inconvertible in any way. Articles to be supplied are listed, though the articles not listed are not paid for even if supplied. In exceptional cases orders

are issued in advance of work, and sometimes without work being exacted.

Information concerning labour conditions in all centres of population in that State is collected and disseminated by the Bureau, and for this purpose forty-three Clerks of Petty Sessions are agents for the Director, and report each month to the Director on the state of the labour market, &c. In addition, the police of 200 principal cities all forward similar monthly reports. These reports are embodied by the Director in a monthly digest, copies of which are furnished to the Prime Minister of the Commonwealth, the High Commissioner for Australia, and the Agent-General of the State in London. They are also made available to the Press, the Statistician, Immigration Bureau, Etc.

Four years ago, an instructional course in farming was instituted for city lads. Youths over fourteen are sent to the Government Agricultural Training Farm, near Windsor, where they take part in all the operations of the establishment. They are kept apart from the men, and are in charge of a special foreman. They pay their own travelling expenses to and from the farm, but pay no fees. They are fed and housed, but receive no money allowance. As soon as they are considered capable, situations are procured on farms for such as desire them, but so far, many more boys have been called for than could be supplied.

BRITISH REPORTS.

Guilds of Help in England.

Report to the President of the Local Government Board on Guilds of Help in England, by G. R. Snowden, Assistant General Inspector. London, Wyman & Sons, 1911. Pages 20, price 2½d.

An interesting report on Guilds of Help in England has recently been issued by the local Government Board. These Guilds represent a new movement for dealing with the unemployment question. The first Guild of Help was inaugurated in Bradford, in 1904. In the following year similar guilds were founded at Bolton, Eccles, Halifax, Heckmondwike, Salford and Swinton (near Manchester). A number of others

were established in the following years, and at the present time it is stated there are nearly sixty of these organizations scattered over England, principally in Yorkshire and Lancashire. Three annual National Conferences of Guilds of Help have been laid, and the formation of a National Association has been under consideration.

The general objects of the Guilds of Help may be summarised as follows from their published statements: (1) To deepen the sense of civic responsibility for the care of the poor, and to promote, through personal service, a neighbourly feeling among all classes of the community. (2) To provide a friend for all those in need of help and advice, and to encourage them in efforts towards self-help. (3) To discourage indiscriminate almsgiving by private persons, and to organize methods whereby the generosity of such persons may be wisely directed and enabled to secure results of permanent benefit. (4) To co-operate with all existing charitable agencies in order to prevent overlapping. (5) To arrest the inroads of poverty in its initial stages in order to prevent the poor from sinking into destitution, and to insure, so far as possible, that no home shall be broken up when can be saved by friendly advice and assistance.

There are two general characteristics common to all the Guilds; (1) the work is carried on by voluntary assistance and unpaid personal service, and the person who visits and investigates a case has a voice in deciding what assistance is necessary. (2) A prominent position is given to the idea of a man's civic responsibilities, his special duties to the place in which he lives, and to his fellow-citizens as such. Most Guilds are governed by a General Council or Central Board, but the business control of the organization is usually in the hands of an executive committee. The general council or the executive committee frequently consists not only of members elected by the annual meeting, but also members nominated by the public authorities, and of representative men interested in philanthropy. In some instances, these representatives are ap-

pointed by the trustees of charities, by trade unions, and other bodies.

The field of the Guilds' work coincides with a municipality, the mayor, or chairman of the district council is its president. A town is divided into a number of districts, usually based on municipal wards, each with about eight or twelve voluntary helpers. These helpers form a distinct committee of the Guild. In large towns, a number of districts are combined in groups, each group meeting having its own chairman, consisting of heads and secretaries of the districts within the groups. The helpers are drawn from all classes of society, and in a few guilds half or more than half are men and women of the working classes

Housing, Prices and Wages in the United States.

Report on an Enquiry by the Board of Trade into working class rents, housing and retail prices together with the rates of wages in certain occupations in the principal industrial towns of the United States of America, with an introductory memorandum and a comparison of conditions in the United States and the United Kingdom. Wyman & Sons, 1911. Price, 5s., 1d. Page 615.

This volume continues the result of investigations undertaken by the Board of Trade into matters affecting the condition of the working classes in industrial centres and is the fifth of the series to be issued. The others relate to the United Kingdom, Germany, France and Belgium. In the United States enquiry, twenty-eight cities were covered, twenty-six of which lie east of the Mississippi river and twenty-two of which have a population of over 100,000, while the combined population of the whole totals 15,488,140. The report deals with conditions in the United States as a whole, conditions in the United States as compared with those in England, and conditions as they were separately found in the twenty-eight cities under enquiry, while the appendices contain statements of wages agreements, apprenticeship regulations, building and housing regulations and treat with other special aspects such as laws and regulations relative to the preparation and sale of food, the employment of negroes in skilled trades and unemployment.

Taking more particularly that portion of the report dealing with a comparison of conditions in the two countries, we find that the trades chosen for this purpose are the building, engineering and printing trades. Turning to a comparison of wages, it will be seen that in the building trades the mean of the predominant range in the United States is in no case less than double that of the corresponding English grade of wage earner. For the whole group the ratio is 243:100. In the engineering trades, the combined ratio is 210:100, and for compositors the ratio is 246:100, while the ratio for all the occupations included in the Table is 232:100. The average hours of labour per week in the different occupations in the building trades range from forty-six to forty-eight and three-quarters in the United States, compared with fifty-two to fifty-three and one-half in England and Wales. In the engineering trades, the hours range from fifty-four to sixty compared with the English average of fifty-three, the ratio being 106:100. Among compositors the American working week is averaged at forty-nine, compared with fifty-two and one-half in England, the ratio being 93:100. Averaging the three groups, it will be found that the hours in the United States are about four per cent. shorter than in England and Wales. In the comparison of rents, the matter is more complicated, conditions in the two countries being widely different in certain cases, but the report believes, after careful comparison, that the ratio of 207:100 may be taken as representing with approximate accuracy the level of rents paid by the working classes in the United States and England and Wales respectively. Again, in retail food prices, 138:100 is taken as representing the relative levels of the cost of food in these two countries. The report comments upon the fact that the budgets indicate in general that the dietary of American working class families is more liberal and more varied than that of the corresponding families in the United Kingdom.

Summing up the above, it will be found that the American workman receives a greater wage by about 130 per cent

under a slightly shorter working day, but on the other hand expends about fifty-two per cent, more on food and rent. The report concludes: "The margin is clearly large, making possible a command of the necessities and conveniences and minor luxuries that is both nominally and really greater than that enjoyed by the corresponding class in this country, although the effective margin is itself, in practice, curtailed by a scale of expenditure to some extent necessarily and to some extent voluntarily adopted in accordance with a different and a higher standard of material comfort."

Opium Question in China.

1. China No. 1 (1911). Despatches from Sir A. Hosie, forwarding reports respecting the Opium Question in China. (Cd. 5,638).

2. Treaty Series 1911, No. 13. Agreement between the United Kingdom and China relating to Opium. Signed in English and Chinese texts at Peking, May 8, 1911, together with notes relating thereto exchanged on that day. (Cd. 5,660).

Sir Alexander Hosie, in Document China No. 1 (1911), reports upon the cultivation of the poppy in the provinces of Shansi, Shensi, Kansu, Szechuan and Yunnan in 1910 as he was able to ascertain it by personal investigation. The report contains a more or less detailed account of his journey and of statements of various officials met. The investigation, in brief, showed that in Shansi poppy cultivation ceased in 1909, while in Shensi, in face of the fact that the officials claim a diminution of from sixty to eighty per cent, he believed that cultivation of the poppy had been diminished by perhaps thirty per cent., certainly much under fifty per cent.; in some districts in this latter province it is openly carried on on an extensive scale and there is no secrecy. In Kansu, he states, a reduction of about twenty-five per cent has taken place. In Szechuan and Yunnan, formerly the two great opium producing provinces in China, poppy cultivation has been successfully suppressed.

In the agreement between the United Kingdom and China three years ago, the British Government undertook that if for three years from January 1, 1908, the Chinese Government reduced the

production and consumption of opium in China, they would continue in the same proportion of ten per cent. a diminution of the annual export of opium from India until 1917. The British Government recognize the sincerity of the Chinese Government in their effort to reduce the production of opium in China during the time stipulated by entering into the present agreement containing in all ten articles. The articles set forth:—

1. The willingness of China to diminish annually for seven years the production of opium in the same proportion as the annual export from India is diminished until total extinction in 1917.

2. The willingness of Great Britain to cease exportation from India in less than seven years if clear proof be given of the complete absence of production of native opium in China.

3. The prohibition of entrance of Indian opium into any provinces where cultivation and import of native opium has been effectively suppressed.

4. The willingness of the Chinese Government to permit British officials to obtain evidence by local enquiries as to the extent of cultivation, their decision to be accepted by both parties to the agreement.

5. The continuance of the arrangement of 1907, whereby a Chinese official watched the opium sales in India, and the further concession of that official being present at the packing of opium.

6. The willingness of the Chinese Government to levy a tax on all native grown opium, and of the British Government to increase the present consolidated import duties.

7. The willingness of China to withdraw all restrictions placed by provincial authorities on the wholesale trade in Indian opium.

8. The willingness of the British Government to assist in suppressive measures by issuing export permits for each chest of Indian opium and by an annual reduction in these permits of 5,100.

9. Provision for modification of the agreement in the light of subsequent experience.

10. The enforcement of the agreement

to take effect on date of signature, May 8, 1911.

One Day's Rest in Seven.

A Bill to secure one day's rest in seven for all workpeople; to make the first day of May a Bank holiday throughout the United Kingdom; and to make secure payment of wages for public holidays has recently been introduced in the British Parliament.

This Bill provides, as the full title suggests, that the first day of May (or if that be a Sunday, the second day) shall be a Bank holiday, also that any person who has been employed without interruption for twelve months, shall be entitled on or after the period named to have during every period of twelve months of employment at least seven whole holidays. The Bill further seeks to legislate that no deduction is to be made from the wage of any person during any compulsory holiday. Section 5 provides that one day in every seven shall be a holiday. The penalties to be imposed are those enforced under section 9 of the Truck Act, 1831. The short title is cited as "The Holidays Act, 1911."

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

ONTARIO CASES.

Damages Under Workmen's Act—Injury to Helper in Railway Repair Shops—Direction of Superior.

Appeal by the defendants from the judgement at the trial with a jury in an action for damages for injuries sustained by the plaintiff while in the defendant's employment. The plaintiff, a young man of twenty-three years, was a helper in the defendant company's repair shops at Fort William. One T., a machinist also employed in the shops, was making some repairs on a wrecking car on a siding near to the shops. In the course of his work at one stage of it he needed someone to assist him, and the plaintiff was selected. He had instructions from the shop foreman to do whatever T. told him to do, and went with T. He says T. was for the occasion his "boss", and he was obliged to obey his orders. It was necessary to repair the grate-bars of a boiler on the west end of the wrecking car, and T. had placed a trestle or horse between the rails of the siding close to that end of the car. The plaintiff was told by T. to stand on this trestle, and, with a piece of board to hold up some bolts in the grate-bar, while T. would get on the car and fasten them. About six feet to the west stood another car on the same siding so that the plaintiff, on the trestle, would be standing with his back towards it, and between it and the wrecking car.

It is usual, when men are engaged in repairing cars on a track, to put out a flag or flags as a danger signal to the crews of other engines or trains, to show that men are working there and that the car must not be interfered with. The

plaintiff had previously worked on cars on the track, and the foreman had always seen that there were flags put up, and the plaintiff says that regular car repairers always carry such flags. The plaintiff admits that was the rule in practice.

The defendants, in their reasons for appeal, say they had a rule requiring a blue flag. The plaintiff had only seen red flags used. There was no evidence that there was any written rule, or that he had ever been made acquainted with any, but he admits knowledge of the practice and the reason for it, and that other companies had such rules, and that in working about a car the flags should be there, and that they were as necessary as their tools and were part of the equipment of car repairers, and that T. might have gotten flags in the repair-shop. But so far as appeared, it was the practice for the foreman on the job to see to the flags, and there was no rule or practice proved prohibiting the men from working without flags.

On this occasion, before they began work, T. told the plaintiff that there were no flags out, and the plaintiff would have to be careful and listen for any noise. The plaintiff then said if there were no flags out he could not work; it was too dangerous and he was liable to get caught there. T. said to him that they did not need any flags as it would only take four or five minutes, but he would take a look to see if there was any train coming. T. did look around and told the plaintiff that he did not see any smoke around, and that the engine must be up at a point called the mission, which was three miles away, and that all was safe in between the cars. The plaintiff says, "He was my boss there." "He gave me orders to hold the bolts," and he says he was obliged to obey, and "I had to do whatever he told me." They went to work, and, in the course of it, T. was

hammering on the grate-bars, and the noise made thereby, the plaintiff says, prevented him from hearing any approaching noise, and, within the five minutes, the car to the west was "kicked" by an engine or other cars and ran against the wrecking car, the plaintiff being caught between the two and injured. He admits that the accident was really caused by the failure to put out the flags.

On the questions to the jury and their answers, judgement was directed for the plaintiff. In answer to one of the questions the jury said that the plaintiff's injuries were not caused by his own want of care, and that it was not part of his duty to place these flags.

The Court was of opinion that questions to the jury were evidently intended to ascertain whether the facts brought the case within sub-sections two and three of section three of the Workmen's Compensation for Injuries Act. Sub-section two applies to negligence of an employé who has any superintendence entrusted to him, whilst in the exercise of such superintendence. Sub-section three applies to negligence of an employé to whose orders or directions the plaintiff was bound to conform, and did conform, where the injury resulted from his having so conformed. By the answer that the negligence was that of a person in superintendence, and the necessary implication that it was whilst in the exercise of such superintendence, the case was brought within the second clause, and the defendants become liable. The appeal was dismissed.

(Burlott v. Grand Trunk Pacific Railway Company, Ontario, W. N. 1277.)

The Mechanics' Lien Act.—Scheme between Parties.

Appeal by K. & S. from the judgement of an Official Referee in a mechanics' lien action to enforce a lien for bricks supplied in the erection of a certain building. The referee dismissed the claim. An appeal to the Divisional Court from the Referee's judgment was dismissed with costs. Mr. Justice Ridlell gave a written judgement in which he stated that the Court had called upon

the Referee for the reasons for his judgement, which had been furnished, and from which it appeared that the brick, which it was claimed kept the lien alive, were furnished after the building was completed, and were not to be used in the building. This was the outcome of a scheme between the parties, in bad faith, to advantage the appellants at the expense of others; and did not come within the Act.

(Renney v. Dempster, Ontario, W. N. 1303.)

Setting Aside Election of Alderman.—Contract of Supply of Goods to Contractor.

Upon the appeal by Homan in the municipal election case of *Slater v. Homan*, referred to in the last number of the *Labour Gazette*, Mr. Justice Teetzel, who heard the appeal, said that the cause of disqualification of Homan and setting aside his election as alderman of the city of Niagara Falls, was that, since his election, Homan supplied goods and materials to a contractor erecting a public building for a municipal corporation for that city. The proceedings were based upon the provisions of section eighty of the Consolidated Municipal Act, 1903, which provides, that "no person having by himself or his partner an interest in any contract with or on behalf of the corporation, or having a contract for the supply of goods or materials to a contractor for work for which the corporation pays, or is liable, directly or indirectly to pay, or which is subject to the control or supervision of the council, or of an officer thereof on behalf of the council, or has an unsatisfied claim for such goods or materials . . . shall be qualified to be a member of the council of any municipal corporation."

That Homan purchased, or ordered in his own name, practically all the goods and materials which, until the beginning of these proceedings, went into the building, and became personally liable for the cost of same, that his teams delivered quantities of the material upon the ground, and that money for wages of workmen employed upon the building was paid from his office by his stenog-

rapher, were facts not seriously contested upon the hearing. Men do not ordinarily supply hundreds of dollars worth of material and cash for wages without having some contractual rights against the person to whom the same are furnished, and in the absence of any satisfactory evidence to the contrary, or of any explanation by Homan, who abstained from giving evidence, I think the conclusion is irresistible that Homan had a contract for the supply of goods or materials to a contractor, &c., and did supply them within the meaning of section eighty of the Act.

The object of this legislation clearly is to prevent any one being elected to, or holding a seat in, a municipal council, whose personal interests might clash with those of the municipality; and in this case if Homan is allowed to retain his seat, and any question should arise between the corporation and the contractor for whose benefit Homan had furnished the material, &c., such as a question, whether the contract had been duly and properly completed entitling the contractor to be paid, thereby possibly embarrassing Homan's ability to realize the amount he had advanced, for material and money, he might be tempted to vote, or use his influence as a member of the council, in favour of the contractor and against the interests of the corporation. It is of the utmost importance that members of a municipal council should have no interests to bias their judgement in deciding what is for the public good, and they should strive to keep themselves absolutely free from the possibility of any imputation in this respect.

The appeal was dismissed but without costs, on account of certain irregularities in the proceedings.

(The King on the relation of Slater v. Homan, Ontario, W. N., 1334.)

Damages for Alleged Negligence Refused.

In the case of Edward Hanley vs. Cummer Ice & Coal Company, the plaintiff asked the county court judge at Hamilton, to award him \$500 for injuries received, while an employ  e of that company. Hanley claimed, that

he fell through a hole in the company's ice-house, owing to the fact that the light was so poor he could not see it. He further alleged that it was dangerous to allow the hole to remain uncovered, and that it would have been a simple matter to guard or cover the hole and thus prevent an accident such as befell him. In falling his knee cap was torn, knee sprained and leg bruised. As a result he was confined in an hospital for two weeks and had to undergo an operation, which will have to be repeated in the near future. A number of witnesses, who had seen the hole, proved that the place was dangerous to public safety. After all the evidence had been submitted Judge Snider held that negligence on the part of the company had not been shown and he granted a non-suit.

Contract to Sing Not Assignable.

Upon an appeal by plaintiff to a Divisional Court from the judgement of the County Court of York, it appeared that the action was by plaintiff personally and as assignee of some three others to recover \$150 alleged to be due from defendants to plaintiff under a contract with plaintiff and his assignors to sing for defendants, who are the president and cantor, respectively, of the Goll Tzedoc Congregation of Toronto. At the trial the Judge held these contracts were not assignable and dismissed the action as to them, and offered to give judgement for plaintiff for \$35 and Division Court costs, with right of set off. The Divisional Court held that the objections in law to the maintenance of the action were in their opinion two fold: the contract itself was inherently of a non-assignable character, and, secondly, the possible damages, separated by means of the assignment, were not susceptible of being enforced in the court by the assignee in his own name. The appeal was dismissed with costs.

QUEBEC CASES.

Domestics Deserting Employment.

Desertions on the part of domestics, who have crossed the ocean and entered on contracts, are becoming frequent in

some parts of Montreal, and in consequence of complaints, on this score, the police are looking after such young women. Maggie McCurdy, one of those arrested on a charge of desertion, had been brought over by her employer, who had paid the passage money, but, after a month's service in the household, the new arrival abruptly quitted her employer. She was bailed out on \$8 to come up again before the Magistrate, and will either have to go back or refund her passage money.

Treatment of Alleged Deserting Sailors.

Judge Leet has ruled that a number of sailors, who were arrested for deserting their employment, but who denied the charge, would not languish in jail until the return of the Canadian Pacific Railway SS. *Milwaukee*, from which they were accused of having deserted. The Court remonstrated over the way the arrests for desertion were being effected. It was shown that, for each deserter arrested by the special constables, one dollar was collected by the officer. The men claimed that they had no intention of jumping their contract with the boat, but were just on the wharf for a few hours whiling away the time. These men will have to be arrested in future by an officer from headquarters carrying a warrant duly sworn in the police court office. The accused were all released.

ALBERTA CASE.

Implied Warranty as to Machinery.— New Agreement and Breaches Prior Thereto, &c.

An appeal from the judgement of the Supreme Court of Alberta, affirming the judgement of Mr. Justice Beck at the trial, by which the plaintiffs' action was maintained and the defendant's counter-claim was allowed for an amount equal to the plaintiffs' claim, one judgement being set off against the other and general costs allowed to the defendant. The plaintiffs' company brought the action to recover the balance due on the price of machinery sold, under the agreement hereinafter mentioned, and the defence

and counter-claim set up that the plaintiffs' had warranted the machine sold as fitted for the purposes for which it was manufactured and intended, that it did not fulfill the warranty and was defective in many respects, and the defendant claimed damages for breach of the contract of warranty.

At the trial Mr. Justice Beck entered judgement for the amount of the plaintiffs' claim without costs, and awarded a similar amount to the defendant on the counter-claim with costs, the defendant's judgement to be set off against the plaintiffs' judgement. The result was a judgement in favour of the defendant for the general costs of the action. This decision was affirmed by the judgement of the Supreme Court of Alberta. The plaintiff company appealed to the Supreme Court of Canada.

It appeared that R. and N. purchased threshing machinery from the company, in November, 1906, under an agreement similar to that in part quoted below, and gave notes for the price. They dissolved their business connection, after using the machine for some time, and, in March, 1907, after the threshing season was over, N. was released from his obligations under the agreement, the notes signed by R. and N. were cancelled, and R. gave the company his own notes in their place and entered into a new agreement containing the following provisions: "The said machinery is sold upon and subject to the following mutual and interdependent conditions, namely: It is warranted to be made of good material, and durable, with good care and with proper usage and skilful management to do as good work as any of the same size sold in Canada. If the purchasers after trial cannot make it satisfy the above warranty written notice shall, within ten days after starting, be given both to the company at Winnipeg and to the agent through whom purchased, stating wherein it fails to satisfy the warranty and reasonable time shall be given the company to remedy the difficulty, the purchasers rendering necessary and friendly assistance together with requisite men and horses; the company reserving the

right to replace any defective part or parts; and if the machinery or any part of them cannot be made to satisfy the warranty, it is to be returned by the purchaser free of charge to the place where received and another substituted therefor that shall satisfy the warranty, or the money and notes immediately returned and this contract cancelled, neither party in such case to have or make any claim against the other. And if both such notices are not given within such time, that shall be conclusive evidence that said machinery is as warranted under this agreement, and that the machinery is satisfactory to the purchasers. If the company shall at purchaser's request render assistance of any kind in operating said machinery, or any part thereof, or in remedying any defects, such assistance shall in no case be deemed a waiver of any term or provision of this agreement, or excuse for any failure of the purchasers to fully keep and perform the conditions of this warranty. When at the request of the purchasers a man is sent to operate the above machinery, which is found to have been carelessly or improperly handled, said company putting same in working order again, the expenses incurred by the company shall be paid by said purchasers. This warranty does not apply to second hand machinery. It is also agreed that the purchasers will employ competent men to operate said machinery. There are no other warranties or guarantees, promises or agreements, than those contained herein. All warranties are to be inoperative and void in case the machinery is not settled for when delivered, or if the printed language of the above warranty is changed whether by addition, erasure, or waiver, or if the purchasers shall in any respect have failed to comply herewith."

Some defects in the machinery had given rise to complaints during the previous threshing season, and had been rectified by the company before the execution of the second agreement; they also made further repairs during the autumn of 1907, and then notified R. that future repairs must be at his own expense. R. paid the first instalment of the price of the machinery, but, when subsequently sued on his other notes, contested the claim, pleaded breach of an implied warranty of fitness and counterclaimed for damages for this breach.

The Supreme Court of Canada held, that all claims for damages for breaches of any kind, prior to the second agreement, had been waived by that agreement, and that the provision that there were no other warranties, guarantees, promises or agreements than those contained in the agreement excluded all implied warranties.

The Court further held, that the condition requiring written notice of breach of warranty applied only to the warranty that "with proper usage and skilful management" the machinery would "do as good work as any of the same size sold in Canada," and that it had no application to the warranties that the machinery was "made of good materials" and would be "durable with good care."

The consideration for the release of N., and the acceptance of the sale liability of R. for the price of the machinery, was the execution of the new notes and agreement which involved the relinquishment by both parties of all their rights under the first agreement.

The appeal of the plaintiff company was allowed with costs.

(Sawyer & Masey Company v. Ritchie, 43 S. C. R., 614)

THE LABOUR GAZETTE

AUGUST, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JULY, 1911.

I.—GENERAL SUMMARY.

DURING the month of July prosperous conditions prevailed in nearly all branches of industry throughout the country, with but few exceptions. Prospects of a good harvest in the west continued to be bright. Manufacturing industries were stimulated in anticipation of an abundant harvest. Great activity continued in the coal mines of Nova Scotia, but the prolongation of the coal strike in Eastern British Columbia and Alberta caused a depression in the localities immediately affected by it. A special feature of the month was the exceptional activity in building operations, the supply of labour generally equalling the demand, but anxiety was felt in some of the agricultural districts lest the supply of labour that would be required for harvesting the western crop might be inadequate—

Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during July, 1911.

Building trades.—Bricklayers and masons (750) at Winnipeg, Man., received an advance from 62½ cents to 67½ cents per hour, and a reduction from fifty-four to fifty-one hours per week. Carpenters and joiners (800) at Montreal, Que., received an advance from 30 cents to 35 cents per hour. Plumbers (ninety

and steamfitters (twenty-five) at Calgary, Alta., received an advance amounting to from \$24.20 to \$25.30 per week, to be increased to \$26.40 on July 1, 1912. Structural iron workers (300), at Winnipeg, Man., received an advance from 40 cents to 50 cents per hour.

Metal trades.—Iron moulders (fifty) at Moncton, N.B., received an advance of twenty per cent. in their wages. Iron moulders at Guelph, Ont., were granted an increase from \$2.75 to \$3 for day workers, and from \$3.50 to \$3.70 per day on the average for piece-workers. Sheet metal workers (sixty-five) at Calgary, Alta., received an increase from 42½ cents to 45 cents per hour.

Printing trades.—Linotype operators and newspaper printers (120) at Vancouver, B.C., received an advance from \$25 to \$29 per week for day work, and from \$27 to \$31 for night-work, the increase dating back to January 1.

Railway service.—Checkers and freight foremen of the Intercolonial Railway were granted an increase of \$5 per month.

Civic employés.—Cement workers (seventy-five) employed by the Corporation of Victoria, B.C., received an increase from \$2.75 to \$3 per day. Pavers, street repairers, and drain diggers at Quebec, Que., received an advance from \$1.75 to \$2 per day, dating from August 1.

Miscellaneous trades.—Early closing on Wednesdays during the months of July and August went into effect in many retail shops at Halifax, N.S.

Interruptions to Industry.

Among industrial establishments, &c., destroyed by fire or through other causes, during July, 1911, as reported in the press of the Dominion, the following may be mentioned:

Nova Scotia.—Six buildings at Canso, loss, \$14,600; store, dwelling and barns at Elmsdale, loss unknown.

New Brunswick.—Cathedral at Fredericton, loss \$75,000.

Quebec.—Lumber yards at Aylmer, loss \$550,000; paper mill at Calumet, loss \$200,000; portion of commercial and residential section of Calumet, loss \$1,000,000; portion of commercial and residential section of Farnham, loss \$350,000; twelve dwellings at Longue Pointe, loss \$75,000; sheds containing hay and coal at Montreal, loss \$18,000; dwellings and sheds, Montreal, loss \$20,000; cold-storage warehouse, Montreal, loss \$20,000; laundry at Quebec, loss \$50,000; business section and dwellings at St. Jerome, loss \$150,000; cold-storage warehouse at St. Albans, loss \$50,000.

Ontario.—The towns of Cochrane, South Porcupine, Kelso and Pottsville in Northern Ontario destroyed, loss estimated at \$1,500,000; business block at Aylmer, loss \$23,000; barns and silo, Brockville, loss unknown; hotel and other building at Cobalt, loss \$16,000; furniture store at Chatham, loss \$30,000; hotel and offices at Cornwall, loss unknown; two-thirds of the business section of Eganville, loss \$450,000; nine dwellings at Embury, loss \$10,000; barns and contents at Exeter, loss unknown; barns and contents at Cole Harbour, loss unknown; grandstand at Hamilton, loss \$125,000; moving picture theatre at Kingston, loss \$2,000; gypsum mill at Lythmore, loss \$75,000; barns and contents at Lambeth, loss unknown; barn and contents near Madoc, loss unknown; town of Maxville, loss \$100,000; cement plant at Shallow Lake, loss unknown; lumber yards at Sarnia, loss \$265,000; business block at Sault Ste. Marie, loss \$15,000; twenty farms in the townships of Hosmer, Capreol, Wisner and Hutton, near Sudbury destroyed by bush fires; building of ore reduction plant at Thorold, loss \$15,000; sawmill at Wakefield, loss \$2,000; Hotel at Windsor, loss \$4,000; barns with contents at Lucknow, Strathroy, and Malachi, losses unknown.

Manitoba.—Homesteads in prairie fires, losses unknown; homesteads, timber and railway bridges throughout Northern Manitoba and Saskatchewan burned, caused by bush fires, losses unknown; flour mills, elevator and engine room at Gilbert Plains, loss unknown; tent and mattress factory at Winnipeg, loss \$15,000; garage, automobiles and gasoline at Winnipeg, loss \$250,000; grand stand at Winnipeg, loss \$75,000.

British Columbia.—Lumber mill at Burrard Inlet, loss \$20,000; lumber mill at Vancouver, loss \$10,000; Hotel at Vancouver, loss \$3,500; city market buildings, Victoria, loss \$2,500, shops and offices at Powell river, loss \$35,000; shipyards at North Vancouver, loss \$50,000; dry kiln and lumber yards at Port Moody, loss \$15,000; restaurant and two shops at Vancouver, loss \$10,000. At Squamish, forest fires did damage to the extent of \$14,000.

According to an estimate of the *Monetary Times*, the fire losses in Canada for the month of July amounted to \$5,384,300, as compared with \$1,151,150 for June, and \$6,386,674 last year. Forest fires contribute very materially to the list of losses, especially of those in Northern Ontario and British Columbia.

Conditions in the Industries and Trades.

Conditions of employment during July in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received by the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Favourable conditions prevailed with regard to agricultural crops in most districts of Canada during July. The farmers were chiefly engaged in harvesting their hay crop. The yield of hay was short, owing to drought, in Southern Ontario, but in other places there was a fair crop.

Some damage was caused to the small fruits in the Niagara district by excessive heat at the beginning of the month.

In the West the grain crops were somewhat retarded by cold weather, but otherwise the prospects are very favourable. Steps were taken by the Immigration authorities and the Railway Companies to provide a sufficient supply of labour for the harvest in the West, and they reported the prospects for securing enough men were very good. It was estimated that about 40,000 men would be needed to handle the Western harvest.

The *Census and Statistics Monthly* for July states that at the end of June the condition of winter wheat was 75.26, compared with 100 for a full crop. In Ontario it was 73 per cent. of a full crop, and in Alberta 83.22 per cent. Spring wheat in all the Provinces was given the high average of 94.78 per cent., an improvement of 12.62 per cent. over 1910. In Saskatchewan and Manitoba it is close to one hundred per cent. The average for barley was ninety-three per cent., for oats 94.46 per cent., and for rye, peas, and mixed grains about ninety per cent. In the three North West Provinces the condition of pasture is over one hundred per cent. There was an increase of nearly 300,000 acres in the area devoted to flax. There is

not much change in the price of live stock, but their condition at the end of June was very satisfactory, all classes being within less than two points of 100.

The preliminary estimates of the 1911 wheat harvest received at the Department of Agriculture from the International Agricultural Institute at Rome, on July 22, were as follows:

Belgium 14,054,000 bushels compared 12,449,000 last year; Hungary 173,886,000 compared with 198,484,000; Italy, 196,579,000 compared with 153,339,000 last year; Spain 154,437,000 compared with 137,449,000; Roumania 121,710,000 compared with 110,828,000; Great Britain 61,351,000 compared with 58,235,000 in Great Britain and Ireland last year. Conditions in Russia satisfactory.

Reports from France pointed to yield of about 320,000,000 bushels, against 253,000,000 in 1910. In Germany a yield of about 136,000,000 bushels was reported, against 142,000,000 in 1910. Good yields were anticipated in Turkey, Upper Egypt, and Algeria.

Fishing.

The fishing industry in the Maritime Provinces was reported not to have been as good as in the previous year. The catch of lobsters was not very large, but high prices made up for the limited supply. The run of spring salmon in the northern rivers of British Columbia was reported to be unusually good. Whaling in the Pacific was better than in the previous season.

The fishery regulations for the Province of Manitoba and District of Keewatin, established on May 1, 1911, were amended by Order-in-Council by the addition of the following section:

"Fishing for sturgeon in the Province of Manitoba or District of Keewatin is prohibited for a period of four years from January 1, 1912."

Section 13 of the Fishery Regulations for Manitoba, established on May 1, 1911, was rescinded, and the following substituted:

"The use of gill-nets for winter fishing shall be permissible from November 20

in each year to the last day of February following, both days inclusive."

Lumbering.

The lumber industry was reported to be in a fairly satisfactory condition, but in Nova Scotia the export trade was hampered by scarcity of steamers, and in Quebec and Ontario by a shortage of cars. Much damage was done by forest fires in Nova Scotia and Ontario.

With a view to the conservation of timber and the protection of forest from fire, the yearly Dominion timber licence for permission to cut timber in the railway belt in the Province of British Columbia is amended by adding the following clause: That the licensee shall prevent all unnecessary destruction of growing timber on the part of his men and exercise strict and constant supervision to prevent the origin and spread of fire, and shall also comply, during the term of the license and of any renewal thereof, with all regulations made in that respect by the Governor-in-Council and with all laws and regulations in that respect in force in the province or territory in which the berth is situate.

Mining.

Great activity prevailed in the coal mining industry of Nova Scotia, the output of the producing mines having increased and new mines having been opened up. Coal mining in Eastern British Columbia and Western Alberta was at a standstill, owing to the continuance of the strike. A disastrous fire in the Porcupine district caused a serious loss to a number of mining companies. The production continued to be steady in other parts of Canada.

Manufacturing.

Active conditions continued in most branches of manufacturing throughout the country. Agricultural implement factories were particularly busy.

Railway Construction.

Great activity prevailed in railway construction during the month, but

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, active, very active; (2) quiet and very quiet.

there was an adequate supply of labour.

According to announcement, about 120 miles of new track will be laid in the province of Saskatchewan during the present year by the Canadian Pacific Railway Company, The Grand Trunk Pacific Railway Company, and the Canadian Northern Railway Company. In addition to this, it is estimated that about 1,350 miles of new grading will be done in that province.

General Transport.

Railway earnings continued to increase and activity prevailed throughout the country.

The following statistical report of Lake Commerce through the United States and Canadian canals at Sault Ste. Marie, Michigan and Ontario, for the month of July, 1911, was compiled under the direction of Col. C. McD. Townsend, Corps of Engineers, United States Army.

Short tons are tons of 2,000 pounds.

The Trades.

Building.—There was great activity in the building trades in nearly all the principal cities and towns of the Do-

minion. The cessation of a general strike in the building trades at Vancouver, B.C., caused a revival in the building trades during the last week of the month. The only localities where

conditions were dull among builders were: Halifax, N.S., Newcastle, N.B., Port Arthur, Ont., and Fort William, Ont.

The building permits during the first six months of 1911 in Canada, amounted to the value of \$64,746,811, compared with \$49,583,399 in the corresponding period of 1910. The highest percentage of increase over the corresponding month of 1910 was at Prince Albert, Sask., with an increase of 582.7 per cent. Guelph came second, Windsor third, and Calgary fourth. Reckoning the amount of building per capita in the principal cities, Calgary ranked first with \$164.25, followed by Saskatoon with \$160.96, and Regina with \$154.57.

Metal and woodworking.—Active conditions prevailed in the metal and woodworking industries.

Printing and allied trades.—Printers and pressmen in allied trades were well employed in most localities, but in some places job printing was quieter than in the preceding month.

Clothing.—Journeyman tailors, hat and cap makers, boot and shoe workers, &c., were well employed.

Leather.—Leather trades were active in most localities.

Food and tobacco preparation.—Bakers, confectioners, and butchers were well employed, and active conditions prevailed also among cigar and tobacco makers.

Miscellaneous.—Hotel and restaurant employes were actively employed, on account of the tourist season. Retail clerks were not so well employed as in the previous month, many people having left the towns for the summer months.

Unskilled labour.—Great activity prevailed among unskilled labour, large works being carried on in many municipalities. In some places the supply of unskilled labour was not equal to the demand.

Canadian Trade and Revenue.

Foreign and Imperial trade.—During June, 1911, the total value of imports entered for consumption in the Dominion of Canada was \$43,936,881, compared with \$39,705,237 in June, 1910.

During the three months ending June 30, the total value of imports amounted to \$122,353,584, compared with \$109,384,187 in the corresponding months of 1910. The total value of domestic imports during June was \$23,525,420, compared with \$24,793,824 in June, 1910. During June there was an increase in the export of fisheries, agriculture, and miscellaneous merchandise, and a decrease in the export of the products of the mines, forests, and animals and their products, and manufactures, compared with June, 1910. The grand total of Canadian trade for June, 1911, was \$69,710,369, compared with \$66,011,824 in June, 1910.

In the reports of the Canadian trade commissioners issued during July, an account is given of the imports of timber into South Africa, and the kinds of Canadian woods for which there is a demand in that country. A market exists there for Canadian spruce and Douglas fir. The imports of lumber into South Africa have been steadily increasing during the past three years. An account is given of the British imports of food materials during 1910, taken from a special supplement of the *London Chamber of Commerce Journal*. This shows that 48,116,138 cwt. of wheat is imported into the United Kingdom from British possessions; the total from foreign countries is 57,106,500 cwt.. Imports of wheat meal and flour amounted to 3,204,101 cwt. from British possessions, of which 2,783,701 cwt. came from Canada. With respect to cheese, eighty-four per cent. of the total imports to Great Britain came from within the Empire, the imports from Canada amounting to 1,607,064 cwt. out of a total amounting to 2,456,340 cwt. from all countries. It is stated that the Canadian cheese trade is not expanding. A summary is also given of the British imports of minerals and metals in 1910, taken from a special supplement of the *London Chamber of Commerce Journal*.

Domestic trade.—Trade conditions continued to be generally satisfactory. Retail trade was somewhat quieter than in the preceding month owing to the holiday season. The wholesale trade is reported to be fairly satisfactory for the

summer season. Business failures during the first half of 1911 numbered 961 with a total amount of liabilities of \$6,492,736, compared with 761 failures and a total amount of liabilities of \$7,629,359 in the corresponding period of 1910.

The bank statement for June, 1911 showed an increase in circulation, deposits and current loans. The circulation of notes amounted to \$88,618,699 in June, compared with \$81,862,218 in May. Bank deposits amounted to \$874,672,408 in June, compared with \$860,993,354 in May, and current loans in Canada amounted to \$717,869,386, compared with \$708,093,677 in May.

The bank clearings for the month of July, 1911, amounted to \$613,258,000 compared with \$537,107,000, in July,

1910, an increase of \$76,156,742 or 14.1 per cent.

Note.

One of the unfinished items of Government business remaining on the Order Paper of the House of Commons on July 29, when the dissolution of Parliament was announced, was the second reading of a bill entitled "An Act to prohibit the Manufacture and Importation of Matches made with White Phosphorus." The principle of this measure was assented to by the House of Commons on January 19. A bill based on the resolution was introduced on the same day. Owing, however, to the pressure of other Government business, the bill in question was not further proceeded with during the past session.

II.—REPORTS OF LOCAL CORRESPONDENTS.

DURING the month of July, Mr. D. P. Grant was appointed local correspondent for New Westminster, B.C., and district, and Mr. Norman Mackintosh for Prince Rupert, B.C., and district. On August 1, Mr. R. B. Allen was appointed correspondent for Fredericton, N.B., and district.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions were active during the month, and all classes of labour were well employed. The steel and coal trades were active. The wood and other factories were busy. The building trades, the tar and chemical works, the cement and other works were all active. Increased outputs were obtained from nearly all the large collieries, and the demand for coal was good. The New Waterford district is rapidly growing and new collieries are being opened up. Many houses are in course of construction, new streets are being made, and the new town is rapidly assuming large

proportions. During the month of June four blast furnaces were in continuous operation and are still running. The increased production of pig iron made it possible to keep the steel department more fully supplied with raw material, and as a result the output of ingots in June was the largest in the history of the Company. The output in July was somewhat less, but even then it was large. The June shipments were heavy. On account of the passing of the rod bounty on July 30, an effort was made to dispose of the whole tonnage of the mill. The effect of this was to stock the market and for a time shipments of rods may be lighter than in former months and the mill may be shut down for a time. Rail shipments continued brisk, principally by water to the Great Lakes and Northern Quebec. Large importations of ore and limestone are being made with a view to building up a stock of material for four blast furnaces during the winter season when transportation is more difficult and more expensive. During the past six weeks progress upon new work under construction has been more noticeable. The new turbo-electric plant is practically complete. The whole of the new coke ovens have gone into opera-

tion and are producing a satisfactory grade of coke. The plate work of No. 6 blast furnace is complete, and lining will be commenced immediately. The foundations of No. 7 furnace are beginning to show. Foundations for the new wire and nail mills are completed and the erection of the steel frame work will begin as soon as the material now being fabricated is ready. The big open hearth furnaces are slowly but surely approaching completion, and will be ready to do their part in the program of advance when the completion of No. 8 blast furnace makes it possible to keep four furnaces continuously in operation. Work is actively in progress on the new coal washer in connection with the Coal Company's shipping piers and the timber is being prepared for a new pier. The supply of labour has been fairly equal to the demand so far and there has been less delay and inconvenience this season than was experienced a year ago. The Sydney Mines steel and coal works continued active and had a good month. The building trades are having the best season in years, the estimated cost of the buildings under construction being close on \$4,000,000, or twice the amount spent in building last year. Transportation by rail and water was brisk. A branch railway, one and one-half miles long, is being laid into Birch Grove colliery to connect it with the main line. The wholesale and retail trades were normal. Labour was well employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops are doing very well, but the excessive rains were a great hindrance to the making of hay. The hay crop is a good average.

Fishing.—Bait continues scarce, but fish is reported plentiful; and those who are able to obtain bait secured good catches.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were active, and skilled labour was well employed.

WESTVILLE, N.S., AND DISTRICT.

Mr. Tom Hale, correspondent, reported as follows:

GENERAL CONDITION OF LABOUR.

There was no change in the busy conditions of the labour market in this town and district since last month. All branches of industries continued brisk. Farmers were exceptionally busy, gathering on the whole a fair hay crop. The mines of this district showed, during June, an increase in their shipments of about 5,000 tons, over the corresponding month of 1910. As far as can be learned, the collieries at Spring Hill, Cumberland County, are again assuming their old time energy. There are nearly 1,000 men working, and sinking operations have again commenced, which means that there will be more places made ready for more men in the near future. The pay-roll for the fortnight was around the \$25,000 mark. It is considered by some that the Mabou Mine, which was abandoned some months ago, owing to water breaking in, has a favourable outlook to be regained, as the action of the water with the tide makes people think that the rock fissures are filling up with silt and stopping the inflow of water. The Mines Department of this Province is gathering data in reference to the coal dust and humidity of the different collieries. This information is considered to be meant to try to prevent violent explosions, which generally take place during the winter months, sometimes with serious results.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — Farmers were busy gathering in the hay crop, and attending to their root crops. Considerable loss has been caused throughout this district to the vegetable and root crops, this season, by the cut worm pest. This pest and the Colorado beetle (potato bug) have given farmers and gardeners considerable trouble.

Fishing and lumbering in this district were quiet.

Manufacturing.—All branches of this industry throughout the district were in general very brisk.

Mining.—This industry throughout the district continues busy, with a shortage of men. The Drummond colliery is so far making fair progress in mining the bottom coal.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were actively employed, and the supply of unskilled labour did not meet the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent reported as follows:—

GENERAL CONDITION OF LABOUR.

The past month, industrially speaking, has been about the same as June. Work in the building trades has been quiet; the building permits, as far as new structures are concerned, being less than the previous month. The principal permits were for dwellings, valued respectively at \$4,000, \$3,500 and \$2,500. Still, taking the half-year as a comparison the present year exceeds the record of 1910 as far as building permits are concerned. For the first six months of 1910, the total value was, \$176,450 as against \$211,150 for the same period in the present year. But indications for the future point to an improvement. Tenders are being asked for new banking alterations and structures, which amount to a substantial sum; a contract has just been awarded by the city for the construction of a \$54,383 school house, while the specifications have been received for the new shed on the Government piers, and tenders will be called for at once. The temporary building is to be 378 feet x 54 feet and will be built under fair wages conditions.

Work along the waterfront has been quiet, which is generally the case at this season. But considerable activity has prevailed on the city works, where about \$17,000 has been expended during the month on street cleaning and sewer construction. Butcher shops, groceries,

boot and shoe stores and some of the fruit and variety stores have agreed to close Wednesday afternoons during the months of July and August.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—It is too early to get an accurate estimate on crops, but dry weather has prevented advancement up to average in some localities. Fruits, however, promise fair results.

Some late month wholesale prices:

Butter, creamery, prints, 25 cents.
Dairy, butter, creamery prints, 21-22 cents.
Cheese, large, 12½-13 cents; twins, 13 cents.
Eggs, fresh, 19-20 cents.
Beef, forequarter, 7-8½ cents.
Beef, hindquarter, 8-11½ cents.
Mutton, 7-9 cents.
Veal, 6-8½ cents.
Spring lamb, 14 cents.
Hams (smoked) 16-18 cents.
Hams (fresh) 16 cents.
Geese, 16 cents.
Ducks, 17 cents.
Fowl, 12-15 cents.
Bacon, roll, 13½ cents.
Bacon, side, 16 cents.

Fishing by local fishermen has resulted in poor catches.

Manufacturing has maintained a good average.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet. Carpenters and joiners were fair. Painters, decorators, plumbers were not as busy as in June. Stonecutters and builders' labourers were dull. Electric workers were fair. Boilermakers were not as well employed as in June. Blacksmiths and horseshoers had an average month. Printers were not as busy as in June. Pressmen and bookbinder had a fair month. Tailors showed falling off from June. Bakers, confectioners, butchers, meat cutters and ironmen had a good average month. Barberbers were busy. Hotel, restaurant and laundry employés had a good month. Transportation men had average employment, but longshoremen had a falling off from June. Unskilled labour had a fair month.

DISTRICT NOTES.

Shelburne.—A new steamer, the *Bert G. Cann*, was launched July 1

She is 124 feet long, 25 feet wide, 9 feet deep, and has spacious passenger accommodation.

AMHERST, N.S. AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions throughout Cumberland County during the past month, have been on the whole very satisfactory. At Springhill, the company has been steadily augmenting its working staff until at the present time there are only about a hundred miners who have not been taken back to work, and it is anticipated that within a short time, all the miners will be given places in the mines. The feeling in Springhill after its twenty-two months' siege is most hopeful. The Company, the men, and the merchants of the town are optimistic with regard to the future of the collieries at that place. The Eastern Coal Company, which was largely controlled by prompt capitalists, ceased work some months ago, and went into liquidation. It was sold on July 27, by the Sheriff, for \$1,000 after the company had expended two or three hundred thousand dollars on the property. Building operations in Amherst and indeed in a number of other parts of the county have been fairly active this year. There is employment for all who desire to work. Farmers in the vicinity of Amherst are complaining very much with regard to the scarcity of labour, and farm help in Eastern Canada is growing to be an acute question. Wages have remained fairly steady. No important increases or decreases have been reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—With the exception of the hay crop, which is decidedly light in this section of Nova Scotia, the farmers throughout the county report prospects good for a bountiful harvest. The grain and root crops are exceptionally good, as there were large quantities held over from last year for want of a market

there will be no serious want felt on account of the shortage of the hay crop this year. Prices for farm produce continued good.

Fishing.—The lobster season closed by the middle of July. The packers along the Northumberland Strait report the catch smaller than for some years, but prices are good and the lobster packers will stand to gain as much by the increased prices as they would lose by the small catch.

Lumbering.—Lumber shippers are complaining severely with regard to the scarcity of steamers to convey the Nova Scotian cut to foreign markets. It is almost impossible to charter vessels this season, and as a result a large quantity of lumber will have to be held over until next year. An extensive forest fire prevailed in this county during the month, sweeping over fully two hundred square miles of valuable timber land. A number of the heavy operators in the county lost heavily by this fire.

Manufacturing.—All the industries in Amherst and vicinity were working actively, employing a larger complement of hands than usual, and the outputs of all the concerns were increasing. The Car Company is rapidly pushing its new buildings to completion, and will move into them early in September. At present the output of the Car Works is rather limited owing to lack of room for work.

Mines.—The mines in general were working steadily with increasing outputs.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were well employed. Carpenters and joiners were active. Latherers and plasterers were very busy. Painters were busy. Paper hangers and decorators were rather dull. Plumbers were active. Stone cutters were steadily employed. Iron moulders were busy. Iron workers and helpers were well employed. Machinists, engineers and electrical workers were very busy. Boiler makers were all employed. Woodworkers in general were busy. Upholsterers were fairly well employed. Car builders were active in most of the Departments. Pattern makers were

busy. Printers were well employed. Pressmen were busy. Journeymen tailors were well employed. Garment makers were active. Boot and shoe makers were very busy. Bakers and confectioners were busy. Butchers and meat cutters reported steady work. Trunk and bag makers were very busy. Clerks and stenographers were fairly well employed. Furriers reported business dull. Unskilled labour was well employed.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during the month of July differed little from that of June, supply and demand being well balanced. The month may be said to be the high water mark of labour, as all departments were in full swing. In Charlottetown, the remodelling of the new Royal Bank the building of Zion Church, the annex to Notre Dame Convent and other works gave employment to a large number of men. In other parts of the island the building of the Tracadie Breakwater and of the Elmira branch railway were other important sources of employment. At the latter work, a sufficient number of men could not be procured in this Province, and a number had to be brought from the mainland. The tourist traffic was up to the usual volume, and hotel business was increased accordingly. Wholesale and retail merchants reported a good trade.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of the month found hay making in full swing throughout the Province with the prospects of a lighter crop than other years, owing to the want of rain. Along other lines, however, prospects are for an average yield.

Fishing.—The lobster season closed on June 20, except over a limited por-

tion of the coast. This year an extension of ten days has been granted. Mackerel and cod fishing will be carried on by a number of the lobster men until they are ready to take up oyster fishing in September.

Manufacturing.—The few factories in this Province were carried on under normal conditions, the supply of labour equalling the demand.

Railway construction and employment.—The building of the Elmira branch railway and the preparations for the construction of the new stations at several points on the main line, were among the chief features of the construction work this month. The situation with regard to employment showed no change from that of June.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, decorators and paper hangers were busy. Plumbers, gas and steam fitters, stone cutters, and builders' labourers were active. Iron moulders, iron workers and helpers, machinists and engineers, steam engineers, electrical workers, linemen, sheet metal workers and bicycle workers were active. Woodworkers, upholsterers, carriage and wagon makers, and cabinet makers were active. Printers, pressmen and bookbinders were active. Journey men tailors and garment workers were busy. Boot and shoe workers were active. Bakers and confectioners, butchers and tobacco workers, were active. Tanners, curriers and saddlers were active. Barbers, clerks and stenographers, delivery employes and hotel employes were active. Railway conductors, locomotive engineers, firemen, railway telegraphers, trainmen, switchmen, trackmen, freight handlers, steamboat men and firemen, longshoremen, teamsters and expressmen were active. The demand for unskilled labour in its various branches was about equal to the demand.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The volume of employed labour this month considerably exceeded that of June, and fully reached the standard of the corresponding period of last season. Work upon the new annex to the Intercolonial Railway General Offices was rapidly pushed and furnished employment for a large number of carpenters, masons and stone cutters. Considerable building is in progress throughout the city and suburbs, though hardly up to the mark of last year. Contract for the construction of No. 4 Engine house has been awarded at \$11,098, and tenders are being called for the erection of a brick parsonage for the Methodist Church. The work of laying the gas main from the gas wells at Lower Coverdale to the city is well under way, about twenty-five men being employed, and two miles laid. A considerable force of men is also putting down the mains in the city and planting posts for the installation of the gas and street railway systems. Twenty thousand square feet of cement sidewalks have already been laid by the city, and tenders are being asked for the construction of a reservoir dam and in connection with the proposed extension of the city water works. Contracts calling for the construction of new plaster mills at Hillsboro to replace those destroyed by fire recently have been awarded to the Rhodes Curry Company of Amherst. The buildings and machinery equipment will cost in the vicinity, of \$100,000. The iron moulders employed by the Record Foundry and Machine Company, numbering about fifty men have been granted an increase of twenty per cent. The Intercolonial Railway Board of Management has granted increases of 5 per month to the freight checkers and freight foremen along the line of the Intercolonial Railway. The railway policemen also received a ten per cent increase. The employés of J. D. Creagh's Company have been granted a Wednesday half-holiday throughout July and August.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were actively

engaged at upland haying, weather conditions being very favourable. The crop is about one-third short of last season's. Marsh hay is promising well. All grain crops, potatoes and turnips are very thrifty and promise a large yield. Strawberries were not up to the average; blueberries are plentiful and apples abundant. Butter retailed at 20 cents per pound, and eggs at 20 cents per dozen. Country beef and lamb was scarce. Farm help was in good demand, experienced helpers receiving from \$1.00 to \$1.50 per diem and board.

Fishing.—The lobster season closed July 15, the pack at the various factories averaging a little better than last year.

Lumbering.—Saw mills are all actively working. Considerable shipments of lumber have been made from the different North Shore and Bay ports.

Manufacturing.—Humphrey's woollen mills, the cotton factory, Marvin's biscuit factory and the New Brunswick Wire Fence Company are actively operating to fill orders. All other local concerns reported steady conditions.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were in fair demand. Carpenters and plasterers were active. Painters were busy. Plumbers and stone cutters were active, and builders' labourers in moderate demand. Active conditions prevailed in all the metal and various engineering trades. Woodworkers, upholsterers, carmen, barrel factory hands and shingle machine men were active. Printers, pressmen and bookbinders were active, the local supply being sufficient for the demand. Journeymen tailors and garment workers were active. Bakers and butchers were active. Leather workers and saddlers were busy. Barbers were active. Clerks and stenographers were busy. Theatre employés and laundry workers were active. Railroad operating crews were in fair demand. Freight handlers were active. Teamsters and expressmen were busy. Demand for unskilled labour was very good, with wages rating from \$1.40 to \$1.75 per day.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:

GENERAL CONDITION OF LABOUR.

The labour market continued active during July, and the prospects look bright for the balance of the summer. Work is proceeding rapidly on the concrete foundation walls for the new armory, and tenders were invited for the new car barns for the St. John Street Railway Company, and a brick block for the Catholic Bishop of St. John. The paving of Pond, Mill and Nelson streets is well under way, giving employment to a large number of men and teams. The liquidators of the A. E. Hamilton Company, Limited, have concluded the sale of the mill property, plant, machinery, stock, &c., to the Christie Woodworking Company, Limited. The Imperial Oil Company has added to its plant at Courtenay Bay a large steel tank for the storage of gasoline. The control of York and Cornwall cotton mills has passed over to the Dominion Cotton Company. On the site of the new paper mill to be erected by the Edward Partington Pulp & Paper Company, Lancaster, boring for water is progressing favourably. The total value of exports to the United States from St. John for the quarter ending June 30, amounted to \$645,834.81, an increase of \$226,199.56 over the same quarter in 1910, when the value was only, \$419,635.25. A large portion of this increase was in lumber, laths increasing from \$95,000 in 1910 to \$124,970.10 in 1911; wood pulp from \$72,000 to \$85,777.21, and pulp wood from \$14,000 to \$37,950.45. Bank clearings for the five weeks ending July 27 were \$8,150,840, and for the corresponding period last year, \$8,061,808, being \$89,032 greater in 1911 than in 1910, and \$2,433,871 in excess of the four weeks ending June 21 of the current year. The deposits at the Savings Bank during June were \$81,182.50; withdrawals, \$101,193.17. For the four weeks ending July 27, the city cashier paid out in wages and salaries the sum of \$27,391.05. The employés of the Canada

Woodenware Company, South Bay, about seventy in number, went out on strike, July 24, for a nine-hour day. Their demand was acceded to. A Master Builders' Exchange was organized on July 10. A two days' session of the New Brunswick Dental Society was opened in Keith's Assembly Rooms on July 11. The thirty-first annual meeting of the New Brunswick Medical Society opened at the Court House on July 18. It was decided to hold the 1912 convention at Moncton. It was also decided to affiliate with the Canadian Medical Society. Owing to the scarcity of logs the rotary in Hilyard's mill, Chesley street, had to close down on July 27. The arrival of two large rafts from Fredericton booms did much towards relieving the situation.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from agricultural districts are to the effect that hay, oat and buckwheat crops are in fine condition. The grass looks well, and the oats are beginning to head. The potato crop promises a large yield.

Railway construction.—The work of double tracking the Intercolonial Railway from St. John to Coldbrook is almost completed. The rails have been laid, and the ballasting is now being finished. Owing to the rush of passengers from the United States extra cars had to be added to the early morning express on the Intercolonial Railway. The telephone system which is to replace the telegraph for despatching trains on the Atlantic division of the Canadian Pacific Railway is now complete from St. John to McAdam Junction.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were from active to busy, with the exception of ship-labourers, who were quiet. Unskilled labour was active.

DISTRICT NOTES.

Fredericton.—The York county councillors, on July 4, celebrated the fact that York county for the first time in its history was free from debt, and one of

the features of the evening was the burning of the paid-off bonds. Christ Church Cathedral was completely destroyed by fire on July 3; caused by lightning. The opening session of the Summer School of Science took place in the Provincial Normal School on July 12. The Alexander Gibson Railway and Manufacturing Company's lumber property was sold at auction to Messrs. Farnworth and Jardine, the Liverpool lumber dealers, on a bid of \$1,000,000.

Hillsboro.—The contract for the construction of new plaster mills at this place, to replace the works destroyed by fire some months ago, has been let by the Albert Manufacturing Company to the Rhodes Curry Company, Amherst. Some four or five buildings are included in the contract. The Dominion Government is calling for tenders for a handsome public building in this town, for use as a post office and customs house.

Plaster Rock.—A new industry has been started here largely through the efforts of the Industrial Department of the Canadian Pacific Railway Company. This is the shipment of crushed gypsum, for which an order for 15,000 tons is now being executed.

Maugerville.—The first official experiment to test the possibilities of tobacco culture in New Brunswick is being carried on this year at this section of Sunbury County on Messrs. Clark's farm.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Everything was quiet in the labour market, the supply being greater than the demand both in skilled and unskilled labour. The saw mills are running full time, but there is very little demand for the manufactured article. In fact, the sawn lumber is not worth much more than the logs and very little is being shipped. There has not been less doing in the building line for a number of years than there is this season. There was no change in the rates of wages. Wages

are pretty high. In fact, men are asking \$2 for haying. There was no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were just beginning haying. Hay is a much better crop than was expected. The crops in general are good.

Fishing has not been as good this season as last. The catch of salmon is not nearly as good as last year; neither was the catch of shad up to the usual catch.

Lumbering is not nearly up to the standard.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were almost idle. Carpenters and joiners were not rushed, but there was something doing in their line. Blacksmiths were always busy, and wages were good. Carriage makers were kept busy.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:

GENERAL CONDITION OF LABOUR.

The month has been a good one, the demand for labour of all kinds being brisk and well sustained. Work has been commenced on the new bridge which is to span the St. Charles river. The City Council has granted an exemption from taxes for ten years to both the Parisian Corset Company and the Quebec Glove Company. A statement of municipal receipts and expenses from May 1, 1910, to April 30, 1911, shows a surplus of \$52,290.85. The new building being constructed by the Quebec Railway, Light, Heat and Power Company is progressing satisfactorily, as well as the work of rebuilding the Custom House destroyed by fire two years ago. A consignment of seven carloads of underground conduits has arrived in the city for the National Telephone Company, which will shortly start the installation of its system. The labour market was

little affected by a strike of iron workers employed by Geo. T. Davie & Sons, at Lévis, which was settled by an officer of the Department of Labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy making hay. The crop is a good one.

Lumbering.—All the big sawmills in the district were working day and night.

Manufacturing.—The manufacturing concerns were busy with the exception of the boot and shoe factories, which were in their dull season.

Railway construction.—The small branch electric railway from Beauport to Montmorency has been finished and put in operation.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were from active to busy, with the exception of plumbers and glove makers who were quiet, and boot and shoe workers and tanners and curriers who were dull. Unskilled labour was equal to the demand.

DISTRICT NOTES.

Mr. Joseph Gosselin, of Lévis, was awarded the contract for a \$32,500 iron bridge in the municipality of St. Lambert. The second caisson for the Quebec Bridge was put in position in the early part of the month.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour of all descriptions was in demand during the month. Work on buildings is being rushed ahead, and a large contract has just been let for a monastery for the Redemptorists, who will settle here. The work being carried on by the city on new reservoir; and that by the Street Railway Company gives employment to a large number.

Wholesale and retail merchants report

business as being very good, and there seems to be plenty of money.

From reports received from the *Record's* correspondents throughout the townships, the hay crop was fully up to the average and was gathered in splendid condition. The other crops are reported as fully up to that of any previous, with the exception of potatoes, which are a small crop.

During the month considerable damage was done by electrical storms. Several barns in this section of the townships with season's crop of hay were destroyed. Quite a number of head of cattle were killed.

It is reported that the Quebec Central Railway Company has been taken over by the Canadian Pacific Railway Company and New York, New Haven and Hartford Railway Company. The price is said to be about \$5,000,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting is well advanced, and average crops are reported. Farmers complain of scarcity of help and high wages demanded.

Manufacturing.—All branches of manufacturing are running full time, and orders ahead.

Mining.—The various mines in this section are working to full capacity, and more men would be taken on if they presented themselves.

Railway construction.—The Sherbrooke Railway Company has a large force extending and relaying extension to their system.

Other Industries.—All industries in this place report work plentiful.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades are very busy. Iron workers, moulders and machinists are busy. Linemen are busy. Wood workers are busy. Printer active. Journeymen tailors and garment workers busy. Bakers and confectioners, butchers and icemen busy. Cigarmakers active. Miscellaneous trades busy. Transport men busy. Unskilled labour very much in demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was no change in the labour market from the preceding month. Conditions generally were busy and, on account of the difficulty of obtaining men, manufacturers were working overtime. The building contractors are still short of men, and there is room for many hands at The Wabasso Cotton Mill, at the Whitewear factory and at other factories also. There is exceptional activity in the saw mills, where they are also short of men. Commercial activity was also pronounced and business was good both in the wholesale and retail trade. Rates of wages remained on the high basis, there were no changes in hours of labour, and the best understanding prevailed between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—In the early part of the month owing to the dry weather, crops were not so well advanced as usual, but a few good heavy rain falls have helped everything greatly and now prospects are good on all the line.

Fishing was very dull.

Lumbering was very active.

Manufacturing was good, factories running full time.

Mining and railway construction.—These two industries were quiet.

Other industries.—The harbour was active with steamers unloading coal, pig iron and sulphur and loading lumber. The constructions for the Wayagamack Pulp and Paper Company are advancing rapidly but it will take several months before they are all completed.

CONDITION OF PARTICULAR TRADES.

All employed in the building trades were active. Iron moulders, iron workers and helpers and coremakers were

active. Machinists and engineers were fairly busy. Electrical workers and linemen worked full time. Blacksmiths, bicycle workers and horseshoers had plenty of work. Woodworkers, varnishers and polishers, carriage and wagon makers and pattern makers were active. Printers, pressmen and bookbinders were quite busy. Journeymen tailors and garment workers were active. Glove makers had to work overtime, and boot and shoe workers reported a good month. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers were very active, and the ice drivers were on a rush the whole month on account of the excessively warm weather. Tanners and curriers were quiet, but leather workers and saddlers were active. Barbers, clerks, stenographers, delivery employés; hotel, restaurant and theatre employés and laundry workers reported a good month. All employed for the transportation companies have been very active. There was a good demand for unskilled labour, but the supply was not up to the demand.

DISTRICT NOTES.

There has been plenty of work in the whole district this month, and especially at Grand Mère, Shawinigan Falls and at Cap de la Madeleine.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during the month was generally satisfactory; there was more activity than in the corresponding month of last year. The Dessaulles property, covering a large area, has been bought by a syndicate and divided into lots which are being quickly sold, which will give a new impetus to building operations. The sash and door industry was fairly active. The boot and shoe industry had a quiet month. The leather industry, though not quite

as active as last year, has improved, and the delay in the revival of activity is caused chiefly by the lack of hands. The month was fairly active in the iron trades, the various shops employing full staffs. The musical instrument factories had a very busy month with large orders ahead. The confectionery business was very active. Much activity prevailed in City works. Cement sidewalks are being built on a large scale and the City is having other public works done. The wages paid for unskilled labour are the highest paid in the history of the locality. Wholesale business was getting quiet, most of the fall orders having been taken in. The retail trade, although rather quiet, was steady. Banks reported a good month with easy collections. There was no change in the rates of wages or hours of labour and the relations between employers and employés were cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop was put in in good condition; both the quantity and quality are above the average. Vegetables were plentiful on the market and sold well. Dairy produce also commanded good prices. Farm labourers were in great demand and the supply did not meet the demand. As high as \$2.75 and board for a ten-hour day was paid for good haymakers, the average being \$2.50 per day and board.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners, lathers and plasterers, painters and decorators had a good month. Plumbers, steamfitters, stone cutters and builders' labourers were very busy. Iron moulders, iron workers and helpers, machinists, electrical workers, linemen, blacksmiths, boilermakers and horse-shoers had a good month. Woodworkers, upholsterers, varnishers, polishers, wood carvers, and carriage and wagon makers were active. The printing trades were well employed. Journeymen tailors and garment workers were busy. Boot and shoe workers had a quiet month. Bakers

and confectioners, butchers and meat cutters and ice cutters and handlers were very active. Tanners and curriers had a fair month, as well as the other leather trades. Barbers, clerks, delivery employés, hotel, restaurant and laundry workers were well employed. Railroad conductors, engineers, firemen and telegraphers, trainmen, switchmen, sectionmen and freight handlers were active. Cab drivers, hackmen, draymen, teamsters and expressmen were well employed. Unskilled labour had a very active month and the supply for that class did not meet the demand.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market was active. A large number of men were employed on new buildings as well as on city work. Skilled workmen were in demand. There was more activity in all trades than during the corresponding month of 1910. Sash and door factories were rushed with orders. The Singer Company only gave one week's vacation to its men, and several departments closed for one day only on July 1. All the manufacturers have large orders on hand, and a good season is anticipated. Navigation was very active. Business, wholesale and retail, was very good. Banks reported a very active month. Relations between employers and employés seemed most harmonious.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were asking very high prices for farm products. Haying progressed satisfactorily. Hay is fairly abundant and of a good quality throughout the district.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators, plumbers and steam-

fitters, stone cutters and builders' labourers were very busy. Iron moulders, iron workers and helpers, coremakers, machinists, engineers, linemen and electrical workmen were well employed. Shipbuilders, ship carpenters and caulkers had a quiet month. Tinsmiths, bicycle workers, tool sharpeners, horse-shoers and jewellers were active. Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, pattern makers, coopers and gilders were active. Printers, pressmen, electrotypers, bookbinders, steel and copper plate printers and photo engravers were well employed. Journeymen tailors and garment workers, hatters and glove makers had a fair month. Bakers and confectioners, butchers and meat cutters, ice handlers and tobacco workers were active. Tanners and curriers, leather workers and saddlers were fairly well employed. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and laundry workers had a good month. All railroad men were well employed. Steamboat men, freight handlers, ship labourers and longshoremen, cab drivers, hackmen, carters and draymen, teamsters and expressmen and unskilled labour were well employed.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The situation has much improved in the city and district as far as work done during the last few weeks is concerned. All the manufacturers have received large orders and skilled workmen have been in demand. Railroad business was not quite as good as last month for freight, but it was better as far as passengers were concerned. Several large buildings are in course of construction. The government machine shops and shipyards are full of workmen and there is work ahead for several months. Wages are good in all branches, being from \$1.50 to \$3 for a ten-hour day.

River boatmen have done well so far and are quite satisfied.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have finished haying. The crop, on the whole, was a fair one. The other crops suffered somewhat from the lack of rain, but the recent showers improved the conditions, and it is expected the crop will be a good one. The local market was well stocked with meat, vegetables and fruit. The price of pork and beef has come down two to three cents per pound. Butter sold for 22–25 cents; eggs, 20–25 cents a dozen; cheese, 15 cents a pound; new potatoes, \$1.00 per bushel.

CONDITION OF PARTICULAR TRADES.

Masons, joiners, plumbers and roofers were busy. Painters, electrical workers, upholsterers and wagon makers have not yet suffered from lack of employment. Journeymen tailors and garment workers reported a good month. Teamsters and draymen, as well as cab drivers, were steadily employed.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

As compared with the preceding month, July was more active. In some trades the supply did not meet the demand. All industries in Maisonneuve were in full operation, and there was exceptional activity in the building trades. Dealers did a good business and collections were easy. There was a partial strike of carpenters and joiners for an increase of five cents in wages, from 30 to 35 cents per hour, with the prospect of its speedy termination in favour of the men.

CONDITION OF PARTICULAR TRADES.

All the building trades were very active, several, such as bricklayers, plasterers, joiners and labourers, being in

demand. The metal trades generally had a good month; tinsmiths, linemen, blacksmiths, stove mounters and horse-shoers were very active. Carriage and wagon makers and car builders were in demand, the other woodworking trades being active. The printing trades were busy. Journeymen tailors were in demand. There was much activity in the food preparation and tobacco trades. The leather trades were busy. Workers in the miscellaneous trades were in demand with the exception of broom makers and furriers. All the transport trades and unskilled labour were very active.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

A partial strike of 800 carpenters took place on July 18, for an increase in wages. Within a week all the employers concerned had signed an agreement to pay the Union wages. Business was very active for the season. Grain and provision shipments through Lachine canal during the month did not much exceed those of the corresponding month last year. The receipts at the Montreal Post Office during the month were \$13,694.04 more than during the same month last year. The June income was \$83,444.67. The movement in the harbour during the month of June was very encouraging. The figures furnished by the commissioners show that the receipts for that month exceed those for the same month last year by \$6,000. Imports gave over \$7,000 more than in 1910, but there was a decrease of \$1,500 in the exports. The income from the local traffic was \$2,000 more than last year. The tonnage of vessels was 752,810 since the opening of navigation, or 41,708 tons more than last year. The water level was not without causing some uneasiness. On July 1, the water was only 31 feet, 5 inches, or 4 inches less than last year and 2 feet, 4 inches less than in 1909.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very active.

Manufacturing was active.

Great activity prevailed in *railway construction*.

CONDITION OF PARTICULAR TRADES.

All the skilled trades, as well as unskilled labour, were from active to very active.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour during the month has been very active, employers having their hands full of orders, and employés having in many instances to work overtime. The condition of the water powers was favourable to the industries on the Ottawa river. The demand for products was brisk. Workingmen had every opportunity of employment almost at their own price; i.e., at an advance over the salaries paid last year. For instance, while it is admitted that the standard pay for a common labourer is \$1.50 per day for ten hours' work, contractors declare that they have to apply to some employment agencies to get men at from \$1.65 to \$2.00 per day. Messrs. Carrière & Gendron, Hull, who have contracted extensively for the construction of cement sidewalks, are employing a number of Polacks at \$1.65 per day, as they cannot find the necessary help in Hull. The tax payers have just voted for the borrowing of an additional sum of \$150,000 for various municipal works. The general prosperity of the working population of Hull is shown by the last report from the City Assessors, which marks a considerable increase in the value of property.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

July was an active month for employment in nearly every branch of labour. The difficulty of securing help on farms during the haying period forced wages to \$1.50 per day and board, and as high as \$1.75 was offered in some localities. The search for labourers, begun the previous month, for railway construction on the Canadian Northern Railway, continued with \$2.25 per day offered. The hiring for shanties began in the latter part of July, and bushmen are in demand. The city engineer, whose staff of labourers numbers 1,000, announced that some works were held back on account of inability to secure men, and an abundance of help soon appeared. The civic corporation pays \$1.98 for a nine hour day, which is higher than the rate current on most other works. The building trades had an active month. Construction permits in June reached a value of \$405,000, as against \$302,000 for the corresponding month in 1910. The June Customs receipts, amounting to \$107,849, surpassed June of last year by \$15,000, and the bank clearings of June were \$16,921,000, or a gain of \$1,268,000. That business activity was even more marked in July is evidenced by the bank clearings for the first four weeks, \$19,000,000, an increase over July, 1910, of nearly \$3,000,000. Lumber and hay were shipped in considerable quantities from the Ottawa district, and the local cattle trade was active. Land values have increased rapidly in the last year or two. The Publicity Bureau, formed to encourage new industries to come to Ottawa, has decided that it will be necessary to buy an area and hold it at a "reasonable" price for manufacturers who agree to erect plants. The Allied Trades and Labour Association called the attention of the authorities to alleged unsanitary conditions caused by overcrowding in certain houses, occupied chiefly by foreign elements. A strike of four days' duration began in J. R. Booth's paper mill on July 19, when eighteen pulp beaters demanded an eight hour day, for which they were willing to accept lower wages. The men have been working 11 hours and 13 hours per day, alternate

weeks. The strike threw part of the paper mill idle, and fifty-five paper makers were indirectly affected, though some of them resumed work before the strike ended. Sixteen of the strikers returned to work on the employer refusing to change the time schedule. The men received an increase in wages a short time ago, bringing their wages to \$24.90 per fortnight.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The local hay crop was heavy, and farmers had difficulty saving it owing to scarcity of help. The price on the local market is \$8 to \$11 per ton. The price of cheese advanced on the Ottawa board. During a hot spell in the first half of July, the supply of fresh milk in the city was not equal to the demand. New potatoes, which began selling at \$3 per bag dropped to \$2.25 at the end of the month. The blueberry crop is the largest in many years.

Lumbering.—Lumber prices were firm. The outlook for low water made lumbermen anxious about the drive. Forest fires threatened the limits of some Ottawa lumbermen, but men sent to the woods reported that no damage was sustained.

Railroad construction.—The Canadian Northern Railway Company's bridge across the Rideau river, costing \$40,000, has been started. The Ottawa Electric Railway Company made some extensions in the city and negotiations are in progress with the City Council for a two mile extension to the cemeteries.

CONDITION OF PARTICULAR TRADES.

Several of the building trades had a busy month. The briskness which has characterized masons and bricklayers is not expected to be so marked in the remaining months of the summer. Carpenters and plumbers were reported to be all working. Builders' labourers were well employed. Quietness prevailed among painters, except the most skilled men. Though the usual summer quietness was noticed in the metal trades, machinists, blacksmiths, etc., were fairly well employed. Extensive sewer and

street improvements furnished work for several tool sharpeners. Electrical workers are forming a union affiliated with the American Federation of Labour, which will result in a more uniform scale of wages. Carriage and wagon makers had steady employment. Woodworkers were busy. Printing and allied trades were busy. Tailors had an active month, and skilled female help for clothing factories was in demand. Normal conditions prevailed among those engaged in food preparations. No change occurred in the harness and leather goods industry. The holiday season created activity in transport circles, and hack drivers, baggage-men, etc., were busy. Opportunities were very favourable to employment of unskilled labour.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The zenith of industrial activity was probably reached during the month of July. Immediately upon the settlement of the labour difficulties in connection with the building trades, a grand rally was entered upon to make up for lost time. During the month the building of the much delayed lead smelter was actually commenced. Quite a staff of men are employed, and a large foundation has been built. It is stated that the Exploration Company, which left Kingston, and partly moved to Collins Bay, is also now contemplating carrying on a large portion of its business at the smelter site. Contracts for the new public school to be built at a cost of \$40,000 were awarded during the month, and building commenced. The local branch of the Salvation Army has purchased a site on Princess street, and will erect new barracks to cost between \$10,000 and \$15,000. Building permits issued for the past six months amounted to \$136,462, or \$36,319 more than during the same period last year, and this in the face of very damaging strikes.

The annual meeting of the shareholders of the Wormwith Piano Company, Lim-

ited, was held here on July 24. Reports showed that shipments for 1910 had been one-third larger than for 1909, and that shipments for the first six months of 1911 exceeded the same months for 1910 by thirty per cent., with good prospects for the fall trade. It was also noted that there was a satisfactory increase in the output of piano players. The preliminary work in connection with the paving of certain city streets was commenced. It was found difficult by the contractors to find men to carry on the work. The generators in the power house are being arranged for the introduction of fifty new arc lamps in connection with Kingston's street lighting system. A meeting of the board of provisional directors of the Ottawa, Smith's Falls & Kingston Railway Company was held during the month. The directors have secured the services of a competent engineer, and hope to begin the work of locating the line during the month of August. The annual meeting of the Oddfellows' Relief Association of Canada was held here during the month. Reports showed that while the benefits paid in 1910-1911 amounted to \$251,185.44, the revenue, which was very rapidly increasing, amounted to \$410,310.97. The membership of the association had been increased to 6,649, and the death rate per thousand was 6.93. The net assets of the association on June 30 were \$940,399.90, and the gain for the year was over \$100,000. Beginning on July 5, the local grocery stores close down for a half holiday every Wednesday afternoon. On Sunday, July 9, the Street Railway Company placed its system in operation, beginning 1.30 p.m. to 9.30 p.m. Outside of the children, who were carried free, 4,100 fares were collected. Representatives of the Lord's Day Alliance waited on the company and asked it to cease running on the Sabbath. The company refused, claiming the right to run every day under its charter. During the month fire broke out in the operating room of the "Orpheum" moving picture and vaudeville theatre, causing damages to the extent of \$2,000. The theatre was immediately renovated and repaired, and has resumed its performances. There were no changes in the

rates of wages, or strikes, or lock-outs, reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from all over the Kingston farming district show an abundant crop. Harvesting will be completed earlier than usual. A scarcity of farm help is being felt.

Mining, Lumbering, Manufacturing, Mining, and Railway construction were very active.

CONDITION OF PARTICULAR TRADES.

All the skilled trades, as well as unskilled labour, reported an active month.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Active conditions prevailed during July, the building trades continuing very busy. The iron trades remained about the same as last month. The Canadian General Electric Company's power plant has been shut down temporarily during the rebuilding of the pole line and the construction of two new circuits from the water works dam down to its factories. The Peterborough Light and Power Company is supplying it with 1,200 h.p. for 24 hours per day, until such time as the new power line is completed. Hon. J. R. Stratton and Mr. J. H. McClellan, superintendent of the Trent Valley Canal have waited on the Department of Railways and Canals with a view to having the remuneration of the lock masters, bridge tenders and overseers along the line of the Trent waterways increased; the apportionments will be made during the present month and the increases will date from April 1, 1911. The Thursday summer half-holiday which was granted the clerks other seasons, was granted to them again this season. This affects all the retail stores in the city. Wholesale and retail merchants reported business very good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy haying and report a fair crop. Reports so far of the crops are very favourable.

Lumbering.—All the sawmills in the district have been running to their full capacity.

Manufacturing.—Activity prevailed in all lines.

CONDITION OF PARTICULAR TRADES.

The building trades were active, especially bricklayers, masons, carpenters, lathers, plasterers, plumbers and builders' labourers. Metal workers, iron moulders, coremakers and machinists were active. Electric workers and linemen were very busy. Metal polishers, buffers and brass workers were active. Woodworkers, cabinet makers, upholsterers and varnishers were well employed. Printers, pressmen, bookbinders and allied trades were active. Journeymen tailors and garment workers were busy. Bakers and confectioners were active. Butchers and meatcutters had a good month. Cigarmakers found trade fair. Leather workers and saddlers were active. Railway and street railway employes were well employed. Steamboat men were active. Teamsters and express men were well employed. Unskilled labour was in good demand.

DISTRICT NOTES.

Port Hope.—Material is being delivered at Fraserville, Millbrook, and other places in the vicinity for the new power line which is being put through from Healy Falls via Millbrook and other places which it touches with power. The work is being done by the Midland Construction Company.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions for July continued satisfactory with plenty of work in nearly

all lines. Owing to the number of important civic undertakings on hand, unskilled labour was better employed than in most seasons. The building trade was very busy. The number of permits issued for the six months ending with June was 3,776, representing an approximate value of \$11,939,953, as compared with 3,032 permits, representing an approximate value of \$9,620,648 for the corresponding six months of 1910. The receipts of the Toronto Railway Company for June were \$401,185, of which the city received \$80,237; as compared with \$358,041, of which the city's share was \$72,959, in June of last year. The contract for laying the new intake pipe in connection with the water works system has been awarded to Roger Miller & Sons for \$259,900. Home Smith has offered to present the city with over 100 acres of land in the Humber Valley for park purposes on condition that the city construct a boulevard and driveway 100 ft. wide from the Lake Shore Road to Bloor st. The offer has been tentatively accepted and the details of the proposed work are now under consideration by the Council. The Ontario Club is altering the former Standard Bank building on the corner of Wellington and Jordan Streets, at a cost of \$60,000.

The report of Dr. Hastings, medical health officer, on the inspection of the slum districts, embraced in the area lying south of College and Carlton streets, shows that in 4,696 houses visited 357 families were found in filthy environment. Only 1,601 families had baths in their houses. Filthy conditions were found inside 205 houses, overcrowded rooms in 109, dark or sunless rooms in forty-eight. In all 390 houses were reported for various reasons as "absolutely unfit for habitation". In 2,207 cases privy pits were found and unsanitary closets in 716 cases. There were 198 one-roomed dwellings, in which were living 472 persons. The total number of persons in the places inspected was 26,412. The report suggests that a committee be organized, composed of representatives of the Board of Health and the Board of Control, to confer with representatives of organizations and public spirited citizens who

would jointly act in appointing a permanent committee to deal with the problem.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were engaged in harvesting, much of the fall wheat and barley having been got in by the close of the month. The wheat is generally a good crop, but barley is light and badly colored. Oats were backward looking but fairly well. Ensilage corn promises a large crop, and the recent rains had considerably improved the root crops and the pasturage.

Manufacturing.—Manufacturing plants were generally busy, activity being stimulated by favourable crop reports from the West. Many report orders coming in well and a good fall trade is anticipated. The Gutta Percha & Rubber Company will build a three-storey factory of reinforced concrete on O'Hara avenue, to cost \$40,000. The James Robertson Company, Limited, manufacturers of plumbing supplies, are erecting a five-storey brick warehouse at a cost of \$105,000 on the corner of Sullivan street and Spadina avenue. F. H. McGuigan, of Toronto, has obtained the contract for the civic filtration plant of Montreal, at \$673,500.

CONDITION OF PARTICULAR TRADES.

The building trades had a busy month. Blacksmiths, boilermakers, machinists, moulders, sheet metal workers and structural steel workers were active. Electrical workers were busy. Brass workers, jewellers and silversmiths had steady work. The woodworking and furnishing trades were well employed. Printers, pressmen, bookbinders, stereotypers and lithographers had continuous employment. Custom tailors were fair, but not so active as in June. Garment workers were fair. Boot and shoe and hat and cap workers were well employed. The provision and tobacco trades were normal. Harness and leather workers had steady work. Railway and street railway employes, teamsters and expressmen were active. Sailors and longshoremen

had plenty of work. Hotel and restaurant workers, barbers and laundry workers were busy. Unskilled labour was generally well employed.

DISTRICT NOTES.

North Toronto.—The assessment returns for the town of North Toronto, a project for the annexation of which to the city is now under consideration, showed the value of real property without buildings to be \$2,733,187, value of buildings, \$1,340,050; exempted property, \$143,680; total taxable real property, \$3,929,557; number of buildings, 1,419; total population, 5,217.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Considered from any point of view, the industrial situation during July was most satisfactory, whether compared with the previous month or previous years. The labour market was nicely balanced and there was every assurance of a continuation of satisfactory conditions until autumn.

The American Cyanamid Company was enlarging its works by the erection of an additional factory building, 140x110 feet in size. Hereafter this company will ship a finished instead of a semi-finished product as heretofore. The present extension will cost \$10,000. The Clarke-McGlashan Company was enlarging its cutlery factory by erecting an additional building of concrete, 85x30 feet in size. Another factory for the reducing of chicle gum is to be established.

Progress in erecting the new armoury and the nurses' home at the general hospital was delayed by a scarcity of brick. A large addition was being made to the Grand Trunk Railway Company's station. By-laws to raise money for another trunk sewer and to enlarge the city hall were lost.

Financial and commercial conditions were satisfactory.

A recent estimate of the amount of energy derived from Niagara Falls places it at 273,140 horsepower, divided in its application as follows: Electro-chemical industries, 126,000; railway service, 56,200; lighting, 36,400; various industrial purposes, 54,540. The total energy of the falls is estimated at 5,000,000 horsepower, so that not much more than 5 per cent. is at present utilized.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Hot, dry weather hastened the maturing of crops and farmers and fruit growers had a very busy month. Wheat was harvested and proved to be below the average in yield. Threshing was commenced. The oat crop will not be heavy. Berry crops were generally inferior in quality, owing to lack of rain. Prices were high for all fruits and vegetables. A wind storm late in the month did heavy damage to apples, peaches, plums and pears.

Manufacturing.—All manufacturing concerns were running full time with full staffs of employes.

Railway employment.—Both steam and electric railways had heavy traffic. Passenger business on electric lines was particularly good. Grading of the new Dunnville, Wellandport & Beamsville electric railway was completed from Dunnville to St. Anns and track laying commenced. It is stated that the Michigan Central Railway Company will rebuild its cantilever bridge which spans the Niagara gorge at Niagara Falls. The Niagara, St. Catharines & Toronto Railway Company (electric) is now operating fifty-seven miles of line between Niagara Falls, St. Catharines, Port Colborne and Port Dalhousie.

CONDITION OF PARTICULAR TRADES.

Bricklayers were busy, carpenters very busy, painters in demand, plasterers busy, plumbers and gas fitters active, builders' labourers quiet. The metal and engineering trades were all active. Tailors, hatmakers, tiemakers and suspender makers were all busy. Cereal factories and canneries were employing the largest poss-

ible number of hands. The baking, meat and ice trades were busy. Barbers were active; office, sales and delivery employés busy; hotel and restaurant employés very busy; laundry workers in demand. All classes of railway and steamboat men were fully employed. Electric trainmen were particularly busy. Carters, draymen and teamsters were very busy. Unskilled labour was very well employed.

DISTRICT NOTES.

Chippewa.—A new public school will be erected at a cost of \$11,000.

Ridgeway.—The village school will be enlarged.

Port Colborne.—The International Cork Company erected a large storage building and installed electric motors in place of gas engines. Welland canal traffic was heavy and the grain elevator was run to its full capacity.

Welland.—Building trades were active and all manufacturing concerns busy. Contracts let during the month included a \$23,000 school and the \$10,000 water-works pumping station. New wheat sold at local mills at 75 cents a bushel. A new church will be erected at a cost of \$15,000.

Bridgeburg.—Building operations were brisk. It was stated that the International Bridge Company has set aside \$3,000,000 to erect a new railway bridge to replace that now spanning the Niagara river between this place and Buffalo, N.Y.

ST. CATHERINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:

GENERAL CONDITION OF LABOUR.

July proved to be another good month for the employment of labour. All branches of industry were active to busy. The building trades were particularly busy with rush conditions, and unless more help is secured a large proportion of the season's work will not be finished. The Steel and Radiation Company has broken ground for its first building, 150 x 300 feet, which will be followed by

others of similar dimensions, largely of steel throughout. Civic works, concrete curbs, sidewalks, pavements and sewers are well under way, but the amount of work planned will be greater than can be completed this season. Some of the contracts have been awarded for the construction of the new \$180,000 water main. Business, wholesale and retail, proved good for the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The early part of the month was exceptionally dry and hurt the raspberry and other small fruit crops. Some of the vegetables also suffered. The hay crop and grass were so badly affected that milk advanced from 7c. a quart to 8c. a quart. Beneficial rain fell the middle and latter part of the month. On July 24 and 25 a strong high wind swept the district, doing thousands of dollars damage to the fruit crops. It is estimated that \$100,000 damage was done. Peaches, pears and plums suffered most. Grapes were not affected much.

CONDITION OF PARTICULAR TRADES.

The building trades were rushed with a demand for more help. The metal and engineering trades were active to busy. A few days were lost in most of the factories owing to the excessive heat wave that prevailed in the early part of the month. The woodworking and furnishing trades were all active. The printing and allied trades were busy. Journey-men tailors were active. Boot and shoe workers were busy. Bakers and confectioners, butchers and meat cutters, ice cutters and drivers, cigar makers and tobacco workers were busy. Tanners and curriers, leather workers, saddlers and trunk and bag makers, were active. Barbers, clerks, stenographers, delivery employés, furriers, and hotel and restaurant employés were active. All branches of transportation were active to busy. Unskilled labour was active with favourable conditions for employment.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed for the month.

Merritton.—The labour market was active to busy, with conditions of employment good.

Thorold.—All the mills and factories were running full time. Labour was well employed. Fire damaged the Coniagas Reduction Company's smelting plant on July 11, to the extent of \$25,000.

HAMILTON, ONT., AND DISTRICT.

Mr. William T. Cooper, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of labour during July was not so favourable in many respects as during the previous month. The extreme hot weather during the first week of the month was the cause of many factories being closed down for a time. Outside work was also hampered through the same cause. The building trades have had an exceptionally active month, and there is considerable work ahead. A by-law to raise \$505,160 for the purpose of installing a municipal light and power distributing plant, was carried on July 25. It is expected that plans and specifications will be prepared at once, and that tenders will be called for shortly. A by-law to raise \$22,000 for the purchase of property adjoining the City Hospital was also carried. The Consumers' Lumber Company, Limited, has been incorporated with a capital of \$75,000. The S. G. Buskard Company, Limited, has been incorporated with a capital of \$40,000; the company manufactures welding compounds, and carries on a general machinists' business. The Laidlaw Bale-Tie Company, Limited, has been incorporated with a share capital of \$400,000; the company is authorized to do a general business in iron, steel or any metal, or the products of iron or steel. The Delta Park Company has been granted a provincial charter to carry on a general land and building business. It has a share capital of \$50,000.

Building permits issued during June showed a big increase over the corresponding month a year ago: 213 permits with a total value of \$619,675, as compared with \$301,885 in June, 1910. A

permit has been issued for the erection of a \$30,000 building on King street, which will contain six stores and twelve living apartments. The wholesale price of sugar has increased ten cents per hundred weight, but no change has taken place in the retail price. Bank clearings for the four weeks ending July 8, 15, 22, and 29, as compared with those of the corresponding weeks of last year, were as follows:—

1911	1910
\$2,995,841	\$2,329,989
2,402,552	1,917,750
2,478,986	1,829,661

For the week ending July 29, the figures were:—

1911	1910
\$2,400,364	\$1,719,635

Wholesale and retail trade has been steady during the month, and wholesalers are looking forward to a big fall trade. The special salary committee of the Board of Education has recommended a complete adjustment in the salaries of principals, special teachers and caretakers. The local letter carriers have affiliated with the Trades and Labour Council. There is no change in the carpenters' strike situation; all those who went on strike on May 1 have found employment with other employers at the rate demanded of the Master Carpenters' Association.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The great heat wave during the first week of July, was responsible for the loss of considerable small fruits, such as gooseberries, currants, thimbleberries, etc., the first being practically cooked on the bushes. Honey is selling on the local market at 25 cents per pound, an advance of 7 to 9 cents per pound over last year. Potatoes are very scarce, and are selling at much higher prices than last year. Heavy windstorms during the month were responsible for the loss of thousands of dollars' worth of peaches, plums, pears and apples. Fruit growers estimate that from ten to fifteen per cent. of the crops have been blown to the ground and many trees are broken.

Manufacturing.—Manufacturing has eased off considerably in several lines, as is customary at this season, but manufacturers of farm implements are still very busy.

Railway construction.—The Toronto, Hamilton & Buffalo Railway Company has been given permission to construct a switch into the Frost Wire Fence Company's plant. The Hamilton Street Railway Company has announced that it will make extensions to its line in the eastern, northern and western parts of the city at an early date. The Board of Control has decided to ask the Government to authorize the appointment of a commission to govern the local harbour.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have had steady employment. Carpenters, lathers and plasterers, painters and plumbers, have been busy. Structural iron workers were quiet. Iron moulders, electrical workers, linemen and stove mounters have been rather quiet. Blacksmiths and horseshoers report trade good. Jewellers and silversmiths had a fair month. Woodworkers, carriage and wagon makers have been well employed. Printers have had a quiet month. Pressmen have found steady employment. Journeymen tailors and boot and shoe workers were quiet. Garment workers were busy. Bakers and confectioners and cigar makers and tobacco workers were busy. Barbers were busy. Broom makers had a fair month. Laundry workers were busy. Railway employés had steady employment. Steamboat employés and longshoremen were busy. Unskilled labour was well employed during the month; the demand and supply being about equal.

DISTRICT NOTES.

Dundas.—Tenders are being called for the erection of a new post office and custom house. The public school teachers' salary schedule has been amended to read as follows: minimum salary, \$400; second year, \$450; third year, \$500; experience in teaching at other schools to count.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour generally was well employed during the month of July. Skilled labour was fully employed, and there was a demand for unskilled labour. The building trades were very busy, and there was some delay on account of a shortage of brick. During the past six months the city engineer's department issued 273 building permits representing \$262,228, as against 168 permits representing \$241,430 for the corresponding period of last year. Manufacturers continue to be very busy. The Cockshutt Plough Company is arranging for large additions to five departments, at an estimated cost of \$75,000, and expect to employ about 300 more men when the additions are completed. The Verity Plough Company is planning new and enlarged moulding shops, and will use the present moulding shops for other purposes. The Massey-Harris Company is erecting another warehouse. The large additions to the Watrous Engine Works are progressing rapidly. Civic improvement work under the supervision of the city engineer is progressing on a large scale. Over five miles of sanitary sewers have already been constructed this year, 211 house sewer connections have been made, and 223 plumbing plans have been filed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy. The grain crop generally speaking is light, with short straw, which will affect the winter supply of food for stock. The root crop, particularly turnips in some sections, will also be a light one. This is attributable to the very dry weather.

Manufacturing.—Manufacturers were very busy, and prospects are very bright.

Railway construction.—The local street railway company is completing an extension about one mile long into the Holmedale factory district.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasters, painters and decorators, plumbers, gas and steam fitters, were very busy. Iron moulders were very busy, but lost some time on account of the extremely hot weather. Coremakers, machinists, engineers, electrical workers, linemen, metal polishers, buffers and platers, stove mounters, blacksmiths, boilermakers and sheet metal workers, were very busy. Horseshoers were from active to busy. Woodworkers, carriage and wagon makers, pattern makers and coopers, were very busy. The printing and allied trades, so far as jobbing shops were concerned, were not very busy. Those engaged on regular newspaper work were busy. Tailors and tailoresses were active. Boot and shoe workers were very busy. Bakers and confectioners were busy. Cigar makers and tobacco workers, leather workers and saddlers, were active. Barbers, clerks, delivery employés, hotel and restaurant employés, were steadily employed. Laundry workers were busy. Railway trackmen were active. Freight handlers were busy. Street railway employés had steady employment. Teamsters and draymen were busy. Unskilled labour was in demand.

DISTRICT NOTES.

Paris.—Labour was well employed. The mills and factories were busy.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of July continued to be active in nearly all lines of trade and industry, both skilled and unskilled workers being well employed. The building trade continued very active with plenty of work in sight. Contractors are being somewhat delayed owing to the scarcity of brick. The Independent Tire Company has let the contract for its new four storey, fire proof factory. It will

be built of reinforced concrete at a cost of \$47,000. Work is being rushed on the new factory of the Guelph Whitewear Company. The Guelph Carpet Mills Company is erecting a 90 x 30 foot brick addition to its factory. Tenders have been let for the remodelling of the old Morelock factory, which, when finished, will be used by small manufacturing concerns. The Standard Valve and Fitting Company has made an assignment, thus causing about fifty men who were employed there to seek work elsewhere. Manufacturers are for the most part kept running full time and in some cases are putting on extra help to meet increasing trade. Wholesale and retail merchants report trade good. Customs returns for June were \$15,644.11, showing an increase over the corresponding month last year of \$2,450.14. Men employed on civic improvement work had a very active month. Street paving, filter beds extension and the extension of the street railway into St. Patrick's ward kept them well employed. Union moulders employed by the Guelph Stove Company, the Raymond Company, Crowe's and Griffin's factories have received an increase in wages. The increase is from \$2.75 to \$3.00 for day workers and from \$3.50 to \$3.70 on an average for piece workers, and was granted after a request from the Union. There were no further changes in rates of wages or hours of labour reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy haying and harvesting. They report a very light crop of hay, owing to the extreme heat and lack of rain, and straw will be very short. Roots also have suffered to a great extent.

CONDITION OF PARTICULAR TRADES.

All classes engaged in the building trades have had plenty of work. Iron moulders, core makers and helpers reported a good month. Tube mill workers were very busy. Electrical linemen reported a good month. Machinists, metal polishers and stove mounters had a fair month, also blacksmiths and horseshoers. Men employed in sash and door

factories were very active; also piano and organ makers. Carriage makers and coopers had a fair month. Printers and allied trades report a quiet month, also journeymen tailors. Garment workers had a good month. Boot and shoe makers were busy. Teamsters and carters were very active. The supply in this class of work was not equal to the demand. Unskilled labour was well employed and in good demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

All classes of labour were fully employed and there was a demand for help among the carpenters and labourers on the construction of the new buildings. The month of July was a busy one in the labour circles, and would compare favorably with the corresponding month of last year. Good progress was made in the construction of the new buildings under way. The Western Shoe Company has its building up and the roof on. The L. McBrine Company has the brick work completed and ready for the roof. There were nineteen permits issued for new buildings during the month of July, valued at \$32,000. These are all for residences. Transportation, shipments and bank clearings will compare favourably with last month. Business, wholesale and retail, reported favourable conditions. There were no changes in rates of wages or hours of labour. There was some unrest among unskilled labourers during the month, as the demand for labour is keen, and many of them changed their positions.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a busy month. Owing to the dry spell, hay, wheat, barley and oats all ripened at once, and this kept them hustling. The crops will run light through this district, owing to the dry spell, but there has been lots of rain towards the close of the month.

This helped the root crops. The apple crop is going to be light. Plums are fairly good. Raspberries were scarce and sold at 15 cents per box, or 2 for 25 cents. Other market produce remained about the same as last month.

Lumbering.—This industry was active.

Manufacturing.—All establishments were busy.

Railway construction and employment.—The People's Railway Company has been at a standstill for some time.

CONDITION OF PARTICULAR TRADES.

Active conditions prevailed among bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators and paper hangers, plumbers, gas and steam fitters, stone cutters and builders' labourers. Iron workers and helpers, machinists and engineers were active. Steam engineers, electrical workers and linemen were busy. Metal polishers, buffers, platers and brass workers, stove mounters, blacksmiths and boilermakers were active; also sheet metal workers, bicycle workers, tool sharpeners and horse-shoers. The woodworking and furnishing trades were well employed. Printers and pressmen were all busy. Bookbinders were active, as were steel and copper plate printers. Journeymen tailors and garment workers were active. Hat and glove makers were somewhat quiet with boot and shoe workers busy. Bakers and confectioners, butchers and meat cutters were busy. Ice drivers, cigar makers and tobacco workers were fully employed. Tanners and curriers, leather workers, saddlers, trunk and bag makers were very busy. Barbers, broom makers, clerks, stenographers, delivery employés, laundry workers were fully employed. Railway employés were active, with freight handlers busy. Cal drivers, hackmen, carters and draymen, teamsters and expressmen were active with unskilled labour very busy. There was a shortage of this class of labour.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Industrial conditions were never more satisfactory than they are at present, and have been all through the year. Practically all the factories are working to their full capacity. Several have increased their staffs during the year, and a few are still urgently in need of more help. This is true, for instance, of the Woodstock Wagon and Manufacturing Company, which, while it has been adding to its staff, is still looking for more men. Another significant and satisfactory feature of the situation is that several of the factories have added or are adding to their factory space, to increase their accommodation and their output. In most cases a considerable improvement in business conditions over last year is reported. In scarcely any instance has there been a falling off. In addition to all this the prospects for the future are regarded as very encouraging. The Canada Furniture Manufacturing Company, Limited, is enlarging its factory accommodation, and will increase its staff by about 100 men. It is working full time and at its full capacity. The Tobin Arms Company has enlarged its factory. Business is good and increasing. The Oxford Knitting Company has in process of erection an addition larger than the original building. The Bain Wagon Company is about to let the contract for an addition. This year's business has been the largest in the history of the concern. The Karn-Morris Piano & Organ Company, the Thomas Organ Company, and the Hay Company all report a good season's business. The same is true of the James Stewart Company, the Linderman Company, the Textile Company and of many smaller concerns. The Woodstock Wagon Company has increased both factory space and equipment. The Ken-Knit Company has a \$20,000 factory under way. The Woodstock Automobile Company has been incorporated, and the new industry is practically assured. There is some demand for help in the building trades. The following prices were offered; teams, \$5 a day; carpenters, \$3 a day; labourers, \$2 a day.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have practically finished their wheat harvest and are now waiting for the oats. The wheat crop has been abundant, and the oats promise well, although the straw will be light. Corn and roots have benefitted greatly by the recent rains. There is still some demand in certain quarters for farm help, but generally speaking the farmers are fairly well supplied.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, lathers, plasterers, painters, stone cutters, plumbers and the rest were busy, and there was a demand for carpenters and labourers. Moulders, blacksmiths, iron workers, stove mounters, machinists, metal polishers, were busy. There was a more or less constant demand for good machinists and skilled mechanics generally. Woodworkers, upholsterers, painters, varnishers and polishers, wood carvers and wagon makers were busy. Business in the printing trade was good and all printers and pressmen were busy. Tailors and garment workers were steadily employed. Bakers, butchers and cigarmakers were regularly employed. Tanners and leather workers were active. Builders' labourers were in some demand.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during the month has been exceedingly active, both for skilled and unskilled labour. The many buildings, mostly dwellings, that were in course of construction are nearly completed, also an addition to the Herald Printing Company's building. The work on the river bed is progressing rapidly and a brick boat-house is being erected. Reports from the factories show that labour, especially skilled labour, is getting scarce. This is owing to the fact that so many men

have gone to the West. Wholesale and retail merchants report business very good. The customs receipts for the port of Stratford for the month of June amounted to \$14,418.13, an increase of \$3,119.77 over the corresponding month of 1910. No change in the rates of wages or hours of labour; no trouble in the labour market was reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were very busy harvesting. Most of the fall wheat is in and the barley cut and they are preparing the ground for fall seeding. Grain prices were as follows:—

Wheat, 80 cents per bushel.
Oats, 38 cents per bushel.
Barley, 45 to 50 cents per bushel.
Peas, 65 to 70 cents per bushel.
Flour, \$2.60 per cwt.

Manufacturing.—All the manufacturing establishments were busy during the month.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were active. Painters, paper hangers and plumbers were very busy. Gas fitters, stone cutters, builders' labourers and all connected with the building trades were busy. Iron moulders, iron workers and helpers were busy. machinists, electrical workers and blacksmiths were active. Boilermakers and jewellers were busy. Woodworkers, upholsterers, varnishers and wood carvers were active. Carriage and wagon makers and coopers were busy. Printers had no idle men. Journeymen tailors were busy and factory workers had an active month. Bakers, confectioners and butchers were busy. Cigarmakers were fairly well employed. Harness makers did a good trade. Barbers, clerks and delivery employes were active. Hotel, restaurant and laundry workers were busy. Railway conductors, engineers, firemen and trainmen were active. Switchmen, trackmen and freight handlers were busy. Cab drivers, draymen and teamsters were fully employed. Unskilled labour was well employed.

DISTRICT NOTES.

Mitchell.—A large number of Indians, men, women, boys and girls from Oneida reserve, were employed pulling flax. There was between 400 and 500 acres to be pulled.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions remained about the same as last month, with the different factories almost all very busy. Among the building trades there was very little new work, but repair work was keeping all hands busy. The Canadian Pacific Railway Company is rushing the construction of its new round house, and had about 200 men and teams at work grading for its new yards, etc. As the new buildings are all of concrete, the ordinary building tradesmen are getting very little of the work. The Canadian Pacific Railway Company is also to build a new coaling plant, a new sand house, new oil house, and a 60,000 gallon water tank. Wholesale and retail trade continued very active, and the wholesalers were receiving large orders from Western Canada. The strike of the iron moulders, which commenced on June 5, still continued, with no signs of settlement, and was affecting the output of the foundries involved to a considerable extent.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in this district report exceptionally good crops. Wheat was being cut, and showed up well. Prices at which hay and oats were selling continued very high, oats fetching \$1.35 per 100, and hay \$14.00 per ton. Eggs and butter were also commanding good prices, butter selling at 25 cents per pound and eggs at 22 cents per dozen. Raspberries were a very poor crop owing to dry weather. New potatoes were selling at 10 cents per quart.

CONDITION OF PARTICULAR TRADES.

Bricklayers were rather quiet, and a number have again left the city for the summer. Carpenters were busy, and a lot of repair work was being done. Lathers and painters were busy. Plumbers report trade fair. Builders' labourers were very busy. Iron moulders on stove work were very busy. At general work the strike was keeping about sixty idle. Iron workers at rolling mills were very busy, and were working night and day shifts. Machinists were busy. Electrical workers and linemen were exceptionally busy. Metal polishers and brass workers were busy. Stove mounters reported trade very brisk. Woodworkers were busy. Carriage and wagon workers were fair. Car builders were very busy. Printers and pressmen were all busy. Some of the firms have started on their novelty work for the Christmas trade. Journeymen tailors reported business only fair. Garment workers were slack, and reported that they were not receiving their consignments of cloth from Great Britain, owing to the seamen's strike. Boot and shoe workers were very busy. Most of the cigar manufacturers were not as busy as last year. Bakers and confectioners were busy. Tanners and curriers were exceptionally busy. Saddlers were busy. Broom makers were busy. Furriers reported trade good. Laundry workers were very busy. Railway train crews were very busy, and a great number of special trains were being run. Teamsters were exceptionally busy. There has been a great demand for unskilled labour, but the supply was plentiful.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Conditions in the labour market continued the same throughout July as during the month of June. The usual amount of work was done in the building trades, mechanics in that line being well

employed. Normal conditions prevailed in local industries. The Monarch Knitting Company has made good progress the past month, and about 100 hands are employed. In the railway shops conditions have been good. The Pere Marquette Railway Company has been particularly busy, and a full staff has been maintained throughout the summer months. While traffic has been fair on the Michigan Central Railway, considerable reduction has been made in the number of operating crews, particularly in the locomotive department. Engineers of seven and eight years' standing are at present engaged as firemen. Train crews have made good time on the other roads entering the city. Street railway receipts took a decided jump over the corresponding month of last year. Attendance at the baseball games of the Canadian League is responsible for the increase. Peaceful conditions between employer and employé prevailed in this city and district.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The drought during the early part of the season had a considerable effect upon the crops in this locality. The farmers state that the wheat will be considerably lighter than usual, and that the hay and oat crops will be lighter also. Corn will average fair, some localities having good crops, others poor. Apples are reported scarce. The timely arrival of rain undoubtedly had a good effect on the potato crop, which at the present time is showing up well.

Local industries have been well employed during July.

Railway construction.—The railways are taking advantage of the fine weather and considerable track work is being done.

CONDITION OF PARTICULAR TRADES.

The building trades were well employed during July. A number of building permits were issued during the month. Machinists, blacksmiths and boilermakers in the local shops, and printers were well employed. Teamsters and draymen

found employment brisk. Unskilled labour was in greater demand during the month of July than during June, and at present the supply and demand are about equal.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The demand for labour in all lines was very brisk, owing to the industrial boom that the city is experiencing at the present time. All classes of labour were well employed, good carpenters and bricklayers being in great demand. During the last two weeks of July building permits were issued amounting to \$66,500, and the present indications are that the amount will more than double that of 1910. All factories were running full time and a number of planing mills overtime. The Walker Pant and Over-all Company, which commenced operations something over one year ago with five machines has now fifty machines in operation and employs between fifty and sixty hands. The City Board of Works has a large amount of granolithic sidewalks under construction and continually employs a large number of labourers and none have had to seek employment elsewhere. No strike or dissatisfaction was reported among any branch of trade during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the very dry weather in the first part of the month, small fruits were only a fair crop. Apples will be scarce. Many large orchards are a complete failure. Early potatoes will not be half a crop. Corn and beans will be very good. Fall wheat was good; some farmers report forty bushels to the acre. Live hogs still remained at \$7.25 per hundred.

Manufacturing.—Manufacturers of all kinds were fully engaged and reported prospects bright for the fall trade.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, lathers, plasterers, painters and paperhangers, plumbers and builders' labourers were very busy. Iron moulders, machinists, steam engineers, electrical workers, linemen, metal polishers, and brass workers were active. Blacksmiths, boilermakers and sheet metal workers and horseshoers were fairly busy. Woodworkers of all classes were very busy. Carriage and wagon makers were active. Printers and allied trades were fairly active. Journeymen tailors report trade fair. Bakers were active. Cigar makers and tobacco workers were busy. Barbers were active. Clerks and stenographers were well employed. Laundry workers were busy. Carters, draymen, teamsters and expressmen were very busy. Unskilled labour was well employed.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

General activity prevailed in all branches of industry with rush conditions in the building trades. Although 181 permits have been issued for the first six months of this year there is still a big demand for houses. The building operations this year will be the greatest in the history of the city. All the factories were well supplied with work and skilled help was in demand. On July 24, the ratepayers voted on the by-laws; one to grant usual exemptions to the Canadian plant of the National Wire and Spring Company, of Albion, Michigan; the second one to provide for purchase of an automobile fire fighting apparatus; the third one to issue \$50,000 of water works debentures for new intake and necessary extensions. The Board of Works had a large gang of men employed laying out new streets, building cement sidewalks and paving streets. Wholesale and retail merchants reported trade good. Over twenty new stores have opened up in the past two months.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to so much dry weather, market gardeners are not having as large a crop as they expected and cannot supply the demand. Corn and tobacco are looking well.

Lumbering.—Retail lumber yards and manufacturers were very busy.

CONDITION OF PARTICULAR TRADES.

The building trades were very busy and good carpenters were in demand. All connected with the metal and engineering trades were well employed. All lines of the woodworking and furnishing trades were active. Printers and pressmen were fully employed. Journeymen tailors had a fair month. Garment workers were busy. Bakers, butchers, ice drivers, cigar and tobacco workers were busy. The leather trade was good. Barbers reported business good. Clerks, delivery employés, hotel and laundry workers had plenty of work. Steamboat and railway employés were busy. Unskilled labour was well employed.

SAULT STE MARIE, ONT. AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was well employed during the month. In fact the demand was greater than the supply, particularly in the building trades. The construction of roads, sewers and walks in Steelton and Sault Ste. Marie has created a brisk demand for unskilled labour. Building was brisk, the number of permits issued and value of buildings being greatly in excess of anything in the town's history, viz: 125 permits at a value of nearly \$300,000 this year to date. The Algoma Central Railway Company is pushing its line to connect with the Grand Trunk Pacific Railway. The Lake Superior Paper Company and the Algoma Steel Company are enlarging and improving their plants. Business was good and the various trades were well employed.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Work during this month has been slack. There is very little improvement over last month, and it is very much duller in this district than in the corresponding month of a year ago. The outlook is brighter than it was a month ago, owing to the fact that more public work has been put in hand in both cities during the month, and more is also projected, which has made the last week of July more hopeful. In addition to the city work, which every year employs a large number of hands, the letting of the contracts for railway construction along the eastern extension of the Canadian Northern Railway Company has opened up expectations of a very busy fall. So far the workers have not felt much benefit, but contractors are in both cities making arrangements for camp work. There is no exceptional activity in any trade, but the marine transportation has been a little busier during the month, and a greater number of men have been employed around the docks. The wholesale and retail trade was normal. There have been no changes in the rates of wages during the month, and no unrest in the labour market. The unskilled labourers are having a difficulty in keeping their wages up to \$2.00 a day, which is generally considered the minimum rate for this district. Many are only getting \$1.75 per day, and one firm is reported as paying as low as \$1.50 per day. There are plenty of men to supply all demands. Many skilled mechanics, failing to obtain work here, have gone further west. The Trades and Labour Council of Port Arthur have presented a scheme for a City Labour Bureau to the City Council for its consideration, and the matter has engaged the attention of a special committee appointed by the City Council to confer with the labour men. The latest statement from the Trades and Labour Council is now before the City Council, and the labour men hope their wishes

will be acceded to and their proposal given a trial. In addition to the statement, an estimate of the probable expense of running such a bureau and the estimated income has been presented. The labour men calculate that the cost would amount to some \$3,000 per year, and they think they see the probability of covering the whole of this expenditure under their scheme, and keeping in addition a complete census of the wage workers of the city, with accurate information as to accidents, sickness, lack of employment and thriftlessness.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—In the homestead districts adjacent to these cities all crops are looking well and a great number of homesteads have been taken up during this summer. For the first time in three years the hay crop is a great success, owing to plentiful spring rains this year.

Railway construction.—Railway construction has been quiet, but a rush is expected during next month, and these cities promise to be a busy centre for the engagement of men; at present, however, there are a number of men to be found work.

CONDITION OF PARTICULAR TRADES.

The building trades in both cities were dull. No large works were in course of construction. Most of the building operations were on small house property, alterations, and a few larger residences and some business blocks of no great size. The outlook for next month is brighter, and it looks probable that all the men left in the cities will find full occupation. All other trades were quiet.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There has been no change of importance in labour conditions. Additional anxiety with regard to the supply of labour for harvest prevails, and doubt

exists as to whether the joint efforts of the Commissioner of Immigration at Winnipeg and the railway companies will be able to bring enough to the West to meet the demands of the farmers. Some extensive additions are being made to the plant of the Manitoba Rolling Mills at St. Boniface, according to building permits taken out. Additions to the General Hospital at Winnipeg, involving an expenditure of nearly half a million, are now proceeding, the contract being let for the work during July. Exceptional activity prevails in the building trades at the present time. Factories generally are active. Nearer prospect of a better crop is having a stimulating effect. Business expands steadily. Bank clearings for the year to date show a gain over the corresponding period of last year of approximately twenty-two per cent. During the latter part of July the gain was approximately fifteen per cent. Wholesale houses reported a larger business towards the end of July than during June, and the volume of orders being received was steadily gaining as compared with last year. An important change in the rate of wages paid to bricklayers and stonemasons took place during the month. Approximately 750 men received an advance of from 62½ cents to 67½ cents per hour. The structural iron workers, of which there are, according to members of the union, 300 employed in Winnipeg, now claim to be all working at the rate of fifty cents per hour. Previous to May 1, on which day a strike was inaugurated, the rate was forty cents. The employers, however, do not recognize the union. A meeting of coopers is being arranged for the purpose of resuscitating the organization, which has for some time ceased to have meetings. The cooks and waiters of Winnipeg, to the number of eighty, at a public meeting during the week, resolved to organize. A statement has been made to the effect that power from the municipal hydro-electric plant belonging to the city of Winnipeg, will be turned on about September 15 next. The annual report of the city electrician for the year ending April 30, shows that during the year wiring permits to the number of 5,473 were issued, and

horse power of motors installed to the amount of 4,515; new lamps 82,064. The mayor of Winnipeg has announced that the City Council of Winnipeg is considering favourably the proposal of Sir William Mackenzie, the president of the Winnipeg Electric Railway Company, to sell out the properties of that company at the rate of \$250 for each share of stock with a par value of \$100. The condition which the City Council will require is that upon the audit of the books of the Company by an auditor to be appointed by the city, it is shown that the earnings of the company are equal to seven per cent. upon the purchase price after due provision has been made for retiring the bonded indebtedness of the company, and other usual fixed charges. Permits for new buildings issued during June, indicated an estimated expenditure of \$2,790,250, which is the largest total ever reached in one month in Winnipeg. The following are the comparative statistics for the first six months of 1910 and 1911:

	Permits.	Bldgs.	Cost.
June, 1911.....	519	634	2,790,250
June, 1910.....	373	467	2,413,700
First 6 months, 1911.....	1,982	2,371	8,581,550
First six months, 1910.....	1,789	2,213	9,906,100

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During July the weather has been very cool, so much so as to destroy all hope of an early harvest. Grain under normal conditions will be ready to cut about August 15. Barley cutting has already commenced in Manitoba. Farmers are very much concerned over the apparent short supply of labour, and the resultant higher prices which the men will ask. The crop will not be a very heavy one to handle, as the straw is not as rank as it promised to be during the early period of the season.

CONDITION OF PARTICULAR TRADES.

The class of mechanics in most demand at the present time is plumbers. All other branches appear to be fairly well supplied with men. In the engineering trades there has been some improvement during the past few weeks,

but the number of men employed is not more than at the same period of last year.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During the past month labour has not been very well employed. Especially is this true of unskilled labourers, carpenters and plasterers. It is expected, however, that a large number of men will be needed to assist in the harvest, which will be very heavy. A special meeting was called by the mayor for the purpose of finding out the needs of the farmers in the surrounding districts, and as a result the mayor and an alderman were sent south to arrange for harvester excursions to be brought over the Great Northern Railway. The City Council is doing much local improvement this year, including widening of Rosser avenue sidewalks, and an extensive storm water drain system. The city engineer was instructed to examine and report on the water supply. The engineer reported that the best results could be obtained from sedimentation basins at a cost of \$60,000. The steel has been laid on the new transfer track, and the industrial spur between Rosser and Pacific avenues has been completed. With these two tracks the city will have excellent track-age sites for warehouses. Work has been commenced on the new Canadian Pacific Railway Company's depot. The Brandon Construction Company was the successful tenderer, and the contract price was \$60,000. This company also obtained a contract for the power house for the new hospital for the insane.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops are exceptionally heavy, and if warm weather comes a record crop will be harvested.

Manufacturing.—All manufacturing companies were working full time and business was good.

CONDITION OF PARTICULAR TRADES.

Carpenters, lathers and plasterers were dull, but all the other building trades were busy. The other skilled trades were from active to busy, and unskilled labour was dull.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During the past month, labour, with but few exceptions, has found a ready demand at all times, especially in the building trades, which alone speaks for itself as evidence of the rapidity with which the city is growing. In consequence of the increased amount of business, both industrial and commercial, the past month has been more favourable to labour than the preceding month, or the corresponding period of last year. Both wholesale and retail trade continued to experience active business.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports received from throughout the Province indicate that the crops are in good shape.

CONDITION OF PARTICULAR TRADES.

Many bricklayers and masons were idle as a result of lack of material. Carpenters and joiners had an active month, also lathers and plasterers. Painters and paperhangers were busy. Plumbers were active throughout the month. Stone cutters were fairly well employed. Builders' labourers were active and in demand. Machinists, engineers and electrical workers and bicycle workers were active. All branches of the printing trades experienced an active month. Journeymen tailors and garment workers were well employed. Bakers and confectioners and butchers were active. Barbers were active and in demand. Clerks, stenographers and de-

livery employés found demands for their services. Hotel and restaurant employés were very active. Cabdrivers, hackmen and draymen were active. Teamsters and expressmen were busy. The supply of unskilled labour was equal to the demand.

CALGARY, ALTA., AND DISTRICT.

Mr. Geo. Howell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

An increased demand for unskilled labour, also for skilled labour in several trades has considerably improved the condition over the previous month; and a comparison with the same month of last year also showed a considerable improvement, but building operations were somewhat retarded by shortage of material.

There is a surplus of carpenters, leather workers and stone cutters, owing to a limited demand for these classes.

A very large number of residences, business blocks and warehouses are under construction.

The contract for the new \$1,000,000 Canadian Pacific Railway Company's hotel has been awarded the Ross Cartage Company, a local concern; and operations on same have begun.

There were 214 building permits issued to the value of \$817,980 during July, compared with 133 permits, totalling \$520,098 for July, 1910.

The bank clearings for the month of July were \$21,226,508, as compared with \$12,371,753 for July, 1910.

Wholesalers and retailers report further improvements in trade; and considerably better than July, 1910.

On June 15, the sheet metal workers came out on strike for a raise in wages from 42½ to 52½ cents per hour and a fifty-hour week. After negotiations with the employers they came to an agreement that the wages be increased to 45 cents per hour, from July 1 to March 30, 1912; and 52½ cents from April 1, 1912 to April 30, 1913, with a fifty-four hour week.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, plasterers, plasterers' labourers and building labourers were well employed. Plumbers, steam-fitters and helpers, carpenters and stone-cutters are fair. Moulders, iron workers and helpers, coremakers, machinists, engineers, electrical workers, linemen, blacksmiths, boiler makers, sheet metal workers and horseshoers report trade good. Woodworking and furnishing trades report condition good. Brewery workers were well employed. Printing and allied trades report trades busy. Clothing trades are well employed. Bakers, confectioners, butchers, meat cutters, and cigar makers were fully employed. Leather trades are quiet. Miscellaneous trades are well employed. Transport employes report trade good. Unskilled labour well employed.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of labour during the month was active and compared favourably with conditions last month. Heavy rains retarded building somewhat at the beginning of the month; otherwise building mechanics were well employed. Among the buildings under construction at the present are: the Provincial Parliament buildings, Public Hospital, Public School, Court House, Massey-Harris building, Shugarman Store, Ames-Holden McCready building, Jackson Brothers' store and office block, Tegler black, Alberta Loan & Investment Company's block, J. B. Mercer's warehouse, Great West Saddlery Company's warehouse, Presbyterian Church and the Northern Hotel. Transportation companies reported an increase in business during the month and wholesale and retail trade was very active. The following figures show the business conditions during the month of June, compared with the same month in 1910:

	June, 1910	June, 1911	Increase.
Customs returns.....	\$ 29,913	49,055	64%
Building permits.....	233,670	357,929	53%
Bank clearings.....	5,350,379	9,689,373	81%
Post Office (stamps only)....	6,572	9,005	37%

Street Railway—

Passengers carried.....	311,307	525,781	69%
Revenue.....	\$13,500	\$21,934	62½%
Homestead entries.....	611	637	4½%

TOTAL FOR FIRST SIX MONTHS.

The team owners have organized under the name of the Team Owners' Association. It was decided that no horses in the city should be required to work more than nine hours a day, that 5,000 pounds should be the maximum load on good roads, the load to be lessened on bad roads; also that the rate of wages be not less than 60 cents per hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There has been ample rain and all grain crops are looking in perfect condition. Haying was general throughout the district, and will be the best that has been harvested in years. Farmers are greatly interested in the new stock pavilion which the Exhibition Association will erect immediately after the close of this year's fair. It will be the largest building of its kind west of Toronto. In outside dimensions, it will be 200 by 316 feet, while the interior arena, 90 feet by 230 will provide for 1,000 head of stock. The seating capacity will be 5,000, with standing room for an additional 5,000 spectators.

CONDITION OF PARTICULAR TRADES.

All classes of labour were well employed, the supply and demand being equally balanced. No changes in rates

of wages or hours of labour were reported during the month.

DISTRICT NOTES.

Red Deer.—Building permits for the three months ending June 30, show a total of \$160,305 as against \$30,780 for the same period in 1910, or an increase of 420 per cent. The post office receipts for the same period show gains of thirty-seven to fifty-four per cent., while the freight tonnage and receipts are three times what they were last year. The returns of the land office show that the sums received for timber, mining and school lands run as high as 229 per cent. greater than last year. The only decrease that is recorded is that of the number of homestead entries, these being about one-third less than during the same period in 1910.

Strathcona.—The Public Works Department has large improvements going on, namely: paving Whyte avenue and Main street, construction of miles of granolithic and plank sidewalks and the opening up of numerous streets in the south-west of the city. Among the most prominent buildings either planned or under construction are: the new hospital, costing \$100,000 to be erected on the university grounds; the new post office, costing \$75,000; an armoury, costing \$35,000; the dormitory building on the university grounds, \$100,000; and the addition to the Roman Catholic College, costing \$40,000. Four new residences will also be erected on the university grounds for the professors.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market was very dull during the month of July. Work on city side-walks and sewers was started about the middle of the month. Work at the Exhibition grounds gave employment to a good number of men of all classes. At

times about sixty carpenters were employed. The demand for men has not been great, the supply exceeding the demand. In no branch of labour has any activity been shown. Building permits for the month of June amounted to \$94,960; for June of last year, \$92,005; for July of this year, \$20,270 up to the twenty-fifth. A new firm, The Canadian Rand Drill Company, has established its head office in Lethbridge. Its factories are at New York and Sherbrooke, Que. The strike of the coal miners is the chief cause of the depression in the various trades.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This year's crops will be the best that were ever raised in this district. There is some fear expressed of the excessive drought having a bad effect on the ripening grain. Harvesting will be general the first week in August.

Manufacturing.—Brickyards are busy, the product being shipped to outside points.

Mining.—Coal mining is at a standstill at present. Orders are in for mine supplies, but owing to the strike they are not being filled.

CONDITION OF PARTICULAR TRADES.

Bricklayers were very dull. Carpenters and joiners were fairly well employed. Lathers, plasterers, painters, plumbers and builders' labourers were dull. Printers were well employed, and pressmen to a limited extent. Unskilled labour was very well employed.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general strike of the building trades practically terminated on July 25, when a new committee was appointed to settle the trouble. It was decided that each union should make a settlement

with its employers individually, which they have all done, excepting the plumbers and electrical workers. All went on strike on June 5, excepting the electricians who went out on June 1, for an advance in wages from \$4.25 to \$5.00 a day of eight-hours. The carpenters asked for an advance from \$4.25 to \$4.50 and a "closed shop." In a number of cases this new scale prevails, but in some instances, \$4.25 remains the rule as before the strike. The improvement from the old scale is small. The other twenty-two trades, being on a "sympathetic" strike with the carpenters and electricians, returned to work on the same conditions existing prior to June 5. On July 27, the plumbers had not completed their negotiations, but out of 180 men, only twenty per cent., remained out of employment.

Vancouver is to have a new department store building, costing \$1,500,000, was the announcement of Herbert E. Burbridge, stores commissioner for the Hudson's Bay Company. The new store will occupy half of the block, bounded by Granville, Georgia and Dunsair streets.

It was announced that a new morning paper—*The Morning Sun*—(Liberal) will be issued shortly. The new company is headed by Hon. Mr. Templeman, proprietor of the *Victoria Times*.

A new ferry wharf, with greater docking capacity and freight facilities, will be shortly constructed at the Vancouver approach to the North Vancouver City wharves.

The Grand Trunk Pacific Railway Company is now constructing a new wharf at the foot of Main street (late Westminster avenue). Exclusive of the North Vancouver ferry landing, the Company has a water frontage of 490 feet, with a depth of 850 feet.

The British Columbia Electric Railway Company commenced a new service on Broadway west and Hastings street east. This makes the second longest line in Vancouver. "In pursuance of the rights and privileges granted to us by franchise, dated April 23, 1901, we are now ready to commence work on a system of mains

for the distribution of electrical energy within the limits of the city of Vancouver." This was the statement in a letter from the Western Canada Power Company which was read to the Board of Works at its meeting on July 11.

Some 2,800,000 feet of lumber was exported from Hastings Mills per three vessels that cleared for Suva, Australia and South Africa.

Fruit for canning and preserving was scarce and expensive. New apples arrived from San Francisco; being a novelty, the prices ruled high. New potatoes sold for 4½ cents a pound.

Ham and bacon rose one cent and provisions of all kinds are firm. Feed is falling a little over the prospect of heavy crops. British Columbia farmers are now busy with the hay, which will be a bumper crop.

On July 15, stone cutters resumed work after being on strike since June 5. Conditions in hours or wages unchanged.

The salmon fishing season opened on July 8. So far (July 25) the catch was poor. It is expected that the catch will be in British Columbia waters this year between 700,000 and 800,000 cases, and that something like 4,000,000 cases will be the total pack of the coast, including Alaska.

Street improvements in different outlying sections of the city, amounting to \$47,675, were confirmed by the City Council.

An apartment building will be erected on the south east corner of Pendrill and Cardero streets, by M. Conlin, costing \$70,000.

A. Des Brisay will build a \$60,000 combined business and rooming house at 541 Water street.

John Montgomery will erect a building at 3637 Windsor street for stores and rooms.

The Mainland Transfer Company, Limited, will build a two-storey brick warehouse on the corner of Nelson and Hamilton streets, costing \$70,000.

A six-storey apartment house will be erected at 1014-16-18 Davie street. It will be the most modern in Canada, costing \$135,000.

A six-storey brick building, to cost \$40,000, will be erected at 148 Cordova street, east.

A public school house, costing \$60,000, will be put up on Sixth avenue.

R. Evans will erect brick stores and apartments at 2200 Granville street, costing \$35,000.

A building permit was issued for the Dawson block, north-east corner Hastings and Main streets, to cost \$180,000.

DISTRICT NOTES.

South Vancouver.—A contract for clearing and grading Wilson road, from Main street to Victoria road was awarded for \$13,599.50. Building operations are active.

North Vancouver.—Wallace's ship-yards were destroyed by fire, loss \$50,000, mostly covered by insurance. A large number of labourers are employed at sewer work and laying water pipes.

Coquitlam.—The Canadian Pacific Railway Company and Town Council have agreed on a flat rate of taxation for a period of ten years, providing the Company will spend \$250,000 within two years on establishment of railroad yards.

Merritt, B.C.—Building operations are active. A contract was let to build a \$20,000 hospital building.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chow, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Generally speaking, labour has been well employed during July, the number of men employed on certain classes of work being larger than at any previous time. However, owing to numerous arrivals from outside points, there is an abundance of help offering, especially carpenters and unskilled labourers. Building permits for June amounted to \$250,000, as compared with \$287,335 for the previous month. For the first six months of the year the aggregate was \$1,432,585, compared with \$1,202,835 for the corresponding period of 1910, an

increase of 20 per cent. The bank clearings for June amounted to \$11,361,784, and for May the figures were \$12,670,535. The customs returns for June totalled \$523,858. There were 181 Chinese landed during the month, who paid the head tax of \$500. Both wholesale and retail trade are in a very healthy condition, and the future outlook is bright. During the month a deputation waited on the mayor of the city, with a request that Hindoos be given employment on city works. It was represented that the Hindoos are British subjects, though they were in a different class from other Orientals. The City Council unanimously refused the request. The City Council is about to commence the construction of a sea wall to protect the foreshore at Ross Bay cemetery from being washed away by the sea. The ratepayers recently voted \$150,000 for this purpose. The city is also spending \$50,000 to improve the electric lighting system, and a large sum to extend the sewerage system. At the July meeting of the Victoria Trades and Labour Council it was stated that the various Boards of Trade throughout the province were petitioning the Dominion Government, asking it to relax the immigration laws, claiming that there was a shortage of labour for railway construction, &c. The council passed a strong resolution protesting against any modification of the immigration laws.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops in the vicinity of Victoria promise a fair average yield. The fruit crop, especially plums and prunes, will not be as abundant as expected earlier in the season.

Salmon fishing.—The run of spring salmon on the northern rivers of British Columbia has been unusually good this season. The sockeye fishing season began on June 20, and the canners hope a good average year.

Whale fishing.—Whale fishing on the west coast of Vancouver Island is better than in any previous season, and the total for the season will be largely in excess of any former year.

Sealing.—The settlement of the sealing question by the governments of Great Britain, Japan, Russia, and the United States, whereby pelagic sealing will cease for fifteen years, is an event of considerable importance to a number of people in this city, and it is expected that claims for compensation will be filed by the owners of sealing vessels for the loss they will sustain through the shutting down of the industry.

Lumbering.—The lumbering industry was in a flourishing condition. All mills were working steadily with good prospects for the future. The total receipts from timber and coal licenses for the month of June were \$136,486.12. The provincial log scalers during June scaled 66,000,000 feet of logs, an advance of 6,000,000 feet over the corresponding month of last year.

CONDITION OF PARTICULAR TRADES.

Work among the various branches of the building trades may be said to be brisk, with few idle men, except carpenters, who report a number of unemployed. Iron moulders, machinists, &c., report work as only fair, with some unemployed. Electrical workers, linemen, blacksmiths, horseshoers, &c., report work as fair with few idle men. Woodworkers were steadily employed, while upholsterers reported trade as somewhat quiet. Business was good in the printing trades and all men employed. Tailors reported work dull, while garment workers were well employed. Owing to the numerous public works under construction, unskilled labour was employed in greater numbers than ever before in this city; yet there was more than a sufficient number of men available.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There has been little change in the labour situation since last month; while there has been a large amount of work going on, there are still a large number of

men idle and looking for work in the mines. Commercial activity continues, as evidenced by the heavy passenger travel and steady increase of general merchandise. Wholesale and retail dealers report business as good. There have been no changes in rates of wages during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy with their harvest, but there are plenty of men to meet the demands.

Fishing.—Fishermen are quiet in this district.

Lumbering.—The saw mills of the district are working steadily, and the logging camps are also in full operation.

Mining.—The coal mines in this city are working every day, and while some of the other mines in the district are working steadily, some of the mines have lost a few days work during the month.

Railway construction.—Track laying on the extension of the Esquimalt & Nanaimo Railway Company to Alberni is nearly completed. There are several parties of surveyors out on the Island working on new lines to be started soon. The Canadian Pacific Railway Company is steadily clearing land in different sections for sale for agricultural purposes.

The city is still busy extending its sewerage system and laying cement sidewalks on the principal streets.

Operations at the brick yard, which have been delayed a few months, are progressing, and it is expected that machinery will soon be put in and work of making brick started.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were active. Carpenters and joiners were still very active. The amount of new buildings in course of erection seems to be on the increase. Lathers and plasterers were active. Painters and paperhangers had plenty of work on hand. Plumbers reported work very active. Builders' labourers were well employed during the month. Blacksmiths and carriage workers reported work as active. Printers

reported work as steady. Teamsters and expressmen had a good month. While there has been a large amount of

work for unskilled labour in this district there are still a number of men looking for work.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JULY, 1911.

DURING the latter part of the month of June two applications were received in the Department for the establishment of Boards of Conciliation and Investigation, as follows:

1. On behalf of the carmen employed by the Quebec and Lake St. John Railway Company, the number of employés affected being given as eighty directly and fifteen indirectly.

2. On behalf of the employés of the Montreal Street Railway Company, said employés being members of the Amalgamated Association of Street and Electric Railway Employés of America, No. 328. The number of employés affected was given as thirty directly and 1,970 indirectly.

Reports Received.

During the month of July reports were received of five Boards of Conciliation and Investigation established under the Act, as follows:—

1. Report of Board to which had been referred certain differences between the Cities of Port Arthur, Ont. and Fort William, Ont., and their electrical workers, members of the International Brotherhood of Electrical Workers of America, Union No. 339.

2. Report of Board to which had been referred certain differences between the City of Edmonton, Alta., and its electrical workers, members of the International Brotherhood of Electrical Workers of America, Local Union No. 544.

3. Report of Board to which had been referred certain differences between the Hudson Bay Mining Company, Limited, Gowganda, Ont., and its employés, members of Gowganda Miners' Union, No. 154, Western Federation of Miners. A minority report was also received bearing the signature of Mr. Duncan J. McDonell, member appointed on the recommendation of the employés concerned.

4. Report of Board to which had been referred certain differences between the Coal Operators comprising the Western Coal Operators' Association and their employés, members of District No. 18, United Mine Workers of America. A minority report was also received bearing the signature of Mr. A. J. Carter, member appointed on the recommendation of the employés concerned.

5. Report of Board to which had been referred certain differences between the Great North Western Telegraph Company of Canada and its telegraphers, members of the Commercial Telegraphers' Union of America.

Other Proceedings under the Act.

In the application received on behalf of the carmen employed by the Quebec and Lake St. John Railway Company it was stated that the matters in dispute related to wages and conditions of employment, the number of employés affected being given as eighty directly and fifteen indirectly. The application as received was not in the form prescribed under the Act, and whilst communications were passing between the employé and the Department in respect of the correction of the same, a communication addressed to the Honourable the Minister of Labour under date of June 20, was received from the General Superintendent of the Canadian Northern Quebec Railway in which the following statement was made: "Beg to inform you the Committee representing the men was met at Quebec on the fifteenth instant and new schedule of rates and conditions arranged and agreed to."

In the application received on behalf of the employés of the Montreal Street Railway Company for the establishment of a Board of Conciliation and Investigation it was stated that the differences

question grew out of the dismissal by the Company of certain employés and alleged discrimination against them as members of the Union. The number of employés affected by this dispute was given as thirty directly and 1,970 indirectly.

A Board was established by the Minister on July 19, Messrs. J. L. Perron, K.C., and Charlemagne Rodier, both of Montreal, Que., being appointed members of the same on the recommendation of the employing Company and of the employés respectively. At the close of the month of July the Board had not been completed by the appointment of a Chairman.

In the July number of the *Labour Gazette* reference was made to the report of the Board of Conciliation and Investigation to which was referred, for adjustment, certain matters in dispute between the following boot and shoe

manufacturers of the City of Quebec, namely: The John Ritchie Company, Limited, The William A. Marsh Company, Limited, Gale Brothers, and J. M. Stobo, and their employés. During the latter part of the month communications were received in the Department from The John Ritchie Company, Limited, Gale Brothers, and J. M. Stobo, stating that the findings of the Board were accepted by them as an adjustment of the disputes in their respective factories. The letter of The John Ritchie Company, Limited, which was received in the Department on July 5, said in part:

"We have pleasure in thanking the Board, and the Department, for their laborious and efficient work in their efforts to bring about a better understanding between employer and employed, and hope it will lead to better results than have prevailed."

I. REPORT OF BOARD IN DISPUTE BETWEEN THE CITIES OF PORT ARTHUR, ONT. AND FORT WILLIAM, ONT., AND CERTAIN EMPLOYÉS OF SAID CITIES, BEING ELECTRICAL WORKERS AND MEMBERS OF THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS OF AMERICA, LOCAL UNION NO. 339.

THE Minister of Labour received on July 3, the unanimous report of the Board of Conciliation and Investigation to which had been referred for adjustment certain differences between the Cities of Port Arthur, Ont. and Fort William, Ont., and employés of said cities, being electrical workers and members of the International Brotherhood of Electrical Workers of America, Local Union No. 339.

The matters in dispute which led to the establishment of this Board related to wages and hours, the number of employés affected being given as thirty-two directly and sixty-six indirectly.

A Board was established by the Minister on June 1, and was constituted as follows: Mr. J. Dix Fraser, Port Arthur, Ont., member appointed on the recommendation of the Cities of Port Arthur and Fort William; Mr. C. W. Foster, Port William, member appointed on the recommendation of the employés con-

cerned; and Rev. S. C. Murray, D.D., Port Arthur, Ont., Chairman, appointed by the Minister on the joint recommendation of the foregoing members of the Board.

The first meeting of the Board was held in Port Arthur on June 13; subsequent meetings were also held in Fort William, the Board completing its work of conciliation and investigation on June 29. The points considered by the Board were discrimination, wages, date of payment, hours per day, overtime, and annual agreement. After a very thorough investigation of these points the Board drew up an agreement effective for a period of one year from June 1, 1911. This agreement was presented to the Councils of both cities and to the representatives of the employés. It was formally signed by both parties to the dispute, their differences being thus amicably settled and the threatened strike averted.

On July 19, a letter was received from the City Clerk of Fort William, acknowledging receipt of a copy of the findings of the Board in the above matter and stating that the same had been presented to the City Council at a meeting held on July 11. The letter of the City Clerk further stated that: "The members all expressed themselves as being entirely in accord with the award of the Board of Conciliation, and as far as known, the terms of the award are perfectly satisfactory to the men, and in acknowledging receipt of your report, I was instructed to convey to your Department the thanks of the Council for the successful adjustment of the dispute between the Electrical Workers and this city."

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

PORT ARTHUR, June 30, 1911.

F. A. Acland, Esq.,
Deputy Minister of Labour,
Department of Labour,
Ottawa, Ont.

Sir:

The members of the Board of Conciliation and Investigation in the matter of the dispute between the cities of Port Arthur and Fort William and electrical workers, beg leave to submit the following report:

In the matter of the "Industrial Disputes Act, 1907", and in the matter of differences between the cities of Port Arthur, Ont., and Fort William, Ont., and certain employés of the said cities being Electrical Workers, and members of the International Brotherhood of electrical workers of America, Local Union No. 339.

The Board, composed of Rev. S. C. Murray, D.D., Chairman, of Port Arthur, Mr. J. Dix Fraser, of Port Arthur, and Mr. C. W. Foster, of Fort William took the oath of office before Magistrate Halling of Fort William.

The first meeting was held in Port

Arthur, Tuesday, June 13, at four o'clock p.m. The documents were read, including clause of the Act bearing most directly upon the case, and methods of procedure agreed upon. The Board then adjourned to meet at Fort William the following day.

Meetings were held continuously, Wednesday, Thursday, Friday, Saturday, Monday, Tuesday and Wednesday, June 14 to June 21, inclusive.

All members of the Board were present at every sitting of the Board.

The City of Port Arthur was represented by Acting Mayor H. B. Dawson, in the earlier sessions, and by Mr. Richard Fox, Manager of the Electrical Department of the City of Port Arthur.

The City of Fort William was represented by Mr. A. L. Farquharson, Manager of Utilities for Fort William.

The employés were represented by Mr. John B. Pegg, of Fort William, and Mr. A. R. McRae, of Port Arthur.

Your Board decided not to place men on oath and to give all possible liberty in discussing points at issue.

The situation was somewhat complicated.

1. The employés in both cities were living under practically the same conditions, and were members of one union.

2. The schedule of wages in one city differed in almost every instance from the schedule operative in the other.

3. Men working under a specific designation in one city might be employed, in part, in as many as three departments, while the men similarly designated by the other city might be serving in more than one department, though different from the departments in the former.

4. In order to substantiate their claims the employés usually quoted Western Wage Schedules, while in their defence the cities quoted Eastern Schedules, making it necessary to study a wide range of conditions in order to reach an intelligent basis.

5. While the employés had stated in their application for a Board of Conciliation that they "are willing to expurgate" certain clauses which involve recognition of their Union, it was pleaded that it had not been anticipated that the

above expression would bar discussion of that point. Though contrary to precedent the point was re-admitted with the result that it was mutually agreed to substitute the word "Employés" for "Union" (see clause 1 of agreement). The points considered were discrimination, wages, date of payment, hours per day, overtime and annual agreement, in all which was involved the question of uniformity in the two cities.

Upon adjournment Wednesday, June 21, it was agreed to meet Friday morning at Fort William, June 23, and as far as possible interview parties to the dispute during the interval.

On Friday morning the Board met, reported progress and held conference with Mayor at Fort William, who assured the Board that he would advise his council to acquiesce in the finding of the Board should it be unanimous.

After discussion of the principal points now at issue—wages and hours—it was agreed to adjourn to meet at the call of the Chairman, and to spend whatever time was necessary in study of relative cost of living as compared with wages schedules, using the *Labour Gazette* for the former purpose in compiling comparative tables with a view to a fair and intelligent agreement, and also to further interview parties.

The Board again met Tuesday morning, June 27, reported progress, compared tables and made draft agreements as a basis for further discussion with parties to the dispute.

Wednesday, June 28, The Board met, reported progress, and completed the agreement, and returned to the parties.

A meeting of the employés was convened for Wednesday evening. Their representative, Mr. Foster, presented the agreement, which, after argument and presentation of statistical tables, was accepted by a majority of the men, and upon a second vote was accepted unanimously, and their representatives authorized to sign.

Thursday morning, June 29, the Board again met, made a final draft of agreement, ordered copies to be prepared for signature, and during Thursday afternoon and Friday morning had the agree-

ments before the Council of Port Arthur, and the Mayor and Clerk of Fort William, and also the representative of the men and duly signed.

The dispute was thus, by an unanimous finding of the Board, amicably settled, and a uniform agreement for the two cities and their Electrical workers formally signed.

The agreement is as follows:

AGREEMENT BETWEEN CITIES OF PORT ARTHUR AND FORT WILLIAM AND ELECTRICAL WORKERS OF SAID CITIES.

1. That the Cities of Port Arthur and Fort William in the event of disputes arising between the cities and their employés with regard to wages, hours, or any other matter pertaining to the welfare of their employés, agree to confer with their employés through their regularly appointed representatives, and that such appointees shall not in any way be discriminated against in subsequent relations with the cities on account of having accepted such appointment from their fellow employés.

2. Scale of wages recommended.

Foremen.....	\$100.00 per mo.
First linemen.....	3.50 per day.
Second linemen	3.00 "
Wire chief	100.00 per mo.
Meter men.....	90.00 "
Cable men.....	4.00 per day.
Arc light trimmers and repairers.....	80.00 per mo.
Trouble men.....	90.00 "
Phone installers....	90.00 " or 3.50 per day.
Wire inspectors.....	3.75 "

3. That employés be paid semi-monthly.

4. That ten hours shall constitute a day—from seven o'clock a.m. to six o'clock p.m., with one hour at noon for dinner; or as may be mutually agreed upon between managers and men; and further that the ten-hour day shall continue throughout the year.

5. All time worked over regular schedule working hours, to twelve o'clock midnight, shall be paid at the rate of time and one-half; after midnight, double

time. Sundays and all Dominion holidays, including New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, and Christmas Day will be paid at the rate of double time. Should any of the above mentioned holidays fall upon Sunday the day observed by the Federal or Provincial Government will be observed.

6. That this agreement shall remain in force for one year, beginning June 1, 1911, and shall continue in force from year to year, from June 1 to June 1, unless notice in writing be given by either party on or before April 1, in any year, and if no such notice be given, then this agreement shall remain in force for the further period of one year beginning June 1.

Board of Conciliation:

(Sgd.) E. C. MURRAY,
Chairman.

J. DIX FRASER,
C. W. FOSTER.

We accept the above award.

For the City of Fort William:

(Sgd.) S. C. Young,
A. McNAUGHTON, *Clerk.*

For the City of Port Arthur

(Sgd.) H. B. DAWSON,
Presiding Officer.
J. McTEIGUE, *Clerk.*

For electricians duly elected to represent employés of Fort William and Port Arthur:

(Sgd.) A. McRAE,
JOHN B. PEGG.

All which is respectfully submitted.

S. C. MURRAY, *Chairman.*
C. W. FOSTER,
J. DIX FRASER.

PORT ARTHUR, ONTARIO,
June 30, 1911.

II. REPORT OF BOARD IN DISPUTE BETWEEN THE CITY OF EDMONTON, ALTA., AND CERTAIN EMPLOYÉS, BEING ELECTRICAL WORKERS AND MEMBERS OF THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL UNION NO. 544.

THE Minister of Labour received, on July 5, the unanimous report of the Board of Conciliation and Investigation to which had been referred certain differences between the City of Edmonton, Alta., and employés, being electrical workers and members of the International Brotherhood of Electrical Workers, Local Union No. 544.

In the application for the establishment of this Board it was stated that the dispute grew out of a demand on the part of the employés concerned for a change of wage allowance or remuneration of the employés, and a change generally of conditions surrounding their employment in and about the various utilities owned and operated by the City of Edmonton, namely: telephones, electric lights, street railway, and electric power. The number of employés concerned was given as thirty-five.

A Board was established by the Minister on June 2, and was constituted as follows: Mr. Arthur W. Ormsby, Edmonton, Alta., member appointed on the recommendation of the City of Edmonton; Mr. W. Symonds, Lethbridge, Alta., member appointed on the recommendation of the employés concerned; and the Honourable Mr. Justice H. C. Taylor, Edmonton, Alta., Chairman, appointed by the Minister on the joint recommendation of the foregoing members of the Board.

The Board convened on June 21, at the City Hall in the City of Edmonton. Working rules and schedules of wages were examined; and a new set of rules and a new schedule of wages were drawn up by the Board for each of the departments concerned, namely: telephone department, electric light and power, power-house and street railway electrical

workers. The Board recommended that the rules and schedule above mentioned should remain in force from July 1, 1911, until May 1, 1913. After making some changes both parties to the dispute accepted the recommendations of the Board; the dispute being thus amicably settled and the threatened strike averted.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

DISTRICT COURT.

EDMONTON, June 30, 1911.

To the Honourable,
W. L. Mackenzie King,
Minister of Labour,
Ottawa, Ont.

In the matter of the Industrial Disputes Act, 1907, and of a dispute between the City of Edmonton (Employer), and certain of its employés being electrical workers, (Employés).

The Board of Conciliation and Investigation, established under the provisions of the Industrial Disputes Act, 1907, to whom the above dispute was referred under the provisions of the said Act, having concluded their duties, beg to report as follows:

The Board convened at the City Hall in the City of Edmonton, pursuant to appointment, on Wednesday June 21, 1911, and proceeded to enquire fully into the matters in dispute. Working rules and schedule of wages covering the different departments of the City concerned were fully gone into and a new set of rules and a new schedule of wages were drawn up by the Board who unanimously agreed to them. These were submitted to the parties interested and were accepted by them after some changes had been made, and we are pleased to report that the dispute herein has been harmoniously settled.

We attach hereto, duly signed, the working rules and schedule of wages as agreed upon.

All of which is respectfully submitted.

(Sgd.) H. C. TAYLOR,
Chairman,
A. W. ORMSBY,
For the City,
WM. SYMONDS,
For the Workers.

Telephone Department.

WORKING RULES AND SCHEDULE OF WAGES.

1. The City does not object to any of the employés of this Department belonging to the Brotherhood of Electrical Workers or Union, nor is it the intention of the City to discriminate against any of the employés because of his connection with same, it being understood that the International Brotherhood of Electrical Workers will not, in any way, interfere with or limit the right of the City to discharge or discipline its employés. And nothing herein contained is to be understood as debarring any employé or any committee of employés of the City of Edmonton, affected by this schedule, from interviewing the management relative to any future difference or disagreement pertaining to the provisions herein.

2. Nine hours shall constitute a day's work in exchanges except during the months of November, December, January and February, when eight hours shall constitute a day's work.

3. All overtime shall be paid at the rate of time and one-half. Sundays and Dominion Holidays shall be counted as overtime.

4. Employés who are relieved from duty owing to inclemency of weather, except by their own fault or request, will be allowed one-half a day's pay after having worked two hours of such day. A full day's pay shall be paid only on working, at least, six hours of such day.

5. Employés shall be paid semi-monthly, payment to be made on or before the twenty-second of the month for wages due up to and including the fifteenth of the current month, and on or before the seventh of the month for wages due up to and including the last day of the preceding month.

6. "Foreman" means an employé having charge of five or more men.

7. Where carfare during working hours is deemed necessary by the City, same will be furnished to employes affected by this schedule. Where transportation is considered necessary by the City beyond the five-cent limit the City will furnish same to employes.

8. The foreman shall be held responsible for all tools belonging to the City.

9. Schedule of wages:

The Board recommends that the position of city foreman is worth \$115 per month; cablemen, \$3.75 to \$4.50 per day; exchange linemen, 33½ to 41½ cents per hour; wire chief \$100 to \$110 per month; switchmen and assistant wire chief, \$85 to \$95 per month; inspectors, \$70 to \$100 per month; chief installer, 41½ cents per hour; installers, 25 cents to 33½ cents per hour; cable helper, 30 cents per hour.

10. Nothing herein shall be construed to reduce the pay of any employe now getting a higher rate of pay.

The Board recommends that this schedule do take effect on July 1, 1911, and continue until May 1, 1913.

(Sgd.) G. S. ARMSTRONG,
Mayor.

A. CLUBB,
President, Local 544, I.B.E.W.

J. H. HELLIER,
*Financial Secretary, Local Union 544,
I.B.E.W.*

Electric Light and Power.

WORKING RULES AND SCHEDULE OF WAGES.

1. The City does not object to any of the employes of this Department belonging to the Brotherhood of Electrical Workers or Union, nor is it the intention of the City to discriminate against any of the employes because of his connection with same, it being understood that the International Brotherhood of Electrical Workers will not in any way interfere with or limit the rights of the City to discharge or discipline its employes. And nothing herein contained is to be understood as debarring any employe or any committee of employes of the City of Edmonton, affected by this

schedule, from interviewing the management relative to any future difference or disagreement pertaining to the provisions herein.

2. Nine hours shall constitute a day's work except during the months of November, December, January and February, when eight hours shall constitute a day's work.

3. At electric light line work the first five hours overtime worked between 6 p.m. and 11 p.m., shall be computed at the rate of time and one-half of the standard rate. Additional overtime at electric light line work or overtime starting at 11 p.m., or later, shall be computed at the rate of double time of the standard rate and shall continue until 7 a.m., except intermission for meals.

4. All time worked on Sundays and Dominion holidays at electric light line work to be paid at the rate of double time.

5. Employes relieved from duty owing to inclemency of weather except by their own fault or request will be allowed one half day's pay after having worked two hours of such day. A full day's pay shall be paid only on working at least six hours of such day.

6. Employes shall be paid semi-monthly, payment to be made on or before the twenty-second of the month for wages due up to and including the fifteenth of the current month, and on or before the seventh of the month for wages due up to and including the last day of the preceding month.

7. Where carfare during working hours is deemed necessary by the City same will be furnished to employes affected by this schedule. Where transportation is considered necessary by the City beyond the five cent limit the City will furnish same to employes.

8. All wires carrying a voltage of 650 volts or more shall be classified as high voltage wires.

9. When work is to be done on high voltage wires not less than two journeymen are to be assigned to the job except on "thawing machines." No apprentice shall be allowed to work on high voltage wires.

10. In case of trouble with high voltage

wires and where work is hazardous, two journeymen or more must be sent out to repair the trouble. One man can be sent out to watch until another man can be obtained.

11. Schedule of wages:

Foreman, \$125 a month; sub-foremen and linemen 45 cents to 50 cents per hour; arc lamp trimmer and troublemen 42 cents per hour.

12. Nothing herein contained shall be construed to reduce the pay of any employé getting a higher rate of pay.

The Board recommends that this schedule do take effect on July 1, 1911, and continue until May 1, 1913.

(Sgd.) G. S. ARMSTRONG,
Mayor.

A. CLUBB,
President, Local 544, I.B.E.W.

J. H. HELLIER,
Financial Secretary, Local Union 544, I.B.E.W.

Power House.

SCHEDULE OF WAGES.

1. The chief electrician in the power house being responsible for the performance of all electrical apparatus, altera-

tions, etc., the Board considers the position worth \$110 per month as a minimum. Assistant to chief electrician 40 to 45 cents per hour.

The Board recommends that this schedule do take effect on July 1, 1911, and continue until May 1, 1913.

(Sgd.) G. S. ARMSTRONG,
Mayor.

III. REPORT OF BOARD IN DISPUTE BETWEEN THE HUDSON BAY MINING COMPANY, LIMITED, GOWGANDA, ONT., AND EMPLOYÉS.

THE Minister of Labour received on July 10, the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Hudson Bay Mining Company, Limited, of Gowganda, Ont., and its employés, members of Gowganda Miners' Union, No. 154, Western Federation of Miners. A minority report was also received from Mr. Duncan J. McDonell, member appointed on the recommendation of the employés concerned.

In the application for the establishment of this Board it was stated that the dispute in question related to a reduction of wages by the Company and an increase in the price for board, the employés

demanding that the old scale of wages should be continued. The number of employés affected by the dispute was given as thirty.

The Board which was appointed to investigate the differences was composed as follows: Professor John Sharp, New Liskeard, Ont., member appointed on behalf of the employing Company; Mr. Duncan J. McDonell, Gowganda, Ont., member appointed on the recommendation of the employés concerned; and Mr. George Ritchie, K.C., Toronto, Ont., Chairman, appointed by the Minister in the absence of any joint recommendation from the foregoing members of the Board.

The Board met on June 15, at the Com-

pany's mine about twelve miles from the village of Gowganda. At this meeting the Company produced the scale of wages in question and gave the following reasons in support of their action, namely, the extra cost of bringing supplies to the locality; that the property was not sufficiently developed to justify any further expenditure for the accommodation and convenience of the men; that the old scale of wages was too extravagant and higher than the wages paid at other mines around Gowganda; that the cost of the work done was not justified by the results shown; and that about eighty per cent. of the men working in the operating mines around Gowganda were getting wages on the new scale submitted by the Hudson Bay Mining Company. The employés, on the other hand, submitted the evidence of many witnesses and claimed that the remoteness of the locality, the loss of time and expense going to and returning from Gowganda, as well as the extra cost of such necessities as the men required, justified their contention that the old scale of wages should not be changed. The Board also visited the bunk house which had been complained of and unanimously recommended that the same should be suitably enlarged and the roof mended. The day following the Board visited several of the mines in the district and found that the men were, on the whole, contented with their wages and condition.

The report was signed by the Chairman and Professor Sharp, member appointed on the recommendation of the Company, and was favourable to the contention of the Company; the minority report signed by Mr. Duncan J. McDonnell, member appointed on the recommendation of the employés, being favourable to the men.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

GOWGANDA, June 6, 1911.

To the Honourable
Wm. L. Mackenzie King, C.M.G.,
Minister of Labour,
Ottawa, Ont.

Sir:

In the matter of the Industrial Disputes Act, 1907, and in the matter of the differences between the Hudson Bay Mines at Gowganda and its employés.

The Board of Conciliation convened at the Company's mine, near Hanging Stone Lake, about twelve miles from the village of Gowganda, on June 15, 1911, in the presence of all the employés at the mine.

There were present Mr. Duncan J. McDonnell, a member of the Board appointed by the employés, Professor John Sharp, M.A., appointed by the Company, and George Ritchie, the Chairman.

The employés named Fred. J. Carroll to represent them before the Board. The Company named Horace G. Young to represent it before the Board, both parties consenting, and the members of the Board were duly sworn.

The Chairman briefly explained the scope and objects of the Industrial Disputes Investigation Act, and asked for the co-operation of both sides.

The Company then produced the scale of wages in question and adduced evidence in support of it, showing that the extra cost of bringing supplies to this remote locality, a distance of about sixty miles from the railway, amounting to \$1.60 per one hundred pounds, justified the reduction from the old scale of wages to the new scale; that the property was merely a prospect and not yet sufficiently developed to justify an expenditure for the accommodation and convenience of the men further than the buildings and conveniences at present existing; that the old scale of wages was too extravagant and higher than the wages paid at mines around Gowganda in a like state of development; and that the cost of the work done was not justified by the results shown; that about eighty per cent. of the men working in the operating mines around Gowganda

were getting wages on the scale submitted by it.

On the other side the men submitted the evidence of many witnesses and showed that owing to the remoteness of the locality and the difficulty of ingress and egress, there being two portages and a trail, very swampy, of about fourteen miles, the loss of time and expense going to and returning from Gowganda (fare \$1.50 for both ways), the extra cost for such necessities as the men required for wearing apparel &c., amounting to about 38 cents per week, each man, as compared with Cobalt prices, justified their contention that the old scale of wages should not be disturbed. (See memo of comparison between the old scale and the new scale herewith enclosed.)

The Board visited the bunk-house and heard evidence from the men showing that it was too small to accommodate twenty-six men; that the roof leaked, and the Board was unanimous in finding that the bunk-house should be suitably enlarged and the roof mended. There was no complaint about the food.

In the course of taking the evidence, reference was made to the Millerette Mine and the O'Brien Mine (Big Six), about three miles from Gowganda, and the Board deemed it advisable to visit these mines.

Accordingly, on the following day the Board visited the first of the above mines and took further evidence as to the scale of wages paid the men there. The Board next visited the O'Brien Mine and obtained the scale of wages paid to the men there, and it was shown that the men were content at these two places with their wages and accommodation although they worked ten hours per day.

The men further submitted the scale of wages paid the men at the Labrick Mine, the Boyd-Gordon Mining Company, the Calcite Lake Mining Company, the Powerful Mines, Limited, the Reeves-Dobie, Blackburn and Big Six. Some of these are in operation and some are not, but all are referred to in the *Labour Gazette* under date of March, 1911, at page 985.

The scale of wages paid the men at Big

Six is enclosed herewith marked "A." The scale of wages paid the men at the Millerette Mines is hereto annexed marked "B". The scale of wages submitted by the Hudson Bay Company and posted on the door of the bunk house is hereto annexed marked "C." In this latter scale the wages of the blacksmith instead of being reduced to \$3.50 per day were continued at \$4.00, and with this exception the scale marked "C" is what the Company contend for.

After securing such evidence as the Board deemed necessary, it convened on the evening of June 16, at Gowganda, and after considering the matter in dispute in all its phases, Mr. McDonnell contended very strongly that the old scale should be restored, Mr. Sharp contending very firmly that the new scale under the circumstance was only fair to the Company as compared with the wages paid by other mining operators.

A compromise was suggested by the Chairman to split the items in difference, but neither side would yield on any points and except as to the improvements in the bunk house, which the Company agreed to remedy, the Board was unable to make an unanimous report.

All of which is respectfully submitted,

(Sgd.) GEO. RITCHIE,
Chairman.
JOHN SHARP,
Member.

"A"

WAGE SCALE.

We make no charge for board, and the following amounts are what the men receive clear of all expenses.

	Per hour.	Per shift.
Drill runners, in shaft stope, or raise	\$.30	\$3.00 ⁰
Drill runners, in drift or cross cut.....	.27½	2.75 ⁰
Drill helpers, in shaft, stope or raise25	2.50 ⁰
Drill helpers, in drift or cross cut.....	.22½	2.25 ⁰
Topmen muckers, trammers.....	.20	2.00 ⁰
Blacksmiths.....	.35	3.50 ⁰
Blacksmiths' helpers.....	.22½	2.25 ⁰
Carpenters.....	.32½	3.25 ⁰
	and	
Carpenters, helpers30	3.00
Axe men, general work.....	.25	2.50
Pick and shovel, general work.....	.22½	2.25
Firemen.....	.20	2.00
	.22½	2.75

From the above it will be seen that we are paying on the average about 25 cents

per shift, more than is paid for the same class of work by the majority of mines in Cobalt.

"B."

MILLERETTE SILVER MINING COMPANY, LIMITED.

SCALE OF WAGES FOR MEN EMPLOYED AFTER OCTOBER 1, 1909.

Shifts are ten hours except at the Power Plant where twelve-hour shifts are worked. Overtime paid at same rate as regular time. One dollar per month deducted from each man for Medical Service. Seventy-five cents per day charged to each man for Board. Men will be charged full board unless absent for three successive meals or more.

OCCUPATION.

	Per hour.	Per shift.	Rate No. 6

(Sgd.) HUDSON BAY MINES, Ltd.,
Per H. G. Young,
Manager.

Minority Report.

The text of the minority report of Mr. Duncan J. McDonnell is as follows:

GOWGANDA, ONT., June 22, 1911.

In the matter of the Industrial Disputes Investigation Act and in the matter of differences between the Hudson Bay Mining Company and its employés, the Board of Conciliation appointed to inquire into this matter met at the mine near Hangingstone Lake, Gowganda, on Thursday, June 15, at 2 o'clock, p.m. Those present included Geo. Ritchie, Chairman, who was appointed by the Hon. the Minister of Labour, John Sharp, appointed by the Company, and Duncan J. McDonnell, appointed by the employés.

The members of the Board being duly sworn then proceeded to take evidence. The Company was represented by H. G. Young, Manager, Arthur Pooley, foreman, and C. E. Cook, timekeeper. The employés were represented by Fred. T. Carrol, Nicolas King, Duncan Campbell, Alex. Chisholm, Thomas Temple, and others of the employés, who acted as witnesses.

Both parties consenting, H. G. Young presented the Company's side of the case, and submitted a wage scale introduced in the first instance by himself, without consulting the Company in the matter, and claimed as his reasons for doing so that the Millerette Mining Company were paying the same rate of wages and that the cost of freighting provisions into the Camp was high, also that the previous Manager (now deceased) did not run the mine upon an economical basis.

Arthur Pooley, the foreman at the mine, then gave his evidence and claimed that sixteen of the twenty-seven men affected still remained at the mine, stating that those who ceased work made no complaint, but asserted that in his (Pooley's) mind the new scale was too low and as proof he admitted that he made an advance of twenty-five cents per shift to some of the men, but that this change was not upheld by the General Manager.

After the Company's evidence had been given Fred. T. Carrol presented the employés' side of the case, and proved that the new scale of wages which was posted on April 15, had been altered somewhat. Several employés were examined who gave evidence of the bunk-house being unfit for the men to live in, and also that all the employés were dissatisfied with reduction owing to the many inconveniences of the locality and demanded unanimously that the wages should be, at least, as denoted in former scale.

After all the evidence deemed necessary was obtained at the mine the Board then adjourned for the day after deciding to visit the Millerette mine which pays the lowest wage in Camp.

Friday, June 16, the Millerette property was visited and upon inquiries being made it was demonstrated that the Millerette Mines, Gowganda, were paying slightly over the scale adopted by the Hudson Bay Company. The Board then visited the Miller Lake O'Brien and were tendered a copy of their wage scale, which showed they were paying a much better wage than the Millerette Mine, and not as H. G. Young had stated. The sleep camps, although not the best, bore a greater resemblance to human habitation than the shelter at Hudson Bay property.

The same evening (June 16) the Board met to consider evidence and after a lengthy discussion in analysing the situation, failed to arrive at a satisfactory conclusion. The Chairman suggested a compromise which neither of the other members would agree to. In my opinion the Company had no reason to introduce a reduction in wages as they were not by any means paying the highest scale in Gowganda.

The conditions under which the men live and work are far from being as they should be. The bunks are hard boards without even a common mattress whilst the blankets can speak and act for themselves. There is no "dry" accommodation for the miners and indeed taking the property as a whole it is not operated with any degree of consideration for the men.

The contention of the Company that

cut was justifiable owing to prohibitive cost of mining is perfectly absurd, as the same argument would apply with more than equal force in favour of the men.

Under all the circumstances of the case, and taking into consideration the entire evidence, I am convinced the employés have not been fairly dealt with in the premises, and without any hesitation do state that the Hudson Bay Mining Company have been guilty of using their men unfairly, to say the least. Further-

more, I wish to include in this my report that, regardless of the findings of any individual member of this Board, the fact still remains that the Hudson Bay Mining Company have directly infringed Section 57, Chapter 20, of the Industrial Disputes Investigation Act, 1907, and are therefore liable in that respect.

All of which is respectfully submitted.

(Sgd.) DUNCAN J. McDONNELL,
Gowganda, Ont.

IV. REPORT OF BOARD IN DISPUTE BETWEEN THE COAL OPERATORS COMPRISING THE WESTERN COAL OPERATORS' ASSOCIATION AND EMPLOYÉS, MEMBERS OF DISTRICT NO. 18, UNITED MINE WORKERS OF AMERICA.

THE Minister received, on July 11, the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Coal Operators comprising the Western Coal Operators' Association and the workmen who had been employed in these mines. The Companies comprised in the Western Coal Operators' Association are as follows: Bankhead Mines, Limited, Bankhead; The H. W. McNeill Company, Limited, Canmore; Alberta Railway and Irrigation Company, Lethbridge; West Canadian Collieries, Limited, Blairmore; The International Coal and Coke Company, Limited, Coleman; Royal Collieries, Limited, Lethbridge; Chinook Coal Company, Limited, Lethbridge; Leitch Collieries, Limited, Passburg; Davenport Coal Company, Burmis; Crows' Nest Pass Coal Company, Limited, Fernie, B.C.; The Corbin Coal and Coke Company, Limited, Corbin, B.C.; Hosmer Mines, Limited, Hosmer, B.C.; Diamond Coal Company, Limited, Diamond City; Canadian Coal Consolidated, Limited, Frank, Alta.; Hillcrest Collieries, Limited, Hillcrest; and the Maple Leaf Coal Company, Maple Leaf. The miners concerned are members of District No. 18 of the United Mine Workers of America. The mines affected are located in eastern British Columbia and the southern portion of Alberta. The number of men concerned is placed at 6,000.

The largest individual Companies comprised in the Association are the Crow's Nest Pass Coal Company at Fernie, B.C., and Michel, B.C., and the Alberta Railway and Irrigation Company at Lethbridge, Alta. The difficulties referred to the Board for adjustment resulted from the failure of the Coal Companies and their employés to effect a working agreement to take the place of one expiring on March 31. The men refused to continue work until a new agreement had been effected. The questions at issue were: conditions of work and wage rates covering the various mines and classes of labour; in the first named question is understood to have been comprised the degree of recognition given by the operators to the employés' organization.

Upon being apprised of the failure of the miners' and mine owners' conference to agree upon terms of settlement, the Minister of Labour instructed Mr. J. D. McNiven, an official of the Department of Labour, to proceed to Fernie for the purpose of lending the good offices of the Dominion Government in any way which might be found of service, also to facilitate and expediate the establishment of a Board of Conciliation and Investigation in the event of the parties concerned being unable of themselves to arrive at an understanding.

The application from the employés for the establishment of a Board of Con-

ciliation and Investigation was received on April 13, and a Board was immediately established by the Minister, being constituted as follows: Rev. C. W. Gordon, D.D., Winnipeg, Man., Chairman; Mr. Colin Macleod, Macleod, Alta., named by the operators; and Mr. A. J. Carter, Fernie, B.C., named by the employes. The Board proceeded with the work of investigation immediately. A short adjournment was made on May 12, and the inquiry was resumed and carried to completion. The report is signed by Rev. C. W. Gordon, D.D., as Chairman, and Mr. Colin Macleod, the member appointed on the nomination of the operators. In a note attached to the report Mr. Macleod signifies his agreement with the Chairman generally, but indicates a few minor points of difference. A minority report was received from Mr. A. J. Carter, the member appointed on the men's recommendation.

The Board's report opens with a brief sketch of the course of the dispute, closing with an expression of regret that the efforts of the Board have been unsuccessful in bringing the dispute to a conclusion, but remarking that "it is, however, the conviction of the Board that after due consideration of the equity and of the effect of this decision, the parties will come to an agreement on the basis suggested." The report points out that during the progress of the investigation every mine was visited, every witness called, and every grievance probed as each party desired. Sworn statements taken from the Companies' books were presented, pay rolls were examined, and mine officials and union officials were placed on the stand. Sanitation was inspected, and the cost of living, the cost of coal production, the tonnage output of mines, the selling price of coal, markets, the relation of coal companies, and all similar matters, were, at the instigation of the parties and on its own motion, fully investigated.

In discussing the question of the causes of the "perennial strife between the parties to this dispute", the Board remarks that "many grievances of the miners were reported arising from conditions of work, interpretation of agreement, dis-

crimination, &c., &c., due in some cases to misunderstandings, in some to petty tyranny of subordinate officials, in some to mismanagement of mines, and in some again to unwise interference of Union officers. At this point the Board ventures the opinion that a stupid, tyrannical or unsympathetic pit-boss or foreman may work great injury in a mine and should be removed, and that a meddling secretary of a local union can with the greatest ease keep a camp in a state of turmoil. His local should deal with him. The Board further made the discovery that in the mines best managed there were fewest causes of complaint. These grievances, while individually of comparative insignificance, cumulatively furnish a mass of inflammable material for strike conflagrations. They ought to be dealt with promptly and settled without delay." These matters are not, however, in the Board's opinion, sufficient to explain the phenomenon of recurring strikes and persistent antagonism between the parties concerned.

The question of the relation between the Operators and the Union is then taken up and some consideration is given to the discussion of the "check-off", in which, the Board explains, so far as it applies in the case of the present dispute, is involved "the principle of the open or closed shop, as also the development, if not the existence, of the Union."

On the question of wages the Board points out that as the investigation proceeded certain striking features emerged, prominent among these being two in particular: firstly, an abnormally low day-wage scale and an abnormally high wage for men engaged in pillar coal; and, in the second place, that out of the eighteen Companies concerned only four have paid any dividends, and these four only intermittently, while during the past two years probably two-thirds of the mines have been operated at a loss. The Board admits finding an impression in some quarters that these losses were due to mismanagement or to collusion with railway companies. This point is discussed at some length.

In reaching a finding upon the wage scale the Board was governed, it is

stated, by certain well-defined principles, as follows: (1) A living-wage is a necessity. (2) In mines operating under the same Association and within the jurisdiction of the same Labour Union, uniformity should prevail as far as possible. (3) In the same mining camp equalization of wages should be sought. (4) After passing the limit of the living wage the financial standing of the Company should be considered.

The schedule of wages proposed by the Board is as follows: (1) That the day-wage scale be increased as follows: ten per cent. advance up to \$3.00 inclusive; eight per cent. advance from \$3.00 to \$3.50, the latter inclusive; five per cent. advance above \$3.50. (2) A differential of 5 cents to 7 cents per ton in all pillars presently without a differential, the application to be by mutual consent. (3) An adjustment of the Contract Rate at Lille Mine so as to make the rate proportionate to the size of seam. (4) An advance of three per cent. on Contract Rates at Lethbridge. (5) All other Contract Rates to remain unchanged. In discussing the schedule of wages recommended by the Board it is pointed out that the general result of the acceptance of the proposed schedule would be an increase in day wages amounting to about \$280,000, offset by a reduction on pillar differentials of about \$46,000, leaving a total net increase in the Companies' payrolls of about \$234,000; "but", says the Board, "though this may appear a somewhat heavy increase, the Board feels that the wages will be more equitably distributed than formerly, the lowest wages paid being increased and the highest reduced."

Some remarks also are offered by the Board as to sanitation and the neglect of ordinary precautions against disease, dirt and overcrowding, the following expression of view being made on this subject: "The Board cannot but express its profound regret that nowhere could it discern indications of any sincere and earnest attempt on the part either of a Company or of a Local Union to promote the social, moral and intellectual well-being of the workers in the mines. Earnest and intelligent co-operation here

would surely be productive of the best results."

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:

BANFF, ALTA., July 5, 1911.

To the Honourable
The Minister of Labour,
Department of Labour,
Ottawa, Ont.

Sir:

In the matter of the Industrial Disputes Investigation Act and in the matter of differences between the Western Coal Operators' Association and District No. 18, United Mine Workers of America, your Board respectfully presents the following report:

Historical Sketch.—During the years 1909 and 1910 the Western Coal Operators' Association and District No. 18, United Mine Workers of America had been conducting operations under an agreement which terminated March 31, 1911. Under the terms of this agreement, a conference was held at Calgary, Alberta, thirty days prior to the date of expiration of this agreement, to negotiate a new agreement. The conference proved fruitless, the agreement lapsed on March 31, 1911, and immediately the miners throughout practically the whole district covered by the eighteen mines "ceased work."

The Department of Labour immediately offered a Conciliation Board; the parties finally accepted. The Board was constituted with Mr. A. J. Carter of Fernie, B.C., representing the United Mine Workers of America, and Mr. Colin Macleod of Macleod, Alberta, representing The Western Coal Operators' Association, and Rev. Charles W. Gordon, D.D., of Winnipeg, as Chairman.

The Board re-convened at Lethbridge, Alberta, on April 26, continued in session until May 12, and adjourned; convened at Coleman, Alberta, on June 8, and finally adjourned in Banff, Alberta, on July 5, 1911.

The Board regrets its inability to present a unanimous Report. Mr. A. J. Carter, who represents the United Mine Workers of America, will present a Minority Report. The Board further deeply regrets that after the utmost diligence and care in the securing and weighing of evidence secured during the investigation, and after the most strenuous and prolonged efforts to harmonize the opinions and attitudes of the parties, that it is forced to report a failure in this respect, in that neither of the parties is prepared to accept the finding of the Board. It is, however, the conviction of the Board, that after due consideration of the equity and of the effect of this decision, the parties will come to an agreement upon the basis suggested.

The problems confronting the Board in dealing with this dispute were so intricate and varied, and the issues involved so vast and far reaching, that the time consumed was far beyond the expectation of any of its members. But having entered upon the task, it was felt that anything but the most thorough and exhaustive investigation would satisfy neither the Board itself, nor the Department, nor the country at large.

In conducting its work, the Board placed itself entirely at the disposal of the parties in seeking to possess itself of the fullest data upon every point. Every mine was visited, every witness called, every grievance probed as each party desired. Sworn documents taken from the Company's book were presented, payrolls were examined, mine officials and union officials were put on the stand. Sanitation was inspected; the cost of living; the cost of coal production; the tonnage output of mines; the selling price of coal; markets; the relation of coal companies to railway companies; these and all cognate matters at the instigation of the parties and on its own motion, the Board faithfully and fearlessly investigated. No information was refused by either party, no inquiry curbed.

When it is remembered that in The Western Coal Operators' Association there are eighteen mining companies represented, working lignite, bituminous

and anthracite fields, differing in methods of working and in character of seams, with a capital of \$40,000,000, and that in District 18 of the United Mine Workers of America there are eighteen locals, each with its own set of claims and grievances and all united in common aims, it will not be difficult to understand why the Board found it necessary to extend the time of its labours to such a length.

Throughout this investigation the Board has set itself to discover the causes of this perennial strife between the parties to this dispute, feeling that there must be some deep rooted reason, not for divergence of opinion simply—that is explicable and yields to reasonable negotiations—but for the spirit of hostility approaching to bitterness, and of distrust that clouds their every relation.

Many grievances of the miners were reported arising from conditions of work, interpretation of agreement, discrimination, &c., &c., due in some cases to misunderstandings, in some to petty tyranny of subordinate officials, in some to mismanagement of mines, and in some again to unwise interference of Union officers. At this point the Board ventures the opinion that a stupid, tyrannical or unsympathetic pit-boss or foreman may work great injury in a mine and should be removed, and that a meddlesome Secretary of a Local Union can with the greatest ease keep a camp in a state of turmoil. His local should deal with him. The Board further made the discovery that in the mines best managed there were fewest causes of complaint. These grievances, while individually of comparative insignificance, cumulatively furnish a mass of inflammable material for strike conflagrations. They ought to be dealt with promptly and settled without delay.

But these grievances, while they account for local irritation, do not explain the phenomena of recurring strikes, persistent antagonism and suspicion, impossibility of mutual concession, &c., that have marked the relations between the parties during the past years. What is the cause? Minor grievances, annoying though they be, never appear at the meetings of the Scale Committee where

agreements are discussed. Difference of opinion on a wage question is inevitable, but this yields to negotiation by reasonable men. What is the cause of this deplorable feeling? The effects are serious enough to concern thoughtful men all over the country. The situation has become intolerable. The question is not solely for the parties primarily concerned and their interests, vast though they may be, but for those constituting that Third Party, The People, with their immensely greater interests, who, unable to protect themselves from loss and suffering, are wholly at the mercy of those who at will let loose upon them this biennial flood of misery and strife. What is this?

A study of the Calgary conference sets forth one chief cause in clear light. For thirty days the parties sat in conference, so-called, unable to achieve a single step in advance. What blocked the way? The General Provisions of the Agreement, as they are called, and specifically the "Check-off." What is this "Check-off?" It is a plan by which the Company agrees to collect for the Union its dues, assessments, fines, &c., from the employes affected. This plan, which seems to be peculiar to the coal mining industry, has found a place in practically all the Districts in the United States where the United Mine Workers of America are in existence, is recognized in the Statutes of Alberta, and has been in operation in all the mines represented in the Western Coal Operators' Association. Why then should the "Check-off" clause become the *bête noir* of every conference? Simply because in the "Check-off" is involved the principle of the "open" or "closed" shop, as also the development, if not the existence, of the Union.

A certain variety of "Check-off" clause the operators will accept, though grudgingly perhaps, but a particular form of "Check-off" the operators resolutely reject. And why? Because in this particular form of "check-off" clause both the Union and the operators believe they see the closing of the door. At every conference both parties sit with their eyes upon that door. Let it move ever so little, open or shut, and the gates are out. And this in the face of the extra-

ordinary fact that the Union frankly and fully concedes the "Open shop", and the no less extraordinary fact that the operators frankly and fully concede to the Union the right to exist and develop itself among their employes. Thus the Union, professing the policy of the "Open Door", gently proceeds to close it a little and are surprised and grieved to find behind the door the whole body of the operators shoving as for dear life. Meantime, the Third Party, the People of Canada, gaze and suffer. If the shop is "Open", why bother about the "Door." A little more sincerity on the part of both parties and a definite understanding upon the question would eradicate what, in the opinion of the Board, is a deep-rooted cause of this continuous strife, and would effectually remove the inability of the parties to rationally negotiate an agreement. Settle the "Open shop" question, and with that the right of the Union to exist and to exercise its proper functions, and there will be little difficulty in finding clear and adequate words with which to frame an acceptable "Check-off" clause with those clauses germane to it, *viz.*, those dealing with Mine Management, Union Jurisdiction, Discrimination, &c., which now invariably awaken strife.

The Board, therefore, suggests that both parties frankly come out into the open in regard to the principle of the "Open Shop" and in regard to the right of the Union to exist and exercise its functions, and then there will be no difficulty in drafting the clauses named above. The operators must remember that a mine is not a hole in the ground with coal in it, but is an industry producing coal for the market in co-operation with labour, and the miners must remember that there are no coal miners unless mines are in operation.

On the question of wages the Board discovered wide divergence of opinion, but, as the investigation proceeded, certain striking features emerged upon the field of inquiry, and prominent amongst these, two in particular, *viz.*, an abnormally low day-wage scale and an abnormally high wage for men engaged in pillar coal. Then too, there was

brought out into clear prominence the startling fact that out of the eighteen companies only four have paid any dividends, and these four only intermittently, while during the past two years probably two-thirds of the mines have been operated at a loss.

The Board came across the impression, not only among the miners but also in the community generally, that this was due in some cases to mismanagement and in others to collusion with railway companies. It is true there are instances of loss due to mismanagement and to unfortunate experiment, but this is true only in comparatively few mines. As to railway influence, the Board was unable to discover that such influence was used either to depress the selling price of coal or to increase the cost of production. There are instances where a railway company secures the lowest rate on coal, but this is to be accounted for by the common business custom of giving a better rate where the whole output of product is purchased and where the security is absolute. The Board is of the opinion that under present conditions most of the coal mines in this district cannot without loss increase the cost of production. It is obvious that this fact has a profound influence upon the question of wages. It is equally obvious, however, that in certain cases this influence must be steadily resisted. When the question, for instance, is one of a living wage, the ability of a mine to pay must be disregarded, from the simple consideration that while it cannot be shown to be an absolute necessity that a particular mine should be worked, it is clearly evident that the wages a man receives must be such as to support himself and his family with a decency and comfort as Canadian citizens.

In coming to a finding upon the wage scale the Board was governed by certain well defined principles:

1. A Living Wage is a necessity.
2. In mines operating under the same association and within the jurisdiction of the same Labour Union, uniformity should prevail, as far as possible.

3. In the same mining camp equalization of wages should be sought.

4. After passing the limit of the Living Wage the financial standing of the Company should be considered.

In the application of these principles to the Day Wage scale the Board found little difficulty. The rates for both Inside and Outside Day men are obviously too low. The Board, therefore, suggests the advance mentioned in the schedule below.

In approaching the Contract Rates the Board experienced more difficulty. Here a great variation was discovered in the wages paid for the same class of work in different mines. For instance, the average wage for contract miners steadily employed in the Alberta Railway and Irrigation Company's mines stands at \$3.54 per day, this being the lowest average in the district. Counting all contract miners in this mine the rate would be lower still. This low rate is partially accounted for by the fact that the character of the mining in these mines seems to demand less highly skilled labour. In other mines general averages for all contract miners for a year showed such variation as is indicated in the figures \$3.98, \$4.62, \$5.46, \$5.61 and \$6.00 per day. This variation is to be accounted for partly by a difference in the contract rates in different mines, but more by the character of the seam, and the method of working. The Board felt little difficulty in deciding that an average over a mine for contract miners of \$3.54 per day was too low, and hence the suggestion that the rates prevailing in the Alberta Railway and Irrigation Company's mines should be advanced three per cent. A higher advance might have been suggested had it not been that already a very substantial increase had been suggested in the Day Wage, which in this particular mine would affect a very considerable proportion of the pay-roll.

In considering the earnings of different classes of contract miners working in the same mine, the Board made another striking discovery, namely, that the miners engaged in Pillars earned wages

far in excess of those earned in other kinds of work. The following table of average net daily earnings will illustrate these differences:

AVERAGE CONTRACT (NET) EARNINGS PER MAN PER DAY FOR THE YEAR 1910.

WEST CANADIAN COLLIERIES, LTD.
BELLEVUE MINE.

	Per Day (net).
Breasts (up the pitch).....	\$ 4.89
Breasts (across the pitch).....	4.74
Pillars.....	8.80
Development.....	4.09
Total contract.....	5.46

BLAIRMORE MINE.

	Per Day (net).
Rooms.....	\$ 5.22
Pillars.....	12.31
Development.....	8.95
Total contract.....	\$ 6.00

LILLE MINE.

	Per Day (net).
Breasts.....	\$ 3.33

Counters.....	5.31
Chutes.....	4.37
Breasts.....	4.36
Crosscuts.....	4.30
Pillars.....	7.37
Average earnings.....	\$ 5.20

In support of a claim for these high averages, two facts must be remembered; first, that this pillar work is recognized as more dangerous, and as therefore demanding more highly skilled men, and second, that it appears to be an estab-

lished rule, though perhaps not invariably, that men who carry up the rooms have their turn at the pillars. But even with these facts in mind, the Board could not bring itself to justify rates of mining that resulted in such remarkable discrepancies between men engaged in the same mine as indicated in the figures, \$4.74 and \$8.80 for an average daily wage.

These discrepancies stand out more strikingly when the individual earnings are considered. In one mine whose general daily average net wage for the whole mine is \$5.61 per day, individual net daily earnings run up in one instance, to \$10.13 per day for the year, and in this same mine twenty men show daily net average earnings of \$6.72 to \$10.31, the lowest daily average in the same mine being \$4.01 per day. In another mine where the average net daily earnings for contract men for the year are \$6 per day, individual earnings of men steadily employed show a variation of from \$3 to \$17, \$19 and even \$20 per day. Indeed the records show a miner earning for four days a daily net average of \$44.72. In this same mine fifty-eight men received for the year 1910 net earnings of over \$1,000 each. These figures found in documents duly attested as being extracted from the Companies' payrolls impressed the Board not so much with the fact that unduly high wages were being paid, but that rates that permit such extraordinary variations in earnings in the same mine demanded readjustment. The Board, therefore, suggest that the rate for pillar coal be reduced. Hence, the differential in Pillars mentioned in the schedule below of 5 cent to 7 cents per ton as may be decided. So much for pillar rates. Now for Contract Rates generally.

A strong plea was made for a general advance in contract rates throughout the district, but with the exception of the Lille Mine, where for a certain class of work the earnings are too low, and where a readjustment will mean advance, the Board could not see its way to yield to the demand for a general increase of the

Contract Rates in the face of the high averages prevailing throughout the district, with the exceptions noted.

The Board might have considered an advance in the case of Michel with a daily average of \$3.96 for all contract miners, and of Fernie with a daily average of \$3.98 for the year 1910, though these rates can hardly be claimed as below a living wage, were it not for the peculiarly trying conditions of the Company operating these mines, and for the strong declaration of the newly appointed manager that by the introduction of new methods he expects to be able to increase the earnings of the men by ten per cent., at least.

The operators assert that the general result of the acceptance of the schedule of wages below would be an increase in Day Wages amounting to about \$280,000, and a reduction by pillar differential of about \$46,180 per annum over the district, a total net increase in the Companies' payrolls of \$233,820. But though this may appear a somewhat heavy increase, the Board feels that the wages will be more equitably distributed than formerly, the lowest wages paid being increased and the highest reduced.

The Sanitation of the various mining camps came under the careful investigation of the Board. In a number of camps sanitation has received the careful consideration of the companies, but in regard to the sanitary conditions in others the Chairman found it necessary to call the attention of the local and Provincial authorities to the deplorable neglect of the ordinary precautions against disease, dirt and over-crowding. A Company, giving but a perfunctory attention to these matters, lays itself open to the most serious condemnation and cannot hope to win and to retain the respect and co-operation of its employés.

The Board cannot but express its profound regret that nowhere could it discern indications of any sincere and earnest attempt on the part either of a Company or of a local Union to promote the social, moral and intellectual well-being of the workers in the mines. Earnest and intelligent co-operation here would

surely be productive of the best results.

The Board further regrets that by the action of the parties in declining the suggested schedule of wages as a basis of settlement, it was prevented from offering its assistance in preparing an Agreement which could with little difficulty be prepared and which undoubtedly would do much to remove causes of grievance, clarify ambiguity in expression and altogether make for the harmonious co-operation of the parties in the working of the mines.

The Board is convinced, however, that with a clear and definite understanding and a sincere agreement upon the question of the "Open Shop" and with an acceptance of the suggested wage schedule an agreement can be made satisfactory to both parties.

The following is the schedule of wages suggested:

1. That the Day Wage scale be increased as follows:—

Ten per cent. advance up to \$3.00, inclusive.

Eight per cent. advance from \$3.00 to \$3.50, the latter inclusive.

Five per cent. advance above \$3.50.

2. A differential of 5 cents to 7 cents per ton in all pillars presently without a differential; the application to be by mutual consent.

3. An adjustment of the Contract Rate at Lille mine so as to make the rate proportionate to the size of the seam.

4. An advance of three per cent. on Contract Rates at Lethbridge.

5. All other Contract Rates to remain unchanged.

I have presented the above as the Majority Report of the Board, Mr. Macleod being in full accord therewith, with the exceptions noted in his subjoined statement.

Respectfully submitted,

(Sgd.) CHARLES W. GORDON,
Chairman.

I concur with the award of the Chairman with the following exceptions:

(a) In clause one (1) of the schedule of

wages the word "inclusive" should read "exclusive."

(b) In clause two (2) the figure "seven" should read "twelve".

(Sgd.) COLIN MACLEOD.

Minority Report.

The text of the minority report of Mr. A. J. Carter in this matter is as follows:

BANFF, ALTA., July 6, 1911

To the Honourable

The Minister of Labour,

In the matter of dispute between the Western Coal Operators' Association and its employés as represented by District 18, U.M.W. of A. which includes practically the whole of the men working in and around the mines operated by the several companies known as the above Association.

The details in connection with the work of the Board have been recorded by your duly appointed stenographer, therefore it is needless for me to outline the proceedings or dwell in any manner upon this feature of the Board's work. I feel, however, in order to emphasize the position taken by the Board in dealing with this dispute that it is essential to point out that all possible speed has been taken, consistent with the importance of the matter under consideration and keeping in mind the probability of getting the parties together with a view of making a mutual settlement, and that no undue delays have taken place. The Board convened at Lethbridge on April 28, and have visited in the meantime, most of the camps affected under this dispute.

Before dealing with the matters of dispute that have been brought to the attention of the Board, I desire to briefly touch upon the actions of the Chairman, Rev. C. W. Gordon, after all evidence had been taken, in trying to arrive at a settlement, and also in the making of the report. It may be somewhat irregular, but I feel it a duty to the Department and the public to do so. On the twenty-sixth ultimo, in requesting the Committees to submit a statement of their relative

positions, he stated: "That he had not up to that time understood the points of contention between the parties", and further emphasized his desire to have both parties submit statements showing clearly the points of contention, and outlining those particular things that each party insisted on having even at the expense of a continuation of the deadlock. In response to this request the miners submitted a full and detailed statement setting forth their demands. The operators' reply was impracticable and evasive in the extreme. On the first instant, a proposal regarding wages was submitted by the Chairman to the parties, which was rejected by both on the third. The Board then made an attempt to draft a report, but each of the other members refused to review, or argue on the evidence that had been placed before them, stating that they were agreed to sign a majority report embodying the suggestions contained in the proposal submitted to the parties by the Chairman on the first instant. This procedure was, in my opinion, most inconsistent, and compared with the statement made by the Chairman on the twenty-sixth that "this whole matter is too big a question to be settled in any but a thorough way, and, as far as I am able, I shall make it thorough," it would appear that the interests of the parties involved had become a secondary consideration to the operation of the mines at any cost. Not having had the privilege of reviewing their report, I am unable to say that I agree or disagree with them, with the exception of the matter of wages when, after going over the question briefly, I found I could not conscientiously accept the position taken by the Chairman in the aforementioned proposal.

The matters of dispute resolve themselves into four main questions as follows:

Day Wage Rates, being rates paid to all employés in and around the mines employed by the day.

Contract Rates, being prices paid for the actual mining of coal and work done in connection therewith by the miners.

Differential in Pillars, which is a claim by the operators for a less contract price

on this particular class of work when compared with other contract prices, and is generally understood to mean a reduction from rates paid at present in most cases, and the *General Provisions* of the agreement between the two parties, being clauses governing the conditions of employment and the relationship to be maintained between the two parties.

In considering the evidence submitted, and the statements made by both parties, I would consider that the following would be a fair basis of agreement:

Day Wage Scale.—On rates below \$2.50 an advance of fifteen per cent; on rates from \$2.50 to \$3.15 inclusive, ten per cent; on rates above \$3.15 an advance of eight per cent., with the elimination of all twelve-hour schedules.

Contract rates.—Substantial advances at Michel, Lille, Canmore and mines at and around Lethbridge, with a general advance at all mines excepting where extraordinarily favourable conditions exist.

Differential in Pillars.—This cannot be considered as a general principle, and should be taken into consideration only with the conditions existing at the various mines.

General Provisions.—These contain some matters of vital importance to both parties, but, as the representatives of the miners only, submitted what they desire in this direction it is safe to assume that these matters would not long delay settlement providing the question of wages could be satisfactorily arranged.

In support of my position generally, I desire to offer the following arguments.

In dealing with the question of wages the Board was asked to make comparisons between the wages paid in this district and in the mining districts of Montana, Wyoming, Washington and Vancouver Island, and it is shown in practically every instance that the rates paid in this district, both contract and day wage, are much lower than the rates for the same classes of labour in the districts named.

Another point that has been forcibly shown in connection with this matter is the phenomenal advances that have oc-

curred during the past few years in the cost of living. This necessarily curtails the purchasing power of the individual in every case where wages remain stationary.

Another important matter that was drawn to the attention of the Board, and one which appears to have been lost sight of by my colleagues is the effect of the elimination or restriction of the blasting of coal on the wages of contract miners. When the present contract rates were fixed it is admitted that they were based on the understanding that men were allowed to blast their coal. In many of the mines shooting is now prohibited and this undoubtedly places the men in a very unfavourable position, compared with the advantages they enjoyed when permitted to blast the coal, and after the evidence by all witnesses on this matter, as to the relative opportunities from a wage standpoint, it would only be equitable and just that the men be compensated in a fair and reasonable manner as they are in other districts when blasting is eliminated.

I find that there have been substantial increases in wages granted on this Continent to all classes of labour, during the past few years, and I am of the opinion that the men working in and around the mines are justly entitled to the same consideration. According to the evidence submitted, the miners have not received any material advances in wages, in fact, a great majority have not received any increase since the present rates were fixed some years ago. It is apparent that the majority of the contract miners in the district are averaging less than four dollars per day, which according to the testimony of every company official should in their judgement be from \$4 to \$5 per day. It has also been freely admitted by all company officials who were examined that they have received substantial increases during the past two years, and this is a further argument in favour of the claims of the miners. At Coal Creek, Michel, Lille, Lethbridge and Canmore the conditions were most unfavourable to the men, and it was pointed out that in many instances it was an im-

possibility for the men to make a wage that would, at least, ensure them a decent living. In almost all of the mines, owing to the nature of the winter's experience out in the West, it is an impossibility to give the men an opportunity to work regularly, even if other matters, such as steady trade, railway facilities, &c., are all favourable. It is, therefore, absolutely necessary that a man should have an opportunity of making a fair wage in order to withstand these contingencies. It is quite true that some mines show much above the average, but these are exceptional, and generally the class of work where these wages are obtained is of such hazardous and dangerous character that they are warranted to the fullest extent. This, however, is not uncommon in the mining industry, and it is a fact, that in practically every coal field in the world there are mines at which men earn more than the average wages, consequently I do not think that the men in this field should be singled out regarding this particular feature, or that evidence on this point should be taken to prove that wages generally are exceptionally high. I desire to draw attention to one matter in connection with the averages that were submitted by one company. I refer to those of the Crow's Nest Pass Coal Company. In Coal Creek, the manner in which the Company endeavoured to place statements before the Board was misleading and were compiled in such form as to leave a wrong impression as to what the correct averages were for these particular mines. The method adopted was to show some of the averages of men who had worked under the most favourable conditions and leave out those who had worked under the unfavourable conditions; again in Michel according to testimony, it had been the practice for two men to be loading on one contract check and all the coal sent out would be credited to one man, the other man being classed as a company man, and paid as such. Under this method whatever earnings over \$3.00 were credited to the contract miner would have to be divided between the two men in that place, and while the average would be shown as the full amount received by the

contract miner, the actual wages would be less fifty per cent. of the amount above \$3.00. The adoption of this method of payment also clearly shows that the contract rates in such cases are not sufficient for the miner to make wages, hence the necessity for review.

In all cases the payrolls asked for were not submitted, but extracts given that would take up considerable time before any intelligent understanding as to the manner of compiling, or the information they intended to convey, could be reasonably arrived at, and, taking into further consideration that all documents have been kept at all times, almost exclusively in the possession of the Chairman, it has placed me in the position of being able to get only a slight knowledge of the facts they may contain. While the miners were not in a position to submit evidence contradictory to the statements of daily averages submitted by the Companies, it was shown, in the case of the Crow's Nest Pass Coal Company that the daily averages submitted did not give any actual idea of the real earnings. In connection with this matter a letter was filed by the Ex-Secretary of Michel Local which was received by himself from the Crow's Nest Pass Coal Company, in connection with certain compensation claims, showing the average weekly amount earned by contract miners during 1909 to be \$12.36. This, I would like to point out, is made up in the manner prescribed by the Workmen's Compensation Act, and should, under the circumstances, be much more reliable information on actual earnings than the other statements submitted by the Company.

In connection with the differential on Pillars, I find that this could not be applied as a general principle, as the conditions affecting the earnings of the men in this class of work vary considerably at the different mines, as the physical conditions of the seam vary. It is true that in some of the mines, exceptionally high wages are made under most favourable circumstances, but this does not apply generally. In some of the mines, the differential is already in operation, but this is not true of the majority, nor

should it, in my opinion, be the case, and it may be pointed out that there are mines where no differential now exists that the men employed are making only low wages, in many instances even below the minimum rate for miners. In the case of the differential existing at Hillcrest, as a result of an award made by the Rev. Hugh Grant as Arbitrator, on July 7, 1909, it was clearly stated that such reduction was given, not on account of any principle of differential, but on account of the adverse conditions in connection with the outside haulage, and this in my opinion is not a justifiable method of determining prices to be paid in the mines, nor should it be taken into consideration in discussing the principle generally.

I have little to add to the statement already given covering General Provisions, but would point out that both parties insist on certain principles being embodied in the manner laid down by the respective parties. Possibly the most serious point of contention is the Check-off, which is practically an assignment on wages for dues, given by members of the United Mine Workers of America, and for the collection of which the companies are responsible. This is a principle which has been acknowledged in various forms since the Organization of

the United Mine Workers of America, and I cannot see that the companies would be justified in refusing this at this time, or of imposing any worse conditions on the men than have existed previously.

One other very important matter in connection with the mining industry in this district, which is very noticeable, and which has a very detrimental effect on the welfare of both men and operators, is the overproduction. There are too many men available to meet the present demand for coal; consequently, it is impossible to insure the miners steady employment: I am of the opinion, though this may not be within the scope of my duty as a member of the Board, that the Government should take some measures to check the indiscriminate immigration into this coal field.

The operators have, in many instances, endeavoured to show that the mines were not on a paying basis, but have not during any part of the proceedings contended that they were unable to procure a higher price for their coal. I am of the opinion that an increase of eight to ten cents per ton on the selling price would meet the increases asked for by the men.

Respectfully submitted,

(Sgd.) A. J. CARTER,

Representative Employés.

V. REPORT OF BOARD IN DISPUTE BETWEEN THE GREAT NORTH WESTERN TELEGRAPH COMPANY OF CANADA AND CERTAIN EMPLOYÉS, BEING TELEGRAPHERS AND MEMBERS OF THE COMMERCIAL TELEGRAPHERS' UNION OF AMERICA.

THE Minister of Labour received, on July 17, the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain differences between the Great North Western Telegraph Company of Canada and telegraph operators in its employ, members of the Commercial Telegraphers' Union of America.

In the application for the establishment of this Board it was stated that the dispute related to rates of wages, working conditions, the dismissal of a number of men and general discrimination against them as members of the Union, and for acting on a committee

representing the employés. The number of employés concerned was given as 200 directly and 1,100 indirectly.

A Board was established by the Minister on March 20, and was constituted as follows:—Mr. Frederick H. Markey, K.C., Montreal, Que., member appointed on the recommendation of the employing Company; Mr. D. Campbell, Toronto, Ont., member appointed on the recommendation of the employés concerned; and the Honourable Mr. Justice J. V. Teetzel, Toronto, Ont., Chairman, appointed on the joint recommendation of the foregoing members of the Board.

The Board met in the City of Toronto on April 6, concluding its work on July 13. The General Manager of the Canadian Pacific Railway Company's Telegraph and other officials of that Company, as well as representatives of the Great North Western Telegraph Company of Canada and of the employes were present at the meetings.

With respect to the dismissal of the men and alleged discrimination against them as members of the Union, the Board found that eleven men had been dismissed on or about the 14th of February, 1911, three of whom had acted on a committee which had presented a schedule of wages and proposed rules to the Company, at the same time requesting a conference with the Manager for the purpose of considering the said schedule of wages and set of rules. This proposal had been refused and the dismissals had followed shortly afterwards. The Company agreed to reinstate the former employes with the exception of four, including the three who had acted on the committee; other reasons, the Company alleged, being responsible for their dismissal. The Board, however, with the exception of Mr. Frederick H. Markey, member appointed on the recommendation of the Company, thought the fourth member should be reinstated.

The employes submitted a set of rules which they had drawn up, and the Board after amending and altering them in certain respects recommended their adoption from the first day of August, 1911. Mr. D. Campbell, member appointed on the recommendation of the men, dissented from the Board's finding in one particular. With regard to the question of wages, the Board found that since the appointment of the General Manager in March last, an increase to the extent of over \$7,000 had been granted to the telegraphers; and as the General Manager seemed inclined to treat his employes justly the Board did not, therefore, recommend any further increase at the time. A system of percentage grading similar to that in use by the Canadian Pacific Railway Company's Telegraphs was

asked for by the employes; this the Board recommended should be adopted in the cities of Toronto, Montreal, Ottawa and Quebec, the same to take effect on January 1, 1912.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

In the matter of the Industrial Disputes Investigation Act, and in the matter of differences between the Great North Western Telegraph Company of Canada, employer, and certain telegraph operators in its employ, employes.

As members of the Board of Conciliation and Investigation appointed to deal with the dispute between the Great North-Western Telegraph Company of Canada and its employes, we beg to report as follows:—

The matters referred to us were the following:—

1. Dismissal of a number of the employes, and also general discrimination against them for participating in membership of the Union, and for acting on a committee representing the employes.

2. A dispute as to rates of pay and working conditions.

The Telegraphers were represented by Messrs. S. J. Konenkamp, M. J. O'Neil and Charles Godwin, and the Telegraph Company was represented by Mr. George D. Perry, General Manager.

The Board met at the City of Toronto on the 6th day of April, the 25th and 26th days of May, the 15th and 16th days of June, and the 10th and 11th days of July, 1911, when the evidence of the aforesaid representatives, also James Kent, General Manager of the Canadian Pacific Railway Company's Telegraph; W. J. Camp, Electrical Engineer of that Company; J. F. Richardson, Superintendent of the Eastern Division of that Company, and G. D. Robertson, General Chairman of the Canadian Pacific Railway Company's Railroad Telegraphers; Charles E. Davies, Manager of the Great North Western Telegraph Company's office at

Ottawa; Ernest Stainton, Chief Night Operator at the Company's office at Montreal; George Salloway, that company's Chief Operator at Montreal; and L. S. Humes, its Manager at Montreal; and, in addition to such evidence, the Board heard extensive arguments of the respective representatives touching the matters in question, and on July 12 and 13 the Board met for the final consideration of the evidence and arguments presented, and the preparation of this Report.

Item 1.

Dismissal of a number of employés, and also general discrimination against them for participating in the Union.

On or about February 14, 1911, the following eleven employés were dismissed by the Company: W. F. Moore, Robert Dunn, W. H. Hartley, A. J. Thompson, A. R. M. Sterling, Joseph Manning, F. Carceau, C. A. Godwin, J. E. Montgomery, M. J. O'Neil and R. W. Ball.

These men were discharged by the Company by reason of the active part which they took as members of the Commercial Telegraphers' Union of America. Three of them, Manning, O'Neil and Godwin, were members of a Committee which presented for adoption by the Company a schedule of wages and proposed rules or working conditions, and who requested a conference with the late General Manager, for the purpose of discussing the said schedule of wages and rules. The conference requested was refused by the late General Manager, and shortly afterwards, to wit, on or about February 14, the said Committee and the others above named were discharged.

At the first meeting of this Board, the representatives of the employés stated that they had not intended and did not now intend to demand from the Company a recognition of the said Union, or any other Union, or to require anything to be done which would prevent promotion of employés on their merits.

No reason other than their action in connection with the Union as above

stated was advanced for the dismissal of these men, and this Board is of the opinion that the reason given for such dismissal was insufficient.

The Company, through its General Manager, Mr. Perry, stated to the Board that it would, upon application being made by them, reinstate all the said employés, except O'Neil, Godwin, Manning and Hartley, as to the reinstatement of whom they showed other objections, and this Board, having considered these objections, nevertheless recommends that the Company should reinstate the said Joseph Manning, from which recommendation, however, Mr. Markey dissents.

Item 2.

(a) Working Conditions or Rules.

The employés submitted a set of rules, which the Board has very fully considered, and, having amended and altered the same, unanimously recommends that the following rules shall govern the telegraphers employed by the Great North Western Telegraph Company of Canada, and shall be adopted and take effect on August 1, 1911.

Rules and Working Conditions.

The following rules shall govern the telegraphers employed by the Great North Western Telegraph Company of Canada, and shall be adopted and take effect on August 1, 1911.

Article 1. Employés assigned to regular service will be classed as telegraphers within the meeting of these rules.

Article 2. Telegraphers' rights of promotion in each office will be governed by merit, fitness and ability, and where these are sufficient the senior telegrapher will be given the preference.

Article 3. When a vacancy occurs, the same will be filled by the appointment of the senior telegrapher in that office, who, in the opinion of the proper authority, is capable of filling the position.

Article 4. A list of all telegraphers employed at Winnipeg, Toronto, Ottawa, Montreal and Quebec will be kept on file at the Company's offices in said cities, show-

ing the dates when said telegraphers entered the service of the Company; such list to be open to the inspection of all telegraphers whose names should appear thereon, and shall be subject to correction on proper representation from any such telegrapher at any time.

Article 5. In case of a reduction in the number of telegraphers employed, the senior telegraphers in their respective offices, if capable of performing the telegraph work required by the Company, will be retained in preference to telegraphers junior to them. Any telegrapher in good standing whose services have been dispensed with on account of a reduction of the staff will be given preference of re-employment when staff is increased, if his merit and ability justify it.

Article 6. A telegrapher declining or being unable to accept promotion shall not forfeit his right to the same or any other position he may be entitled to under Article 2 when a vacancy occurs.

If a vacancy occurs when a telegrapher is on leave of absence (not exceeding thirty days) he will not be debarred from claiming the position to which he is entitled under seniority, and receiving the appointment on resuming duty, if his merit and ability justify it.

All vacancies shall be bulletined by the proper officer within ten days from the time such vacancy occurs.

Article 7. If a telegrapher be taken off his work for any cause, he shall be given a hearing by his Chief Operator, when he shall be given particulars of the charge or charges against him, and shall have the right to have a co-employé of his own selection appear and speak for him. He shall have a right to appeal from the decision to the Superintendent, if one exists, and from the decision of the Superintendent to the General Manager; and if there is no Superintendent the appeal shall be direct from the decision of the Chief Operator to the General Manager. Should no decision be reached within fifteen days after the Division Superintendent or General Manager, as the case may be, has received notice of appeal, he shall receive

his regular pay for time in excess of fifteen days until the decision is arrived at.

If the telegrapher is found blameless in the matter under investigation, he will be reinstated, and paid at regular rates for time lost, and necessary expenses while attending such investigation, if away from home.

Article 8. A telegrapher leaving the service of the Company will, on request to the Chief Operator in writing, as soon thereafter as practicable, be furnished with a certificate by him, stating term or terms of service, capacity in which employed, and whether discharged or leaving of his own accord. If discharged, cause of dismissal will be stated.

If detained by the Company more than five days waiting for such certificate, the telegrapher will be paid regular wages for all time in excess of five days. Unless otherwise requested, this certificate will be mailed to the telegrapher at his last place of employment.

Article 9. Where the words "Senior Telegrapher" or "Senior Telegraphers" occur in the forgoing rules, they shall mean senior telegrapher or senior telegraphers in length of service.

Article 10. At offices where four or more telegraphers are employed, the hour for work, except on legal holidays, shall be as follows:

Nine hours shall constitute a day's work, beginning between 6 a.m. and 1 a.m. Eight hours shall constitute a day's work on split tricks or early or late night duty. Pay for overtime shall be computed on the basis of seven hours constituting a day's work.

Article 11. On New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day, five hours, from 8 a.m. to 1 p.m., and from 1 p.m. to 6 p.m., and four and one-half hours, from 5 p.m. to 9.30 p.m., or from 6 p.m. to 10.30 p.m. shall each constitute a day.

As regards Rule 10, Mr. Campbell dissents as to the hours which shall constitute day duty and split tricks and recommends eight hours and seven hours respectively.

Item 2 (b). Scale of Wages.

The employés submitted a minimum scale of wages for the Company's principal offices in which operators are employed at a fixed salary, and for the offices at Toronto, Ottawa, Montreal and Quebec proposed the adoption of a percentage grading, along the lines heretofore adopted by the Canadian Pacific Railway Company's Telegraphs in those offices on their lines.

The evidence of Mr. Perry shows that since his appointment, in March last, as General Manager of the Company, the wages of the telegraphers have been increased to the extent of over \$7,000; and that by such increase the wages of 106 operators or about half the total number employed have been augmented. Inasmuch as Mr. Perry has only been in charge of the affairs of the Company as General Manager for a short time, the Board is not disposed to recommend a further increase of wages at this time, feeling confident that Mr. Perry is inclined to treat his employés in a spirit of fairness. The Board is pleased to note the mutual good feeling existing at present between Mr. Perry and the Company's employés.

The Board recommends that the minimum scale of wages for the future shall not be less than is at present paid the respective operators for the same class of service.

Item 2 (c). Grading of employés in certain offices.

The Board recommends that in Toronto, Montreal, Ottawa and Quebec Offices a system of grading of employés should be adopted, on the following lines, to take effect on January 1, 1912.

The basis for computing in each office the number of telegraphers to be paid specified wages on the present scale, shall

be the minimum number employed in that office during any one month in 1911; and the percentage of any class shall not be required to exceed the percentage of such class ascertained on that basis. For example, assume that in any office there are fifty telegraphers, of whom two, or four per cent., are paid \$80 per month; five, or ten per cent., \$75 per month; six, or twelve per cent., \$70 per month; ten, or twenty per cent., \$65 per month; four, or eight per cent., \$60 per month; four, or eight per cent., \$55 per month, and four, or eight per cent., \$50 per month, and the balance to make up one hundred per cent. are to be paid rates at the option of the Company; the percentage of any class ascertained on the above basis shall not be increased, notwithstanding that at the time this recommendation goes into force there may be then a larger number in that office in any class, or notwithstanding that at any time, by reason of increase of business the employment of a larger staff is required in any office; in other words, the Company shall have the right to add to the number in any class beyond the number to be ascertained as above without being required to readjust or add to the numbers employed in other classes.

In case the falling off of business in any office necessitates a reduction in the staff below the minimum to be fixed as aforesaid, the reduction shall be carried out under the provision of Rule Number 5.

Our work has been facilitated by all parties concerned.

All of which is respectfully submitted.

(Sgd.) J. V. TEETZEL,
Chairman.

FRED D. MARKEY,
For the Company.

D. CAMPBELL,
For the Employés.

TORONTO, July 13, 1911.

SETTLEMENT OF DISPUTE BETWEEN MESSRS. GEORGE T. DAVIE & SONS, SHIPBUILDERS AND REPAIRERS, LEVIS, QUE., AND THEIR EMPLOYÉS.

THROUGH the intervention of Mr. Victor DuBreuil, one of the officers of the Department of Labour, a settle-

ment was effected on July 11 of certain matters in dispute between Messrs. George T. Davie & Sons, Shipbuilders and Re-

pairers, Levis, Que., and their employés, being shop, shipyard and dry dock men, an agreement effective for a period of two years being entered into by both parties concerned.

The dispute related to a demand on the part of the employés for an increase in their rates of pay, the number concerned being 115.

A reply was made to the Committee of employés on July 5, to the effect that the firm was unable to meet the employés' request on account of the work in hand being contract work based on the existing scale of wages.

The Messrs. Davie having thus refused to accede to their demands the employés went out on strike at 9 a.m., on July 5. The Department of Labour was appealed to for assistance in the settlement of the dispute. Accordingly, on July 8, Mr. DuBreuil, an officer of the Department, was instructed to proceed to Levis for the purpose of bringing about a settlement by means of conciliation.

At a conference with Mr. Davie and six (6) representatives of the strikers, the former stated that he was willing to grant an increase of twenty-five cents (25c.) per day. This offer was, however, refused by the men on the ground that the working season lasted only six or seven months of the year. Mr. Davie then gave the following reasons for his non-acceptance of the terms of the men:

1. That the graving dock was the property of the Department of Public Works, and he had to pay large sums of money to that Department for tonnage and entrance duties;

2. That he had to compete against companies engaged in the same industry who have the privilege of using the dock at Halifax free of charge;

3. That he had contracted with the Department of Marine and Fisheries for a lump sum for the repairs of the steamers *Montcalm* and *Lady Grey*, and had based his figures on the schedule of wages then paid; if, therefore, the demand of the men was granted it would be a considerable loss to the Company.

At another interview the Deputy Minister and an officer of the Department of Marine and Fisheries were present, that Department being interested as the boats were Government boats. Mr. DuBreuil explained to the Deputy Minister of Marine and Fisheries that Mr. Davie had no objection to granting the increase asked for if the Government would pay the difference in the cost of the repairs to the steamers in question. This proposition was accepted by the Deputy Minister of Marine and Fisheries on behalf of his Department and articles of agreement were then prepared and accepted by the Company and the employés concerned. The agreement could not, however, be signed by the Company until the same had been approved of by the Shipping Federation of Canada, and proceedings were accordingly suspended pending the arrival of the Secretary of that organization. On the arrival of Mr. T. Robb, Secretary of the Shipping Federation of Canada, after some discussion it was decided to accept the agreement on the condition that those men composing the Committee of strikers should furnish personal security to the amount of \$50 each to ensure faithful carrying out of the terms of the agreement. The agreement was then signed by representatives of both parties to the dispute and the men returned to work on July 11, having been idle since July 5.

Terms of Agreement.

The terms of the agreement are as follows:—

LEVIS, QUE., July 11, 1911

We, the undersigned, G. T. Davie and Sons, employers of the one part, and Ernest Begin, Napoleon Fleury, Damas Laflamme, Hubert Samson, Theodure Lemieux and Barthelemi Baker, employés of the other part, duly named members of the committee representing all classes of labour employed on repair work on steamers and all other vessels steam or sailing, which shall be constructed within two years after this date on the following conditions, namely:

A—We the said G. T. Davie & Sons, and ourselves: 1. To pay an increase of twenty-five per cent. (25%) on all salaries paid from this date, for permanent pairs, except in the case of foremen and blacksmiths, and 25 cents per day more each worker on temporary work:

2. The men shall not absent themselves from nor quit work without permission on holidays (national, labour) days or Queen's birthdays, except on obligatory religious holidays.

3. The men shall not quit work without permission (except in the case of illness) sooner than three minutes before the midday and six o'clock eveningistles blow.

4. Any workman unable to go to work shall be obliged to so report and give the cause. These workmen shall conform to all the other obligations already imposed for the purposes of the Government and good order in our ship-building and repair yards.

If during the course of the next following two years, any difference should arise between us (employers and employees), such difference shall be submitted to a permanent council of arbitrators of which one of the members shall be named by ourselves (the employers), one arbitrator appointed by the men, and these two arbitrators shall have full power to name a third arbitrator who shall act as chairman, and all decisions shall be final, in accordance with the vote of the majority of the said council. If any change is asked for at the expiration of the said two years, by one or other of the parties interested, thirty days notice shall be given.

We, the said representatives of the committee of workmen endorse and set for and in the name of all the employers and in our own name, without reserve, all the conditions, agreements and salaries above mentioned by Messrs. G. T. Davie & Sons.

In order to ensure the complete fulfilment of this agreement, we, the members of the committee, acting for and in the name of each of our co-workers, bind ourselves to furnish personal security in

order to guarantee the execution of the terms of this agreement, this security not to exceed \$50 each.

Witness:

(Sgd.) Ed. Samson.

On July 15, the Minister of Labour, received a communication from Messrs. George T. Davie & Sons in the following terms:—

“LEVIS, QUE., July 13, 1911.

“Hon. W. McK. King,
Minister of Labour,
Ottawa.

“Honourable Sir:

“We beg to acknowledge and appreciate your kindness in sending down Mr. DuBreuil during the strike of our workmen for an increase of wages.

“The way he handled this trouble so satisfactorily (and through his intervention) and explaining to the men the gravity of the case we must say he represented both parties in a fair and impartial manner; we must say that you have a good man for the position he holds.

“He laid the matter clearly before the Representative of the Shipping Federation, the Underwriters' Agent and Deputy Minister of Marine and Fisheries, they being present during his interviews with the men.

“Kindly accept our thanks for your kindness in sending him down to have the matter amicably settled.

“Yours truly,

(Sgd.) GEORGE T. DAVIE & SONS.”

COMBINES INVESTIGATION ACT.—DISMISSAL OF APPEAL AGAINST ORDER OF THE UNITED SHOE MACHINERY COMPANY OF CANADA.

ON July 12, the Department of Labour was informed that the Judicial Committee of the Privy Council had refused the application of the United Shoe Machinery Company of Canada for permission to appeal from an order which was made on February 25 last by Mr. Justice Cannon, of the Superior Court, Quebec, directing an investigation of this Company's affairs under the Combines Investigation Act. The application of the United Shoe Machinery Company before the Privy Council was opposed by the Deputy Minister of Justice of Canada, as a similar motion before the Court of Appeals of the Province of Quebec had been opposed in the month of May preceding by counsel for the Dominion Government. It was held by the Court of Appeals that the order which Mr. Justice Cannon had issued on February 25 last, directing an investigation of the United Shoe Machinery Company's methods, was not subject to appeal, and the decision of the Privy Council would appear to confirm this interpretation of the statute.

Particulars of the application which was made by certain manufacturers of boots and shoes in Quebec, requesting the establishment of a Board of Investigation under the Combines' Investigation Act, to inquire into the alleged existence of a combine in the manufacture and sale of boot and shoemaking machinery will be found in the March number of the *Labour Gazette*.¹ The same issue of the *Labour Gazette* contained the terms of Mr. Justice Cannon's order for investigation, under date of February 25 last. In the June number of the *Labour Gazette* was published the text of the judgement of the Court of Appeals of Quebec, dismissing the Company's appeal on Judge Cannon's order.²

The Board of Investigation, as constituted by the Minister of Labour in the month of March last, was comprised as follows: Judge Charles Laurendeau, Chairman, Montreal; Mr. J. C. Walsh, Journalist, Montreal; and Mr. W. J. White, K.C., Montreal.

On March 1, the Minister of Labour received a certified copy of an inscription in appeal against Judge Cannon's order on various grounds, and generally to the effect that Judge Cannon had not been competent to grant such order.

On March 21, the Board held a preliminary meeting for organization.

On March 22, pending the hearing and decision of the Court of Appeal, a petition was filed on behalf of the United Shoe Machinery Company for the issue of a writ of prohibition, enjoining the Board of Investigation from proceeding with the investigation ordered. The case was argued on March 23, before Mr. Justice Bruneau, and on April 1, a judgement was given permitting the issue of a writ prohibiting proceedings by the Board until June 15.

The appeal to the Court of Appeal was heard early in May, and on May 1 a judgement was given dismissing the appeal, the court taking the ground that the right of appeal lay from an order for the establishment of a Board under the Combines Investigation Act.

On June 15, the writ of prohibition issued under the order of Judge Bruneau on April 1, lapsed. The Minister of Labour had been in the meantime notified of the intention of counsel representing the United Shoe Machinery Company to apply for an extension of the writ until the right of appeal to the Privy Council had been determined. Steps were taken accordingly, and on June 30, judgement was given by Judge Bruneau extending the writ of prohibition against the Board to September 15; the Department of Justice and counsel for the petitioners had resisted the extension, and the Department of Justice had further sought to limit any extension to August 1, to which, however, the Court did not consent.

On July 12, as stated above, a call was received stating that the application for leave to appeal to the Privy Council had been refused. The writ of prohibition effective until September 15 not alone restrains the Board of Investigation from proceeding under the order of Judge Cannon of February 13.

REMISSION OF CUSTOMS DUTIES ON BITUMINOUS COAL IMPORTED INTO WESTERN CANADA.

AS a result of representations made to the Minister of Labour, that a serious shortage of coal was likely to occur in eastern Canada, through the prolonged cessation of operations in the coal mines of southeastern British Columbia and northern Alberta, an Order-in-Council was adopted on July 31, on recommendation of the Minister of Labour, authorizing a remission of the customs duties on bituminous coal imported into Canada at the ports on the southern frontier of Canada west of Sault Ste. Marie, for consumption in the provinces of Manitoba, Saskatchewan, Alberta, and British Columbia, east of the one hundred and twenty-second meridian of longitude, such remission to become effective on entries and after August 7, and to continue for such period as the domestic coal mines fail to produce coal sufficient, in judgement of the Governor-in-Council to meet the public requirements. The general tariff rate on bituminous coal importations is 53 cents per ton.

Reference to the existence of the above mentioned dispute in the coal mining operations of southeastern British Columbia and southern Alberta, has already been made in the May, June, and July numbers of the *Labour Gazette*. A reference to the continuance of the dispute during the month of July will also be found elsewhere in the present issue of this publication.

The text of the Order-in-Council in the above matter is as follows:—

48)
THE GOVERNMENT HOUSE AT
OTTAWA.

Monday, the 31st day of July, 1911.

PRESENT:

EXCELLENCY THE GOVERNOR
GENERAL IN COUNCIL.

His Excellency in Council is pleased to approve of the following Minute of the Privy Council Board:—

LABOUR:

The Board had under consideration a memorandum from the Minister of Labour reporting that representations have been received by him that a serious shortage of coal in Eastern British Columbia and in the Provinces of Alberta, Saskatchewan, and Manitoba, is likely to result from the prolonged cessation of work in various coal mines in British Columbia and Alberta;

That any such shortage, it is represented, will be liable to be an occasion of widespread privation and possible disaster among the inhabitants of the Provinces referred to;

That importers apparently hesitate to incur the risk of the importation of large quantities of coal and of paying duty thereon, lest when such importation is effected operations in the various coal mines may be resumed and they be at a substantial loss in consequence;

That the result will therefore almost certainly be as above intimated if the present conditions continue during the remaining summer months. These are conditions for which the people of these Provinces as a whole are not in any way responsible and for which they individually are without available remedy.

That under these circumstances the Minister deems it right and conducive to the public good that His Excellency in Council take any proceeding, however exceptional and unusual, within the power of His Excellency in Council, which will bring about or assist in bringing about an avoidance of the dangers suggested.

The Minister, therefore, recommends that assurance be given to importers of bituminous coal that, upon application by them for remission of duty on imported coal upon which duty has been paid and which has been entered, on and after the seventh day of August, 1911, at the ports on the southern frontier of Canada west of Sault Ste. Marie, for consumption in British Columbia (east of the one hundred and twenty-second

meridian of longitude), and in the Provinces of Alberta, Saskatchewan and Manitoba, the duty so paid will be refunded, the publication of any Order in Council that may be founded on this recommendation being hereby deemed to be communication of the assurance to such importers,

The Minister reports that the intention of this recommendation is that the concession shall only be granted for such period as the said coal mines may, through lack of operation, fail to produce coal sufficient, in the judgement of the Governor in Council, to meet the public re-

quirements. It is therefore further recommended that any such application for remission of duty on coal entered later than two weeks after the publication in the *Canada Gazette* of any Order in Council that may be made revoking any order that may be made in accordance with the present report be not entertained.

The Board concur in the above recommendations and submit the same for favourable consideration.

RODOLPHE BOUDREAU,
Clerk of the Privy Council.

BRITISH COLUMBIA LEGISLATION AFFECTING LABOUR, 1911.

THE second session of the Twelfth Parliament of the Province of British Columbia which began on January 12, 1911, ended on March 1. During this session eighty-eight Bills were introduced, of which seventy-seven were passed. A copy of the Statutes in the form in which they received the Royal Assent was received at the Department of Labour by the courtesy of the government printer of British Columbia during the past month. The following is a brief review of the legislation of importance to industry and labour.

Health Regulations for Lumber, Railway Construction and Mining Camps, and Other Places.

An act was passed authorizing the Provincial Board of Health to make regulations respecting the health of lumber camps, mining camps, saw-mills, railway construction camps, and other places where labour is employed throughout the Province. These regulations may deal with the following subjects: (1) respecting any particular industry and the conditions under which it may be carried on for the purpose of preventing nuisances, and the outbreak and spread of disease; (2) for the cleansing, regulating, and inspection of these camps and other places where labour is employed; (3) for the providing by employers of labour of duly qualified medical practi-

tioners, and for the erection of hospitals for the employes; (4) for providing for the construction, arrangement, and inspection of houses for the accommodation of the employes. The regulations may either be general in their application or applicable specially to some particular locality or industry. This Act is to be read with and as part of the "Health Act," and the penalties applied under that Act are applicable to it.¹

Under this Act regulations for the sanitary control of lumber, mining, and other camps, sawmills and other industries situated in unorganized districts went into effect on June 15, 1911².

Amendments to the Health Act.

The "Health Act" is amended so as to provide that "Theatre" shall be held to include the buildings, rooms and places where are held any play, concert, opera show, dance, or other public gathering with the approaches thereto. The Board of Health is authorized to make regulations with regard to the following additional matters: (y) ventilation and the general sanitary conditions and requirements of all boarding-houses, tenement houses and lodging-houses, specifying the size of dwelling rooms in these houses and the number of persons who may dwell therein; (z) compulsory registration

¹British Columbia Statutes, 1911, Chapter 20.

²See the *Labour Gazette*, July, 1911, page 52.

boarding-houses, tenement-houses and lodging-houses, and the mode of such registration; (aa) the construction, maintaining, inspecting, purifying, cleaning, ventilating and disinfecting of theatres, dance-halls, roller-skating rinks, barber-shops, cold-storage buildings, fish-shops, butcher-shops, baker-shops, bake-houses, storehouses, and public bathing-houses; (bb) licensing and regulating plumbers; (cc) regulating the plumbing to be installed in buildings, including the materials to be used in connection with all apparatus, and the keeping, cleansing, and repairing of same.

An amendment is also made, providing that the rules requiring the vaccination of all persons within the jurisdiction of any Health Officer, shall not apply to any person who makes an affidavit or a statutory declaration that he conscientiously believes that vaccination would be prejudicial to his health (or to the health of his child, as the case may be), or who for conscientious reasons objects to vaccination.¹

Sale of Habit-Forming Drugs.

An act was passed forbidding any person from selling, or offering for sale, giving or exchanging, any of the habit-forming drugs, such as eucaïne, cocaine, morphine or heroin, either alone or in combination with other substances, without a written prescription of a registered physician, dentist, or veterinary surgeon, which must be retained by the pharmacist filling it, for at least two years, and shall not be again filled except by a written order of the original prescriber. Veterinary surgeons are not allowed to prescribe for any of these substances for the use of any human being. Manufacturers, wholesale druggists or registered pharmacists may sell these articles to any manufacturer, jobber, or wholesale druggist, or to any pharmacist, physician, dentist, or veterinary surgeon, or to any incorporated hospital, upon the written order signed by those to whom they are supplied. The order must show the article or articles ordered and be endorsed by the vendor with the date of

delivery. The order must also be kept for a period of two years from the date of delivery, and be open to inspection by officers of the Provincial Board of Health, the officers of the Provincial Police Department, and the police authorities of any municipality within the province. Penalties from \$10 to \$100 may be imposed for violation of this Act.²

The "Public Service Act."

The "Public Service Act, 1909" is amended by providing that officers, agents and clerks be graded into four or more classes, according to skill, training, competency, and length of service. The lowest or initial class shall be known as the junior class. No entrant shall be permanently appointed until he has passed the public qualifying examination, and obtained a certificate of good health and character, and if the knowledge and ability requisite for a permanent appointment are wholly or in part professional, technical, or such as require peculiar training, the person may be appointed to such position without examination, and without reference to age limit or nationality. Temporary appointees, at the passing of this Act, may be admitted to the service without further examination, where the work justifies their permanent appointment, and no temporary clerk or stenographer shall be employed in the Public Service for longer than twelve months unless he has passed the Public Service Qualifying Examination.³

Regulation of Motor Vehicles.

An Act was passed called the "Motor Traffic Regulation Act, 1911" regulating the use and operation of motor vehicles. Under the Act, "motor" shall mean and include automobiles, locomobiles, motor-cycles, and all other vehicles propelled otherwise than by muscular power, excepting the cars of electric and steam railways, and other motor-vehicles running only upon rails or tracks.

"Chauffeur" includes every driver,

¹British Columbia Statutes, 1911, Chapter 19.

²British Columbia Statutes, 1911, Chapter 17.

³British Columbia Statutes, 1911, Chapter 42.

mechanic, paid employé, lessee, or other person employed in any capacity on a motor carrying passengers or freight for hire.

Licenses under the Act are granted and renewed by the Superintendent of the Provincial Police, who is required to make an annual report to the Attorney-General; every motor must be registered with the Superintendent of the Provincial Police, and a registration fee of \$10, and an annual license fee of \$10 is paid to the Minister of Finance and Agriculture. No person under the age of seventeen is allowed to drive or operate a motor along the highway. Every Chauffeur must apply for a license to the Superintendent of Provincial Police. Licenses must be renewed each year, and an annual fee of \$5 is charged.¹

Agricultural Associations.

The "Agricultural Associations Act, 1911" provides for the incorporation of agricultural associations, among which are included co-operative farmers' institutes, co-operative women's institutes, British Columbia fruit growers' associations, agricultural fairs associations, the British Columbia Stock Breeders' Association, the British Columbia Dairy-men's Association, the British Columbia Poultrymen's Association. Each association may receive grants from the Minister of Finance and Agriculture, provided that they have complied with the Act, and that the objects of such associations have been strictly adhered to.²

The "Tramway Inspection Act."

An Act to amend the "Tramway Inspection Act" provides that the rules governing the operation of interurban electric tramways and prescribing the equipment and appliances for locomotives, motors, and cars used in the operation of tramways and street railways, approved by the Lieutenant-Governor-in-Council on November 29, 1910, and January 10, 1911, are declared to be good and valid, and the Lieutenant-Governor-

in-Council, is also authorized to alter, amend, or annul such rules at any time.³

Transportation.

The following acts having to do with transportation interests were passed:

1. Respecting the changing of the name of the Portland Canal Short Line Railway to the Canadian North Eastern Railway; and extending the time for construction, and authorizing the building of additional lines.
2. Extending the time for construction of the Crow's Nest and Northern Railway.
3. Confirming the agreement of the Great Northern Railway, re False creek, Vancouver.
4. Incorporation of the Greenwood-Phoenix Tramway Company.
5. Incorporation of the Grouse Mountain Scenic Incline Railway Company.
6. Incorporation of the Mid-Provincial and Nechaco Railway Company.
7. Incorporation of the Naas and Skeena Rivers Railway Company.
8. Incorporation of the Northern Vancouver Island Railway Company.
9. Incorporation of the Peace and Naas River Railway Company.
10. To reduce the capital of the Pacific Coast Coal Mines Company and authorizing issue of debentures.

Miscellaneous.

Acts were passed creating a Department of Railways, Chapter 45; to consolidate and amend the "Coal Mines Regulations Act" and amending Acts, Chapter 33; to amend the "Coal Mines Act" with respect to prospecting and rights-of-way, Chapter 34; to amend the "Contagious Diseases (Animals) Act" by the addition of a number of new diseases, and providing for a fixed sanitary standard for the keeping of dairies and herds, Chapter 12.

Amendments were also passed to amend the "Horse Breeders' Lien Act, 1907" Chapter 24; the "Benevolent Societies' Act", Chapter 3; the "Charitable Associations Act", Chapter 4; the "Shops Regulations Act", Chapter 10.

¹British Columbia Statutes, 1911, Chapter 36.

²British Columbia Statutes, 1911, Chapter 2.

³British Columbia Statutes, 1911, Chapter 51.

Bills were introduced dealing with the following subjects, but did not become law: To prevent Discrimination Against the Members of Labour Unions; to amend the "Dower Act"; to amend the "Inheritance Act"; respecting compen-

sation to Workmen for Accidental Injuries suffered in the course of their employment; respecting the Payment of Wages; respecting the Protection and Marking of Cattle; respecting Pound Districts.

CO-OPERATIVE CREDIT—A GREAT INDIAN MOVEMENT.

The following article on the Development of the Co-operative Credit Movement in India and the results attained is taken from the *Times*, London, England, of May 24, 1911.

BY no means the least important movement set on foot in recent years in India is that which aims at financing agriculture on less onerous terms than has been the tradition of the past; and no notice however brief, of Indian development would be adequate which ignored the organization of co-operative credit societies. Every Hindoo is at heart a money lender; and it is perhaps this circumstance which, while it has in the past rendered possible the toleration of the exorbitant rates of interest charged by money-lenders in agricultural areas, accounts for the rapid development of the system of co-operative credit when once it was given an authoritative start. In order to understand the urgency of the need for some reform in the methods of financing agriculturists it is, however, necessary to give a short account of the condition of affairs at the close of the nineteenth century.

Before the advent of the British, land and its possession was of no great intrinsic value. There was little certainty that the ryot would reap what he sowed or that, when he had reaped it, he would enjoy the fruits of his labour. Added to this was the perennial uncertainty of the climate and the periodical recurrence of failures of the monsoon. Nevertheless, agriculture had to be carried on somehow in the interests of the whole society, non-agricultural as well as agricultural. The village community included the *shroff*, or *bania*, whose business it was to speculate in the organization of means for counteracting or minimizing the uncertainties and discouragements in the path of successful tillage. It was as much to his

own interest as to that of the community at large that the ryot should be encouraged to labour; and the money-lender of those days was frequently the saviour of society.

The Evils of Usury.

With the establishment of the *Pax Britannica*, and the growth of security of tenure, the value of land, as property, increased enormously. Concurrently, however, with the protection of property, the safety of the person was also guaranteed. In earlier times grave oppression or excessive exactions by the village banker brought their own swift retribution; but this check disappeared under our rule, which substituted a resort to the Civil Courts. Such a remedy was of little or no value to the ignorant cultivator, while it was eminently suited to the intelligent and sometimes unscrupulous usurer. The process of dispossession of the ryot, through foreclosure of mortgages and so forth, proceeded in some parts of India at a dangerous pace, and forced upon the Government the adoption of measures such as the Deccan Agriculturists' Relief Act of 1879, and, later, the Punjab Tenancy Act, designed to check the transfer of ownership of land to the non-agriculturist classes in extinction of indebtedness. In a country like India, however, such measures could only have a partial success, and it was clear that some means were required for enabling the ryot to obtain credit both for tiding over bad seasons and for effecting improvements. Accordingly, in 1883 and 1884, the Land Improvement and Agriculturists' Loans Acts were passed, under which the various local Governments in India were empowered to advance money on easy terms for specific

purposes. Considerable relief had been afforded by these measures, as is evidenced by the fact that, in the year 1908-9, a sum of £2,261,040 was advanced by the State to cultivators, while the total advances outstanding at the close of that year were £3,887,283. But it was felt that relief could not hope to be complete so long as Government were the agents, since the formalities and regulations which must be observed and adhered to regarding repayments of Government loans acted as a deterrent to many, and caused them to continue to prefer a resort to the local usurer.

The New Societies.

Towards the close of the nineteenth century attention was drawn to the development in Europe of the system of credit societies as organized in Germany and Italy, and Mr. F. A. Nicholson, in his comprehensive report upon the possibility of establishing Land Banks in India, strongly recommended the adoption of measures based upon the system introduced in Germany by Raiffeisen. Other officers of Government in India took the matter up, notably Mr. Duper-nex, and eventually, in 1904, the Co-operative Credit Societies Act was passed by the Indian Legislature authorizing the formation of central societies (called "Co-operative Unions") empowered to raise loans and accept deposits in the interests of affiliated urban or rural societies, of which the last named work without share capital and with unlimited liability. The movement inaugurated by this legislation, has met with an altogether unexpected degree of success. It is instructive to note that, when the Co-operative Credit Societies Bill was introduced into the Legislative Council in 1903, it was objected to by several Indian members on the ground, among others, that there was in the Indian character, an absence of the spirit "of co-operation." The objections were over-ruled, Government passed the Bill into law, and within eight years are compelled to amend the Act so as to allow for its expansion. As was stated when the amending Bill was introduced, "It has been found that the root of the mat-

ter does exist in India and that Indians will co-operate." In fact, the collectivism which characterizes Indian society appears to lend itself with extraordinary readiness to the mutual self-help which is the basic principle upon which Raiffeisen, in Germany, and Luzzatti, in Italy, reckoned in establishing their co-operative credit societies.

The Success Attained.

Let the figures speak for themselves. On March 31, 1906 (after two years' working), there were in India, 283 societies with a membership of 28,629 and a capital of Rs. 473,219, of which Rs. 70,152 represented the Government's contribution. Two years later there were 1,357 societies with 148,429 members and a capital of Rs. 44,07,024, of which only Rs. 6,51,816 were contributed by the State; and the latest figures available give 3,456 as the number of the societies, 226,958 as the number of members, and Rs. 1,03,27,743 (of which only Rs. 7,21,775 are from Government) as the capital. The societies are thus increasing at a phenomenal speed, and they are firmly established on a self-supporting basis; while loans are well and punctually repaid. Now that the Government have floated the scheme it is being willingly and generously supported by leading Indian capitalists, and in several provinces Central Land Banks have been established in furtherance of the movement. Even under the original Act the measure was aimed not only at organizing the credit of agriculturists, but in urban areas, in establishing similar societies for special industries such as the weavers and leather workers. Under the amending Bill it is proposed to afford facilities for co-operation, not merely for borrowing, but also for purchasing and producing, and in the light of the marked success which has attended the first measure there seems no reason to doubt that, in its enlarged scope, it will also suit the constitution of Indian society and meet a long-felt want.

It is, perhaps, reasonable to hope that in the legislation of 1904, the Govern-

ment of India have at last found means, consistent with the organization of the social system of India, for checking the transference of lands from the agricultural to the non-agricultural classes, and that an era of increased prosperity is in sight. Now that the first impetus has been given, private Indian gentlemen, especially in

Bombay, are coming forward in support of the co-operative movement; and although, as yet, the registrars of the local societies are Government officials, there seems reason to hope that the time is not far distant when the scheme can be entirely divorced from official support and control.

BULLETINS ISSUED DURING THE MONTH OF JULY BY THE ANNUITIES BRANCH, DEPARTMENT OF TRADE AND COMMERCE, CANADA.

An Equal Chance.

ONE of the features of the Canadian Government Annuities system which highly commends itself to every person is that a man who is middle aged enjoys equal advantages with the man who starts at a younger age, for he may by the payment of a lump sum equivalent to the total amounts which he would have paid had he entered at the earlier age go on from his present age at the same rate as if he had begun at an earlier age. For example, a man of forty who has decided to purchase an Annuity of \$500 pays in \$1,593.25, which is the equivalent of what he would have paid during the years from twenty to forty. He will now continue to pay \$50.05 each year until he is sixty, instead of \$167.10, which is the rate which a man entering at forty would have to pay for an Annuity of \$500 to begin at sixty.

A school teacher who has just cashed in a twenty year endowment policy has made the application of this amount on a \$500 Annuity Contract, a most provident disposition of a portion of his money. If he dies before he is sixty, the total amount which he pays up to the time of his death with 3% compound interest will be returned to his legal representatives,

A supply of interesting literature concerning the Annuities Scheme may be had on application to the Superintendent of Government Annuities, Ottawa, to whom letters go free of postage.

A Splendid Example.

A father has commenced the purchase of a Canadian Government Annuity for his

son of twenty under an arrangement with the son that he is to bear a portion of the expense until he, the son, is able to assume the whole payment of \$50 a year, which is the amount required to be paid from twenty to sixty for forty years to secure for the son at sixty an Annuity of \$507.69. It will be seen that the total payments will amount to \$2,000, and that the return each year will be over one-fourth of this amount so long as the son lives after he attains the age of sixty. If he dies before the Annuity is due, all his payments with three per cent. compound interest up to the time of his death will be refunded to his legal representatives.

If he died at 30	they would receive.....	\$ 590.00
" 35	"	957.85
" 40	"	1,383.80
" 45	"	1,877.65
" 50	"	2,450.00
" 55	"	3,113.80
" 60	"	3,883.15

Full particulars of this excellent scheme may be had on application to the Superintendent of Canadian Government Annuities, Ottawa, to whom letters go free of postage.

A Sure Road to Happy Old Age.

This describes in a few words the Canadian Government Annuities Scheme. That this "sure road" is available to all residents of Canada, who are over five years of age, irrespective of sex, health, age or worldly position, is worthy of consideration. Parents may begin the purchase of Annuities for their children; or children, who have prospered, may find in this scheme a safe way to provide an income for fathers and mothers who have

not been so fortunate in life as they. On the other hand, people who have a limited income can increase that sum substantially by the transfer of their capital to the Government for the purchase of an

Annuity.

Full particulars may be obtained concerning this scheme by addressing the Superintendent of Canadian Government Annuities, Ottawa. Postage free.

THE WORLD'S LABOUR LAWS.

THE British Association for Labour Legislation, which forms a section of the International Association, has commenced the publication of a magazine, entitled "The World's Labour Laws".¹ The objects of this publication are stated to be to combine the merits of being of interest to the general reader as well as being a book of reference to the more serious student or politician, and incidentally to show the relations between the labour laws of different States and to emphasize the help which can be gained by international example and inspiration.

The first issue contains articles on

¹Published by The British Association for Labour Legislation, 4, Bloomsbury Square, London, W.C.

"Prospects of Minimum Wage Legislation Abroad", "Recent Legislation in the East", including the Japanese Factory Act and the Indian Factory Act, "Industrial Poisons: regulations in Holland and Belgium", "Hours of Work in Mines: an International Comparison", and "Laws Relating to Shops and Offices". In addition to these articles, there are brief notes on the following subjects: "The German Potash Mining Law", "The Spanish Mines Act", "The Regulation of Work in Bakehouses", "The Administration of Labour Laws" and notes from the Spanish and American sections of the International Association.

RECENT INDUSTRIAL AGREEMENT.

THE following agreement was made between the Plasterers' Labourers' Union, Local No. 1, Ottawa, and the Plastering Contractors of the City of Ottawa.

1. Agreed that on and after August 1, the rate of wages for all members of the above Local shall be 30 cents per hour.

2. Agreed that nine hours shall constitute a working day, except Saturday, which shall be five hours.

3. Agreed that all overtime shall be paid for at the rate of time and a half till 12 p.m.; from 12 p.m. till 6 a.m. shall be double time, and the Sundays, Labor Day, Dominion Day, Christmas Day, and May 24 shall be double time.

4. Agreed that preference be given to all members of Ottawa Local No. 1, Plasterers' Labourers' Union.

5. Agreed that orders from shop stewards or business agents of Plasterers' Labourers' Union shall be accepted at all times when signed by man for collection, such order to be payable on the following pay day.

6. Agreed that business agent be allowed on all jobs for the space of ten minutes to interview shop steward on business of the Union.

7. Agreed that for the termination of this Agreement three months' notice shall be given on either side.

8. Agreed that this Agreement shall cover Ottawa and vicinity.

9. Agreed that all members working outside City limits shall be allowed expenses.

10. Agreed that this Agreement shall terminate July 31, 1913.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF JUNE, 1911.

The following is a list of contracts awarded by the Department of Public Works, the Department of Railways and Canals and the Department of Marine and Fisheries which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

THE general clause for the protection of labour was inserted by the Department in the following contracts awarded during July, 1911:

ARMOURY, STRATHCONA, ALTA.

Armoury, Strathecona, Alta., name of contractor, The Brown Construction Company, Limited, Winnipeg, Man.; date of contract, June 26, 1911; amount of contract, \$33,668.

Trade or Class of Labour.	Rate of Wages, Not less than:

POST OFFICE FITTINGS AT HALIFAX, N.S.

Post Office fittings, at Halifax, N.S.; name of contractor, The Berlin Interior Hardwood Company, Limited, Berlin, Ont.; date of contract, July 17, 1911, amount of contract, \$3,000.

FAIR WAGES CLAUSE.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted

SEMI-DETACHED COTTAGES—RIDEAU HALL.

Semi-detached cottages—Rideau Hall, Ottawa, Ont., name of contractor, Aug. Boehmer, Ottawa, Ont.; date of contract, July 27, 1911; amount of contract, \$7,250.

as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life, and property, or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the Contractor.

Department of Marine and Fisheries.

Contract awarded by the Department of Marine and Fisheries, which received the signature of both parties during the month of July, 1911, together with the Fair Wages schedule attached thereto.

REPAIRS AND ALTERATIONS TO THE LIGHTKEEPER'S DWELLING AT FATHER POINT, COUNTY OF RIMOUSKI, QUE.

Repairs and alterations to the light-keeper's dwelling at Father Point, county of Rimouski, Que., name of contractor, Paschal Hudon, contractor, Rimouski, Que., amount of contract, \$1,025. Date of contract, May 13, 1911.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenters.....	\$2.00
Painters.....	2.00

Stationary firemen.....	1.50 "
Labourers.....	1.50 "

EXTENSION TO PIER AT SAULT STE. MARIE, ONT.

Construction of extension to North Mooring Pier, Sault Ste. Marie Canal. Date of contract, July 20, 1911. Amount of contract, schedule rates. Contractor, John F. Boyd, of Sault Ste. Marie, Ont.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenter.....	\$ 3.00
Foreman carpenter.....	3.50
Foreman concrete mixer....	2.50
Diver (with outfit).....	8.00
Ordinary labourers.....	1.75
Driver, 1 horse and cart....	3.00
Driver, 2 horses and wagon.....	4.00
Driver and one horse.....	3.00
Driver and two horses.....	4.00

INSTALLATION OF VACUUM CAR CLEANING
PLANT AT HALIFAX, N.S.

Supply and installation of a vacuum car cleaning plant in yard at Halifax, on the Intercolonial Railway. Date of contract, July 12, 1911. Amount of contract, \$4,850. Contractors, The Canadian Vacuum Cleaner Company of Montreal, Que.

Trade or Class of Labour.	Rate of Wages, Per Day of 9 Hours, Not less than:
Foreman.....	No special rate.
Concrete men.....	\$1. 62
Carpenters.....	2. 70
Pipe fitters.....	2. 70
Electricians.....	2. 25
Labourers.....	1. 53

Post Office Department.

During the month of July orders were given by the Post Office Department for the supplies below mentioned, subject to

the regulations for the suppression of the Sweating System, and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type, and making other hand stamps and brass crown seals.....	\$1,176.31
Making and repairing rubber dating stamps and type, also other stamps.....	40.60
Supplying stamping material and wooden boxes and repairing stamping pads.....	1,247.28
Supplying mail bags.....	4,015.00
Repairing mail bags.....	2,452.51
Making and repairing Post Office scales.....	179.50
Making and repairing mail locks, and supplying mail bag fittings.....	7,041.05
Supplying Railway Mail Clerks' tin travelling boxes and parcel receptacles and repairing portable letter boxes, parcel receptacles and Railway Mail Clerks' tin travelling boxes.....	2,537.55
Making and repairing miscellaneous articles of Postal Stores.....	82.50
Making and supplying articles of official uniform.....	11,551.34

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent imimgrant arrivals in Canada, number of homestead entries made, land patents issued, etc.,are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

THE total immigration to Canada for the months of April, May and June, 1911, amounted to 153,120, compared with 130,353 in the corresponding

months of 1910, making an increase of 22,767, or seventeen per cent. Of the total arrivals for the three months, 109,318 were at ocean ports, as against 84,853 during the corresponding months of last year, an increase of thirty per cent. The number of arrivals from the United States during the three months was 43,802, compared with 45,500 in 1910, a decrease of 3.7 per cent.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JULY, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Board of Railway Commissioners for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 287 individual work people in Canada during the month of July, 1911, were reported to the Department of Labour. Of these, ninety-two were fatal and 195 resulted in serious injuries. In addition, ten fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before July, 1911.

In the preceding month there were

eighty-two fatal and 110 non-fatal accidents reported, a total of 192, and in July, 1910, there were 116 fatal and 238 non-fatal accidents, a total of 354. The number of fatal accidents reported in July, 1911, was, therefore, ten more than in the preceding month, and twenty-four less than in July, 1910. The number of non-fatal accidents reported in July, 1911, was eighty-five more than in the preceding month, and forty-eight less than in July, 1910. Altogether there were ninety-five industrial accidents reported in July, 1911 more than in the preceding month, and sixty-seven less than in the same month of the preceding year.

Of 287 returns received during the month giving the ages of the victims of industrial accidents, seven referred to persons under twenty-one years of age, sixty-one to persons between twenty-one and forty-five, and sixteen to persons

over forty-five. Two hundred and seven persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

A reference to the accidents of the month, involving more than two fatalities, is as follows:—

Wreck of a Collier off Beaver Light, N.S.

On Tuesday, July 25, the collier *John Irwin* was wrecked off Beaver Light, N.S., during a heavy gale. The ship was carrying a cargo of coal from Port Morien, C.B., to Halifax, and out of a crew of twelve men the mate alone survived. According to the survivor, a heavy gale caused the cargo to shift badly and the heavy seas sweeping over the vessel caused it to founder before the crew had time to launch life boats. The mate constructed a raft from part of the wreck and drifted ashore Wednesday night.

Collision of Steamships on Lake Superior.

On July 9, at midnight, the steamship *John Mitchell* collided with the steamship *W. H. Mack* seven miles above Whitefish point, on Lake Superior, and

sank. There was a heavy fog at the time. The ill-fated vessel carried a crew of twenty-seven, and had seven passengers, all of whom were saved with the exception of three of the crew, the second mate, the steward, and the watchman. Several of the crew and passengers were badly shaken up.

Fatal Accident at the "Plaza Laurier," Ottawa, Ont.

On July 11, two men were fatally injured while at work on the construction of the "Plaza Laurier," Ottawa. The accident was caused through the breaking of a steel cable holding the derrick boom, with the result that when the derrick boom fell the dipper used in hoisting the concrete struck a foreman and one of the labourers, both of whom died of their injuries.

Death of Two Miners at Bellevue, Alta.

On July 5, two men were killed in a mine of the West Canadian Collieries, at Bellevue, Alta. The accident was due to the derailment of a car which struck a timber, causing a fall of coal from the roof of the mine, burying the two men who were on the car. The coroner's jury which investigated the accident brought in the following verdict: "That Tom Rawson and Joseph D. Pasquala came to their death on July 5, 1911, in Bellevue mine, from suffocation caused by a fall of debris, and that in the opinion of the jury no blame can be attached to any party concerned, as we consider it was accidental. It is the opinion of this jury that the company be requested that speed in travelling from entrance to twenty-seven chute be determined when men are riding, and that riding from twenty-seven chute be discontinued except in necessary cases."

Blasting Accident near Stewart, B.C.

On June 28, two men were reported to have been killed on railway construction work near Stewart, B.C., by a premature blast. A third man was slightly injured by the explosion.

Record by Industries and Trades.

A detailed record of the industrial accidents of the month, by industries and groups of trades, is as follows:—

Agriculture.—There were eleven fatal and fifteen non-fatal accidents in July, compared with thirteen fatal and fourteen non-fatal accidents in June, and eighteen fatal and thirty non-fatal accidents in July, 1910. Of the fatal accidents, two were caused by lightning strokes, three by falls, one each by kick from a horse, trampling by horses, gored by a bull, crushed by a stone, struck by an engine, and by suffocation in a well.

Fishing and hunting.—There were no accidents in July, compared with none in June, and one fatality in July, 1910.

Lumbering.—There were one fatal and six non-fatal accidents in July, compared with seven fatal and three non-fatal accidents in June, and eight fatal and three non-fatal accidents in July, 1910. The fatality was caused by a saw mill hand being struck by a block of wood.

Mining.—There were four fatal and four non-fatal accidents in July, compared with eight fatal and twenty-four non-fatal accidents in June, and seventeen fatal and nine non-fatal accidents in July, 1910. Of the fatalities, two were caused by suffocation under fallen coal, and one each by falling stone, and collapse of scaffold.

Building trades.—There were eight fatal and thirty-eight non-fatal accidents in July, compared with eight fatal and four non-fatal accidents in June, and two fatal and twenty-eight non-fatal accidents in July, 1910. Of the fatalities, six were caused by falling material, and two by falls.

Metal, engineering, and shipbuilding trades.—There were twelve fatal and thirty-two non-fatal accidents in July, compared with fifteen fatal and nineteen non-fatal accidents in June, and eleven fatal and forty-three non-fatal accidents in July, 1910. Of the fatalities, seven were caused by electric shock, and one each by lightning, being struck by a travelling crane, being struck by a locomotive, being crushed under a falling boiler and being crushed by steel rails.

Woodworking trades.—There were no accidents reported in July, compared with one fatal and four non-fatal accidents in June, and two fatal and fourteen non-fatal in July, 1910.

Printing and allied trades.—There were four non-fatal accidents in July, compared with none in June, and four non-fatal accidents in July, 1910.

Clothing trades.—There was one non-fatal accident reported in July, compared with none in June, and two non-fatal accidents in July, 1910.

Textile trades.—There were no accidents reported in July, compared with two non-fatal accidents in June, and three non-fatal accidents in July, 1910.

Food and tobacco preparation.—There was one fatality reported in July, compared with one non-fatal accident in June, and two fatal and nine non-fatal accidents in July, 1910. The fatality was caused by the explosion of a retort in a canning factory.

Leather trades.—There were no accidents reported in July, compared with none in June, and one non-fatal accident in July, 1910.

Railway service.—There were nineteen fatal and thirty-one non-fatal accidents in July, compared with ten fatal and eleven non-fatal accidents in June, and twenty-five fatal and twenty-six non-fatal accidents in July, 1910. Of the fatal accidents, seven were caused by persons being struck by trains and locomotives, five by being run over, three by derailments, two by being crushed when coupling, and one each by heat prostration, and scalding.

Railway construction.—There were two fatalities in July, compared with none in June, and none in July, 1910. One of the fatal accidents was due to person being run over by train, and one to falling rock.

Navigation.—There were eighteen fatal and nine non-fatal accidents in July, compared with four fatal and one non-fatal accident in June, and six fatal and ten non-fatal accidents in July, 1910. Of the fatalities, seventeen were caused through drowning, and one through a marine engineer being caught in machinery,

General transport.—There were three

River.....	Maisonneuve, Que.....	" 28	1	Killed by a street car.

fatal and eight non-fatal accidents reported in July, compared with four fatal and seventeen non-fatal accidents in June, and ten fatal and thirteen non-fatal accidents in July, 1910. Of the fatal accidents, one man was struck by an engine, one was struck by falling lumber, and one was killed by a runaway team.

Public employés.—There were one fatal and nine non-fatal accidents in July, compared with two fatal and seven non-fatal accidents in June, and two non-fatal accidents in July, 1910. The fatality was caused by an electric shock.

Miscellaneous.—There were five fatal and seventeen non-fatal accidents in July, compared with five fatal and three

non-fatal accidents in June, and nine fatal and twenty-one non-fatal accidents in July, 1910. Of the fatalities, two were caused by falls, and one each by burning, by being crushed in an elevator, and by a runaway team.

Unskilled labour.—There were seven fatal and twenty non-fatal accidents in July, compared with five fatal and ten non-fatal accidents in June, and five fatal and twenty non-fatal accidents in July, 1910. Of the fatal accidents, two were caused by a falling derrick boom, and one each by stone from blast, a cave-in of earth, a fall from a building, an electric shock, and by being run over by a train.

RETAIL PRICES OF STAPLE COMMODITIES IN CANADA.

The information in the present article has been furnished by correspondents of the *Labour Gazette*, under detailed instructions from the Department as to sources of information, quality of goods to be quoted, &c.

THE principal features in regard to prices of staple commodities during July were a temporary rise in dairy products in many localities, particularly in the Province of Ontario, owing to a period of dry weather causing poor pasture. New potatoes were beginning to come in, and in some places two prices were quoted—one for the old and the other for the new. The latter as a rule, however, were very scarce at the beginning of the month, and sold for very high prices. Garden produce and fruits were plentiful, but at Hamilton, Ont. they were reported to be selling higher than during July, 1910. A rise in the price of a number of articles at Lethbridge, Alta., was attributed to the continuance of the coal strike, which caused a shortage of money. In the following notes comparison is made of the prices prevailing in July with those in the previous month.

Notes on Retail Prices.

Beef.—There was an increase in both sirloin steak and medium chuck at London, Ont., and Winnipeg, Man. The increase at London was attributed to

large shipments to British and Toronto markets. There was an increase in both kinds of beef at Calgary, Alta. Sirloin steak showed an increase at Amherst, N.S., Three Rivers, Que., Maisonneuve, Que., and Lethbridge, Alta. The price of shoulder roast, medium chuck, advanced at St. Thomas, Ont., and declined at Sydney, N.S., Amherst, N.S., Moncton, N.B., and Lethbridge, Alta.

Veal.—The price of veal advanced at Newcastle, N.B., Quebec, Que., Maisonneuve, Que., Ottawa, Ont., and St. Thomas, Ont. It was reported to be scarce at Quebec. The price declined at Sydney, N.S., Sorel, Que., Windsor, Ont., and Lethbridge, Alta.

Mutton.—The price of mutton increased at Maisonneuve, Que., St. Catharines, Ont., and Lethbridge, Alta., while the price decreased at Sorel, Que., Ottawa, Ont., and Brantford, Ont.

Pork.—The price of pork, both fresh and salt, advanced at Peterborough, Ont., Toronto, Ont., Brantford, Ont., and Berlin, Ont., and declined at Three Rivers, Que., Ottawa, Ont., and Sault Ste. Marie, Ont. Fresh pork increased in price at St. John, N.B., and London, Ont., and decreased in price at Amherst, N.S., and Newcastle, N.B. Salt pork rose in price at Westville, N.S., Newcastle, N.B., and St. Thomas, Ont.

Bacon.—There was an advance in the

price of bacon at Moncton, N.B., St. John, N.B., Sherbrooke, Que., Sorel, Que., Peterborough, Ont., Berlin, Ont., London, Ont., Sault Ste. Marie, Ont., Brandon, Man., Lethbridge, Alta., and Vancouver, B.C.

Fish.—The price of salmon rose at Charlottetown, P.E.I., and whitefish advanced at Winnipeg, Man. The increase at Winnipeg was due to the appearance of fresh fish on the market. The price of fish decreased at Sorel, Que., and Vancouver, B.C.

Lard.—The price of lard increased at Sydney, N.S., Amherst, N.S., Moncton, N.B., Newcastle, N.B., Three Rivers, Que., Sorel, Que., Sault Ste. Marie, Ont., and Lethbridge, Alta. It was reported that the advance at Sydney, N.S., was due to an increased demand. There was a decrease in the price of lard at Brantford, Ont., Stratford, Ont., and Calgary, Alta. It was reported at Brantford, Ont., that the decline was due to substitutes for lard being offered for sale, and to a reaction from the high price prevailing in previous months. The decline at Stratford was reported to be due to a more plentiful supply.

Eggs.—There was a general increase in the price of eggs, owing to their scarcity. The following localities reported in advance in price: Sydney, N.S., Westville, N.S., Halifax, N.S., Charlottetown, P.E.I., St. John, N.B., Quebec, Que., Sherbrooke, Que., St. Johns, Que., Montreal, Que., Peterborough, Ont., Toronto, Ont., Niagara Falls, Ont., St. Catharines, Ont., Hamilton, Ont., Guelph, Ont., Berlin, Ont., Woodstock, Ont., London, Ont., Sault Ste. Marie, Ont., Brandon, Man., Calgary, Alta., and Victoria, B.C. The only localities reporting decrease in price are Stratford, Ont., and Winnipeg, Man.

Milk.—The only locality in which an advance in the price of milk was reported was Toronto, Ont. The price decreased at Quebec, Que., Sorel, Que., Brandon, Man., and Edmonton, Alta. The decrease in the price at Quebec was stated to be the usual summer reduction.

Butter.—Butter, both dairy and creamery, advanced in price at Amherst, N.S., Sherbrooke, Que., Kingston, Ont., St.

Catharines, Ont., Hamilton, Ont., Woodstock, Ont., Stratford, Ont., and Chatham, Ont. These increases were reported to be due to scarcity, owing to the dry season. The price declined at Halifax, N.S., Charlottetown, P.E.I., Quebec, Que., and Guelph, Ont., on account of a plentiful supply. Dairy butter advanced at St. John, N.B., and Ottawa, Ont. Creamery butter advanced at Sydney, N.S., Toronto, Ont., St. Thomas, Ont., Sault Ste. Marie, Ont., and Winnipeg, Man., and declined at St. John, N.B., Brandon, Man., Vancouver, B.C., and Victoria, B.C.

Cheese.—Both new and old cheese advanced at Toronto, Ont., Hamilton, Ont., and Winnipeg, Man., and declined at Newcastle, N.B., and Three Rivers, Que. There was also a decline in new cheese at St. John, N.B., Stratford, Ont., and St. Thomas, Ont.

Bread.—The only changes in the price of bread were a decline at Sydney, N.S., St. John's, Que., and Hamilton, Ont. The decline at Sydney, N.S., was reported to be due to a decrease in the price of flour. The decrease at Hamilton, Ont., was stated to be due to keen competition among the bakers.

Flour.—The price of flour declined at Sydney, N.S., Ottawa, Ont., Kingston, Ont., and St. Thomas, Ont.

Oats.—The price of oats advanced at St. Catharines, Ont., and declined at Newcastle, N.B., Sorel, Que., and Woodstock, Ont.

Rice.—The price of rice advanced at Sherbrooke, Que., and declined at Sorel, Que., and Woodstock, Ont.

Beans.—An increase in the price of beans was reported at Maisonneuve, Que., and Lethbridge, Alta., and a decrease at Sherbrooke, Que., Ottawa, Ont., and Vancouver, B.C.

Apples.—The price of evaporated apples advanced at Sydney, N.S., Newcastle, N.B., and Vancouver, B.C., owing to scarcity.

Prunes.—The price of prunes of medium quality increased at Toronto, Ont., Woodstock, Ont., St. Thomas, Ont., Winnipeg, Man., and Vancouver, B.C., and decreased at Sydney, N.S., St. John, N.B., and Kingston, Ont.

Sugar.—There was an advance in the price of both granulated and yellow sugar at Sydney, N.S., Westville, N.S., Amherst, N.S., Sherbrooke, Que., Toronto, Ont., Edmonton, Alta., and Lethbridge, Alta. Granulated sugar advanced at Kingston, Ont., Niagara Falls, Ont., Brantford, Ont., and St. Thomas, Ont. Yellow sugar advanced at Montreal, Que., but declined in price at St. John, N.B., Newcastle, N.B., and St. Thomas, Ont.

Tea.—The only changes in the price of tea were an increase in both black and green at Lethbridge, Alta., and a decrease at Kingston, Ont. Black tea also decreased in price at St. John, N.B., and Newcastle, N.B.

Coffee.—The only change in the price of coffee was a decrease at Kingston, Ont., and Vancouver, B.C.

Potatoes.—There was an advance in the price of potatoes, owing to the coming in of the new crop, at Newcastle, N.B., Quebec, Que., Three Rivers, Que., Sherbrooke, Que., St. Hyacinthe, Que., Maisonneuve, Que., Ottawa, Ont., Toronto, Ont., Niagara Falls, Ont., St. Catharines, Ont., Hamilton, Ont., Brantford, Ont., Guelph, Ont., Berlin, Ont., London, Ont., St. Thomas, Ont., Chatham, Ont., Windsor, Ont., Sault Ste. Marie, Ont., Port Arthur, Ont., Winnipeg, Man., Brandon, Man., Calgary, Alta., Edmon-

ton, Alta., Vancouver, B.C., Victoria, B.C., Nanaimo, B.C. The only place where there was a decrease in price was at St. Johns, Que.

Starch.—The only changes in the price of laundry starch were at Lethbridge, Alta., where there was an increase in price, and at St. Thomas, Ont., where there was a decrease.

Coal.—There was an advance in the price of both anthracite and bituminous coal at Guelph, Ont., and a decrease at St. Catharines, Ont. Anthracite coal also advanced at Halifax, N.S., Three Rivers, Que., Sherbrooke, Que., St. John's, Que., Peterborough, Ont., and Toronto, Ont., and decreased at Moncton, N.B., and Stratford, Ont. Bituminous coal advanced at Montreal, Que. Where increases in the price of the anthracite occurred, they were due to the usual custom of the dealers in gradually advancing the price from month to month during the summer season.

Coal oil.—The only change in the price of coal oil reported was a decrease at St. Thomas, Ont.

Rent.—No changes in the rent of workmen's dwellings were reported, except at St. Catharines, Ont., where there was an advance, owing to scarcity of houses.

TRADE DISPUTES DURING THE MONTH OF JULY, 1911.

THERE was an improvement in industrial conditions in Canada with regard to trade disputes during July, compared with the previous month, the only localities at all seriously affected by strikes being eastern British Columbia and Alberta, where a strike of coal miners continued throughout the month, and Vancouver, B.C., where a general strike in the building trades lasted until towards the end of July.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The number of trade disputes reported to have been in existence in Canada during July was

eighteen, a decrease of nine compared with June, and a decrease of two compared with July, 1910. About 116 firms and 19,006 employés were involved in these disputes, about sixteen firms and 1,255 employés being involved in new disputes of the month.

Loss of time in working days.—The loss of time to employés through trade disputes during July was approximately 302,950 working days, compared with a loss of 355,435 days in June, and 100,260 days in July, 1910.

Trades affected by new disputes.—The following table shows the trades affected by new disputes, and the number of employés in each group of trades.

Trades.	No. of disputes.	No. of employés.
Building trades.....	2	847
Metal working and shipbuilding trades.....	1	115
Food and tobacco preparation.....	1	160
Miscellaneous trades.....	2	133
Total.....	6	1,255

Localities affected by new disputes.—

Of the six new disputes of the month, two took place in the Province of Quebec, two in Ontario, and two in Manitoba,

Cause of disputes.—The following were the causes of the new disputes of the month:—

Cause.	No. of disputes.
For higher wages.....	3
For shorter hours.....	1
For higher wages, shorter hours and recognition of Union.....	1
Against employment of a non-unionist.....	1
Total.....	6

Methods of settlement.—Of the eighteen disputes in existence during the month, nine were terminated, leaving nine still in existence at the end of July. Six disputes were settled by negotiations between the parties concerned, one by conciliation, and two by the resumption of work without negotiations.

Results of disputes.—Of the nine disputes that were terminated, two resulted in favour of the employers, and two in favour of the employés. In one, the employés were partially successful, nearly all returning to work on the terms demanded, and in four cases compromises were effected.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes of previous months which were still in continuance during July comprised strikes of coal miners in Alberta and eastern British Columbia, carpenters and all building trades at Vancouver, B.C., carpenters and sheet metal workers at Calgary, Alta., painters at Port Arthur, Ont., electrical workers, iron moulder's and garment workers at Toronto, Ont., iron moulder's at Lon-

don, Ont., and pulp mill hands at St. George, N.B., and a lockout of carpet weavers at Toronto, Ont.

Strike of Coal Miners in Alberta and Eastern British Columbia.

No settlement was reported in a strike of coal miners in Alberta and eastern British Columbia, which began on April 1, on account of failure to reach a new agreement to replace one which had expired on that date. About 6,000 members of the United Mine Workers of America, and 1,000 non-unionists, employés of sixteen companies, were involved in this dispute. On July 11, the Minister of Labour received the report of the Board appointed under the Industrial Disputes Investigation Act, 1907. On July 24, the operators accepted the award conditionally, but at the close of the month it had not been accepted by the men.

Strike of Building Trades at Vancouver, B.C.

On April 10, a strike of 116 carpenters took place at Vancouver, B.C., on account of the refusal of the employers to grant a demand for an increase in wages from \$4 to \$4.50 per day. On June 5, the dispute was extended to all the other branches of the building trade, about fifty-four firms and 5,500 men being involved. On July 25, steps were taken to bring the strike to a termination by the unions involved, when it was decided that each union should make a settlement with its employers individually. On July 27 all had made settlements with the exception of the electrical workers and plumbers. Of the latter, only about thirty-six out of 180 were affected. At the close of the month, conditions seemed to have been affected by this dispute.

Strike of Carpenters at Calgary, Alta.

No settlement was reported in the case of a strike of eighty-eight carpenters at Calgary, Alta., who went out on June 20. The cause of the dispute was the objection of the men to the employment of a particular person.

Strike of Painters at Port Arthur, Ont.

No settlement was reported in the case of a strike of ninety painters at Port Arthur, Ont., which took place on April 17, on account of the employers to grant a demand for an increase in wages from thirty-five to forty cents per hour, and recognition of the union.

Strike of Pulp Mill Hands at St. George, N.B.

No settlement was reported in the case of a strike of fifty pulp mill hands at St. George, N.B., which began on April 26, on account of the refusal of the employers to grant a demand for an eight hour day instead of a day of eleven and thirteen hours, with an increase in minimum wages.

Strike of Sheet Metal Workers, Calgary, Alta.

On June 23, about seventy sheet metal workers declared a strike at Calgary, Alta., on account of the refusal of their employers to grant a demand for an increase in wages from 42½ to 52½ cents per hour and a 50 hour week. Settlements were reached with individual contractors, and the dispute was practically terminated on July 8. According to the terms of settlement as reported in the press, the men were to receive 45 cents per hour until the end of March, 1912, and from April 1, 1912, they would receive 52½ cents per hour and a 54 hour week.

Strike of Electrical Workers at Toronto, Ont.

On June 12, a strike of about 100 electrical workers took place at Toronto, Ont., on account of the refusal of the employers to grant a demand for an increase in wages from 35 to 40 cents per hour. By July 19, fourteen contractors had agreed to pay the new rate, leaving six still involved in the dispute. Seventy-five to eighty men had returned to work, but twelve men were still out.

Strike of Iron Moulders at Toronto, Ont.

Conditions ceased to be affected with regard to a strike of iron moulders at Toronto, Ont., which began on May 4, a compromise having been reached on May 12, with eleven firms employing 257 men, only one firm employing thirteen men failing to come to an agreement.

Strike of Iron Moulders at London, Ont.

A strike of about sixty iron moulders, employed by three firms, took place at London, Ont., on June 5, on account of the refusal of the employers to grant a demand that the hours of labour be reduced from 10 to 9, without a reduction in the minimum wages. The strike continued throughout the month of July, no settlement having been reported.

Strike of Garment Workers at Toronto, Ont.

On June 28, a strike of about thirty-five employes of the Puritan Skirt Factory took place at Toronto, Ont. According to a report received from the firm, the dispute arose on account of their refusal to grant certain demands of their men. It was stated that the employes wished a committee to be appointed to adjust all prices; that the names of all persons to be engaged or discharged, with the reason for such action, be submitted to the chairman of this committee, and that persons can only be engaged or discharged if the committee consider the reason sufficient; that work be distributed so that all could have a share and that all workers be kept, whether there is work or not; that pressers should not be employed on a weekly wage, but that all should be on piece work. No settlement of this dispute was reported during July.

Lockout of Carpet Weavers at Toronto, Ont.

No change was reported in the case of a lockout of 114 carpet weavers employed with the Toronto Carpet Manufacturing

Company at Toronto, Ont. which took place March 26.

New Disputes.

The new disputes of the month comprised strikes of carpenters at Montreal, Que., shipbuilding employés at Lévis, Que., gas works employés at Toronto, Ont., brewery workers at Winnipeg, Man., pulp beaters at Ottawa, Ont., and bricklayers at Brandon, Man.

Strike of Shipbuilding Employees at Lévis, Que.

On July 4, a strike of the employés of the shipbuilding firm of George T. Davie & Sons, took place at Lévis, Que. The cause of the dispute was the refusal of the firm to grant a demand for an increase of twenty-five per cent. in wages, and 25 cents per day extra under certain conditions. The dispute was settled on July 12, by the friendly mediation of the Department of Labour, when an agreement was signed providing for the desired increase in wages.¹

Strike of Carpenters and Joiners at Montreal, Que.

On July 18 a strike of carpenters took place at Montreal, Que., in which eight or ten of the largest firms were involved. Estimates of the number of men affected ranged from 200 to 800. The cause of the dispute was the refusal of the employers to grant a demand for an increase in wages from 30 to 35 cents per hour. The firms involved were approached individually and settlements were made on different dates. Within a week most of the employers had granted the desired increase. The carpenters employed by the Montreal Harbor Commissioners continued on strike and no settlement with regard to them was effected during the month.

Strike of Employés of the Consumers' Gas Company, Toronto, Ont.

On July 12, a strike of about sixty employés, firemen, pipe jumpers, and

stokers, in the retort houses of the Consumers' Gas Company, at Toronto, Ont., took place. The cause of the strike was a refusal on the part of the Company to grant the demand of the above employés for an increase in wages. The Company reported that, after investigation, it was found that the wages of their employés were higher than those paid to the same class of workmen throughout Canada, Great Britain and the United States. The men returned to work on July 17, on the conditions prevailing before the strike.

Strike of Brewery Workers at Winnipeg, Man.

On June 10, a strike of brewery workers took place at Winnipeg, Man., on account of the refusal of two breweries to grant a demand for recognition of their union, an increase in wages, and a reduction in working hours from ten to nine. It was reported in the press, that about 160 men were involved in the dispute. A conference was held between the two parties to the dispute, and on July 12, an agreement was reached, by which recognition of the union and a nine-hour day were granted, and the wages were increased to about half of the original demands.

Strike of Pulp Beaters at Ottawa, Ont.

On July 19, a strike of eighteen pulp beaters took place at Ottawa, Ont., on account of the refusal of the J. R. Booth firm to grant a demand for an eight-hour day with three shifts, in place of an eleven and thirteen-hour day, alternate weeks with two shifts. On July 22, all the men with the exception of two, returned to work on the conditions prevailing before the strike. About fifty-five men were indirectly affected by this dispute. Some of the paper-makers who were indirectly affected resumed work before the end of the strike.

Strike of Bricklayers at Brandon, Ont.

On July 7, a strike of forty-seven bricklayers took place at Brandon, Man.,

¹A fuller account of this dispute is given in a special article on another page.

DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLE, SERIES C, No. 130.

TABLE OF TRADE DISPUTES DURING THE MONTH OF JULY, 1911.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.			Date of commencement.	Date of termination.	Result.
			Directly.	Indirectly.	Directly.	Indirectly.				
							Di-rectly, rectly.			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.										
Mining—										
Coal mines.....	Alberta & Eastern British Columbia	Failure to reach new agreement	16	7,000	April 1	No settlement reported at end of month.
Building trades—										
Carpenters and joiners.....	Vancouver, B.C....	For increase in wages from \$4.00 to \$4.50 per day.....	116	"	10 July	25 Work resumed with employers of Union shops paying \$4.25 per day
Carpenters.....	Calgary, Alta.....	Against employment of a particular person.....	1	88	June 20	No settlement reported at end of month.
Building trades....	Vancouver, B.C....	In sympathy with striking carpenters and against alleged violation of agreement.....	54	5,500	"	5 July	25 Individual settlements made by separate trade Unions.
Painters.....	Port Arthur, Ont..	For increase in wages from 35 to 40 cents per hour and recognition of Union.....	1	90	April 17	No settlement reported at end of month.
Metal trades—										
Iron moulders....	Toronto, Ont.....	For increase in wages.....	1	13	May 4	No settlement reported, but conditions ceased to be affected.
Iron moulders....	London, Ont.....	Men demanded that a minimum wage for a 10-hour day be paid for a day of nine hours...	3	60	June 5	No settlement reported at end of month.
Sheet metal workers	Calgary, Alta....	For increase in wages from 42½ to 50 cents per hour.....	70	"	23 July	8 Agreement signed, a compromise.
Electrical workers.	Toronto, Ont.....	For increase in wages from 35 to 40 cents per hour.....	20	100	"	21
Clothing trades—										
Garment workers..	Toronto, Ont.....	For change in conditions of employment.....	1	35	"	28
										No settlement reported at end of month.

<i>Textile trades—</i> Carpet weavers.....	Toronto, Ont.	Lookout on account of firm's op- position to employes belong- ing to a Union.....	1	114	Mar. 22	No settlement reported at end of month.
<i>Miscellaneous trades</i> Pulp mill hands....	St. George, N.B. . .	For day of eight hours instead of thirteen and eleven, with in- crease in minimum wages . . .	2	50	April 26	No settlement reported at end of month.

DISPUTES WHICH BEGAN DURING THE MONTH.

<i>Building trades—</i> Bricklayers.....	Brandon, Man.	Against employment of a non- union foreman.....	1	47	40	July	7 July	10 Foreman discharged.
Carpenters....	Montreal, Que.	For increase in wages from 30 to 35 cents an hour.....	10	800	"	18	Within a week, most firms had granted increase demanded, but continued against other firms dur- ing month.
<i>Metal working and</i> <i>shipbuilding trades</i> Shipbuilding em- ployés.....	Lévis, Que.	For increase in wages.....	1	115	"	4 July	12 Settled by conciliation of Depart- ment of Labour, increase granted.
<i>Food and tobacco pre-</i> <i>paration—</i> Brewery workers..	Winnipeg, Man.	For higher wages, shorter hours and recognition of Union....	2	160	"	10	12 A compromise.
<i>Miscellaneous trades—</i> Employés of gas works.....	Toronto, Ont.	For increase in wages.....	1	60	"	12	17 Work resumed. No change in wages
Pulp beaters	Ottawa, Ont.	For 8-hour day with three shifts in place of 11 and 13-hour day , with two shifts.....	1	18	55	"	19	22 Work resumed on conditions pre- vailing before strike.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firms or establishments concerned. Men- tion, moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

in which about forty men were indirectly affected. The cause of the dispute was the objection of the strikers to a non-union foreman, the foreman employed being a contractor who had refused to join the union. On July 10, work was resumed, the foreman having been dis-

charged.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of July, and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during the month of July, 1911.

DOMINION REPORT.

Commission of Conservation.

Second annual report of the Commission of Conservation, including a report of the proceedings of the second Annual Meeting held at Quebec, January 17-20, 1911, and of the Dominion Public Health Conference held at Ottawa, October 12-13, 1910. Montreal, John Lovell & Son, Limited, 1911. Pages 237.

THE second annual Report of the Commission of Conservation for Canada contains report of the proceedings of the second Annual Meeting held at Quebec from January 17 to 20, with the resolutions adopted by the Dominion Forestry Association at its Convention held at the same time, and addresses on "Agricultural Work in Ontario", by Mr. C. C. James, Deputy Minister of Agriculture of Ontario, "Unsanitary Housing", by Dr. C. A. Hodgetts, "The Swedish Forest Conservation Law", by Dr. B. E. Fernow, "The Work of Conservation", by Mr. John Hendry, "Conserving the Forests", by Mr. John Hendry, "Mining in British Columbia", by Mr. John Hendry, "The Forestry Problems of British Columbia", by Mr. A. C. Flu merfelt, also Work of the Commission of Conservation in 1910, Opinions Given by the Commission in 1910, Proceedings of the Dominion Public Health Conference, and Opinions of the Provinces on the Recommendations of the Dominion Public Health Conference.

Among the resolutions passed at the Dominion Forestry Association were the following:

"Resolved, that with the sole idea and motive of compelling the Railway Companies to exercise great care

in the operation of their lines through wooded areas, it is advisable in the interest of our public forests, and other wooded areas, that the said section 298 be amended so as to leave the Railways responsible for all damages that may occur through fires set by their locomotives."

"Resolved, that this Convention wishes to place on record its heartfelt satisfaction at the great advance in the appreciation of forest preservation throughout the Dominion, and recommends that in all forest lands controlled either by the Dominion or by the Provinces there should be a more systematic development of forest protection by educated forest inspectors, fire rangers, fire lines, fire roads, telephone lines, &c., &c., and that as the value of the forests has increased there should be more adequate amount spent for protection."

"Whereas, the forests of Canada are a great national asset, and whereas the welfare of our agriculture, health and climatic conditions, as well as the national prosperity of the country depend upon the proper and scientific care of the forest areas.

"Therefore Resolved, that this Convention commends the action of the Province of Quebec in employing technically trained Foresters in its service, and recommends to the other Provinces of Canada the importance of this policy."

ONTARIO REPORT.

Report of the Board of Health.

Twenty-ninth annual report of the Provincial Board of Health of Ontario, for the year 1910. Toronto, King Printer, 1911. Pages 173.

In the Report of the Provincial Board of Health, Ontario, in the year 1910,

is stated that a campaign of education in respect to means of prevention and cure of Tuberculosis was conducted, and that the returns of 1908, which are the latest available, show that the death rate from this disease is slowly but surely being reduced, the number of deaths that year being 2511, or about one in thirteen of the total death rate.

A medical and dental inspection of school children has been commenced in the City of Toronto, and the hope is expressed that the experiment will be extended, and that it will eventually be adopted in the whole Province.

A system of rigid inspection of all meats is recommended, and it is stated that while the inspection of export meats is covered by the Dominion authorities, diseased animals are sold to local butchers, and consumed in the country and smaller towns where there is no inspector.

A list of amendments to the Public Health Act, passed in the 1911 session of the Legislative Assembly, is given in the Report. The Report also contains the reports of the Medical Inspector's supplementary report on the Lindsay Ozone Water Purification Plant, report of the International Commission on the control of Bovine Tuberculosis, report of the Lady Grey Hospital for Tuberculosis, Ottawa, and Laboratory reports for Toronto and Kingston. The Appendix contains reports of City and Town Medical Health Officers.

OTHER REPORTS RECEIVED.

Canada.—Report on Dividends Remaining Unpaid, Unclaimed Balances and Unpaid Drafts and Bills of Exchange in Chartered Banks of the Dominion of Canada, for five years and upwards prior to December 31, 1910.

Ontario.—Annual Report of the Beekeepers' Association of the Province of Ontario, 1910.

Fifth Annual Report of the Horticultural Societies of Ontario for the year 1910.

Twenty-fifth Annual Report of the Commissioners of the Queen Victoria Niagara Falls Park, 1910.

Report of the Secretary and Registrar

of the Province of Ontario, for the year ending 31st day of October, 1910.

Infant Mortality, Second Special Report, by Dr. Helen MacMurchy, Toronto.

Forty-third Annual Report of the Inspectors of Prisons and Public Charities upon the Prisons and Reformatories of the Province of Ontario, being for the year ending 30th September, 1910.

Forty-third Annual Report of the Inspector of Prisons and Public Charities upon the Hospitals for the Insane of the Province of Ontario, being for the year ending 31st October, 1910.

Part II of the Forty-third Annual Report of the Inspectors of Prisons and Public Charities of the Province of Ontario, containing report of the Hospital for Idiots, Orillia, and the Hospital for Epileptics, Woodstock, being for the year ending 31st October, 1910.

Great Britain.—Annual Statement of the Trade of the United Kingdom with Foreign Countries and British Possessions 1910, compared with the four preceding years.

British section of the International Association for Labour Legislation. Report for the year 1910-11.

Australia.—Population and Vital Statistics, Bulletin No. 24, of the Commonwealth for the quarter ended 31st December, 1910.

Trade, Shipping, Migration and Finance of the Commonwealth of Australia, for the month of February, 1911. Bulletin No. 50.

Trade, Shipping, Migration and Finance of the Commonwealth of Australia for the month of March, 1911. Bulletin No. 50.

Summary of Australian Financial Statistics 1901 to 1910. Bulletin No. 4.

Statistics as to Education, Hospitals and Charities, and Law and Crime, for the year 1909. Bulletin No. 3.

New Zealand.—Awards, Recommendations, Agreements, &c., made under the Industrial Conciliation and Arbitration Act, New Zealand, for the year 1910.

United States.—Pennsylvania—Annual Report of the Factory Inspector, 1910.

Texas.—Laws of Texas relating to Labour.

Report on Condition of Woman and Child Wage-Earners in the United States. Volume VII: Conditions under which Children Leave School to go to Work.

Report on Condition of Woman and Child Wage-Earners in the United States. Volume VIII: Juvenile Delinquency and its Relation to Employment.

Belgium.—Rapports Annuels de l'Inspection du Travail. 15me Année (1908).

France.—Enquête sur le Travail à Domicile dans l'Industrie de la Lingerie. Tome IV.

Statistique des Grèves et des Recours à la Conciliation et à l'Arbitrage, survenus pendant l'Année 1909.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

ONTARIO CASE.

Prohibition of Employment of Licensed Dentists as Servants of Unlicensed Person.

An appeal by the plaintiffs to the Court of Appeal from the judgement of Chief Justice Meredith, at the trial, dismissing the action, which was brought to obtain a declaration that certain by-laws passed by the defendants were beyond their power, and to restrain the defendants from proceeding against the plaintiffs under the provisions of the by-laws.

The plaintiffs, who were licensed by the defendants to practice dentistry, entered into an agreement with H., who was not a licensed dentist, whereby they became the employés of H., at stipulated wages, in carrying on the business or profession of dentists at H.'s premises—H. supplying everything required for the purposes of the business, taking all the profits, and bearing the losses, if any. The plaintiffs' conduct was directly contrary to the provisions of certain by-laws of the defendants, which prohibited licensed dentists from entering into such employment, and prescribed by way of punishment that the licenses to practise might be suspended or cancelled.

The Court held (Mr. Justice Meredith dissenting), that the defendants had power, under section 17 of the Act respecting Dentistry, R.S.O., 1897, chapter 178, which provides that the Board of Directors of the defendants shall, from time to time, make such rules,

regulations and by-laws as may be necessary for the proper and better guidance, discipline and regulation of the said Board and the profession of dentistry, to pass the by-laws, and that they were reasonable in their terms.

Mr. Justice Garrow was of opinion that the words "profession of dentistry", in section 17, mean those whom the defendants, under the Act, may license to practise that profession. The by-laws were applicable to the plaintiffs, though passed after they were licensed, for the power is "from time to time" to pass by-laws. A statutory power to pass by-laws carries with it the implied power to impose reasonable penalties for their infraction; and the penalty of suspension or cancellation of license is a reasonable punishment for an offence such as that of the plaintiffs. Statutes relating to other professions, and containing express powers to suspend or expel, afford no evidence of any general legislative intent.

Mr. Justice Meredith, the dissenting judge, was of opinion that the words of section 17, read in connection with the other provisions of the Act only, are not sufficient to support the intended action of the Board regarding the plaintiffs. The appeal was dismissed, Mr. Justice Meredith dissenting.

(*Gordon et al v. Royal College of Dental Surgeons of Ontario*, 23 O. L. R. (1911), 223.)

MANITOBA CASE.

Building Contract.—Subsidence of Walls, Etc.

The plaintiffs entered into a contract with the defendants to provide all the materials and perform all the work in the erection and completion of a building, according to certain plans and specifica-

tions. After the walls were up and the roof and concrete floors in, an accident occurred to the basement walls, resulting in considerable damage, and the defendants terminated the employment of the plaintiffs, under the provisions of the contract, and completed the building themselves, asserting that the damage was due to the default of the plaintiffs, and that the plaintiffs refused to repair it except as extra work for which they should be paid. The plaintiffs sued for the balance alleged to be due under the contract for work done and materials supplied, including a large amount for extras, up to the time their employment was terminated. They alleged that the accident to the walls was due to the negligence or lack of judgement of the architects, and that they (the plaintiffs) were not responsible therefor, and that the termination of their employment by the defendants was, therefore, wrongful.

Chief Justice Mathers, who tried the action, held, that the specifications, being incorporated with and constituting part of the contract, must be read with it; and, in so far as the contract proper modified the terms of the specifications, the contract must prevail. By the terms of the contract, the plaintiffs were not liable for loss or damage to the works which might be due to the negligence or lack of judgement of the architects. The plaintiffs alleged that the drawings and specifications prepared by the architects were defective and improper; and that they failed to provide for adequate foundations and footings.

The Chief Justice held, that the onus of establishing this was on the plaintiffs; and they had failed to shew that the subsidence of the walls was due to the negligence or lack of judgement of the architects in so far as the footings were concerned. Upon the evidence, the cause of the subsidence was the backing up of water through the sewer into the basement, which saturated the earth around the footings; and for that the plaintiffs were responsible. The backing up of the water could have been prevented by a back water trap, which was not mentioned in the specifications; but, the plaintiffs knew that, and contracted

to secure the work from injury by inclemency of the weather, fire, accident, design, or otherwise, until its acceptance, to keep the foundations dry, and to be responsible for and make good any damage that might occur, during the progress of the work, not due to the negligence or lack of judgement of the architects. The non-specification of a back water trap was not negligence or lack of judgement. The plaintiffs were, therefore, responsible for the damage resulting from the collapse of the foundation walls. (See *Thorn v. Mayor and Commonalty of London*, 1 English App. Cas. 120). The Chief Justice also held, that, under the terms of the contract, the plaintiffs were bound to repair the damage to the building at their own expense, with as little delay as possible; and their refusal to repair, (except as extra work) was sufficient justification for the architects' certificate that the plaintiffs had failed to perform their agreement, and for the defendants terminating the employment. The architects were not in default in refusing a progress certificate after the damage had occurred.

Under the contract, if the expense incurred by the defendants in completing the building was less than the unpaid balance of the amount to be paid under the contract, the plaintiffs were entitled to be paid the difference; but, if the expense of completing the building exceeded the balance of the amount to be paid under the contract, the defendants were entitled to recover the excess from the plaintiffs. For this the defendants counterclaimed.

The Chief Justice was of opinion that the defendants were entitled to set off the costs of completing the building according to the original plans and specifications against the contract-price; they were not entitled to recover the whole amount expended by them in the work of restoring or completing, but only such as came within the plans and specifications. By the specifications, the plaintiffs were to do all shoring, underpinning, or bracing necessary, or as directed by the architects, and were to be responsible for and to make good any damage done to

adjoining property by reason of earth caving-in, or if in any way caused by the plaintiffs' work, unless due to the negligence or lack of judgement of the architects. As to this it was held, upon the evidence, that damage done to a neighbouring building was not due to the negligence or lack of judgement of the architects, and that the plaintiffs were responsible for it.

The defendants, when they took the building over, completed it without levelling it up, and the floors were perceptibly out of level. The defendants counterclaimed for damages because the selling value of the building was thus reduced. It was possible to restore the building to its proper levels. The plaintiffs offered to replace the damaged walls for \$12,000, without raising, and for \$5,000 more to raise the building to its former level. The Chief Justice was of opinion (1) that the measure of damages for which the plaintiffs were responsible was the amount it would have cost to put it back in its original position; and that amount and no more, the defendants should recover; they were not estopped by the plaintiff's offer. He was also of opinion, (2) that the defendants were not entitled to recover for loss of rents after the building should have been completed, and other items of damage of that class; such matters were covered by the provision in the contract as to ascertained damages for delay in completion. Where a sum certain is payable accruing from day to day or from week to week or the like for non-completion to time, it is ascertained damages, and not a penalty.

The plaintiffs were delayed by a workmen's strike, and on that account made a claim for an extension of time, under a provision of the contract, and the architects allowed ten days. The plaintiffs made no claim to the architects for an extension for any other reason, and the architects made no further allowance. There being no decision of the architects, there was no resort to arbitration, under another clause of the contract. The plaintiffs contended that the Court could extend the time because of extra work having been required to be done. The contract provided that if the plain-

tiffs were delayed by reason of extra work, they should present a claim for extension to the architects, and, if the plaintiffs did not do so within a reasonable time, there should be no allowance. As to this it was held, (3) that the ordering of extras did not put the parties at large, and deprive the defendants of the right to ascertained damages. The decisions in *Westwood v. Secretary of State for India*, 7 L.T. 736, *Dodd v. Churton*, (1897), 1 Q.B. 562, and *Grey v. Stephens*, 16 Man. L.R. 189, were distinguished; and the decisions in *Jones v. St. John's College*, L.R. 6 Q.B. 115, and *McNamara v. Skain*, 23 O.R. 103, were followed.

The Chief Justice also held, (4) that as the plaintiffs had not availed themselves of the provisions in the contract whereby the question could be finally and conclusively determined, the Court was powerless to help them; and (5) that the defendants were not entitled to ascertained damages for the period before completion that elapsed after they had terminated the plaintiff's employment, the contract not providing means, in the event of forfeiture, of fixing a date up to which ascertained damages should run. He was also of opinion, upon the evidence, (6), that the plaintiffs had been delayed in their work by the architects being dilatory in supplying details, and by other causes; and, upon the facts as well as the law, that the defendants were not entitled to unascertained damages for non-completion to time, except up to the day when the defendants terminated the employment.

(*Grace v. Osler*, 16 W.L.R., 627).

SASKATCHEWAN CASES.

Threshers' Lien Act, 1908—Non-Compliance with Act.

Action to recover moneys due for threshing grain for defendant, and to establish and enforce a lien therefor for expenses, &c. Counter-claim for damages for non-completion of work which the plaintiff contracted to do.

In October, 1909, the plaintiff entered into a contract to thresh the defendant's grain, consisting of wheat and oats, at 9 cents per bushel for wheat and 7 cent

for oats. On November 10, the plaintiff began the threshing and continued till the seventeenth, when his men declined to go on, and he was obliged to leave the threshing unfinished, although it might have been completed on that day, if the work had been continued. The plaintiff never completed the work, and the defendant failed to secure any one else to complete it, though he endeavoured to do so, and, in consequence, the grain was not threshed. On November 22, the plaintiff sent the defendant a statement of the grain threshed shewing the sum of \$439.10 to be due. On this statement there was a written notice that "eight per cent. will be charged from December 1 until paid," and a printed notice that the defendant's grain would "be held by thresher's lien until payment of this account in full." A few days after this, the plaintiff sent a letter to the defendant demanding payment. On December 11, the parties met, and the plaintiff offered to accept \$400. The defendant agreed to this, and said he would settle the account on the following Wednesday. He did not do so, but, on December 21, he paid the plaintiff \$100 "part pay on threshing account." On December 28, the sheriff, at the instance of the plaintiff, served a notice on the defendant, under the Ordinance respecting Threshers' Liens, claiming a lien on the grain. On January 18, 1910, pursuant to notice given to the defendant, the plaintiff went with teams to the defendant's place to take the grain, but the defendant would not permit him to take it; and on the following day the sheriff, at the instance of the plaintiff, went with teams to take the grain, but was also unsuccessful.

Mr. Justice Brown, who tried the action, held that the plaintiff was entitled to the amount claimed for threshing; the contract was not an indivisible one; and payment by the defendant was not intended to be conditional upon the threshing of all the crop. But the plaintiff was under obligation to complete the threshing; he contracted to do so; and, having failed, he must suffer the consequences. As the defendant claimed only general damages by his counter-claim, evidence of special damages was

inadmissible; and the amount to be allowed for general damages was that fixed by the parties themselves on December 11, *viz.*: \$39.10.

It was also held, (1) that the plaintiff, by his account rendered, notice as to interest, and letter demanding payment, had complied with sub-section 2 of section 37 of the Judicature Act, 1907, and was entitled to interest from December 1, 1909; but at the rate of five per cent. only: R.S.C. 1096, chapter 120, section 3.

It was also held, (2) that the plaintiff was not entitled to a declaration that he had a lien on the grain: whatever lien he had, under the Threshers' Lien Act, 1908, section 1, expired after the lapse of sixty days from the completion of the threshing. The statute, being in derogation of the common law, must be strictly complied with. Neither the sending of the notice on November 22, claiming a lien, nor the serving of the notice by the sheriff on December 28, was a compliance with the Act. There must be an actual "taking" of the grain within sixty days. The mere statement that the plaintiff "hereby takes" the grain is not sufficient.

It was also held, (3) that the expense of the plaintiff's and the sheriff's trips to the defendant's place, after the expiration of the sixty days, could not be allowed against the defendant.

(*Elsom v. Ellis*, 16 W.L.R., 373.)

Master and Servant.—Dismissal of Servant

In an action for damages, tried by Chief Justice Wetmore, for improper dismissal of the plaintiff from the defendants' employment, it appeared that the plaintiff was hired by the defendants as "a mechanical expert" for one year. By the agreement of hiring he was to have full charge of the defendants' machine shop, "but to consult the management concerning the hiring of assistant help." The plaintiff was discharged by the vice-president and manager of the defendants for disobedience to his (the manager's) order. The manager told the plaintiff to pick up a rope which he had thrown away. The plaintiff, in his testimony at the trial, said that the order was a vexatious one, and that he did not

intend to pick up the rope at the manager's order—he was engaged by the company (the defendants). He said he would pick up the rope later, but he did not really intend to do so. The manager then told the plaintiff to pick up the rope or hand in his resignation; and the plaintiff left his employment there and then.

The Court held, that a servant who has been guilty of deliberate disobedience to lawful orders may be discharged; and in such a case it is not necessary to prove that a loss resulted from the disobedience; a discharge without notice may be justified even by a single and trifling act of disobedience.

The authorities bearing on the question are discussed in the judgement, which held, that the plaintiff was under the control of the manager; that he had disobeyed a lawful order; and that his action for wrongful dismissal failed.

(*Youngash v. Saskatchewan Automobile & Gasoline Engine Company*, 16 W.L.R., 268).

ALBERTA CASE.

Trade Mark Infringement.—Trade Mark and Design Act, Section 20.

In an action to restrain the defendants from using certain labels upon bottles containing beer manufactured and sold by the defendants, upon the ground that the use of the labels in this way constituted a passing off of the defendants' goods as those of the plaintiffs and a fraud upon the public, Mr. Justice Stuart, who tried the action, held, that the proper interpretation of section 20, of the Trade Mark and Design Act, R.S.C. 1906, chapter 71, which provides that no person shall institute any proceedings to prevent the infringement of any trade mark, unless it is registered, involves a limitation of its provisions to an action for infringement strictly so-called.

It was also held, that the label or design in question here came within the definition of a trade mark given in section 5 of the Act and was capable of registration; but, that the disability to sue without registration applies only to an

innocent infringement; an actual intention to deceive, that is, an actual fraud or attempt at fraud, must be proven; otherwise the action remains merely an infringement action. The decision in *Goodfellow v. Prince*, 35 Chapter D. 9, was followed. He was also of opinion upon the evidence, that the defendants could not be heard to say, that they did not intentionally produce a colourable imitation of the plaintiff's trade mark, or that they did not intentionally pass off, or attempt to pass off, their goods as being the goods of the plaintiffs. The possibility of deceiving an unwary purchaser is sufficient; the character of the goods must be considered, and each case must stand on its own footing. The nature of the goods here involved was such as to suggest unwariness in the majority of cases; and the presence of the defendants' name upon the labels was not sufficient to prevent the probability of deception. He was also of opinion, that although the plaintiffs' label contained a misrepresentation, inasmuch as it spoke of registration, when none had been made, that was not a misstatement about the goods themselves, and was, therefore, not one which deceived the public; and it was a question, whether that was a defence open to the defendants, as it had not been pleaded.

As to the form of the judgement the judge held, that as the use of the defendants' label was not suggested by any real quality in the goods or by the place of manufacture, but was a straight and arbitrary adoption or imitation of the plaintiffs' label, for which the defendants had no manner of excuse or justification, there should be an injunction, as in *Edelsten v. Edelsten*, 1 DeG. J. & S. 185, restraining the defendants from using their present body label or any other colourable imitation of the plaintiffs' body label. He held further, that the plaintiffs were entitled to an account of the profits made by the defendants upon the sale of all beer sold by them bearing the label complained of.

(*Anheuser Busch Brewing Association v. Edmonton Brewing & Malting Company*, 16 W.L.R., 547).

THE LABOUR GAZETTE

SEPTEMBER, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF
AUGUST, 1911.

I.—GENERAL SUMMARY.

THE month of August saw a continuance of the general activity characteristic of the previous months of the summer season. Though the prolonged dry weather injuriously affected the crops in western Ontario, yields elsewhere in eastern Canada have been fair. In the Northwest provinces exceptionally heavy yields are promised. With prices well maintained, the agricultural year is expected to yield on the whole exceptionally profitable returns, rains in the closing week of the month having greatly improved the outlook for the late root crops and the dairying branch of the industry. A feature of the month was the marked activity which prevailed in building and railway construction operations, the available supply of common labour being entirely absorbed in most sections of the country, with additional men in demand at certain points. In the lumbering and mining industry the general outlook is favourable for larger returns than those of 1910. Fishing yields have been normal. Railway and water transportation were affected by the labour disturbances which occurred in Great Britain, though traffic returns from the leading railway companies continued to show increases as compared with 1910. The heavy inflow of immigrants has been maintained and the total number of arrivals for the year will largely exceed that of the previous year. Trade, domestic and foreign, was steady in tone,

especially in the closing days of the month. Tourist traffic has been heavy.

Lumbering.—In connection with the engagement of men for the winter camps in Ontario and Quebec, wages showed a tendency to rule higher than last year.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during August, 1911.

Building trades.—Plumbers and steamfitters, (fourteen), at Berlin, Ont., had their hours reduced from sixty to fifty-five per week, without change in wages. Carpenters at Montreal obtained an increase¹. Plasterers' labourers, (fifty) at Ottawa, Ont., received an advance from 25 to 28 cents per hour.

Railway service.—Over 8,000 employés of the Canadian Pacific Railway Company, including carmen, machinists, boilermakers and moulders, received an increase in wages of between eight and ten per cent.

General transport.—Teamsters, (160), at Edmonton, Alta., received an increase in wages to 60 cents per hour and a reduction in hours to ten per day.

Unskilled labour.—Street labourers, (200), at Quebec had their wages increased

¹For details see the article on Trade Disputes of the present issue.

from \$1.75 to \$2.00 per day. Street labourers at Ottawa, Ont., had their wages increased from \$1.75 to \$1.85 per day of nine hours.

Interruptions to Industry.

Among industrial establishments, &c., destroyed by fire or through other causes, during July, 1911, as reported in the press of the Dominion, the following may be mentioned:

Nova Scotia.—Twenty-five buildings at Port Clyde; church and presbytery at Salmon river, loss \$12,000.

Prince Edward Island.—Condensed milk factory at Charlottetown, loss \$50,000.

New Brunswick.—Residences, stores and barns at Florenceville, loss \$25,000; lumber mill at French Lake, loss unknown; shingle mill at Musquash, loss unknown; workshops and roundhouse at Salmon Falls, loss \$110,000.

Quebec.—Sawmill and box factory at Berthier-en-Haute, loss \$20,000; barn and contents, Beauceville, loss unknown; barn and contents at Beauport, loss unknown; store and residence at Chapeau, loss \$15,500; hotel and bakery at Farnham, loss \$5,000; sash and door factory, Montreal, loss \$50,000; barn and contents at North Sutton, loss ; convent at Thurso, loss \$20,000.

Ontario.—Barn and outbuildings with contents at Belmont, loss ; planing mill at Cobocook, loss \$4,000; residence, barn and contents, Dalhousie Mills, loss ; barn and contents at Dorchester, sawmill at Fenelon Falls; barns and residence at Fruitland, barn and contents at Grimsby, loss ; barns and contents at Harrison; wing of asylum for the insane at Hamilton, loss ; livery stable at Hamilton, loss \$10,000; hotel and residence, Kingston, loss \$8,000; wood turning factory at Lindsay, hotel and houses at Mountain Grove, loss \$8,000; barn and contents at Minto, loss ; hotel, warehouses, and stables at Ottawa, loss \$50,000; clothing factory, Ottawa, loss \$16,000; railway storehouse at Palmerston, loss \$7,000; planing mill at Sarnia, loss \$10,000; two barns, contents and stock, St. Thomas; residence and barn, Stratford, factory and stock of a bed manufacturing firm, Toronto, loss \$15,000; hotel, Tupperville, loss \$30,000.

Alberta.—Rosery at Medicine Hat, loss \$3,500.

British Columbia.—Stores and buildings at Hope, loss \$6,500; hotel at Enderby, loss \$3,500

Conditions in the Industries and Trades.

Conditions of employment during August in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received by the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

The month was an exceedingly active one for agriculturists. In Quebec and the Maritime Provinces the hay crop was gathered under favourable conditions; a

fair yield is reported. Harvesting and threshing were in full progress in Ontario and Quebec. The returns from these provinces were reported somewhat lighter than last year, especially in the case of western Ontario, as a result of the long drought. The season has been earlier than last year owing to the exceptionally warm and dry weather. Rains in the latter half of the month considerably improved the outlook for the potato and root crop, as well as improving pastures and maintaining the milk flow. Plums, pears, and peaches will be a fair yield, but apples are light in some sections. In western Canada, cutting became general in the latter half of the month under favourable conditions, though rains somewhat retarded harvesting operations in Saskatchewan and Alberta. Frosts were recorded during the last week of August, but no serious damage followed. It was estimated that over 30,000 harvesters had been distributed from Winnipeg, and the demand was reported as well met. On the whole, the outlook in western Canada is for a crop yield of exceptional proportions, conservative estimates of the wheat yield alone placing it at over 175 million bushels.

The Provincial Secretary for Agriculture, Nova Scotia, in his midsummer report on crops, based on reports of 128 correspondents, says: "So far as the general farmer is concerned, the season promises an average crop, ranking slightly below that of 1910. Fruit growers report the best year to date in the history of the industry. Oats and other cereals are above the average; it is too early to forecast potatoes and turnips; a three per cent. increase is reported in the number of dairy cattle; beef cattle are stationary; and sheep declined three per cent. As to fruit, nothing but continued dry weather will prevent our orchards from yielding the biggest crop in the history of the Province."

The following statistics of the principal field crops of Ontario for 1911 show the acreage, as compiled from individual returns made by farmers to the Ontario Bureau of Industries and the yields as estimated by a large and

experienced staff of correspondents, who give probable yields according to conditions on August 5, 1911:

Fall wheat.—837,492 acres will produce 17,034,052 bushels, or 20'3 per acre, as against 743,473 acres, 19,837,172 bushels, and 26'7 in 1910. The annual average for twenty-nine years was 17,878,244 bushels, and 21'0.

Spring wheat.—133,711 acres, 2,375,842 bushels, or 17'8 per acre, as against 129,319 acres, 2,489,833 bushels, and 19'3 in 1910. Average, 15'9.

Barley.—616,977 acres, 16,766,319 bushels, or 27'2 per acre, as against 626,144 acres, 19,103,107 bushels, and 30'5 in 1910. Average, 27'3.

Oats.—2,699,230 acres, 88,261,352 bushels, or 32'7 per acre, as against 2,757,933 acres, 1,620,333 bushels, and 17'0 in 1910. Average 16'4.

Rye.—98,652 acres, 1,624,572 bushels, or 16'5 per acre, as against 95,397 acres, 1,620,333 bushels, and 17'0 in 1910. Average, 16'4.

Peas.—304,491 acres, 4,773,513 bushels, or 15'7 per acre, as against 403,414 acres, 6,016,003 bushels, and 14'9 in 1910. Average 19'3.

Beans.—51,508 acres, 925,228 bushels, or 18'0 per acre, as against 49,778 acres, 892,927 bushels, and 17'9 in 1910. Average 17'2.

Hay and clover.—3,301,468 acres, 4,238,362 tons, or 1.28 per acre, as against 3,204,021 acres, 5,492,853 tons, and 1'71 in 1910. Average, 1'46.

The acreages in other crops for which no estimates as to yield have been made at this date, are as follows: Buckwheat, 189,039, against 194,913 in 1910; corn for husking, 308,350 and 320,519; corn for silo, 335,935 and 326,627; potatoes, 162,467 and 168,454; mangel-wurzels, 64,855 and 68,966; sugar beets 24,664 and 26,879; carrots, 3,207 and 3,551; turnips 100,593 and 108,360; mixed grains 486,112 and 497,936.

The increase in the wheat acreage in Saskatchewan this year is 933,401, or twenty per cent. over that of 1910, the total acreage being 5,598,235. The acreage under oats is placed by the Provincial Department of Agriculture at 2,291,832, a gain of 209,216 or more than ten per cent. over the acreage of the previous year. The acreage under both crops has more than trebled in the past five years.

A cable despatch from the International Agricultural Institute, Rome, Italy, dated August 19, gives the official figures published there on that date concerning the production of wheat during the present season in Prussia, Great Britain, Hungary, Italy and British India. The data for Prussia, showing a crop of 86,167,000 bushels, are new. Those for the remaining countries show the estimated production on August 1, compared with that of July 1. The figures are given in bushels as follows: Great Britain, 62,560,000, (61,351,000); Hungary, 187,760,000, (173,886,000);

Italy, 203,192,000, (203,376,000); British India, 370,413,000, (369,630,000).

Fishing.

Catches were fair off the Nova Scotia coast. The price of dry cod-fish, which has been abnormally high for some time past was somewhat easier, following the announcement of heavy catches in Newfoundland. Fair catches of mackerel have been made and herring struck in large quantities on the Nova Scotia coasts. By order-in-council the lobster fishing season was extended for ten days in that portion of the Strait of Northumberland where lobster fishing ends on August 10. In British Columbia, catches of sockeye salmon have been on the whole light, though the traps off Vancouver Island have made some good returns. Whaling operations off Vancouver Island have been very successfully prosecuted.

Lumbering.

Sawmilling was active throughout the eastern provinces. Lack of shipping facilities somewhat hampered the trade at points in the maritime provinces. Low water following the drought embarrassed certain of the mills in Ontario and Quebec. The strike in the transportation trade of Great Britain delayed shipments somewhat. Trade on the whole, however, was fair and a good autumn business is expected. In British Columbia the month was without feature; railway facilities improved somewhat, but the general movement was quiet. Forest fires did considerable damage in Nova Scotia west of Shelbourne and Liverpool.

Mining.

Shipments were exceptionally heavy from the Nova Scotia collieries, and work under ground was very active with an increasing tendency, notably at Springhill. The collieries of Alberta and eastern British Columbia were still affected by strike conditions, but those on Vancouver Island were active.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, active, very active; (2) quiet and very quiet.

CANADA DURING THE MONTH OF AUGUST, 1911.

and is intended to present, in brief and accessible form, a generalized statement as to the state of employment in the prevailing, no account being taken as to wage changes, trade disputes and kindred phenomena treated under separate the order indicating in each, the degree to which general conditions were favourable or unfavourable, as follows: (1)

Metal, engineering and ship- building.	Wood- working.	Printing and Allied trades.	Clothing.	Food and tobacco preparation	Leather.	General transport.	Miscella- neous.	Unskilled labour.

The metalliferous camps throughout the Dominion had a good month. Shipments from the asbestos, copper, nickel and silver districts of Ontario and Quebec were well maintained. In the Porcupine camp, notwithstanding the recent fires, development work was very active. Ore shipments from the Rossland, Slocan and Kootenay Districts in British Columbia were well maintained.

The annual report of the provincial mineralogist of British Columbia estimates the aggregate value of the output of minerals of that province for 1910 at \$26,377,066, the highest total on record. The estimate for 1909 was \$24,443,025.

Manufacturing.

Activity was well maintained throughout Canada. The favourable reports received from the western crops have produced a buoyant tone in the establishments catering particularly to that market and there has been a continuance of the expansion both in output and equipment noted earlier in the season.

Hereafter water-powers under the control of the Government of Quebec will not be sold, but will be leased on long terms. Ten water powers in different portions of the Province will be auctioned during September.

Railway Construction.

Work in the camps continued very active and there was a good demand for men in western Canada.

Grading on the new Grand Trunk Pacific Railway Company's line from Biggar south to Calgary has been completed. The steel is being laid and trains are expected to be running between the two points before the end of the year. It is also expected that a train service on the Grand Trunk Pacific Railway Company from Edmonton to Montreal *via* the Temiskaming and Northern Ontario Railway from Cochrane to North Bay and *via* the Grand Trunk Railway Company from North Bay to Montreal will shortly be established.

The contracts for the balance of the

Canadian Northern Railway Company's line from Kamloops to the eastern boundary of British Columbia, a distance of about 300 miles, were awarded during August.

The expenditure of the National Transcontinental Railway Commission for the fiscal year ending March 31, 1911, was \$23,487,853, making the total outlay since the organization of the Commission \$95,406,697. The total grading done was 1,388 miles, and the total miles of track laying completed was 1,064 of main line, and 199 miles of sidings.

It is stated that over 150 new towns will have come into existence during the present year in the Northwest provinces.

General Transport.

Railway employes had a very busy month, traffic returns being exceptionally heavy and the earnings of the principal companies showing increases as compared with the corresponding period of last year. Transportation by water was also active, though longshoremen at Halifax, St. John and Montreal had a quiet month as a result of the dock-labourers and railway employes' strike in Great Britain.

The second annual meeting of the Lake Shippers' Clearance Association was held at Winnipeg. The Association loaded 82,065,629 bushels during the past year, as against 74,440,421 bushels in the previous year.

The Winnipeg Electric Railway Company has added thirty new cars to its rolling stock during the present year.

The thirtieth annual report of the Canadian Pacific Railway Company, issued in anticipation of the annual meeting of the shareholders, showed gross earnings of railway and steamship lines of \$104,167,808, and working expenses of \$67,467,978. This indicates an increase of nearly ten million dollars in gross earnings and of nearly three million dollars in net earnings. After payment of all dividends, a surplus of \$11,873,243 will be carried forward. Accounts of the Company for the year in detail are as follows:—

Gross Earnings.....		\$104,167,808.21
Working Expenses.....		67,467,977.64
Net Earnings.....		\$ 36,699,830.57
Net Earnings of Steamships in excess of amount included in monthly reports.....		1,118,349.87
Deduct Fixed Charges.....		\$ 37,818,180.44
		10,011,071.44
Surplus.....		\$ 27,807,109.00
Deduct amount transferred to Steamship Replacement Account.....	\$1,000,000.00	
Contribution to Pension Fund.....	80,000.00	
		1,080,000.00
		\$ 26,727,109.00
From this there has been charged a half-yearly dividend on Preferred Stock of 2 per cent., paid April 1st, 1911.....	\$1,112,333.33	
And three quarterly dividends on Ordinary Stock of 1½ per cent. each, paid December 31st, 1910, April 1st, 1911, and June 30th, 1911.....	9,450,000.00	
		\$10,562,333.33
		\$16,164,775.67
From this there has been declared a second half-yearly dividend on Preference Stock payable September 30th, 1911.....	\$1,141,533.31	
And a fourth quarterly dividend on Ordinary Stock of 1½ per cent., payable September 30th, 1911.....	3,150,000.00	
		\$4,291,533.31]
Leaving net surplus for the year.....		\$11,873,242.36

The working expenses for the year amounted to 64.77 per cent. of the gross earnings, and the net earnings to 35.23 per cent. as compared with 64.38 and 35.62 per cent. respectively in 1910.

The British Columbia Electric Railway Company's annual report for the year ending June 30, 1911 shows gross earnings of \$4,226,834, as against \$2,981,617 last year, an increase of \$1,245,217, or about forty-five per cent. Net earnings during the same period have advanced about twenty-nine per cent. from last year.

The Trades.

Building.—Building operations continued very active throughout Canada and there was an active demand for labour at many points. The outlook is that employment will be very active until the frost comes, and the result of the year's operations will largely exceed that of 1910.

Metal and woodworking.—Metal and woodworking establishments continued very active, and workmen in these trades were for the most part very busy.

Printing.—The allied trades have had a good month and the various branches were actively employed.

Clothing.—Custom tailors were becoming

active on fall work. Garment workers had a busy month. Boot and shoe workers were active.

Leather.—Tanners, curriers and leather workers were all well employed.

Food and tobacco preparation.—Baking and confectionery establishments were entering upon their season of activity with very favourable prospects. Cigar makers and tobacco workers were generally active.

Miscellaneous.—Retail clerks had an active month, the opening of the fall fair season having brought large numbers to the cities and towns.

Unskilled labour.—This class has had a month of exceptionally active employment. In many centres the supply was completely absorbed, and additional men could have found employment.

Canadian Trade and Revenue.

Foreign and Imperial Trade.—During July, 1911, the total value of imports entered for consumption in the Dominion of Canada was \$39,817,753, compared with \$35,793,584 in July, 1910. During the four months ending July 31, the total value of imports amounted to \$156,967,380, compared with \$143,322,043 in the corresponding period of 1910. The total value of domestic exports during

July was \$24,079,708, compared with \$23,303,641 in July, 1910.

During July there was an increase in the export of the products of the mine, fisheries, agriculture, and miscellaneous products, and a decrease in the products of the forest and in animals and their produce. The grand total of Canadian trade for the month of July, 1911 was \$67,151,234, compared with \$61,456,570 in July, 1910.

In the weekly reports of trade commissioners and commercial agents, issued by the Department of Trade and Commerce during August, openings are indicated in New Zealand for Canadian Portland cement, iron products and apples. Trade between Canada and Australia it is stated, has been steadily increasing of late, the total amounting to \$902,443 in 1911, as compared with \$760,832 in 1909. Canadian plums, peaches and canned fruits, as well as poultry and hog products have been meeting favourable markets in Cuba. Prospects for increasing the export of manufactured foods into Germany are reported. The Canadian commissioners in Great Britain have been inquiring into the condition of the market there for Canadian grain. The first instalment of the result of the inquiry appeared during August and dealt with the situation at Bristol, Glasgow, Leeds and Manchester.

Domestic trade.—There was the usual holiday quietness in country trade, but the dominant tone was satisfactory. The general movement of wholesale trade was slow with an increasing tendency towards the close of the month. The exceptionally warm weather has cleared off summer goods and the outlook is for an active autumn in view of the satisfactory crop conditions prevailing over most of Canada. Fall fairs are being well patronized and have brought an access of business to retail establishments.

Canadian banks were making active preparations to meet the pressure expected in connection with the movement of the crops. The bank statement for July was generally satisfactory, with the crop movement. The issue of one million dollars of new stock by the Bank of Toronto was announced. The Merchants Bank has increased its dividend from nine to ten per cent.

Notes.

The Master Bakers' Association of Ontario met at Hamilton, Ont., during August and decided to petition the Government to make a 16 and a 20 oz. loaf legal weights.

The Federated Association of Letter Carriers held their annual Convention in Quebec in the early part of August. The Merchant Clerks' Association of the Province of Quebec also held their Annual Convention in Quebec on July 31 and August 1.

An electric commission was recently appointed by the City of Montreal to deal with the problem of placing overhead wires underground. Application has been made by the Commission for the funds to engage an engineer and clerical staff.

The eleventh annual convention of the Union of Canadian Municipalities was held at the City Hall, Quebec, August 29-31. Papers were read on town planning; destruction of garbage; child welfare; water-main construction; country roads; railway terminals, &c., &c.

The seventeenth annual meeting of the Maritime Board of Trade was held at Moncton, August 16 and 17. Among the questions discussed were the good roads problem; shipping facilities between Canada and the West Indies; express rates; maritime union; food inspection; sheep raising and immigration.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions were active during the month and labour all over the district was well employed. The steel and coal trades with their allied industries continued active. The building trades and all outside labour were busy. The steel works of Sydney and Sydney Mines had a good month with large outputs of steel. The Dominion Steel Company state that their ore shipments from Wabana are much ahead of last year. All the collieries of the district and of the Island, with the exception of the North Atlantic Colliery, which is hindered by lack of shipping facilities, were active. The wholesale and retail trades had a good month considering that August is usually a quiet month in mercantile business. There is no labour unrest in the district.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The season was very favourable to farming and during the month the bulk of the hay crop was got in good condition. Vegetables, roots and grain are a fair crop and the year will be just as profitable to the farmers as last year.

Fishing.—Codfish were plentiful on the grounds but there was a scarcity of bait and the usual pest of dog-fish. Haddock was scarce. The Gorton-Pew Fisheries Company established a branch of their business in Louisburg, with Captain Arthur Marvin at its head. This company is buying up fresh and pickled fish and paying good prices. In addition to an enlarged plant at its piers, three new vessels of one hundred tons are to be placed in the business. It is intended later on that the business will be enlarged and Louisburg will become a more active fishing port.

Railroad construction.—Much progress was made on the Intercolonial Railway extension to Sydney Mines and also on the new branch line being built from the Sydney and Louisburg Railway to Birchgrove Colliery.

CONDITION OF PARTICULAR TRADES.

Activity prevailed among all the skilled trades, and unskilled labour was well employed.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Work in all the various branches throughout this district continues very brisk, with prospects for a continuance of the same. The collieries throughout the district show an increase in their shipments for the month of July of about 12,000 tons over the corresponding month of 1910. Some of the collieries report a shortage of men, chiefly in the unskilled departments. The increase in coal shipments for this district for the seven months ending July, 1911, is about 80,000 tons.

CONDITIONS OF LOCAL INDUSTRIES.

Agriculture.—The farmers have been busy, garnering the hay and grain crops. The copious rains during the month greatly benefited the root crops and pasture lands.

Lumbering.—There was a brisk trade in shipments to supply the home markets and for the export trade.

Manufacturing.—The various branches of the manufacturing industry were actively engaged.

Mining.—There was great activity in development work of mines in installing up to date machinery and slope sinking and repairing.

Other industries.—All other industries were busy, with men wanted. The harvest excursions took away their usual quota of young men from this district. The town of Westville is adding to its street improvements by building a permanent road from the railway crossing to the Acadia Mine office.

CONDITION OF PARTICULAR TRADES.

Activity prevailed in the building, metal, printing, and clothing trades and in the trades relating to food and tobacco preparation and transport. Clerks, stenographers, hotel and restaurant employés and laundry workers were actively employed. Work was fair among members of the leather trades and barbers. The supply of unskilled labour was not equal to the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

August was an improvement over July, industrially speaking. More activity has prevailed in the building trades and future prospects are brighter, at least until the winter season begins. While the permits issued during the month for private contracts were not abnormal, the principal ones being for two \$4,000 and one \$8,000 dwelling houses and a \$3,500 addition, still work on some larger contracts was pushed ahead and a big contract for terminal structures has just been placed. The principal operations now in hand embrace the new school on Tower Road and an addition to the Victoria General Hospital, on both of which large staffs are employed and another addition to the Nova Scotia Hospital is to be commenced shortly. The first portion of the terminal facilities—the construction of a wharf, bulkhead and shed, has just been awarded to the Nova Scotia Construction Company, the figure being \$914,000, the work to be commenced immediately. This will also give an impetus to the building trade, but the local market

should be able to cope with all demands. Work along the waterfront has been quiet, and with the slightly increased activity which is expected owing to the exportation of the large apple crop, is likely to remain so until the close of navigation in the St. Lawrence. Unskilled labour has been better than the general August average, owing principally to sewer construction and work on street cleaning.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—¹Late wholesale prices:

Butter, creamery, prints, 27 cents.
Butter, creamery, boxes, 25 cents.
Butter, dairy, ordinary, 21 cents.
Butter, dairy, prints, 22 cents.
Cheese, large, 13-13½ cents.
Cheese, twins, 14 cents.
Eggs, 22-23 cents per dozen.
Beef, forequarter, 7-8½ cents.
Beef, hindquarter, 8-11 cents.
Mutton, 7-9 cents.
Veal, 6-8½ cents.
Spring lamb, 13 cents.
Geese, 16 cents per lb.
Ducks, 17 cents per lb.
Fowl, 12½-15 cents.

Fishing.—Local fishermen have made several catches in which herring, swordfish and mackerel were the principal fish taken. Herring was most plentiful, 20,000 being taken on one occasion. The latter retailed in the local market at 10 cents per dozen.

Manufacturing was well maintained. Other industries were quiet.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners and plasterers were more active than in July, particularly the two first named. Painters and decorators were not so busy. Plumbers and gas fitters were quiet. Stone cutters showed signs of more activity, but, like all other building trades, the labour market was well supplied. Builders' labourers had a fair month. Blacksmiths, boilermakers and iron ship repairers had a busier month than July. Other metal trades were about normal. Printers, pressmen and binders showed marked activity compared with July, particularly the first

¹For condition of agriculture in Nova Scotia, see general summary, sub-heading "Agriculture."

two. Tailors were about normal, for the summer season. Bakers, confectioners, butchers and meat cutters had an average month. Barbers, hotel and laundry employés were busy.

The railway transportation service was about up to the August standard. Ship labourers and longshoremen were quiet. Street railway men were active. Unskilled labour was fairly well employed.

DISTRICT NOTES.

Shelburne.—A new steamer has just been constructed and sent to Yarmouth, for installation of machinery. She will be placed on the Canso-Mulgrave route.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour during the month of August has been well employed. There have been no idle men in this vicinity and there has been a steady demand for farm help which the local labour market was not able to fill. Farmers in this vicinity formerly paid helpers from \$15 to \$20 a month with their board. They are now offering a dollar a day and board, but even with the advance in wages, it is almost impossible for the farmers in this locality to secure help.

Building operations have been exceedingly active during the past month. The Canada Car Company have under construction a number of splendid work shops to replace those destroyed by fire a few months ago and purpose adding a number of new extensions to their already large plant. All trades employed in this locality have had steady employment throughout the month of August. Merchants, however, in the retail line, report business rather dull. This is doubtless owing to the holiday season and to the growing tendency of families to move to the seashore during the summer months. There have been no marked changes in the rates of wages during August. The labour market has

been quiet and there has been no evidence of unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busily engaged in harvesting their crops. Despite the intense heat and dry weather, the reports with regard to the crop conditions are excellent with the exception of the hay crop, which is reported light. This, however, will not have any serious effect in this section of the province, as there are thousands of tons of hay still in the barns from last year. The fruit crop is exceptionally good. Farm produce still commands a high price in the local market.

Fishing.—The only fishing that is being done in this section of the county at present is the catching of herring for the smoked fish industry. The supply of herring in this section has almost no limit and a large industry could be built up. At present the industry is of limited proportions.

Lumbering.—Lumber shipments have been below the average during the past month, owing to the fact that it was almost impossible for shippers to secure steamers to have their deal shipped to the European and American markets. The cut during the past winter was exceedingly large and probably a large quantity of lumber will have to be held over until next season.

Manufacturing.—The different manufacturing establishments are steadily employed, giving work to a full complement of men. A number of industries are working overtime and all the workshops present scenes of activity at present.

Mines.—Mining operations have been going on steadily during the present month. The output at the Springhill mines, which were practically closed for twenty-two months owing to a strike, is steadily increasing. Over twelve hundred men are now at work and the company intimates that as soon as slopes, levels and balances are put in repair, the working force in Springhill will be largely augmented. At River Hebert, Joggins Mines and Chignecto work has also been steady.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been well employed. Carpenters and joiners are scarce. A number of tradesmen in these lines could find employment here for some months to come. Lathers and plasterers are also working busily. Painters and paper hangers report business rather dull. Stone cutters are well employed and builders' labourers are also working steadily.

Iron moulders have abundant work. All lines of iron workers and helpers are busy. Machinists and engineers are decidedly active and electrical workers very busy. Stove mounters report business rather dull. Boilermakers are kept well employed. Horseshoers are busy.

Woodworkers in general have been well employed during the month. Upholsterers are also fairly busy. Carriage and wagon makers report trade good. Car builders are well employed, having steady work.

Printers and pressmen are very busy.

Journeyman tailors are well employed, garment makers busy. Boot and shoe makers have abundant employment.

Bakers and confectioners report steady work. Butchers and meat cutters are well employed.

Trunk and bag makers are very busy, and stenographers well employed. Furriers report business dull. Unskilled labour was well employed and there is still a demand for more, but as the cold weather approaches much of the work will cease.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during August differed very little from that of July, supply and demand being well balanced. The building operations carried on in this city included the construction of the new Zion Church, an annex to Notre Dame Convent, an annex to the Drill Shed,

a number of residences, and the remodelling of the Royal Bank.

A feature of the month was the departure of about 700 young men and women on the harvest excursion to the Canadian Northwest.

Wholesale and retail merchants report a good trade and the general tone of business is optimistic.

The destruction by fire of the Charlottetown Condensed Milk Factory means a temporary loss of employment for about twenty men.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of the month found harvesting almost completed with the supply of labour below the demand. In some sections, the unprecedented drought has caused a shortage in the crop, but on the whole, the yield will not be very far below the average.

Fishing.—Operations were quiet during the month, being confined mostly to cod fishing.

Manufacturing.—The few factories on this Island were run under normal conditions.

Railway construction and employment.—Surveys for the new line at West Cape in Prince County and the New London branch in Queens County, were carried on and the construction of these works will be started next month. The Elmira branch railway is nearing completion and the first train will be run over a section of the road on September 1st.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners were busy. Lathers and plasterers, painters and paper hangers, plumbers, gas and steam fitters, stone cutters, and builders' labourers were active. Other skilled tradesmen were active. The demand for unskilled labour equalled the supply.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

August has shown a very material increase in the volume of employed la-

bour over that of July. All local manufacturing concerns, railway and machine shops report active conditions for the month. Building trades have also been more active and the demand for carpenters, bricklayers, masons and builders' labourers has increased. A considerable number of private residences are in course of construction and among larger contracts may be mentioned the new wing to the Intercolonial Railway General offices now well advanced, employing over sixty men, No. 4 City Fire Station and a Brick Parsonage to the Methodist Church also well under way. About fifty labourers are also employed in excavating for a subway at Main street north crossing and twenty-five more upon the foundations of the new overhead bridge on St. George street. About eighty men are employed by the Moncton Tramways Company preparing the bed for the electric tramway and John street is already prepared for the laying of the rails. About five miles of low pressure gas mains have been put down in the city and about four miles of the main trunk pipe from the wells to city laid. Fifty acres of land have been purchased by the Grand Trunk Pacific Railway Company or terminal yards and divisional buildings and work upon the same commenced. The Maritime Board of Trade held their eventeenth annual meeting in this city August 16 and 17 with a large attendance, and a number of important commercial issues were discussed. About 100 men left the city and vicinity on the first harvest excursion to the west, August 5, and about seventy on the second excursion, August 25. Retail trade has been active and wholesale trade normal. Customs returns show an increase of \$3,197 duty collected July, 1911, over the corresponding month of last year. Negotiations between the Grand President of the Canadian Brotherhood of Railway Employés and the Board of Management of the Intercolonial Railway have been in progress with view to the increase of employés' salaries, but official results have not yet been given out. No change in hours of labour or rates of wages noted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very active throughout the month. Upland haying was completed, marsh haying well advanced and considerable grain harvested. Weather conditions were very favourable, but drought was quite serious in some sections. Potatoes, apples and vegetables promise well. Farm help was scarce.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and painters, stonecutters were actively employed. Plumbers had a fair month and builders' labourers were in fair demand. Iron moulders, workers, machinists, and electrical workers were very active. Blacksmiths and boilermakers were busy. Woodworkers, upholsterers, carmen and cooperage employés, printers, pressmen and bookbinders, journeymen tailors and garment workers, bakers and butchers, barbers, clerks, stenographers, theatre employés, laundry workers, railway employés, carters and expressmen were all well employed. The leather trades had a quiet month. There was a good demand for unskilled labour with wages at \$1.50 per day for poorer grades and \$1.75 for the better class.

DISTRICT NOTES.

Hillsboro.—The contract for the erection of a new Post office has been awarded and work will commence at once. Contract price, \$25,000.

ST. JOHN, N.B. AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market still continues active with the exception of shiplabourers. Work has started on the new block for the Catholic Bishop, and some of the stone work is being laid on the new armory. Bank clearings for the four weeks ending August 24 were \$5,843,435,

and for the corresponding period last year \$6,278,590, being \$435,155 less in 1911 than in 1910, and \$2,307,405 less than during the five weeks ending July 27 of the current year. The customs receipts for the month of July were \$93,373.12, and for the same period last year \$97,295.47, showing a decrease of \$3,922.35. The inland revenue receipts for the month of July were \$16,185.98, and for the corresponding period last year \$15,505.34, an increase of \$680.64.

CONDITION OF LOCAL INDUSTRIES.

The head of the last of the Corporation drive has reached the booms, and there are now about 20,000,000 feet of logs available for rafting crews engaged at the Mitchell boom. There are also about 5,000,000 feet of logs at the Douglas boom.

CONDITION OF PARTICULAR TRADES.

All branches of the building, metal, woodworking and printing trades were actively employed. Barbers and confectioners, cigar makers and brush and broom makers were also busy. Railway and steamboat employés and teamsters were active, but ship labourers had a dull month. Unskilled labour was active.

DISTRICT NOTES.

Black's Harbour.—Connors Brothers have completed an addition of 75 feet to their wharf, and an extension of 60 feet to their sardine factory, besides adding a new boiler and engine and other plant. These additions will enable the firm to pack from 1,000 to 1,500 cases a day instead of 400 cases.

FREDERICTON, N.B., AND DISTRICT.

Mr. R. P. Allen, correspondent, reported as follows:

GENERAL CONDITION OF LABOUR

The past month has been a good one for labour in this district and few, if any, men have been out of employment. In

the building trade the demand for labour has been exceptionally brisk and will continue so until the end of the year. The Intercolonial Railway authorities have begun the erection of a new station to cost \$35,000. It will be of brick with stone trimmings and will occupy the site of the present wooden structure. Contracts for a roundhouse and engine house for the National Transcontinental Railway Commission at Napudogan, a divisional point, have lately been awarded and work has commenced. The building will be of brick with concrete foundation. The Anglican Cathedral, in Fredericton, was struck by lightning on the night of July 3, and partially destroyed. A contract for repairing it has been let and will furnish employment for a large force of carpenters, metal workers and painters. The repairs will cost in the vicinity of \$70,000. All local industries, with the exception of the New Brunswick foundry, have been busy. The foundry suffered a severe fire loss in the spring, but is now being rebuilt. The Company has been reorganized and may, in addition to carrying on a general foundry business, engage in the manufacture of agricultural implements. Wholesale grocers report a slight falling off in their trade. Banks report collections fairly satisfactory. A few lumber operators have been hiring men for the woods at wages ranging from \$28 to \$32 per month. Retail trade has been a little dull and the number of vacant stores has been the largest in several years.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The season has been very favourable for farming and the crop yield promises to be the best in several years. Haying operations are about completed. The crop is an average one and difficulty has been found in storing it because of so much of last year's crop being still on hand. Heavy rains during the middle of the month greatly benefited the potato crop which had been threatened with rust. Two harvest excursions to the Canadian Northwest took away 125 farm laborers from Fredericton and vicinity.

Fishing.—The open season for salmon fishing on the St. John river closed August

15. The catch by net fishermen in this district was not up to the average.

Lumbering.—Rafting operations at the booms of the St. John River Log Driving Company were suspended early in the month on account of the scarcity of logs. Part of the rafting crew was sent up river to assist in bringing out the drive, which has been delayed by low water. A heavy rain storm facilitated the work, and enabled rafting operations to be resumed. It is estimated that about one hundred million feet will pass through the booms this season. Most of the saw mills have been running full time.

Manufacturing.—Factories have in most cases been running full time and there are no lack of orders for fall delivery. The Hartt Boot and Shoe Company have put on two additional travellers, bringing their total up to eight. This Company expect a large increase of business this year. The John Palmer Company, manufacturers of oil canned larrigans also anticipate an increased business.

Mining.—Coal mine owners at Grand Lake, Queens county, have been somewhat hampered by the destruction by fire of a bridge over the Washademoak river on the Central Railway which has been the means of tying up freight traffic. Repairs will be completed in the course of a week or two.

CONDITION OF PARTICULAR TRADES.

Work has been a little slack with masons and bricklayers during the month. Carpenters, on the other hand, have been very busy and few, if any, are available for jobbing. Painters and plumbers have also been well employed. On account of the fire at the New Brunswick foundry, moulders have only been partially employed. Machinists and helpers have been kept quite busy at outside work. Carriage makers have been kept busy getting out work to be shown at the fall fairs. Good printers out of employment are very scarce. Street making operations carried on by the city officials, and lumber shipments by scow and vessel have furnished considerable employment for unskilled labour at good wages.

NEWCASTLE, N.B. AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was little change in the labour market; every branch of business was extremely quiet. At the present time there is only one new house in course of erection, which will cost from nine to ten thousand dollars when completed. Outside of that there are only a few barns being erected and general repairs being done. Every other branch is quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busy for some time. They are through haying and the crop was a fairly good one, not quite equal to last year, but is about 90 per cent. Last year was extra good. Every farmer is now busy harvesting and the crop is a good one; wheat is good but not much sown in this section. Oats are a full crop if not a little above the average. Potatoes are looking fine and if there is no rot will be a full crop, turnips and other root crops are fine.

Fishing.—Fishing has not been up to the average, at least not quite up to last year, with the exception of mackerel, which have been plentiful and of a fine quality.

Lumbering.—The sawmills are still running full time, but there is no demand for lumber. Logs were sold for \$3.50. For a long time they had been bringing from \$10 to \$12 a thousand. This will lessen the winter operations and there will be fewer men employed in the lumber camps.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a very quiet summer. Carpenters were not quite as bad, as there is a little doing in their line. Painters were fairly busy. Plumbers and steam fitters are now busy preparing for the winter.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month has been a good one, and the demand for labour was well maintained. With regard to unskilled labour, however, there was a temporary stoppage among those employed upon the streets, due to a shortage of cement. Before the end of the month work had again been resumed. Demand for labour of this class was so brisk that an increase of 25 cents per day was granted, bringing the pay of the men up to \$2 per day, from \$1.75 previously paid. The increase affected approximately two hundred men. Construction work was begun upon a large apartment house, to cost \$100,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting was well under way fully from two to three weeks earlier than in previous years. The hay, grain, and root crops were in a good condition.

Lumbering.—In the lumbering industry a good deal of trouble was experienced through the lowness of water in the rivers, the water level in some of the rivers being lower than the average of previous years.

Railway construction.—Construction work on the Quebec and Saguenay Railway was progressing favourably.

CONDITION OF PARTICULAR TRADES.

Carpenters and joiners were very busy; bricklayers, lathers and plasterers, painters, stone cutters and building labourers were busy. Plumbers were quiet. All branches of metal and engineering trades were actively employed, with the exception of ship builders, who were quiet. Pattern makers were busy and carriage and wagon makers were quiet. Garment makers, journeymen tailors, tanners, and curriers were busy, but glove makers and shoemakers had a quiet month. Hotel, restaurant and theatre employes and laundry workers were very busy. All branches of trades relating to transporta-

tion were actively employed. The supply of unskilled labour was equal to the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during the month of August was very good. All branches were fully employed, and at no time in the history of the city were workmen so fully employed. The Sherbrooke Power and Railway Company has completed the extension of the railway system, but it still has a large force of men finishing up the new and repairing the old tracks. The city has a large force at work on the new reservoir, and also on the laying of water and gas services in preparation for the paving of Wellington street. The Bell Telephone Company is laying the wires underground on the main streets, and this also gives employment to a large force of men. The various machine shops, factories and other industries were running to their full capacity, and machinists were being advertised for. Commercial business was good. The returns of the Sherbrooke Power and Railway Company show an increase of \$3,233.92 for the three months ending July, as compared with the same period last year. The wholesale and retail trade was good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had about completed the gathering of the grain crop at the end of the month. They report a good average crop. In several sections the harvest work was handicapped by the scarcity of help. The potato crop is light in sections. All the other root crops are reported to be fully up to the average.

Lumbering.—Preparations are being made by the large lumbering concerns for the winter's work, and many camps have been established. The movement

of pulpwood is better than at this period last year.

Manufacturing.—All the manufacturing industries were busy with plenty of orders ahead.

Mining.—Mining operations were carried on to full capacity, and more men could be given employment.

Railway construction.—While there is no construction of railways under way here, the various companies have augmented their track gangs in repairing and fixing up the permanent way.

Other industries.—All other industries in operation here are well employed.

CONDITION OF PARTICULAR TRADES.

The building trades were busy. Several large contracts are being rushed, and large forces of men connected with the various trades are employed. Machinists and iron workers were busy. This also applies to linemen and electrical workers. Woodworking and furnishing trades were busy. The printing trades were active. Journeymen tailors and garment workers were busy. Bakers, confectioners and ice men were busy. Cigar makers were active. The miscellaneous trades and all branches of transport work were busy. Unskilled labour was very busy.

DISTRICT NOTES.

Farnham.—Work on the new factory of the Robert C. Wilkins Company, Limited is being pushed forward as rapidly as possible. It will be 60 feet wide by 120 feet in length, and two stories high.

Black Lake.—The mines were all in operation but some were very short of men.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during August differed little

from that of July. The call for skilled and unskilled workmen has been good, with exceptional activity in the harbour, where a large number were employed loading pulp wood and lumber and unloading sulphur and coal. The annual County fair which was held on the Exhibition Grounds between August 21 and 26 succeeded very well. Good progress was made on the new buildings of the Wayagamack Pulp and Paper Company and several other lesser contracts. Both wholesale and retail merchants reported a good month. There was no change in rates of wages or hours of labour and the highest prices were paid to good men. There were no strikes or lockouts.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting is well advanced and average crops are reported. Farmers complain of scarcity of help.

Fishing.—Fishing was dull.

Lumbering.—Nearly all the sawmills in the district were running day and night.

Manufacturing.—The manufacturing concerns were all busy.

Railway construction.—The Canadian Pacific Railway Company is constructing a short branch from the Piles Junction to the Wayagamack Pulp and Paper Company's mills.

Other industries.—All industries in this place report work plentiful.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were very busy. Iron workers and helpers, coremakers, machinists and engineers were very active. Electrical workers, linemen and blacksmiths were fairly active. Bicycle workers and horseshoers were busy. Woodworkers, varnishers and polishers, carriage and wagon makers were all active. Printers, pressmen, bookbinders and all others employed in the printing and allied trades here report a good month. Journeymen tailors, garment workers, glove makers and boot and shoe workers were active this month. Bakers

and confectioners were very busy. Butchers and meat cutters fairly active. Ice cutters and drivers very busy. Cigar makers and tobacco workers fairly employed. Tanners and curriers were quiet, but leather workers were active. Barbers were active. Clerks, stenographers and delivery employés were fairly employed. Furriers had a quiet month, but hotel, restaurant, theatre employés and laundry workers were very busy. All employed for the transportation companies were active this month. There was a good demand for unskilled labour, the supply not being equal to the demand.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Very little change has occurred in the industrial or commercial situation since last month. Business in general was good and was certainly up to last year's average. All the shops and manufactures were very busy and the prospects for the fall season are most encouraging. The government shops were in full operation and the number of men employed has not been decreased. The deepening of the river bed is being pushed actively.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were satisfied with their hay crop, which was almost as plentiful as last year and is of fine quality. Grain has a fine appearance and promises an abundant yield. Prices have slightly declined on account of the plentiful supply. Farmers feared for some time a failure of the potato crop on account of the lack of rain and the excessive heat, but rain came in time and a good crop is now assured. The fruit crop is fair, although not up to last year's average. Pastures were good and cows gave an abundant supply of milk; a large quantity of butter and cheese was manufactured in consequence. The price of meat remained the same as in July.

CONDITION OF PARTICULAR TRADES.

All the various trades were well employed. Skilled workmen in wood-working and machine shops were in demand. Bakers, butchers, confectioners, barbers and clerks were very busy.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market was active during August. The building trades had a very active month. There is considerable construction work going on, new buildings as well as extension repairs. Although the demand for men is still good, it is met by the local supply. Sash and door factories had a good month with enough orders to keep the staffs busy working full time. The boot and shoe industry continued quiet. The leather industry had a very active month, the output being considerably increased. The musical instrument factories were busy, the staffs being employed full time. The biscuit industry was exceptionally active. The City corporation is having extensive work done; the construction of cement sidewalks and sewers giving employment to a large number of men. The retail trade was a little better than the previous month, with prospects of a good season. Wholesale business was good. Banks report a good month with easy collections. There was no change in the rates of wages or hours of labour. Relations between employers and employés were cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The general condition of agriculture was good during the month. Farm and garden produce sold well and at good prices. Harvesting made good progress. There was a good demand for men, and it was well met. Crops in general promise to be above the average.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers had a good month. Painters and decorators and paper hangers were quiet. Plumbers, gas and steamfitters were active. Stone cutters were quiet and builders' labourers active. Iron moulders, iron workers and helpers, machinists, engineers, electrical workers, blacksmiths, boiler makers and horse shoers had a good month. Woodworkers, upholsterers, varnishers and polishers, wood engravers, wagon makers and pattern makers were well employed. Printers, pressmen and bookbinders were active. Journeymen tailors and garment workers were well employed. Bakers and confectioners, butchers and meat cutters and ice cutters and handlers were very busy. Tanners and curriers and all leather workers were well employed. Barbers, clerks, delivery employés, hotel and restaurant employés and laundry workers had an active month. Railroad men were all active. Cab drivers, hackmen, carters, draymen, teamsters and expressmen were well employed. Unskilled labour was very active and in good demand.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market was more active than during July. The repair work on the new college building gave employment to more than eighty-five men and the building operations at the Cluett-Peabody factory, although well advanced still employed many workers. Construction work on new private residences was very active and several houses have been left unfinished on account of lack of hands. Skilled workmen have been in great demand and the wages paid have increased accordingly. Sash and door factories were very active, employing

full staffs. The drain pipe and crockery factories have been short of hands. The City is employing a number of men building sidewalks and paving streets. Navigation was much more active than during the corresponding month of 1910. Banks report an excellent month. There were no difficulties between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy harvesting. Farm hands were scarce and wages very high. Farm produce was rather scarce at times and prices raised accordingly.

Fishing gave fair returns in this section.

Railway construction.—The Canadian Pacific Railway Company is making extensive improvements in its yards and a large number of men are employed.

CONDITION OF PARTICULAR TRADES.

All the building trades were very active, as well as the metal, engineering and shipbuilding trades. Woodworkers, upholsterers, varnishers and polishers, wood engravers, carriage and wagon makers, car builders, pattern makers and coopers reported a good month. The printing and allied trades were well employed. Journeymen tailors, garment workers, hatters, glove makers and boot and shoe makers had a good month. Bakers and confectioners, butchers and meat cutters, ice cutters and handlers and tobacco workers were active. Tanners and curriers, leather workers and saddlers reported a busy month. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés and laundry workers had an active month. Railway conductors, locomotive engineers and firemen, telegraphers, trainmen, switchmen and trackmen were well employed. Steamboat men, ship labourers, longshoremen, cab drivers, hackmen, carters, draymen, teamsters, expressmen and unskilled labourers were well employed.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

August showed little difference with July. There was general activity among the various trades in Maisonneuve, but it has not yet had the effect of bringing any increase of wages, even among those most in demand, such as bricklayers, joiners and builders' labourers. Business was very active. There was an abundant supply of produce in the market and prices continued high. Collections were busy. Besides the carpenters' strike, which is being felt in Maisonneuve, there was no sign of any trouble in the labour market.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, joiners and builders' labourers were in demand, the other building trades being active. All the metal trades were very busy, electrical workers, blacksmiths, tinsmiths, roofers and horseshoers being in demand. The woodworking trades were very active. Pressmen and bookbinders were in demand, the other printing trades being active. The clothing trades were well employed. Bakers and butchers were in demand, the other food and tobacco preparation trades were active. The leather trades had a good month. Barbers, clerks, stenographers and delivery employés were in demand, the other miscellaneous trades being active. Carters, draymen and unskilled labour were in demand. Ship labourers and longshoremen were quiet. The other transport trades were very busy.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The receipts of the Harbour of Montreal for the month of July showed an in-

crease of nearly \$1,000 over the same month in 1910. In spite of the delay in the opening of navigation, the total increase is over \$7,000. The total receipts of the Inland Revenue Department, since the opening of navigation up to July 31, were \$176,380.73, as against \$169,296.73 for the same period last year. The number and tonnage of ocean steamers entering the Harbour of Montreal since the opening of navigation up to July 31, for the last four years, were as follows:—

Year.	Number of steamers.	Tonnage.
1908.....	362	923,677
1909.....	327	699,128
1910.....	357	1,041,721
1911.....	372	1,112,609

Bank clearings for July amounted to \$204,190,624, as against \$191,796,531 for the same month of 1910, and \$168,927,014 in 1909. Building operations were very active in spite of the carpenters and joiners' strike. The largest employers have signed the new scale, some, however, being willing to pay the wages asked for, but refusing to recognize the union. The report issued by the City assessors shows real property in Montreal to the value of \$500,000,000 or an increase of \$70,000,000 over last year. This includes the harbour property, valued at \$50,000,000. Business in general was very active.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were active. Ship labourers and longshoremen, however, were less active, on account of the strike in England which has delayed ships entering this port. Unskilled labour was active.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The hiring of common labourers was very active during last month. The

demand for harvest hands in the west took many from this city and district. The wages offered for farm hands in the west range from \$45 to \$60 per month, board included. The lumber, pulp, paper and carbide industries depending on Chaudiere Falls for power have been working day and night until lately. The proprietors are fearing that the water which has gone down over two inches since August 20, will further recede. Hiring for the lumber camps has started but slowly, on account of the mill hands being so busy. All are expecting a bigger season than the preceding ones. The demand for lumber is increasing in consequence of the betterment of other industries. The farmers are well satisfied with the crop. All manufacturers are busy. The building trade is also very active.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Employment was active in almost every branch of labour in Ottawa during August. There was a large exodus of workmen and farmers' sons to the west on harvesters' excursions. The supply of unskilled labour was further drained by brisk hiring for the lumber camps. Shantymen's wages are quoted from \$28 to \$35 per month. Railway construction on the Canadian Northern Railway, near Ottawa, is proceeding rapidly although there is some difficulty getting enough help. The Canadian Pacific Railway Company is giving work to 100 extra men building a new roundhouse. The Dominion Warehouse and Fruit Exchange is erecting three new stories on its plant at a cost of \$20,000. Another \$20,000 building is under construction, to be occupied by the Rolla L. Crain Printing Company, which has outgrown its quarters. The total building permits for July were \$252,575, an increase of \$50,000 over the corresponding month of 1910. Wholesale and retail trade was steady and in some lines, brisk. July bank clearings were reported at \$20,000,000, a gain of

\$3,000,000 over the previous month and \$4,000,000 over July of last year. The week ending August 24, was \$1,000,000 ahead of the corresponding week last year. The master plasterers, nine firms, granted an increase of wages from 25 to 28 cents per hour to fifty plasterers' labourers, beginning August 1. The Ottawa Improvement Commission advanced the wages of the labourers employed in construction work to 22 cents per hour, the civic corporation scale. The men were formerly paid on a scale of \$1.75 to \$1.85 per 9 hour day. About 150 hands are affected.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers experienced difficulty securing help for the harvest rush. The crop of hay is reported to be exceptionally large. Dairy produce commanded higher prices than during the previous month. The potato yield is light in some localities and prices are high.

Lumbering.—Some of the saw mills on the upper Ottawa had interruptions in work owing to crowding of logs in the stream. The situation was partially due to low water. Some of the pulp grinders in the Booth mills were thrown idle owing to lack of water power. Shipping of lumber was temporarily delayed by the railway strike in England.

Railway construction and employment.—The Canadian Pacific Railway Company is erecting a roundhouse at a cost of \$100,000 in the west end of the city. It will accommodate 21 engines and there will also be in it a boiler-house and machine-shop. The Grand Trunk Railway Company began work on train sheds, 600 feet long by 140 feet wide, to cost \$150,000.

CONDITION OF PARTICULAR TRADES.

The building trades were actively employed. There was a scarcity of carpenters for a while. The metal and iron trades had an average month in shops and foundries. Electrical workers, linemen and sheet metal workers were well employed. Woodworkers and carriage and car builders were busy. One factory received a

very large order for packing boxes. The printing and allied trades were busy. Tailors and garment workers were steadily employed. One of the large merchant tailors signed an agreement to run a union shop. The Board of Control rejected tenders for firemen's clothing, which did not guarantee the union label. The contract amounted to \$1,623. Bakers and butchers were busier than during the previous month. Clerks, delivery employés, stenographers and hotel employés were actively employed. Freight handlers and street railway employees were busy. The active condition of the unskilled labour market of the earlier summer continued.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market continued very active during the month of August, and the opportunities for employment are fully as good as during the previous month and far ahead of the corresponding period last year. When the year ends it will be found that building operations in Kingston during 1911 will amount to nearly \$300,000.

For the seven months ending July 31, the amount of building done in Kingston was \$172,614, according to a report issued by the city engineer, as against \$135,961 during the same period of 1910. The addition to the post office, and the lead smelter now under way will add \$70,000 to the present total. During June, and July the amount for permits amounted to \$58,125, and \$36,151 respectively.

On account of the large emigration to the west, contractors and others complain that help was very scarce during the month.

It is expected that the paving of Clarence, King, Brock, and Wellington streets will be completed by the first of October. It is also expected that two and a half miles

of macadam roadway will be built by the first week of November.

The exports from the Kingston district to the United States during July and August exceeded those during the same months of 1910 by \$24,200.23, according to a statement issued by the United States Consul.

At the annual meeting of the directors of the Kingston and Pembroke Railway Company held during the month, it was reported that the year's record was one of the largest in the history of the road. The former officers were all re-elected. New heavy steel rails are to be put in the road between Kingston and Sharbot Lake.

The Richelieu and Ontario Navigation Company's earnings to August 1 show an increase over the corresponding period of 1910 of slightly over \$40,000. August business is said to be keeping up to the new level.

Passenger traffic on the various railways this summer has been very heavy. Railway men say it has been the best in years.

The Department of Justice, Ottawa, will undertake repairs to the breakwater at Portsmouth, and work will commence as soon as possible.

CONDITION OF LOCAL INDUSTRIES.

Farmers, fishermen, lumbermen, miners, railway construction, and employment were very active during the month. Some lines of manufacturing reported a dull month. Other industries were busy.

CONDITION OF PARTICULAR TRADES.

All branches of the building, metal, engineering, shipbuilding, and wood-working trades reported a very active month. Printers, tailors, bakers and confectioners, butchers, ice cutters and drivers, cigar makers, tanners, barbers, broom makers, clerks, stenographers, delivery employés, furriers, hotel restaurant, theatre and laundry employés, with all branches of the transportation business, as well as unskilled labour, reported an active month.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent,
reported as follows:—

GENERAL CONDITION OF LABOUR.

The month has been a fairly busy one in nearly every line of industry; civic improvement work, sewer construction, permanent street pavement, etc., continued to give employment to large gangs of men. The Bell Telephone Company had a large gang of men laying conduits for burying its wires. The Bonner Worth factory will start work this month with about 50 hands; it will manufacture yarns. Messrs. Ruth and Condon's Pump Works are installing a moulding department in connection with this factory. They expect to have it in operation next month. Three by-laws were defeated, two by-laws to fix the assessment of the lock works and the Ackerman Company leather works, and one seeking authority to raise \$24,000 for the purchase of park property. The highest price of the season for cheese was reached when it sold for 12 13-16 and 12 7-8, 2,800 boxes were boarded. There were no strikes and no changes in the rates of wages or hours of labour reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy harvesting their crops. The yield was generally good.

Lumbering.—Lumbering conditions have been very satisfactory and many of the saw mills have been running overtime. The saw mill of Mr. John McGrath, at Lakefield, was totally destroyed by fire last month; he will build at once. Messrs. Moore and Connell's saw mill on Cameron lake shore was also burned down last month.

Manufacturing.—Activity prevailed in all lines.

CONDITION OF PARTICULAR TRADES.

The building trades have been very active during the month, and prospects are good for the remainder of the season.

The metal shops were all working full time with as many men as the condition of the trade required. Electrical workers and line men were very active. Metal polishers and brass workers were very busy. Woodworkers and upholsterers were active. The printing and allied trades were very busy. Journeymen tailors and garment-workers had a good month. Bakers and confectioners, and butchers and meat cutters were active. Leather workers were well employed. Textile workers and carpet weavers were active. Railway employes had a very busy month. Steamboat men had an active month. Street railway employes were active. Cab drivers, carters, teamsters and expressmen had a good month. Unskilled labour was in good demand.

DISTRICT NOTES.

Lindsay.—The Canadian Handle and Wood Trimming Company's factory was totally destroyed by fire. Loss not known. The insurance was \$66,000.

Cobourg.—The annual meeting of the Cobourg Matting and Carpet Company was held this month and the president reported that the business in the past year had almost doubled itself. The factory has been enlarged and all new and modern power looms and machines installed.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent,
reported as follows:—

GENERAL CONDITION OF LABOUR.

Activity in all important departments of labour continued to prevail during the month. Unskilled workers were well employed and there were fewer available men to fill vacancies than usual at this season, owing to so many having gone west. The great activity in building, which characterized the earlier months of the season continued unabated, the record for July showing a large increase over last year, the approximate value represented by building permits for the month being \$2,786,520, as compared with \$1,953,285. The Canadian Pacific Railway Company has obtained a permit

for the construction of their new fifteen-storey office building on the corner of King and Yonge streets at a cost of \$900,000. Work will be begun immediately by the Polson Iron Works on a new steel dry dock and ship-repairing plant involving an expenditure of \$900,000, on which the Dominion Government has granted a subsidy of three per cent. annually for a period of twenty years. The dry dock will be built in three sections which when coupled together will be 600 feet long by 100 feet wide. When completed the lifting capacity of the dock will be 9,000 tons. The Company is also building a new boiler shop. The City Council has awarded to Miller, Cummings & Robertson the contract for laying the 500 foot extension to the present intake pipe for the water works, on a basis of twenty per cent. commission on the total cost. The Consumers' Gas Company has completed the construction of a large retaining tank in the east end. The height is 200 feet and the diameter 216 feet; the weight of the tank and framework being over 3,000 tons. The receipts of the Toronto Railway Company for July were \$405,262, of which the city's share was \$81,052, as compared with receipts of \$369,431, of which the city received \$73,886 in July, 1910.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are generally engaged in threshing, the yield of grain being somewhat light in some localities. Fall wheat has been a poor crop, and barley lighter in weight than usual. Root crops suffered considerably from drought, but were benefitted by heavy rainstorms late in the month. Ensilage has generally done well.

Manufacturing.—Satisfactory conditions are reported in nearly all lines of manufacturing industry, with every reason to anticipate a continuance of activity. A number of new plants are being established. Lowe Brothers, paint manufacturers, will build a factory of reinforced concrete on Sorauren avenue to cost \$25,000. Brigden's, Limited will put up a five-storey printing

and engraving establishment at 162-164 Richmond street west, to cost \$60,000. Rockwood & Company of New York, chocolate manufacturers, have purchased a site on the corner of Queen street west and Crawford street for a six-storey factory. The National Cash Register Company has secured a ten-acre block in the northern part of the city for about \$100,000, on which it will erect a large factory in the spring.

Railway construction.—The Toronto-Trenton division of the Canadian Northern Railway Company will be ready for operation within a month. The Grand Trunk Railway Company lately purchased from the Provincial Government a portion of the insane asylum grounds on Queen street, part of which will be laid out in siding and the remainder retained as factory sites. Altogether there will be twelve uncovered tracks with accommodation for 496 cars. Two freight houses will be erected. Ten miles of the new street car lines have been completed and the remainder will very shortly be finished.

CONDITION OF PARTICULAR TRADES.

The building trades were all actively employed. Blacksmiths, boilermakers, machinists, moulders, stove mounters and structural steel workers had plenty of work. Electrical workers were busy. Brassworkers, jewellers and silversmiths were active. Furniture workers, cabinet makers, upholsterers and piano workers had a good month. Printers and allied trades had steady work. Custom tailors were rather quiet. Garment workers, boot and shoe workers and hat and cap workers were generally well employed. The provision and tobacco trades had continuous work. Harness and leather workers were active. Railway and street railway employes, teamsters and expressmen were busy. Sailors and long-shoremen were active. Hotel and restaurant help, barbers, laundry workers, clerks and salesmen were busy, the opening of the Canadian National Exhibition on the August 28 entailing the employment of many as extra help. Unskilled labour was well employed

DISTRICT NOTES.

CONDITION OF PARTICULAR TRADES.

North Toronto.—The Town Council, on August 28, decided to obtain a supply of electric power from the Hydro-Electric Commission at \$2.14 per horsepower per month, on a one year contract which can be extended.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

August was a prosperous, active month for all workers. Everybody was busy and in some lines of employment there was demand for more hands. Female factory labour was in constant demand and there appears to be steady employment offering for a considerable number of persons of this class. The Watson Fire Arms Sight Company will erect a concrete factory building, their temporary quarters being too small. A whitewear factory is likely to be started soon. The Canadian Niagara Power Company will erect a large addition to their power house. Part of the material was on the ground and contract for steel work was let. Sidewalk construction continued to employ many concrete workers. Further sewer contracts were let. Financial and commercial conditions were quite satisfactory.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had finished harvesting. Fruit growers and gardeners were busy. All crops are fair to good. Employment was active.

Manufacturing.—All manufacturing concerns were active. Corrugated paper, chain and trap, corset, cutlery, silver plating, calcium carbide and chemical fertilizer plants were all reported busy, and sanitary can, fruit canning, shredded wheat factories and iron-working concerns very busy. Hat, suspender, neckwear, shirt and box factories wanted more hands.

Railway construction and employment.
—Railway employment was good.

All the building trades except stone cutters and builders' labourers were busy. Painters were in demand and at times a few more carpenters and bricklayers were called for. Employment in the metal working trades was excellent. Electric linemen were in great demand. Tailors, hat makers, shirt, tie and suspender makers were all busy. Bakers, shredded wheat workers, and employes of canning factories were busy. Barbers, office, sales and delivery employes were active. Hotels, restaurants and laundries continued busy, but there will be a slackening of employment in these lines in September. All classes of men on steam railways were busy. Electric lines were employing full staffs, but a few trainmen may be laid off in September. Cab, team and express drivers were busy. Unskilled labour was well employed.

DISTRICT NOTES.

Bridgeburg.—The shipyards and foundry advertised for twenty-five labourers for steady work at 17½ cents per hour.

Welland.—Manufacturing concerns were all busy. Building operations were brisk. There was said to be a shortage of unskilled labour.

Humberstone.—The shoe factory was being enlarged.

Port Colborne.—Canal traffic continued to be heavy. A severe storm at the end of July did some damage to harbour improvements and shipping and stopped fishing for a week.

ST. CATHARINES AND DISTRICT.

Mr. James A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Probably never before in the history of St. Catharines and district has there been such activity as in August. All branches of industry were busy and rush conditions prevailed in the building trades and a few other lines. All mills and factories were running full time and in some cases there was a demand for more

help. Owing to the difficulty of securing brick and other building material on time and in sufficient quantities, some delay in building operations occurred and contractors have been unwilling to undertake more work. Municipal work on street pavements, sidewalks, curbings, &c., was more active than in the preceding month. The contracts for the twenty-four-inch city water service main, to cost \$180,000, were let and the construction of same begun. Work on the new buildings of the Steel and Radiator Company, Limited, is well under way. Tenders were called for the erection of the new buildings of the Yale and Towne Lock Company's plant, and work was also begun on the new assembly hall of the Collegiate Institute, a building to cost \$12,500. Business, wholesale and retail, was reported good and compared favourably with the corresponding month of last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers were busy with the root and fruit crops, peaches, pears, grapes, apples and plums being the principal fruit crops, for which good prices were realized.

CONDITION OF PARTICULAR TRADES.

The building trades had all they could do and there was a demand for more help. Metal and engineering trades, woodworking and furnishing trades, printing and allied trades, trades relating to food and tobacco preparation, leather trades, barbers, clerks, stenographers, delivery employes, furriers, laundry workers and unskilled labour were all busy. All branches of transportation were busy and there was an increasing amount of traffic.

DISTRICT NOTES.

Thorold.—Labour was well employed for the month, the building trades were particularly active.

Merriton.—All the mills and factories were running full time, and labour, skilled and unskilled, was well employed.

Port Dalhousie.—Favourable conditions prevailed in the labour market for the month. Labour was well employed with a demand for more help.

HAMILTON, ONT., AND DISTRICT.

Mr. Wm. T. Cooper, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during the month was generally satisfactory, there being considerably more activity in some lines than during the previous month. Work on civic improvements has advanced rapidly; already more sewer pipe has been laid than in any two previous years and the laying of water mains and cement walks is being carried on more extensively than in many years past. Work on the extension of the revetment wall is under way and is being rushed. The bulk contract for the new twenty-room school on Trolley street has been awarded at \$87,500. New cement fountains are to be constructed on Central market and on the wood market. The Board of Control have decided to reduce the deposit required from those tendering on city contracts from twenty-five to ten per cent. of the amount of the tender. The International Harvester Company has let a contract for a woodshop to cost \$185,000. The building will be of reinforced concrete, 400 by 100 feet. A Philadelphia ice-making company anticipates establishing a Canadian branch here. The Company claims to have a secret process for the manufacture of ice by which it is said the product can be turned out for nearly half the cost of harvesting it from the bay. The Schacht Motor Car Company, of Cincinnati, has purchased the old Jackson-Tilden plant and property at the corner of Sanford and Cumberland avenues and are establishing a \$350,000 plant there for the manufacture of automobiles and motor trucks. The Company expect to double the size of the plant in the spring, the present capacity allowing of the employment of 75 hands, all of whom will be expert workmen. Hamilton building permits

will show a remarkable increase this year over any previous year in the city's history; those issued during July amounted to \$285,500, an increase of \$17,000 over the corresponding month of last year. Customs collections for the port of Hamilton during the month of July amounted to \$172,467.50, an increase of \$36,726.76 over July, 1910. Bank clearings for the four weeks ending August 5, 12, 19, and 26, as compared with those of the corresponding weeks of last year were as follows:—

1911	1910
2,489,394	1,727,273
2,006,006	1,728,777
2,451,029	1,912,456
2,283,977	1,753,388

Wholesale and retail trade has been steady during the month, wholesalers are in receipt of good orders for this season and report that prospects are favourable for fall business.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing in this locality is almost completed. Crops were considerably lighter than last year. Fruit and vegetables are being marketed in large quantities at prices slightly in advance of those of last year.

Manufacturing.—Manufacturing has been carried on steadily in most lines during the month. The Aikins saw works shipped over 10 tons of saws to one firm at Vancouver. The Master Bakers' Association of Ontario met here during the month and decided to petition the Government to legislate so that a 16-ounce and 20-ounce loaf will be legal weights.

Railway construction.—The Toronto, Hamilton and Buffalo Railway Company is constructing a switch into the premises of the American Car Company. The Street Railway Company has just completed its reconstruction work for the season. An increase of over sixteen per cent. is shown in the city's portion of the street railway earnings for the past quarter.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters, lathers and plasterers, and plumbers and

steamfitters were well employed during the month. Iron moulders had a fair month, as did electrical workers and stove mounters; horseshoers and jewellers and silversmiths had steady employment. Woodworkers and carriage and wagon makers had a good month. Pattern makers were fairly busy. Printers and pressmen found steady employment. Journeymen tailors and garment workers were not very busy. Boot and shoe workers were rather slack. Bakers and confectioners and cigar makers and tobacco workers were well employed. Barbers had a busy month. Broom makers had steady employment. Railroad and steamboat men were well employed during the month, street railway men and teamsters and expressmen were busy. Unskilled labour was well employed during the month.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was particularly well employed during the month. The building trades were particularly busy, but a shortage in brick will cause some work to be laid over until next year. Never before have so many houses been erected in one season and never has there been such a demand; many houses are rented before the walls are up and occupied before finished. The demand is due to the steady enlargement of the many factories and the consequent demand for more men.

The iron trades were very busy and prospects are bright for the immediate future.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners were very busy. The grain crops are light and indications are that the root crops will also be light.

Manufacturing.—Manufacturers were very busy and prospects are bright.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, plumbers,

gas and steam fitters and builders' labourers were very busy. Iron and brass moulders, coremakers, machinists, engineers, electrical workers, line men, metal polishers, buffers and platers, stove mounters, blacksmiths, boiler-makers and sheet metal workers were very busy. Horseshoers were busy. Woodworkers, carriage and wagon makers, pattern makers and coopers were very busy. Printing and allied trades on job work were not very busy. Those employed on newspaper work were busy. Tailors and tailoresses were not very busy. Boot and shoe workers were busy. Bakers and confectioners were very busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were busy; there has been a demand for men. Barbers, clerks, delivery employés, hotel and restaurant employés were steadily employed. Laundry workers were busy. Railway trackmen were active. Freight handlers were busy. Street railway employés had steady employment. Teamsters and draymen were very busy. Unskilled labour was in demand.

DISTRICT NOTES.

Paris.—Labour was well employed during the month. The mills and factories were busy.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

General activity prevailed in all branches of industry during the month, with rush conditions in the building trades. The building operations this year will be the greatest in the history of the city. Owing to the number of important civic undertakings on hand, unskilled labour was better employed than in most seasons. The city council has awarded contracts for two new bridges; one of concrete at a cost of about \$4,000; the other of reinforced concrete to cost \$7,250, both to be finished this year. The Winter Fair Board has awarded

contracts for the extension of the Winter Fair building across the Grand Trunk Railway Company's tracks at a total cost of \$8,392. Though it is rather late in the season an endeavour will be made to have the building completed before this year's show as the extra accommodation is much needed. The Jules Motor Company has bought the old Morlock building on Suffolk street from the city, at a cost of \$13,000, and is fitting it up for the manufacture of automobiles. Operations will be started next month with 75 hands, but by the end of twelve months it is expected that 175 hands will be at work. A large staff of men are employed on the new Homewood Sanitarium buildings, where work is being pushed ahead rapidly. Good progress is also being made on the new Grand Trunk Railway Company's station, the structural work being almost completed. The semi-annual meeting of the Guelph Co-operative Association was held, when a most satisfactory report was presented, the turnover for the past six months being the largest for a like period since the Association was formed. A dividend of five per cent. was declared to shareholders. Permission has been granted the Colonial Whitewear Company, Limited, to increase its capital from \$40,000 to \$100,000. Wholesale and retail merchants report trade steady during the month. Customs returns for the month of July were \$17,022.78, a decrease of \$1,994.98 for the corresponding month of last year. No change in wages or hours of labour was reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers report a busy month, finishing harvesting and threshing. The yield is below the average owing to the very hot dry weather of the past season. The rural mail delivery is much appreciated by the farmers of this district a number of new routes have been approved by the Postmaster-General.

Manufacturing.—Manufacturers of all kinds were fully engaged and reported prospects bright for fall trade.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers had a very active month,

also painters, plumbers and gas and steamfitters. In almost all branches of the building trades there is plenty of work. Iron moulders, coremakers and helpers were well employed. Tube mill workers were busy also electrical workers and line men. Metal polishers, stove mounters and blacksmiths report trade fair. Woodworkers in sash and door factories were very busy, also piano and organ workers. Sewing machine makers and carriage makers had a fair month, as had printers and allied tradesmen. Journeymen tailors and garment workers reported a fair month. Railway trackmen were very busy raising tracks through the city to allow for erection of subways. Carters, draymen and teamsters were very active.

Unskilled labour had an exceptionally busy month with the supply hardly equal to the demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of August was a busy one in all classes of labour, with a shortage of supply in the wood working and furnishing trades, also among the carpenters and machine hands. The demand for help exceeded that of the previous month, or of the corresponding month of 1910. Good progress was made on the new buildings under construction. There were twenty-two building permits issued during August, valued at \$34,730, mostly for residences. Commercial transportation shipments and bank clearings were considered very favourable. Business, both wholesale and retail, was brisk.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy in the early part of the month harvesting their grain crop, and in the latter part preparing the land for the fall seeding, as well as doing some threshing and marketing.

The prices for Saturday, August 25 were;

Eggs, 22 cents per dozen.
Butter, 25 cents per lb.
Cheese, 15 cents per lb.

Potatoes, new, \$1.70 per bag.
Apples, 20 - 25 cents per basket.
Plums, 35-45 cents per basket.
Chickens, 60-70 cents, each.
Elderberries, 20 cents per crock.
Hay, \$17.00 per ton.

Lumbering.—The lumbering industry was active; a quantity of maple and basswood was shipped during the month.

Manufacturing establishments were all busy, and some of them were working overtime.

CONDITION OF PARTICULAR TRADES.

Active conditions prevailed among all branches of the building and metal trades. The woodworking and furnishing trades were fully employed, with an increased demand for help in many of the industries. Printers and pressmen were all busy. Bookbinding, steel and copper plate printers and photo-engravers were active. Journeymen tailors, garment workers, glovemakers, boot and shoe workers had a busy month. Bakers and confectioners, butchers and meat cutters, ice drivers, cigarmakers and tobacco workers were active. Tanners, curriers, leather workers, saddlers, trunk and bag makers were very busy. Barbers, broom makers, clerks, stenographers, delivery employes, hotel, restaurant and theatre employes, laundry workers, and button workers had a busy month. Railway employes were active, and freight handlers busy. Cab drivers, hackmen, carters and draymen, teamsters and expressmen were active. There was still a shortage of unskilled labour.

DISTRICT NOTES.

Waterloo.—All classes of labour were well employed, as all manufacturing establishments were busy. Good progress was made during the month on the new buildings under construction.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Generally speaking, the conditions reported last month continue. All the leading factories are working full time

with full staffs, and the prospects are for a continuance of these conditions. All the available labour is employed and there is more than the usual demand for men, both skilled and unskilled. Following are a few replies to inquiries:—

Stewart Manufacturing Company, (stoves and furnaces); business good. A few skilled men needed.

Canada Furniture Manufacturers; business very good; working full time; both skilled and unskilled labour needed.

Linderman Company; working full time with full number of men. A few skilled mechanics and some unskilled labour needed.

Karn-Morris Company (pianos and organs) and Thomas Organ Company, both busy. The former needs cabinet makers.

Bain Wagon Company and Woodstock Wagon Company, both busy, and the latter needs both skilled and unskilled labour.

Oxford Knitting Company, very busy, skilled female operators wanted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are busy threshing and attending to the root crops. Wheat is yielding well; oats and barley are a fair crop.

CONDITION OF PARTICULAR TRADES.

There is more than the usual amount of building going on at the present time, and the result is a good demand for masons, bricklayers, carpenters and labourers. The following rates of wages per hour are paid:—Bricklayers, 50 to 52½ cents; carpenters, 30 to 35 cents; labourers, 20 cents, except hod-carriers, who receive 22½ cents. The higher rates for bricklayers and carpenters are for men brought in from the outside on short contracts.

Bricklayers, masons, carpenters, joiners and builders' labourers are all very busy. There is some demand for skilled men, especially carpenters and joiners and bricklayers and a good demand for labourers. Painters and plumbers are regularly employed.

Moulders, machinists, electrical workers, metal workers, stove mounters, blacksmiths and bicycle workers are busy. There is a demand for skilled men, good general mechanics and men familiar with the stove and furnace trade. Woodworkers, upholsterers, varnishers, wood carvers, carriage and wagon makers are all busy. There is a good demand for both skilled and unskilled men in the piano and organ factories, the wagon factories and in the furniture trade. Good cabinet makers are needed. Printers and pressmen were busy, but there was no demand for men. Tailors and garment makers, bakers, butchers, cigar makers, tanners, barbers, clerks, stenographers and delivery employés were steadily employed. There was a good demand for unskilled labour both at the factories and in the building trades.

STRATFORD, ONT., AND DISTRICT.

Mr. J. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

All classes of labour were fully employed and the month of August was a busy one and would compare favourably with the corresponding month of last year. Good progress was made in the many buildings in the course of construction. Several of the factories have increased or are increasing the size of their buildings which will mean an increase in their staffs of workers. Men employed on civic improvement work had a very busy month. Wholesale and retail business has been steady during the month and are looking forward to a big fall trade. The City Dairymen's Association announced a raise of one cent per quart in the price of milk, which will sell for seven cents commencing Sept. 1. Scarcity of milk and the high price of feed are given as the reason for increase. The customs returns for the port of Stratford for the month of July totalled \$12,083.85 (an increase of \$2,466.92 over July, 1911. There was no unrest in the labour market and no changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy threshing and preparing for fall seeding. The market prices are

Eggs, 20 cents per dozen.
Butter, 24 cents per lb.
Wheat, 80 cents per bushel.
Oats, 38 cents, pe. bushel.
Bailey, 50 cents per bushel.
Peas, 70 cents per bushel.
Hay is quoted at \$13 per ton.

Manufacturing.—Local industries have been well employed during the month.

Railway construction.—No railway construction; the railways are taking advantage of the fine weather and considerable repair work is being done.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters, plumbers, stone cutters and builders' labourers were busy. Iron moulders, workers and helpers were active. Machinists, electrical men, linemen, blacksmiths and boilermakers were active. Woodworkers, upholsterers and woodcarvers and all engaged in the factories were active. Carriage and wagon makers were busy. Coopers had a good trade. Printers were busy. Tailors and tailoresses were busy. Bakers, confectioners and butchers were busy. Cigar-makers were busy. Harness makers did a good trade. Barbers, clerks and delivery employés were busy. Hotel, restaurant and laundry workers were active. Railway conductors, engineers, trackmen and freight handlers had a busy month. Cabdrivers, draymen and teamsters were busy. Unskilled labour was well employed.

LONDON, ONT., AND DISTRICT.

Mr. A. Wootton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of August was a good one for most workers. The "Old Boys' Celebration" held here from August 7 to 12 brought at least 10,000 visitors to the city, and the retail dealers reaped a rich harvest as a result. Grocerymen,

butchers, bakers, boarding-house keepers and hotels all getting a fair share. In the building trades business was not very brisk, although there is work for all at present. The different factories were all very busy, also the foundries. On the railroads traffic is average, and on the Canadian Pacific Railway a large number of people are busy in their east end yards completing the new roundhouse, and other improvements. They have now commenced a \$75,000 bridge over the Thames, to replace the present one, as they do not think it heavy enough for their big trains. At the different brick yards there have been very few bricks made, as the demand is not up to former years.

The iron moulders, who have been on strike here for over two months, have not yet come to any settlement.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The grain is all harvested in this section, and the yield is not quite up to the average. Summer apples are plentiful, but the winter varieties are scarce. Plums and peaches are plentiful and will be very cheap. The outlook for the potato crop is very poor. A large number are leaving from this district on harvest excursions to the west.

CONDITION OF PARTICULAR TRADES.

Bricklayers are busy. Carpenters are very busy. Lathers and painters are busy. Plumbers report trade fair. Stone cutters and builders' labourers are busy. Iron moulders on stove work are busy. Iron moulders on other work are mostly all on strike. Machinists are very busy. Electrical workers and linemen are exceptionally busy. Metal polishers, brass workers and stove mounters are busy. Boilermakers are very busy. Sheet metal workers are busy. Woodworkers in carpenter shops are exceptionally busy. Carriage and wagon workers are busy. Car-shop employés are very busy. Coopers are busy. Printers are busy and job men in demand. Pressmen are very busy. Bookbinders report trade good. Journeymen tailors are a little slack. Garment workers are slack. Boot and

shoe workers are busy. Bakers and confectioners are very busy. Cigarmakers report trade only fair, a large number losing the week while "Old Boys" were in the city. Tanners and curriers are busy. Broom makers are busy. Brush makers are slack. Laundry workers are very busy. Railroad train crews report work only fair. Street railway employes are very busy, and had a lot of overtime during the month. There has been considerable work for this class during the month, but the supply is fully equal to the demand.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

August was a favourable month to all classes of labour. An increase in traffic was shown on the Michigan Central Railway, which previously had found it necessary to make a reduction in its working staff, because of a falling off of freight. A number of engineers who were put back firing during July, were again called into service as engineers. A continuous increase is expected from now on in traffic and general business. The Pêre Marquette and Wabash Railway Companies' employes report an active month. Business has been good on these two roads throughout the summer months. The men have been well employed in the railway shops. Unskilled labour found ready employment during August. Local industries report a steady month. The Sutherland-Innes stave factory resumed operation during the month and in the neighbourhood of thirty hands are now employed. A scarcity of timber is reported.

In the building trades, mechanics and building labourers (unskilled) were well employed. Contracts have been let for an extensive addition to the recently erected Monarch Knitting Company factory, which when complete will make this factory one of the largest in the city. A large amount of street improvements have been made in the city and petitions for further improvements are before the

City Council. The street railway had a very prosperous month. General prosperity marks the close of the summer months.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy finishing the harvest and marketing fruit, which is plentiful in this district. Plums, pears and apples had a good crop. Apples are not reported plentiful, but the market supply so far has been good. Local industries report an active month, with a plentiful supply of fall orders.

CONDITION OF PARTICULAR TRADES.

Mechanics in the building trades were well employed during August. The stone work on the new Roman Catholic church will be completed early in September. The edifice will be one of the finest in Western Ontario. Moulders, ironworkers, machinists, and blacksmiths were well employed. Journeymen tailors reported a quiet month, with revival of business towards the close, and prospects of good fall trade. Unskilled labour was well employed, the demand being slightly in excess of the supply.

DISTRICT NOTES.

Port Stanley.—It is announced that extensive harbour improvements are to be made at Port Stanley, which when completed will make that port one of the finest on the Lakes. The continued increase of business makes necessary the contemplated improvements. Hydro-electric power will be furnished at Port Stanley; the by-law being carried by an almost unanimous vote.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was very little change in the labour situation during the month, and a large amount of work was carried on.

There was exceptional activity among the building trades in this district and the demand for houses is very brisk. A large amount of civic work is going on at present which is giving employment to a large number of unskilled labourers. The city, at present, is crowded with American visitors. Wholesale and retail dealers report trade steady.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy harvesting their crop, which is a fair average.

Manufacturing.—Manufacturers were all running full time with a full staff of men.

CONDITION OF PARTICULAR TRADES.

Building, metal, engineering and wood-working and furnishing trades were very busy and the prospects look good for some time to come. Printers and pressmen have been very active during the month. Journeymen tailors and garment workers are busy. Owing to the large number of visitors in the city, the bakers and butchers are very busy. Leather workers are all fully employed. Barbers, hotel and laundry workers are very busy. Transportation was brisk during the month on the railway and steamboat lines. Teamsters and unskilled labour were well employed.

CHATHAM, ONT., AND DISTRICT.

Mr. A. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During the past month labour has found a very keen demand in all branches, the building trades being especially active. Contractors experienced trouble in securing sufficient men, contractors at the International Harvester Company offering 50 cents per hour for bricklayers, \$3.50 per day for carpenters and \$2.25 for labourers. A number of the largest contractors were delayed for the want of material of different kinds. South

Chatham's new school and the Baby Blocks contracts were the largest contracts awarded during August. Wm. Gray & Son carriage works took stock and 250 to 300 hands were out of work for two weeks but those who wished found ready employment elsewhere. Both wholesale and retail trades continue active.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy preparing for fall seeding, many having commenced cutting corn.

Manufacturing.—All manufacturing firms were running full time. The International Harvester Company has increased its staff to 300 men and reports prospects good for the balance of the season.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, joiners, lathers and plasterers and all branches of the building trade were exceedingly busy. Machinists, electrical workers, linemen, brass workers, blacksmiths and sheet metal workers report trade very good. Woodworkers were busy and upholsterers fairly busy. Carriage and wagon makers were active. Printers and allied tradesmen were active. Journeymen tailors, garment workers and boot and shoe workers were quiet. Bakers, butchers and meat cutters were active. Barbers, hotel, restaurant and theatre employes and laundry workers were busy. Cab-drivers, hackmen were active. Carters, draymen, teamsters and expressmen were very busy. Unskilled labour was very active.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

A shortage of labour existed in most lines during the month. The Lake Superior Paper Company have a large staff

employed on additions and repairs. The building trades were particularly busy. Trade was active and there was no unrest among employées.

The Algoma Central & Hudson Bay Railway Company is pushing its line through to connect with the Canadian Pacific Railway and Grand Trunk Pacific. The various trades were well employed. Fishing and mining were normal. Steelton is carrying out extensive additions to sewers and roads and cement walks. The district is in a very prosperous condition and the outlook for continued prosperity is very bright.

DISTRICT NOTES.

The several manufacturing plants were busy. There was a shortage of unskilled labour, and of mechanics in the building trades. Crops are good and farmers find a ready market for their produce. The various lumber companies operating in this district are preparing for an active season.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The conditions in this district have not altered much from last month and all work is much more quiet than at the same season last year. No new works are starting up and there is no exceptional activity in any trade. The transport trade is normal for this time of the year; business at this point is quiet.

There has been no change in rates of wages and no unrest in labour circles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers in the district have been fortunate with a good crop of hay, the first good crop for the past three years, and the root crops are doing well. Good reports have been brought in from the valley of the Rainy river and from the townships adjacent to the cities of Fort William and Port Arthur.

Railway construction.—Work has started on the Canadian Northern Railway Company's eastern extension and some hundreds of men have been engaged here for that work and have been shipped out daily; this has had the result of taking off the surplus labor. Working along the line erecting camps for the men has helped the men in the house building trades.

CONDITION OF PARTICULAR TRADES.

Building workmen are more steadily employed than during any former month of this year from the following causes:—

1. The building trade is slightly improved, and the buildings late in starting are being pushed forward. 2. Many workmen have gone west and very few new men have stayed in the cities. 3. Railway construction work on the Canadian Northern Railway has taken many men, and a factory for the making of wagons has been started at Port Arthur.

During the month of August the work at the dry docks has gone on steadily; two large vessels have been docked for repairs. Owing to the election, the printing trades have been working very actively. This of course is but a transient industry but in a dull season helps to dispel the general monotony and finds employment for hosts of men who seem fitted by nature for little other. The musicians are busily employed.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

A change of importance, during the month, has been the disappearance of anxiety with regard to the supply of labour for harvest purposes. At the employment agencies in Winnipeg, it is reported that the farmers have been supplied with enough men. At one or two points in the west congestion has been reported as a result of the crop being later than at the beginning of August was anticipated. Men arrived in large numbers and their services were not immediately in demand. This condition was

due solely to climatic conditions which were of an exceptional character.

The general labour market in Winnipeg, during August, did not show any material changes. Industrial and building activity continued from July without interruption. Cold weather and reported frosts from the crop districts made business men and manufacturers apprehensive, but as fuller and more complete information comes to hand confidence has returned.

Wholesalers report increasing trade and many of the warehouses have had to replenish their stocks. Fall deliveries are now being made. Bank clearings for August show an increase of 20·58 per cent.

An important arrangement has been entered into between the City of Winnipeg and the Winnipeg Electric Railway Company, by which the latter company will be given permits to make additional connections for gas services. About two years ago, through litigation, the Company was refused permits unless it agreed to accept them upon conditions to which it objected. For a period of two years, therefore, practically no new gas services have been put in except those for which permits had been procured before the city attached conditions to the usual form of permits issued. The understanding arrived at enables the Company to resume its former position in regard to new services of which there are approximately 4,000 awaiting. This will necessitate the laying of some miles of new mains upon which several gangs of men are already being put to work.

The differences that have existed between the Canadian Pacific Railway Company and their machinists for the last seven months, or since the old schedule ran out, were finally settled last week, the men being granted an increase in wages of from eight to ten per cent.

This schedule affects over five thousand men and includes all the carmen, machinists, blacksmiths, boilermakers and moulders between Fort William and the Pacific coast. When the old schedule ran out the men submitted a new one, but the Company was disposed not to consider it, and the men remained working on the old one until a definite and satisfactory ar-

range ment was settled upon. Beyond the statement of the Company and representatives of the men no information is available other than that the average advance in wages is between eight and ten per cent.

The Northern Pacific Railway and the Great Northern Railway Companies have completed arrangements with the Canadian Northern Railway and Grand Trunk Railway Companies for the use for passenger purposes of the Union Depot. Meanwhile the former Companies have commenced to erect for themselves more freight terminals in the Ross street locality.

The Winnipeg Electric Railway Company has announced a reduction in the price of electric light from 9 cents per kilowatt hour to 7½ cents with ten per cent. reduction on bills up to \$10; fifteen per cent. reduction on bills over \$10; twenty per cent. reduction on bills over \$15. On larger bills the discount allowed is greater.

CONDITIONS OF LOCAL INDUSTRIES.

Agriculture.—Low temperatures and rain have materially delayed harvest operations. In Manitoba wheat cutting is practically over except the more northerly parts where cutting is now general.

Lumbering.—Wages paid to labourers for work in the harvest fields averaged from \$45 to \$55 per month as compared with \$35 to \$45 last year. This advance will affect approximately 5,000 labourers employed for the harvest in Manitoba.

CONDITION OF PARTICULAR TRADES.

During August the building trades have been exceedingly active. For the first seven months of the present year the permits totalled \$11,368,650 as compared with \$10,971,700 for the corresponding period of last year. During August several very important contracts have been awarded, one of which is for the erection of an hotel for the Grand Trunk Pacific Railway Company at a cost of \$1,300,000, and the other for an annex to the present hotel owned by the Canadian Pacific Railway Company. The Canada Cement

Company has commenced operations upon its plant in Winnipeg and has contracted for a supply of electric energy up to 2,000 horse power. By the end of August it is very probable that the building permits will exceed those for the corresponding period of last year by over \$2,000,000. In the metal trades there has been a notable increase of activity during the month. Manufacturers of harness have been endeavouring to procure skilled help to meet increasing demands upon them.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market was about the same as in the previous month, and labour generally was not so much in demand as at the corresponding period of last year. This is especially true of all unskilled labour, the harvest is later than usual and in consequence the demand has not equaled the large supply coming from the east.

The building trades were fairly busy and advertisements appeared continuously in the local papers for carpenters.

Good progress is being made on the new asylum, also on the Canadian Northern Railway Company's hotel. The greater part of the Canadian Pacific Railway Company's depot has been demolished and work has commenced on the erection of the new \$75,000 depot.

The Maple Leaf Milling Company has erected a large elevator to take the place of one of their elevators recently burned.

The International Harvester Company will soon have their five-storey brick warehouse completed.

The double tracking of the Canadian Pacific Railway Company's main line from Brandon to Portage is almost completed and it is expected that it will be ready for use by the time the crops are ready for moving.

At a recent meeting of the Summer Fair Board, it was decided, in view of the increasing business done at the Exhibi-

tion to either increase the present grounds or purchase new grounds.

The Parks Board is endeavouring to get the Dominion Government to grant a portion of the Experimental Farm, including Lake Percy, to the city for the purposes of a public recreation park.

The labour market was quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvest operations were delayed owing to the cool weather but cutting was general about the twenty-fifth of the month.

Manufacturing.—The Hanbury Manufacturing Company, the Manitoba Windmill and Pump Company and the McDiarmid and Clark sash and door factory were working full time. The Brandon Machine Works closed for a short period has again reopened and is working full time again. The Brandon Sandstone Brick Company has closed down for the winter season.

CONDITION OF PARTICULAR TRADES.

All the building trades were busy. Carpenters and joiners, lathers and plasterers were very busy. The metal working, woodworking and printing trades, cigarmakers and railroad transport trades were busy, but unskilled labour was dull.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There has been a slackening down throughout the past month, particularly noticeable in the building trades. Labour has been far from being scarce, with but few exceptions. For this time of the year a falling off is usual for a few weeks, but with some of the trades, it is years since such a quiet time was experienced in the month of August. Whether it is a reaction of the Dominion Exposition which was held in Regina this year, or will be of short duration, it is hard to say, but a very busy fall is looked forward to by those in a position to judge.

The wholesale and retail trade remains unchanged, and the amount of business already done this season has been of a very satisfactory nature to those concerned.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Although several violent storms, some accompanied by hail, have visited the Regina district, very little damage resulted. Weather conditions were more favourable than in the previous month.

CONDITION OF PARTICULAR TRADES.

The bricklayers and masons were somewhat quiet during the past month, many finding it difficult to secure employment, while others were idle as a result of material running short. Although a vast amount of building is going on, still there were more carpenters and joiners on the labour market than there was a demand for. Lathers and plasterers had a fair month. Painters and paperhangers were very quiet, many finding it difficult to find a demand for their services. Plumbers had a busy month. Stone cutters were quiet. Builders' labourers were fairly well employed. Bicycle workers were quiet. All branches of the printing trade were well employed. The journeymen tailors and garment workers were busy. Bakers and confectioners were active, also butchers. Barbers were very active. Clerks, stenographers and delivery employes were busy. Hotel, restaurant and theatre employes were active. Laundry workers were active, railway employes were active, street railway employes were busy but not in demand, sufficient supply all times. Cab drivers, hackmen, carmen and draymen were well employed, also teamsters and expressmen. There was little demand for unskilled labour.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported follows:—

GENERAL CONDITION OF LABOUR.

All classes of labour were fully employed, and conditions compared favour-

ably with the previous month and the corresponding month in 1910.

The Great Western Garment Company has found it necessary to order additional equipment which will practically double its capacity. The Edmonton Cigar Company is arranging for additional space to permit of a considerably increased output. The Edmonton Tent & Mattress Company finds it necessary to provide considerable additional space to permit the installation of a large addition to equipment. Cushing Bros. have just completed their new brick factory building.

Practically all industries report very active business.

The International Harvester Company has arranged for the immediate erection of a large six-storey brick warehouse; work is progressing rapidly on the brick and concrete distributing warehouse of the Massey-Harris Company. P. Burns & Company have recently announced their intention to commence early construction on the meat packing plant which they have had under consideration for some time past.

Conditions in both wholesale and industrial lines of business are reported as showing exceedingly satisfactory activity.

The following are the returns for the month of July:

	July, 1910	July, 1911	Increase
Customs.....	\$ 26,718	\$ 47,565	78%
Building permits.....	460,086	474,909	3½%
Bank clearings.....	5,831,885	8,950,813	53½%
Post Office (stamps only)	6,477	9,453	46%
<i>Street Railway:—</i>			
Passengers carried....	343,307	570,404	66%
Revenue.....	14,233	23,734	66%
Homestead entries.....	505	629	24½%

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crop conditions are exceedingly promising if weather is favorable during September. All grain crops show an exceedingly heavy stand, even and well headed, which will turn out heavy yields. If the somewhat too frequent rains which have prevailed throughout August are continued into September, there is some danger that the ripening process may be unduly prolonged in the case of some of the heavier crops.

CONDITION OF PARTICULAR TRADES.

The building trades were very busy and good carpenters and bricklayers were in demand. All connected with the metal and engineering trades were well employed. All lines of the woodworking and furnishing trades were active. Printers and pressmen were fully employed. Journeymen tailors had a fair month. Garment workers were busy. Bakers, butchers, ice drivers, cigar and tobacco workers were busy. The leather trade was good. Barbers reported business good. Clerks, delivery employes, hotel and laundry workers had plenty of work. Railway employes were busy. Unskilled labour was well employed.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market was not brisk but was about the same as in the previous month. Building operations were very slack for the season of the year. The harvest has provided employment for numbers who otherwise would have been idle. Work is progressing on the overhead traffic bridge. A great deal of work was done during the month in preparation for the annual exhibition and fair.

A report from the Lethbridge City Council shows that they have 225 men at work on street improvements, also forty-seven teams and five machines. These machines are adapted for the work of digging for sewers and water mains, the men simply laying the pipes.

The A. Macdonald Company of Winnipeg are going to build a wholesale warehouse for groceries, &c. The bank clearings for the week ending August 17 were \$543,417, as compared with \$466,909 the week before. Farm implement houses were busy preparing for the harvest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting was in full operation in the latter part of the month

and there was a good yield. A heavy hail storm occurred on the evening of August 15. The damage to grain is set down at \$1,000,000; there was also great loss in market garden stuff.

Mining.—Coal mining was at a standstill as no agreement had been arrived at between the miners and the operators. Cottages for miners were being built at the Lethbridge Collieries and the machinery was being put in place. Only two small mines were working in this district, with an output of about 200 tons a day.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a dull month. Carpenters and joiners were fairly well employed. Painters were well employed. Lathers, plasterers, plumbers and builders' labourers had a dull month. Electrical workers and linemen were well employed. Blacksmiths were dull. Printers and pressmen, garment workers, bakers and confectioners, butchers and meat cutters, clerks and stenographers, hotel and restaurant employes, teamsters and expressmen were all busy. Journeymen tailors were very busy and unskilled labour was well employed.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market throughout Kootenay district during August has been quiet, owing to the coal miners' strike throughout the Crows Nest Pass part of the district and the Granby Company in the district to the west having shut down operations, throwing out of employment about 1,000 men, while a considerable number were indirectly affected. Many of the coal miners have left for other parts.

The existence of platinum in considerable quantities at and near the Granby Poorman group of mines has been fully demonstrated, it now being merely a matter of satisfactory treatment in order

to save the values and Mr. French is now devoting considerable time to that most important question, of which those interested are hoping for a satisfactory solution.

The Sheep Creek district is keeping well to the front by regularly producing gold cricks, and some new strikes of ore have been reported from the Ymir district.

CONDITION OF LOCAL INDUSTRIES.

Mining.—A good showing of high grade silver-lead ore has been recently struck at the Rio mine near the Rambler-ariboo in the Slocan district. It is also reported that the famous old and well-known Slocan Star mines are now clear of litigation and that the owners will extensively operate the property at an early date. It is also reported that the White-water-Deep mines will start operations most immediately with a force of thirty men, and in a general way it may be said, were it not for the coal miners' strike, mining conditions would be excellent in this district.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The weather during August was excellent for out-of-door workers, no time being lost on account of rain. The building trades reported activity in all branches, and loggers stated that the demand for logs was not equal to the supply.

Vancouver's building permits for the last six months of 1911 amounted to 164,056.

There are over 13,000 telephone instruments in use in the city.

When compared with eastern values, property in Vancouver is high-priced. The demand for business locations continued active, but residential sites were rarely offered without buyers, particularly for working people.

The fruit and produce market was extremely active towards the end of the month. Cherries and California pears were practically off the market, and Cali-

fornia and Wenatchee peaches were in abundance for family use.

The hardware business was brisker. Next month the season for sporting goods commences.

Iron screws slumped and were quoted with an eighty-five per cent. discount.

Business conditions remained quiet on the mining market, and there was very little move in any direction.

Alexander Pantages, president of the large vaudeville circuit bearing his name, announced that he would erect a theatre here, costing \$400,000.

S. Jones, Victoria, B.C., stated that he would erect an eight-storey building at the northwest corner of Hastings and Homer streets, next year, to cost \$125,000. The plans have been prepared.

Messrs. Tingley Brothers will erect a \$70,000 warehouse on Helmeken street.

R. Evans will build an apartment house at corner of Granville street and Sixth avenue, costing \$40,000.

The Caledonian-Canadian Investment Company will put up an apartment block on the southeast corner of Salsbury drive and Parker street, costing \$35,000.

Shipping was heavy to and from this port.

Bank clearings were as follows:—

August, 1911—	\$47,232,335
" 1910—	36,533,143
" 1909—	24,969,077

Building permits were:—

August, 1911—	\$ 1,450,000
" 1910—	744,035

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chow, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There has been no particular change in labour conditions during August, labour being well employed in almost all lines. Building continues active, several substantial business blocks are under construction, as well as a great many private residences. Work on the various street paving contracts is proceeding satisfactorily, and it is expected that several miles will be completed this year.

The city is about to commence the construction of a new main sewer in the north-western and north-eastern portion of the city at a cost of about \$100,000, also the building of a sea protection wall fronting on Ross Bay Cemetery, at an estimated cost of \$70,000. The building records for the City continue to grow, being \$333,375 for July, this year, as compared with \$250,800 for June, and \$222,290 for July, 1910. The value of buildings erected in Oak Bay (a suburb of Victoria) for seven months of this year, amounted to \$273,700, as compared with \$70,195 for the same period last year, an increase of nearly three hundred per cent. The bank clearings for July this year were \$11,554,631, as compared with \$11,361,784 for June, and \$10,517,023, for July 1910. For the first seven months of the year the bank clearings show an increase of forty-one per cent. over the same period of 1910. The customs duties collected during July, 1910, amounted to \$411,034, as compared with \$227,316 for the same period a year ago. Traffic returns for the local street railway for July show an increase of sixty per cent. over July, 1910. The City Council has fixed the rate of taxation for this year at twenty-four mills on the dollar as compared with twenty-six and a quarter mills last year. This year the general rates will be levied on lands only, the assessed value of which is \$46,516,265. Improvements, which are assessed at \$13,491,780, will be exempt. Wholesale and retail trade is active with the future prospects bright. On the first of August, milk was advanced from 10 to 11 cents per quart. Butter also advanced from 45 to 50 cents per pound. In both cases the reason given is scarcity of pasturage and increased demand. The Master Plasterers' Association has ceased employing Chinese labourers in their contracts, in accordance with an agreement with their employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops in this locality are turning out fairly well and taken all round will be an average yield. The

crop of berries was fair, but not as plentiful as last year.

Fishing.—The steam whalers operating on the west coast of Vancouver Island have been making excellent catches during the first two weeks of August, the total for the fortnight being seventy-seven whales. On the Fraser river, salmon fishing has been poor this season, while at the fish traps off the shore of Vancouver Island it is reported to be somewhat better. Complete figures will be available later.

Lumbering.—All lumber mills in the vicinity are busy, and the entire industry is in a healthy condition. The receipts from the timber branch of the Provincial Department of Lands for July, 1910, amounted to \$143,143.

Railway construction.—Railroad work on the Island is proceeding satisfactorily, giving employment to a large force of men.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were well employed, with good prospects for the remainder of the season. Work in the iron shipyards has been fairly brisk during the month. Some extra men are being taken on. All the various branches of the printing industry reported business as good with no idle men. Tailors reported work to be slack, while garment workers reported work plentiful. Cigar makers, bakers and butchers were steadily employed during the month. Barbers, stenographers, &c., reported work as full up to the average. Unskilled labour was extensively employed during the month, with a never-ending supply available.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Conditions in the labour market in this district have not shown much change since last month. While there has been

large amount of work going on there have been many looking for work. Business men, wholesale and retail, report business as good, the number of business firms showing a steady increase. Transportation of merchandise keeps steady, and the flow of passengers shows no falling off. There have been no changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are slackening off, the harvest being generally finished.

Fishing.—There has not been much work among local fishermen.

Lumbering.—The lumber trade keeps active, the sawmills and logging camps being in active operation.

Mining.—The coal trade keeps steady at most of the mines, all working full time with the exception of the Comox mines which are working slack, but are making extensive preparations to increase

their output in the near future. The quartz mines in this district are showing signs of a renewal of activity.

Railway construction.—The extension of the Eastern and Nanaimo Railway to Alberni will soon be completed.

There is a lot of work going on in the city in the way of street paving and sewerage.

CONDITION OF PARTICULAR TRADES.

There was continued activity in building, carpenters and joiners being very active. Bricklayers and masons report work as active. Lathers and plasterers are active and painters and paperhangers busy. The same applies to plumbers and builders' labourers. Blacksmiths and carriage makers report work good. Printers were active and cigar makers steady. Teamsters and expressmen were active. Unskilled labour has been well employed but there are more men than are required at present.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF AUGUST, 1911.

DURING the month of August three applications for the establishment of Boards of Conciliation and Investigation were received in the Department, as follows:—

1. On behalf of the machinists, machinists' apprentices, specialists and helpers on all lines of the Grand Trunk Railway system in Canada, the number of employés affected being given as 2,000 directly and 6,000 indirectly.

2. On behalf of the machinists employed by the Grand Trunk Pacific Railway Company, the number of employés directly affected being given as 50.

3. On behalf of the boilermakers employed by the Grand Trunk Pacific Railway Company, the number of employés directly affected being given as 150.

Other Proceedings Under the Act.

On June 19, an application for the establishment of a Board of Conciliation

and Investigation was received in the Department from the machinists and specialists employed on the Intercolonial and Prince Edward Island Railway systems, to the number of 380. The matters in dispute related to the employés' desire for a readjustment of the terms of their agreement with the Government Railways Managing Board. As a result of subsequent negotiations between the employés in question and the Government Railways Managing Board the Department of Labour was informed that a satisfactory settlement had been reached, on July 12, of the matters at issue.

On June 8 a request was made to the Department for an investigation under the Industrial Disputes Investigation Act of certain matters in dispute between the Government Railways Managing Board and the carmen employed on the Intercolonial Railway system. As a result of subsequent negotiations between the Government Railways Managing Board

and the employés' representatives, the Department of Labour was informed that a satisfactory settlement was arrived at on July 12.

In the August number of the *Labour Gazette* will be found the text of the findings of the Board of Conciliation and Investigation which inquired into certain matters in dispute between the Great North Western Telegraph Company and certain telegraph operators in its employ. The Department of Labour was informed on August 24 that the findings of the Board were accepted on behalf of the employés concerned.

The application of the machinists, machinists' apprentices, specialists and helpers employed on the lines of the Grand Trunk Railway System in Canada for the establishment of a Board of Conciliation and Investigation to which should be referred the employés' demand for a new schedule of agreement with the Company was received in the Department on July 18. Whilst communications were passing between the Department and the parties concerned, looking to the establishment of a Board, the Department was informed that direct negotiations had been renewed between the Company's officials and a committee of the employés looking to the settlement of the dispute. As a result, action upon the employés' application was suspended.

The application of the machinists employed on the lines of the Grand Trunk Pacific Railway Company for the establishment of a Board of Conciliation and Investigation related to the employés' demand for a schedule of agreement covering wages, hours, and other conditions of employment. The application, as received in the Department on July 31, was not in a form which complied with the requirements of the Industrial Disputes Investigation Act. As a result of further communications between the Department and the employés' representative the application was amended so as to comply with the provisions of the Act, the application as amended being received on August 8. Immediate steps were taken looking to the establishment of a Board as requested, the Company meanwhile expressing its willingness to

re-open negotiations for a settlement of the matters at issue. The proposal of the Company in this respect was communicated to the employés on August 1, a reply on behalf of the latter being received on August 17 to the effect that the employés' representative would be pleased to meet the General Manager of the Grand Trunk Pacific Railway Company "for the purpose of reaching an understanding and basis upon which negotiations could be re-opened." The Department was, however, informed by the employés' representative on August 22 that there was no chance of negotiations being re-opened; also that the employés were desirous of a Board being established without delay. A Board was accordingly established by the Minister on August 23. Mr. Thomas J. Murray, of Winnipeg, and Mr. Wallace Nesbitt, K.C., of Toronto, being appointed members thereof on the recommendation of the employés and the employing Company respectively.

The application of the boilermakers employed on the lines of the Grand Trunk Pacific Railway Company for the establishment of a Board of Conciliation and Investigation related to a demand for the adoption of a schedule of agreement with the Company to govern wages, hours, and other conditions of employment. A Board was established by the Minister in this matter on August 23, Mr. Thomas J. Murray, of Winnipeg, and Mr. Wallace Nesbitt, K.C., of Toronto, being appointed members thereof on the recommendation of the employés and of the employing Company respectively.

In the August number of the *Labour Gazette* a brief reference was made to the receipt on June 21 of an application from the conductors and motormen of the Montreal Street Railway Company for the establishment of a Board of Conciliation and Investigation to which certain matters in dispute between the employés and the above mentioned Company might be referred for adjustment. The application as received was not in a form which complied with the requirements of the Industrial Disputes Investigation Act, but was later amended by the employés in such a way as to meet the requirements of the Act. A Board was

ordinarily established by the Minister on July 19, Messrs. J. L. Perron, K.C., and Charlemagne Rodier, both of Montreal, being appointed members on the recommendation of the employing Company and of the employés respectively. In the absence of any joint recommendation from the foregoing, the Board was completed by the Minister on August 11 by the appointment of the Honourable Mr. Justice Fortin, of the Superior Court, Montreal, as Chairman.

On August 16 a letter was received in the Department from the Chairman of the Board, stating that the latter had been served, on August 15, with a petition for writ of injunction asking that proceedings before the Board of Conciliation and Investigation should be forbidden by the courts as being *ultra vires*. On the following day the Chairman of the Board was also served with an amendment of the petition in certain respects.

The petition in question bears date of August 14, and is made on behalf of the Montreal Street Railway Company, being directed against the members of the Board of Conciliation and Investigation, the signatories to the application of June 7 last, and also against the Minister of Labour. At the end of the month the petition in question had not yet been presented to the courts for hearing.

The report of the Board of Conciliation and Investigation which was established to deal with a dispute between the mining

Companies comprising the Western Coal Operators' Association and the miners employed in the coal fields of Southeastern British Columbia and Southern Alberta was published in the last number of the *Labour Gazette*, also a minority report bearing the signature of Mr. A. J. Carter, member appointed on the employés' recommendation.

The Western Coal Operators, on being made acquainted with the terms of the above mentioned report and minority report, informed the Department of Labour, on July 24, of their conditional acceptance of the majority report, the Operators also expressing their willingness to negotiate an agreement along the general lines suggested by the Board. In doing so, the Operators expressed a feeling that it was due to them that a limit should be placed upon the time in which the employés should signify their intention of proceeding with negotiations on these lines. The Board report was later referred by the Miners' Executive to a referendum vote of the employés, which was understood to have resulted in a majority against the acceptance of the Board findings.

The mines controlled by the members of the Western Coal Operators' Association, which were closed down in April last through the occurrence of this dispute, had not been reopened up to the end of August, with the exception of the mines at Corbin, in which operations were resumed early in August.

ROYAL COMMISSION ON INDUSTRIAL TRAINING AND TECHNICAL EDUCATION —INVESTIGATION OF CONDITIONS IN EUROPEAN COUNTRIES.

DURING the months of May, June, July, August and into the month of September the Royal Commission of Inquiry on the subject of industrial training and technical education, appointed by the Government of Canada, to which reference has been made in previous numbers of the *Labour Gazette*,¹ has been engaged in an investigation of the methods

of industrial training and technical education existing in the United Kingdom of Great Britain and Ireland, and in the principal countries of continental Europe. The Commission will shortly reassemble in Canada for completion of its inquiry into conditions in this country and in the United States; and will thereupon prepare a report for submission to the Minister of Labour, which will, it is expected, be presented to the Dominion Parliament at the next session, and will also be

¹See *Labour Gazette* for June, 1910, pp. 1407-1409; August, 1910, pp. 242-245; and June, 1911, pp. 1377-78.

published for the information of the Provincial authorities and all others concerned.

Following the meetings of the Commission in England and Scotland, referred to in the June number of the *Labour Gazette*, the Commission, as a whole, was occupied from May 22 to June 20 with visits of inquiry and investigation at Berlin, Munich, Zurich, Lyons, and Paris. Individual members of the Commission also visited other places between these, including Dresden, Leipsic, Geneva, and Basle. In each of the three countries visited during the period above mentioned the British Ambassador, or other British representative, had obtained the authority necessary to permit the Commission to visit the institutions concerned with technical education. Their interest in the Commission did not end with that. For example, at Berlin, Count de Salis, Counsellor to the British Embassy, gave the Commission almost daily attention and helpful service. At Munich and Zurich, and later at Berne, similar official assistance and personal courtesies were received.

In the several cities the members of the Commission were welcomed at representative institutions for industrial training and technical education, always with cordiality. In Germany and Switzerland the educational leaders readily discussed with the members of the Commission their problems and difficulties in connection with technical education, and how they were endeavouring to meet them.

After June 20, at Paris, the members separated to carry on inquiries and investigations in the particular departments which had been assigned to each.

Hon. Mr. Armstrong went to England, chiefly to study the relations between central and local authorities in education, particularly with regard to administration and finance.

Rev. Dr. Bryce went to England and afterwards to France and Germany to look into the relationship of universities to technical education and to visit some of the technical institutes for the higher branches of instruction.

Mr. Belanger and Mr. Bengough pur-

sued investigations in France, and Mr. Belanger, later on, at the end of July, spent a short time in Belgium. Mr. Bengough also visited some of the institutions in London for the promotion of art training.

Mr. Forsyth returned to Germany and visited a large number of the industrial centres on the western sides from Aix-la-Chapelle to Stuttgart, where he was joined by Dr. Robertson on July 7. Mr. Forsyth had been occupied chiefly in looking into industrial training and technical education as carried on in schools of secondary grade, and continuation classes for those who had left school and were employed in the industries or in commerce.

Mr. Simpson returned to England and devoted himself to the study of the attitude and relations of trades unions and labour leaders to technical education. To some extent, he looked into the conditions of living and the housing of the industrial workers. He also visited Germany and conducted an inquiry of a similar kind there, being joined for a short time by Dr. Robertson at Berlin.

Dr. Robertson, on leaving Paris on June 21, accompanied Mr. Belanger to a few places in France and afterwards went to Switzerland. There he visited a number of places (which had not been previously visited by the Commission) and obtained a fairly complete survey of the Swiss system of technical and industrial education for the various grades of its workers. Dr. Robertson then went on to Stuttgart, where he was joined by Mr. Forsyth. He also met Dr. Bryce there. Dr. Robertson and Mr. Forsyth travelled northeast through Germany, visiting many of the small places and learned by personal observation the character of the schools and the general living conditions of the industrial workers. Their chief objective from Stuttgart was Chemnitz. They afterwards stayed at Freiberg to see the Mining Academy and a special school for leather workers. From thence they visited Dresden, Berlin and Hamburg. Dr. Robertson and Mr. Forsyth then proceeded to Denmark where they spent a week looking particularly into the

work of the People's High Schools and the schools for agriculture and household science.

The Commission reassembled at London on Monday, July 31, and later visited Sheffield, where they had the advantage of being shown through the great iron-works of Messrs. Cammell Laird & Co.

On Thursday, August 2, the Commission left for Ireland and remained there until Thursday, August 10. During that week they were shown every kindness and given every help by the Vice-President of the Department of Agriculture and Technical Instruction and by Mr. T. P. Gill, Secretary of the Department. The Commission learned a great deal in Ireland concerning the effective organization of technical instruction and the administration of it for farmers and other rural workers as well as for the industrial workers in towns and cities.

After visiting Ireland, Dr. Robertson and Mr. Forsyth went through the Midlands of England in order to see some of the rural schools which had been specially indicated as having particularly good courses in nature study in connection with school gardens, or other features having a direct bearing on rural occupations.

Dr. Robertson thereafter spent some time in England and Scotland in order to obtain information concerning technical

instruction for those who are at work or preparing to work in connection with the fisheries; also to visit the weaving schools in the Galashiels districts of Scotland, and to look into the organization of education in the County of Fife which had been recommended as being particularly thorough and adapted to meet the needs of all classes of workers.

GOVERNMENT ANNUITIES.

The cost of a Canadian Government Annuity depends upon four things: 1, the age of the applicant; 2, the amount of Annuity required; 3, the age at which the Annuity is to commence; and 4, the plan on which the purchase is made. Tables which answer these questions have been published by the Department and may be had on application. Annuities are payable for life, but for a small additional payment may be guaranteed for a number of years certain, not exceeding twenty, so that should death occur before the guaranteed period expires the Annuity would be continued for the remainder of the twenty years to the Annuitant's legal representatives. By the latter plan the return of a specific sum is assured. Any other details of this important Annuity plan may be had on application to the Superintendent of Canadian Government Annuities, Ottawa. Postage free.

REPORT OF THE COMMISSION OF CONSERVATION ON LANDS, FISHERIES AND GAME, AND MINERALS.

A VALUABLE report of the Commission of Conservation of Canada has recently been issued, which deals with the lands, fisheries and game, and minerals of the Dominion. It contains twenty-nine illustrations, maps, and diagrams, and deals very fully with the subjects discussed.

Lands.

The section of the report dealing with lands contains an agricultural survey of the Dominion for 1910, an account of the work of the Committee of the Commission of Conservation on Lands, and statistics of the agricultural production in

Canada for the years 1891, 1901 and 1910. The agricultural survey contains the results of visits paid to a large number of farms in all the provinces of the Dominion. Each province is described separately, and the general results of the inquiry are given under the following headings: Rotation of Crops, Seed Selection, Manures and Fertilizers, Weeds, Insect Pests and Plant Diseases, Water Supply, Fuel, Typhoid, Stock, Grain, and General Remarks.

It was found that in nearly every province there was a failure on the part of a large proportion of the farmers to follow any systematic rotation of crops. A greater knowledge of weeds and injurious

pests was needed, and it was suggested that farmers should pay more attention to seed selection.

An opinion is expressed by the Committee on Lands that if the farmers on the average throughout Canada would farm as well as the fifty best farmers whose fields had been surveyed, the result would be the doubling of the quantity of field crops from the land now occupied, within a period of three years. It is suggested that one of the best means toward that result would be for municipal authorities, Provincial Governments, and the Federal powers to join in recognizing these best farmers as illustration farmers, and in holding up the example of their good practice in attractive ways in order that others might follow their systems and methods.

The agricultural statistics contained in this volume, taken from the Census Reports of 1891 and 1901, and from Bulletins of the Census and Statistics Office, show that the area in crops in Canada in 1891 was 15,662,811 acres. In 1901 it amounted to 19,763,740 acres, an increase of twenty-six per cent. and in 1910 to 32,711,062 acres, an increase of sixty-five per cent. over 1901. Wheat production increased from 42,223,372 bushels in 1891 to 139,989,600 bushels in 1910.

Fisheries and Game.

The section of the report dealing with fisheries and game contains a brief synopsis of the Federal and Provincial jurisdiction over fisheries and a summary of the principal laws and regulations. This is followed by an account of the North Atlantic Fisheries dispute.

In a chapter on the Canadian oyster industry it is shown that the production of oysters has greatly declined, notwithstanding the increased demand. The high point in the industry was reached in 1882, with a production of 64,646 barrels, but since 1901 the yield has never risen above 40,000 barrels. The cause of this decline is said to be a blind disregard for the future shown by those engaged in it, and by those charged with its protection. Great destruction was formerly caused by

ice fishing, which was not prohibited until the past decade. It used to be the practice also to sort the oyster catch on the beach, reserving the large oysters for sale, and leaving the small ones to rot on the shore. The great destruction, however, was caused by mud diggers, the farmers considering that the mud and oyster shells, with a large percentage of lime, were valuable as a fertilizer.

As a protection to the industry the close season has been lengthened, ice fishing has been prohibited, as also night and Sunday fishing, and a size limit has been established, so that no person is allowed to have in his possession round oysters of a diameter less than 3 inches or long oysters less than 3½ inches in diameter. Mud digging is prohibited within two hundred yards of any live oyster bed, and then may be prosecuted only at places prescribed by a fisheries officer. Effective protection of the oyster industry, however, has been hampered by a conflict of jurisdiction between the Dominion and Provincial Governments, and a test case is now pending in the courts.

A summary is given of the experiences of other countries with regard to this industry, and the methods adopted for its protection. It is shown that the prevention of the depletion of the oyster beds has invariably been found in the adoption of private oyster culture, recognizing the oyster beds as private property, and it is stated that the real rehabilitation of the oyster industry in Canada depends on the immediate establishment of oyster culture of this system.

It is pointed out that the whitefish of the Great Lakes is the most valuable commercial fish in Canada, but that their supply has been depleted through the use of large numbers of gill nets on the feeding grounds, and the destruction of the eggs and the fry by other fish. It is recommended that new hatcheries be built, and the present hatcheries be enlarged, to make it possible to increase the output to two billions of whitefish fry yearly.

An account is given of the fish and game found in the various Provinces, with brief summaries of the laws and regulations regarding them.

Minerals.

An account is given of the mining laws and regulations, both Dominion and Provincial, with regard to mines, and statistics are given with regard to the mineral resources of Canada and the annual production of minerals in each province or territory. With regard to the conservation of mineral resources, it is recommended that investigation should be carried on to determine the nature and extent of each of our important resources, the rate at which each resource is being utilized, the nature and extent of the waste in mining, extraction and use of each mineral product, how this waste can be prevented, to discover and develop substitutes which may take the place of products of importance, the supply of which is limited, and to discover methods for utilizing by-products or other materials for which, under existing conditions, there is no commercial demand, and which are therefore wasted.

An analysis of accidents in mines is given, in which it is shown that from 1900 to 1909 the average annual fatality rate per thousand men employed in coal mines in Canada was 4.79 and in the metal mines 3.82. The average rate of deaths in the principal mining countries of the world is given, in which it is shown that, with the exception of the Kimberley Diamond Mines and the Transvaal, where native and Chinese labour is employed, the fatality rate is considered lower elsewhere than in Canada. To take a few examples of the death rate in foreign countries among miners, by accidents, the rate in the metal mines of France was 20.2 per thousand, in Germany 10.7 in ore mines and smelting works, in Great Britain 11.4 in metalliferous mines, and in Italy 17.3 in metal and sulphur mines. An appendix to this volume contains a report of a Committee of the American Institute of Mining Engineers on uniform mining laws for the prevention of mine accidents.

DOMINION LEGISLATION AFFECTING LABOUR.

DURING the third session of the eleventh Parliament of Canada, which was prorogued July 29, one hundred and fifty acts received the royal assent.

In the previous issues of the *Labour Gazette*, reviews have appeared of proceedings in Parliament, during the session, of importance to industry and labour¹.

The Fisheries Act.

By an amendment to the Fisheries Act, licenses are required of all persons engaged in the manufacture from sea lions, hair seals, sharks, or dog fish, of oil and of other commercial products. Such a license shall not be granted until the Minister has approved of the site on which it is proposed to carry on such manufacture. This site must not be within fifty miles of any other reduction works used for a

similar purpose. The annual fee for this license is \$1.

The annual fee for a license for salmon canneries in British Columbia is fixed at \$50.

The annual fee for a license for a lobster cannery is at the rate of \$5 for the first 4,800 pounds of canned or cured lobsters and \$2 for each additional 4,800 pounds or fraction thereof, canned or cured under the license.

Owners or managers of lobster factories or canning establishments are required to furnish an annual return showing the number of fishermen and employes connected with their establishments, the numbers of traps used and lobsters caught, the returns to be made not later than May 31 instead of September 1, as before.

The Railway Act.

An Act was passed making some important amendments to the Railway Act. These have reference to the acquiring of lands for right of way, proceedings for

¹See the *Labour Gazette* for January, page 784; February, page 871; March, page 994; April, page 1142; May, page 1253; and August, page 102.

connections between intersecting Provincial and Dominion railways, liability for fire caused by locomotive, and rates to be charged for electrical power. Statistics and returns are required to be made to the Minister by all companies constructing or operating a line of railway in Canada, and also by telephone, telegraph, and express companies. Returns of accidents and casualties, whether to persons, to animals, or to other property, must be made annually or oftener by these companies, when occurring on their property. These returns must show (a) the causes and natures of such accidents or casualties, (b) the points at which such accidents or casualties occur, and whether by night or day, (c) the full extent of such accidents or casualties, and all the particulars thereof.

The Post Office Act.

An Act to amend the Post Office Act was passed, providing for the appointment of a Superintendent, at a salary of \$1,800, to any Post Office having a yearly revenue of \$800,000.

The salary of railway mail clerks was fixed at \$500 a year, with mileage, and a yearly increase of \$100 a year up to \$800, and \$50 a year thereafter until a maximum of \$1,400 is reached.

Legislation Affecting Transportation Interests.

During the session, seventy-six Acts were passed directly relating to transportation. These include an Act to amend the Railway Act, to which reference has been made above, an Act to amend the Department of Railways and Canals Act, and an Act relating to the Water-Carriage of Goods Act.

Provision was made for the payment of a subsidy of not more than \$25,000 per annum for not more than ten years for a steamship service between the Pacific Coast of Canada and China and Japan.

A list, alphabetically arranged, of the various Railway Companies, etc., affected by the legislation of the past session is as follows:—

Albert and Moncton Railway Company.—Incorporation.

Alberta Central Railway Company.—Act respecting.
Alberta Electric Railway Company.—Incorporation.
Alberta Railway and Irrigation Company.—Act respecting.

Algoma Central and Hudson Bay Railway Company.—Act respecting.

Alsek and Yukon Railway Company.—Act respecting.
Athabasca Northern Railway Company.—Act respecting.

ing.
Bay of Quinte Railway Company.—Act respecting.
British Columbia and Central Canada Railway Company.—Incorporation.

British Columbia and Dawson Railway Company.—Incorporation.

British Columbia and White River Railway Company.—Incorporation.

British Columbia Southern Railway Company.—Act respecting.

Brookville, Westport and Northwestern Railway Company.—Act respecting.

Buffalo, Niagara and Toronto Railway Company.—Act respecting.

Burrard, Westminster Boundary Railway and Navigation Company.—Act respecting.

Campbellford, Lake Ontario and Western Railway Company.—Act respecting.

Canadian Northern Ontario Railway.—An Act respecting aid towards the construction.

Canadian Inter-Mountain Railway Company.—Incorporation.

Canadian Northern Branch Lines Company.—Incorporation.

Canadian Northern Ontario Railway Company.—Act respecting.

Canadian Northern Quebec Railway Company.—Act respecting.

Canadian Pacific Railway Company.—Act respecting.

Canadian Western Railway Company.—Act respecting.

Cariboo, Barkerville and Willow River Railway Company.—Act respecting.

Chatham, Wallaceburg and Lake Erie Railway Company.—Act respecting.

Collingwood Southern Railway Company.—Act respecting.

Dominion Atlantic Railway Company.—Act respecting.

ing.
Georgian Bay and Seaboard Railway Company.—Act respecting.

Government of Canada.—Authorizing Government to acquire, by lease, a certain line of railway in the Province of New Brunswick.

Grand Trunk Railway Company of Canada.—Act respecting.

Grand Trunk Railway Company of Canada.—Act to amend an Act of the present session intituled "An Act respecting the Grand Trunk Railway Company of Canada."

Grand Trunk Pacific Branch Lines Company.—Act respecting.

Guelph and Goderich Railway Company.—Act respecting.

Hamilton, Waterloo and Guelph Railway Company.—Act respecting.

Hudson Bay, Peace River and Pacific Railway Company.—Incorporation.

Huron and Ontario Railway Company.—Act respecting.

ing.
Imperial Steamship Company.—Incorporation.

Imperial Traction Company.—Incorporation.

Indian River Railway Company.—Act respecting.

International Railway Company and International Traction Railways.—Act respecting.

Joliette and Lake Manuan Colonization Railway Company.—Act respecting.

Kettle River Valley Railway Company.—Act respecting, and to change its name to "The Kettle Valley Railway Company."

Kootenay and Arrowhead Railway Company.—Act respecting.

Lachine, Jacques Cartier and Maisonneuve Railway Company.—Act respecting.
 Lake Champlain and St. Lawrence Ship Canal Company.—Act respecting.
 Lake Erie and Northern Railway Company.—Incorporation.
 London and North Western Railway Company of Canada.—Act respecting.
 Manitoba and North Western Railway Company of Canada.—Act respecting.
 Manitoba Radial Railway Company.—Act respecting.
 Manitoulin and North Shore Railway Company.—Act respecting, and to change its name to "The Algoma Eastern Railway Company."
 Montreal Park and Island Railway Company.—Act respecting.
 Niagara, Welland and Lake Erie Railway Company.—Incorporation.
 Ontario and Abitibi Railway Company.—Incorporation.
 Ontario, Hudson's Bay and Western Railways Company.—Act respecting.
 Ontario-Michigan Railway Company.—Incorporation.
 Ontario Northern and Timagami Railway Company.—Act respecting.
 Orford Mountain Railway Company.—Act respecting.
 Ottawa, Northern and Western Company.—Act respecting.
 Pacific and Hudson Bay Railway Company.—Incorporation.
 Pacific and Peace Railway Company.—Incorporation.
 Pacific Northern and Omineca Railway Company.—Act respecting.
 Peoples Railway Company.—Act respecting.
 Pontiac Central Railway Company.—Act respecting.
 Quebec and New Brunswick Railway Company.—Act respecting.
 Quebec, Montreal and Southern Railway Company.—Act respecting.
 Railway Act.—Act to amend.
 Richelieu and Ontario Navigation Company.—Act to provide for increasing the capital stock.
 Saskatoon and Hudson Bay Railway Company.—Incorporation.
 Simcoe, Grey and Bruce Railway Company.—Incorporation.
 Southern Central Pacific Railway Company.—Act respecting.
 South Ontario Pacific Railway Company.—Act respecting.
 Walkerton and Lucknow Railway Company.—Act respecting.
 Water-Carriage of Goods Act.—Act to amend.
 Western Alberta Railway Company.—Act respecting.
 Western Canal Company.—Incorporation.
 Western Central Railway Company.—Act respecting.

Miscellaneous.

An Act was passed to amend the "Inspection and Sale Act," providing that when potatoes are sold or offered for sale by the barrel, the barrel will contain 160 pounds of potatoes.

An Act was passed to regulate the inspection and sale of seeds, providing for the marking of seed packages according to the proportion of noxious weed seeds contained in them, and assigning the maximum proportion of seeds of noxious weeds allowed.

The "Immigration Act of 1910" was amended by defining more clearly the meaning of sections relating to the deportation of undesirable immigrants.

An Act was passed prohibiting the improper use of opium and other drugs.¹

An Act was passed placing Japan on a favoured nation basis as regards the duties on imports from that country.

An Act was passed confirming the Waterways Treaty with the United States of June 11, 1909 and establishing a Commission in accordance with the terms of this Treaty.

Among the Bills that were introduced, but did not become law, were the following: Respecting hours of labour on public works; to prohibit the manufacture and importation of matches made with white phosphorus; respecting co-operative societies; respecting co-operative credit societies; to amend the "Railway Act"; respecting fortnightly payment of wages; to amend the "Chinese Immigration Act." The provisions of these bills have already been set forth in previous issues of the *Labour Gazette*.

¹See the *Labour Gazette* for February, page 873; and June, page 1374.

COMPARATIVE MARKET PRICES IN CANADA AND THE UNITED STATES.— AGRICULTURAL, FISHERIES, FOREST AND MINES PRODUCTS.—SPECIAL REPORT BY DEPARTMENT OF LABOUR.

A SPECIAL report on comparative market prices for agricultural, fisheries, forest and mines products in Canada and the United States, prepared by the Department of Labour, was tabled in the House of Commons by the Hon-

ourable the Minister of Labour on July 29 and was printed for distribution during August.

The report, which is a volume of 316 pages, is an outgrowth of the work in connection with the investigation of

prices begun by the Department of Labour some time ago. The relation of the report to that work may, therefore, receive a word of explanation.

Genesis of the Report.

It will be remembered that in August, 1910, the Department issued an extended report on the course of wholesale prices in Canada during the preceding twenty years (from 1890 to 1909, inclusive). This report aroused immediate and widespread attention as a result of the light which it threw on many aspects of the general economic situation, such as the comparative movement of prices in the different branches of industry and as between raw materials and manufactured articles, the causes of changes in the general price level, the effects of price changes, the cost of living, etc. Seeing that the articles covered in the report, 230 in number, were selected not only for their individual importance but with a view to illustrating production and consumption in Canada as a whole, the report lent itself to a variety of uses, prices being the most explicit manifestation of the working of a large number of economic forces.

This report—together with other information on the subject of prices and values compiled by the Department of Agriculture, the Department of Trade and Commerce, and the Department of Customs—is understood to have been of substantial service to those conducting negotiations during 1910 looking to a re-adjustment of tariff schedules between Canada and the United States, and was also frequently cited in the discussion arising out of the proposed reciprocal tariff agreement, especially in conjunction with corresponding publications issued by the Government of the United States, a considerable range of comparative price statistics being in this way rendered accessible. In view of the frequent demands made upon the Department for further data, it seemed advisable to assemble the statistics thus available in a form convenient for reference and to supplement the information thus provided by additional quotations, chiefly from the border

cities of the two countries. The result is the present volume.

Scope of the Statistics.

The statistics have been compiled and arranged with the special object of giving reliable data on prices respecting the commodities affected by the proposed reciprocal tariff agreement, and should prove of most material assistance in its elucidation.

No statistics of this nature, on a similar scale, and having direct bearing on the value of comparative markets, have previously appeared in either Canada or the United States. The return of the United States Tariff Board on Agricultural Products was almost entirely composed of census averages, which though valuable as showing tendencies of production and aggregate values from year to year, and in different sections of the country, are not sufficiently specific in character to throw light on the comparative merit of different markets, seeing that they take no account of differences in grading and classification, or the proportional extent of different grades.

The statistics in the report of the Department of Labour are made up entirely of prices paid in actual market transactions on both sides of the border. They cover the leading articles affected by the proposed reciprocal tariff agreement in the four primary industries of the Dominion, together with such manufactured products as represent the first stages of the manufacturing process from the raw material in these four fields. In the case of each one of the articles covered, one or more markets on each side of the border have been taken which would be fairly comparable in point of population, geographical situation, and distance from sources of supply. Generally speaking Halifax and Montreal are balanced with Boston and New York; Toronto with Buffalo and Detroit, and Winnipeg with Duluth, Minneapolis, and Chicago. Lack of continuous market quotations somewhat limited the scope of selection further west.

In order to give a fair survey of the field and to avoid abnormal conditions,

the report is extended over the past five and a half years, monthly quotations in each year being obtained. The sources of the data are the market reports of the daily press and of the various trade bulletins of the cities indicated. Reports of Boards of Trade and Chambers of Commerce are quoted where available, and in some cases statistics have been taken from the books of large and representative firms.

In order to facilitate the interpretation of the statistics, yearly averages have been worked out in each of the tables. At the close of each section of the report these averages are brought together in a table in which the parallel markets are balanced against each other and the final average for the entire five-year period indicated.

In view of the comprehensive and thorough nature of the statistics, the report will be of permanent value to students of comparative industrial and trade conditions in Canada and the United States, and of the general economic relationship of the two countries.

An outline of the plan of the volume is as follows:—

1. *Agricultural Products.*

- (a) Grains.
- (b) Fodder.
- (c) Dairy Produce.
- (d) Live Stock.
- (e) Meats.
- (f) Fruit and Vegetables.
- (g) Miscellaneous

2. *Fisheries Products.*

- (a) Prices paid to fisherman—
Fresh and dry fish.
- (b) Wholesalers' prices—Fresh,
salted and prepared fish.

3. *Lumber Products.*

- (a) Hemlock, Spruce, Cedar
Shingles, Hardwood and Pine.
- (b) Pulp and News Print Paper.

4. *Mines Products.*

Prefixed to each of these divisions is a brief analysis of the basis of comparison possible between the two countries. Prefacing the statistics relating to fish prices, for example, the following note appears.

Note on Fish Prices.

The statistics relating to fish prices as a whole are divided into two groups, namely, (1), comparative prices paid by wholesale dealers to boat fishermen, and (2), comparative prices quoted by wholesalers to the retail trade.

The statistics given under (1), namely those of prices paid to fishermen, cover a thoroughly representative range of Atlantic fish products. They may be divided into two series, (a) those relating to fresh fish, and (b) those relating to salted, and dried or "made" fish. The first of these subdivisions offers little difficulty, and a considerable range of directly comparable prices will be found below, though it will be noted that a more minute classification is employed at Boston than at Canadian points and that the list of fish quoted is larger. In the second subdivision, however, that relating to fish subjected to processes of curing by the fishermen themselves, it was found impossible to secure quotations that would admit of immediate comparison. This is because of the widely different methods which obtain in the dry-fish industry in the two countries. In Nova Scotia, the fish caught by the "bankers" and others engaged in this branch of the industry, after being cleaned and salted at sea, are landed, cured, and dried by the fishermen themselves, and are not disposed of to the wholesaler till the fish are ready for market, the great bulk of them going to the West Indies and South America, which demand a heavy-salted and hard-dried product. Some quotations, however, of the salted product, prior to its conversion into "made" fish were obtained at Canso. On the other hand, at Gloucester, Mass., which is the centre of the salt fish industry of the United States, the fish are all sold by the fishermen immediately on landing, in what is termed the "green" state, i. e. as cleaned and salted at sea, and are by the manufacturers finally cured and dried, or made into the other products which the market demands. That market is very largely the domestic market of the United States, and less heavy salting and quite different methods of drying and preparing from those em-

ployed in most sections of Canada are required. In balancing, therefore, the two tables given below of dry Nova Scotia and "green" Massachusetts fish prices, allowance must be made for the fact that the Nova Scotia product represents the completed manufacturing process and consequent increased expenditure of labour on the part of the fisherman. Accordingly, no summary of the yearly averages is appended to the tables.

A large number of tables of quotations of canned fish—including Pacific Coast salmon, lobster, sardines and mackerel—were collected, and are available in the Department, but were not published here—under owing to the difficulty of comparing brands and qualities.

Note on Comparative Lumber Prices.

In a similar connection the following note on some of the factors determining lumber prices occurs:—

To obtain statistics of lumber prices on a basis admitting of direct comparisons between Canada and the United States offers peculiar difficulties. These difficulties arise chiefly from two sources, (1) the absence of any uniform system of grading lumber in either country; and (2) the general conditions prevailing in the trade between the two countries. Brief references to each of these features may be made in turn:

(1) *Absence of uniform system of grading.*—Notwithstanding repeated attempts to establish systems of grading on both sides of the international boundary, the trade is for practical purposes without recognized standards of quality. Especially is this true of pine which constitutes a most important part of the Canadian export trade with the United States. This is largely the result of the varying conditions which determine quality in lumber. Localities often within short distances of each other produce standing timber of different characteristics. Again, one tree in the same locality differs from another; log from the same tree differs from log; board from the same log differs from board. In a rough way the nature of the output of the different mills is known to the trade; but it remains true

that almost every transaction between the mills and the wholesaler, and between the wholesale and retail trade, is highly individualized, and that the definition of grades becomes in the final resort a matter largely of personal judgement. Almost every millman and dealer has his own method of sorting and classifying boards, and even where the same terminology is employed, the quotations may be for widely different articles. Further, such distinctions as the following occur frequently: at Buffalo, boards designed for local consumption will be found to be quoted in certain instances at different prices from the same boards in the same yards when re-sorted for shipment to outside points. Printed records of lumber prices are accordingly somewhat rare, and where they exist are offered chiefly as approximations within considerable ranges requiring an amount of interpretation that renders direct comparisons hazardous.

(2) *Features of trade in lumber between Canada and the United States.*—It follows from the above that in an inquiry into comparative lumber prices reliance must be had chiefly on the opinion of those in the trade, especially those engaged in business on both sides of the boundary. The consensus of opinion among several millmen and wholesalers in Canada and the United States was that the course of the lumber trade is at present affected but slightly by international considerations. The chief markets of the lumbermen of Ontario and Eastern Canada are three in number: the home market; the United States market; and the British market. The influence of these markets on current prices varies in different sections of the country. In the same section, moreover, at different times the flow into the markets in question fluctuates according to conditions therein of supply and demand. It frequently happens that most of the output from a particular section will go in one season to a particular market, while in the following season the main current may be in quite another direction. As a generalization, the United States offers a steady demand for the better grades of Canadian soft lumber though the poorer qualities also find a

market, more or less restricted and variable in character, south of the international boundary. The area within which Canadian lumber can be successfully marketed in the United States is largely determined by freight rates relatively to the situation of areas producing similar or interchangeable grades in the United States themselves. Georgian Bay pine, for example, can meet the pine of Wisconsin and Minnesota (which is generally of better quality) in the Buffalo market, but finds the pressure of competition increasingly powerful in markets further west. The products of the Quebec limits meet those of Georgia and the other southern States in the eastern cities of the United States. On the other hand, some southern pine finds its way north to Ottawa, turpentine, in the case of southern forests, yielding a return almost as valuable as the lumber. In all cases, of course, the special qualities of the products create a market for themselves. In the hardwoods, for example, most of the oak consumed in Ontario is received from the United States, owing to the superiority of the southern oak over that produced in many parts of Ontario. On the other hand, Ontario birch flows south, being generally superior in quality, to that produced south of the line. In the west a considerable amount of low-grade lumber is shipped from Minnesota and Wisconsin to the Northwest Provinces, but the keen demand for the higher grades of pine in the United States keeps most of these qualities at home. Northern Ontario and British Columbia meet most of the demand in the Northwest Provinces, British Columbia being able to compete successfully with Washington and Oregon owing to lower stumpage rates and the less costly methods of logging which in many sections are possible.

In view of the above, it was the consensus that, quality for quality, and other things being equal, distance from the mills is the chief factor in determining prices of lumber in Canada and the United States. In most cases prices are higher in the United States than in Canada, seeing that the chief movement in lumber is from Canada to the United States. In a few cases, however, the opposite

is true, and oak is ordinarily higher in Toronto than in Buffalo, though birch is higher in Buffalo than in Toronto. An example typical of many others is as follows: At Liverpool, N.S., surfaced hemlock boards (planed on one side) were quoted during June, 1911 at \$12.25 per M, f.o.b. These landed in the Boston market would stand as follows:—

Cost f.o.b. Liverpool.....	\$12 25
Freight.....	3 00
Duty.....	1 25
Commission (5 p.c.).....	0 90
Interest.....	0 40
Insurance.....	0 45
Total.....	\$18 25

In Boston at the same date this lumber was selling at \$18.50-\$19.00 in competition chiefly with Pennsylvania hemlock which is generally somewhat inferior in toughness to the Nova Scotia product.

The accompanying tables of prices are presented, not as affording direct means of comparison—though grades as nearly as possible corresponding to each other have been selected—but as of interest, subject to the interpretation which the trade will be able to give them, as showing the general tendency of lumber prices in the two countries during the past few years.

COMPARISON OF YELLOW PINE AND DOUGLAS FIR.

WOOD-USING industries in Canada reported to the Forestry Branch for 1910 the use of \$542,000 worth of yellow pine and \$69,500 worth of Douglas fir.

From scientific investigation and experiment it has been ascertained that our native Douglas fir could in many instances replace yellow pine as at present used in Canada. Yellow pine is necessarily all imported from the United States, and if a species of native wood could be introduced to take the place of yellow pine, the change would be of great benefit in the development of Canadian industry. Douglas fir is a lighter wood than yellow pine and has a greater limit of elasticity,

that is, stands more bending without taking a permanent set. Likewise, compression perpendicular to grain is resisted equally by both species. In the western states the uses of this wood are being rapidly extended and its recently discovered qualities are introducing it for purposes for which previously only yellow pine was thought fitted. Douglas fir is a light and strong wood easily worked. For railway cars and vehicles it is used throughout the United States,

where its elasticity and durability recommend it for nearly all purposes except where a hardwood has to be used. Because of its beauty of grain and the attractive effects which may be obtained by staining, it is very popular for inside panel work, door and window frames and cheap classes of furniture, particularly "mission" furniture. Furniture, car and vehicle manufacturers would benefit if Douglas fir was used to a greater extent in Canadian manufacture.

NOVA SCOTIA LEGISLATION AFFECTING LABOUR, 1911.

A COPY of the public statutes of Nova Scotia passed during the Fifth Session of the Thirty-fourth Legislative Assembly of Nova Scotia, was received at the Department of Labour during August, by courtesy of the King's Printer, Nova Scotia.

In the course of the session, assent was given to one hundred and sixty Acts. Of these the following was the most important from the standpoint of industry and labour.

Regulations for the Use of Lamps in Coal Mines.

An Act was passed to amend the Coal Mines Regulation Act of 1908, in which it is provided that in every mine in which closed safety lamps are required under the provisions of the Act, there shall be provided at or in the mine such lighting stations as the extent and nature of the workings require. Every mine examiner, while in the discharge of his duties, is required to use a locked safety lamp, and to observe such provisions as to being accompanied by an employé of the Company and such other precautions as to safety as the Commissioner may from time to time prescribe by regulations approved by the Governor-in-Council. On the recommendation of any member of the Board of Examiners appointed under the provisions relating to stationary engineers, the inspector may grant special permits to engineers to take charge of a steam plant, and engineers to take charge of stationary en-

gines for limited periods. A special permit, however, shall not be valid after the holding of the regular examination of candidates for engineers' certificates next following the granting of such permit.¹

Other Legislation Relating to Mines.

An Act was passed authorizing the Governor-in-Council to make regulations prescribing the terms and conditions upon which a person who stakes off land under the provisions of the Mines Act may receive a license or lease, and these terms may be different from those prescribed by the Mines Act in other cases.²

An Act was passed permitting any Company incorporated for the purpose of mining or drilling for oil or gas, which is the owner or lessee of mineral or oil rights other than as lessee from the Crown, to acquire lands, lakes, or streams for mining purposes, as set out in Section 63 of the Mines Act, for the purpose of laying and maintaining pipe lines. These lands, lakes or streams, or rights therein, may be acquired by such a Company to the same extent and in the same manner as if it were a lessee from the Crown under the Mines Act. Such a Company may construct roads, subways, pipe lines or conduits over, along, under or across any rivers or streams that are not navigable, and any highway, subject to regulations by the Municipal Council of the district.³

¹Nova Scotia Statutes, 1911. Chapter 30.

²Nova Scotia Statutes, 1911. Chapter 8.

³Nova Scotia Statutes, 1911. Chapter 9.

The Mines Regulation Act of 1908 is amended with regard to its application, making the Act apply to mines of coal, stratified ironstone, shale or fire-clay, where such minerals are held under lease from the Crown or are the property of the owner of the soil.¹

Dominion Coal Company Employes' Benefit Society.

An Act was passed to incorporate the Dominion Coal Company Employes' Benefit Society, for the purpose of:

1. Protecting the interests of its members who shall be employes of the Company, and to promote the principles of good will and humanity amongst them, both in their relations as fellow-employes and as servants of the Company;

2. Providing benefits to such of its members as may become entitled to the same under the Constitution and By-Laws of the society;

3. Providing allowances of money to members when by reason of illness or bodily injury they are unable to follow their regular employment and are deprived of their usual wages or salary;

4. Providing grants of money to the representatives of deceased members;

5. Providing old age and disability pensions.

The society is authorized to possess real estate not exceeding \$10,000 in value, and is required to invest its funds in the manner prescribed by the Trustee Act and Acts in amendment thereof, or in debentures, bonds, or mortgages of any company incorporated by charter or Act of Parliament and paying a dividend. The liability of members of the society is limited to the amount of their assessment. The affairs of the Society shall be controlled by a Board of Directors, to be chosen in the manner prescribed by the constitution and by-laws of the society, but the Governor-in-Council may appoint a representative on this Board.²

Incorporation of the Co-operative Association, Limited, of Sydney, Nova Scotia.

An Act was passed incorporating the Co-operative Association, Limited, of

Sydney, N.S. The object of this Association is to carry on a retail business on co-operative lines, dividing the profits in proportion to the amount of each member's payments for goods purchased from the Company. The capital stock of the Company is fixed at \$20,000, divided into shares of \$5 each. The liability of each shareholder is limited to the amount of stock held by him, less the amount paid on the same. The Company is authorized to hold and dispose of real estate not exceeding the value of \$20,000. A director must hold at least five shares in the Association, but no person can hold more than sixty shares.³

Construction and Maintenance of Public Highways.

An Act was passed providing for an examination and survey under the Commissioner of Public Works and Mines of the different highways of the Province, such examination to show the best and most practicable methods of road construction and repair in the Province, the location, quantity, quality and cost of road-making material, and the most effective method for the construction and maintenance of roads and bridges. The Commissioner may employ experts and assistants for this investigation, and is required to have a report prepared on this subject at the next session of the Legislature.⁴

Miscellaneous.

An Act was passed authorizing the granting of aid to Electric Railways.⁵

An Act was passed creating the office of Superintendent of Neglected and Dependent Children, in the Department of the Attorney-General, his duties to be to encourage and assist in the organization and establishment of Children's Aid Societies, to visit and inspect reformatories, industrial schools, detention and temporary homes or shelters, charitable institutions and foster homes, and to perform the duties of Chief Probation Officer for Juvenile Delinquents under the Juvenile Delinquents Act, 1908.⁶

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF AUGUST, 1911.

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals, which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

THE general clause for the protection of labour was inserted by the Department in the following contracts awarded during May, 1911:

PUBLIC BUILDING, STRATHCONA, ALTA.

Public building, Strathcona, Alta.
Name of contractor, M. A. Pigott & Son,
Kenora, Ont. Date of contract, June 18,
1911. Amount of contract, \$47,894.

Trade or Class of Labour.	Rate of Wages, Not less than:
Stonecutters.....	\$.62½ per hr., 8 hrs. p. d.
Bricklayers.....	.60 " 8 "
Masons.....	.60 " 8 "
Carpenters.....	.43½ " 8 "
Joiners.....	.43½ " 8 "
Stairbuilders.....	.43½ " 8 "
Plasterers.....	.60 " 8 "
Lathers.....	.04½ per yard.
Painters and glaziers.....	.45 per hr., 8 "
Plumbers.....	.56½ " 8 "
Steamfitters.....	.56½ " 8 "
Sheet metal workers.....	.43½ " 8 "
Electrical workers.....	.40 " 8 "
Builders' labourers.....	.28½ " 8 "
Ordinary labourers.....	.25 " 9 "
Driver, one horse and cart..	3.50 per day, 9 hours.
Driver, 2 horses and wagon	5.00 " 9 "

PUBLIC BUILDING, TIGNISH, P.E.I.

Public building, Tignish, P.E.I. Name
of contractor, J. M. Clark, Summerside,
P.E.I. Date of contract, July 18, 1911.
Amount of contract, \$19,000.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenters.....	\$1.75
Joiners.....	2.00
Bricklayers.....	3.00
Masons.....	2.50
Stonecutters.....	3.00
Painters and glaziers.....	1.75
Plasterers.....	2.50
Plumbers and steamfitters..	2.00
Sheet metal workers.....	2.00
Builders' labourers.....	1.50
Ordinary labourers.....	1.25
Electricians.....	2.00
Driver, one horse and cart..	2.50
Driver, 2 horses and wagon	3.50

PUBLIC BUILDING, GRAND FORKS, B.C.

Public building, Grand Forks, B.C.
Name of contractor, B. Lequime, Grand
Forks, B.C. Date of contract, August 1,
1911. Amount of contract, \$43,202.

Trade or Class of Labour.	Rate of Wages, Not less than:
Stonecutters.....	\$.62½ per hr., 8 hrs. p. day
Bricklayers.....	.62½ " 8 "
Masons.....	.62½ " 8 "
Carpenters.....	.50 " 8 "
Joiners.....	.50 " 8 "
Stairbuilders.....	.50 " 8 "
Plasterers.....	.62½ " 8 "
Lathers.....	3.00 per M.
Painters and glaziers.....	.50 per hr., 8 "
Plumbers.....	.62½ " 8 "
Steamfitters.....	.62½ " 8 "
Sheet metal workers.....	.50 " 8 "
Structural iron workers50 " 8 "
Electrical workers.....	.50 " 8 "
Builders' labourers.....	.43½ " 8 "
Ordinary labourers.....	.37½ " 8 "
Driver, horse and cart.....	4.50 per day 9 hours.
Driver, team and wagon....	7.00 " 9 "

POST OFFICE FITTINGS, OTTAWA, ONT.

Post Office fittings, Ottawa, Ont.
Name of contractor, R. A. Sproule,
Ottawa, Ont. Date of contract, August
2, 1911. Amount of contract, \$1,100.

FAIR WAGES CLAUSE.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life and property, or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the Contractor.

WHARF, FASSET, QUE.

Wharf, Fasset, Que. Name of contractors, T. & J. Moran, Arnprior, Ont.

Date of contract, August 4, 1911.
Amount of contract, \$5,955.40.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter.....	\$2.50
Masons.....	3.50
Carpenters.....	2.00
Hoist runner.....	2.00
Fireman.....	1.50
Drillers.....	1.75
Blacksmiths.....	2.00
Blacksmiths' helpers.....	1.50
Powderman.....	2.00
Quarrymen.....	1.50
Labourers.....	1.50
Driver, 1 horse and cart....	2.00
Driver, 2 horses and wagon	3.00

GARAGE, RIDEAU HALL GROUNDS, OTTAWA,
ONT.

Garage, Rideau Hall Grounds, Ottawa,
Ont. Name of contractor, A. G. Marshall,
Ottawa, Ont. Date of contract,
August 4, 1911. Amount of contract,
\$15,100.

Trade or Class of Labour.	Rate of Wages, Not less than:
Stonecutters.....	\$.44 per hr., 8 hrs. p. day.
Bricklayers.....	.52 " 8 "
Masons.....	.52 " 8 "
Carpenters.....	.30 " 9 "
Plasterers.....	.42½ " 9 "
Painters and glaziers.....	.30 " 9 "
Plumbers and steamfitters..	.39 " 9 "
Sheet metal workers.....	.35 " 9 "
Electrical workers.....	.27 " 9 "
Builders and labourers.....	.28 " 8 "
Common labourers.....	.20 " 9 "
Structural steel workers....	.35 " 9 "
Driver, 1 horse and cart....	.35 " 9 "
Driver, 2 horses and wagon	.45 " 9 "
Lathers.....	1.75 per 1000.

CONSTRUCTION OF THREE DUMP SCOWS,
VANCOUVER, B.C.

Construction of three dump scows,
Vancouver, B.C. Name of contractors,
George Stewart, Edward Choate and
N. J. Mayhew, Vancouver, B.C. Date
of contract, August 4, 1911. Amount of
contract, \$22,200.

FAIR WAGES CLAUSES.

All mechanics, labourers or other persons who perform
labour in the construction of the work hereby contracted
for shall be paid such wages as are generally accepted
as current for competent workmen in the district in
which the work is being performed, and if there is no
current rate in such district, then a fair and reasonable

rate, and shall not be required to work for longer hours
than those fixed by the custom of the trade in the dis-
trict where the work is carried on, except for the pro-
tection of life or property or in case of other emergencies.
In the event of a dispute arising as to what is the current
or a fair and reasonable rate of wages, or what are the
current hours fixed by the custom of the trade, it shall be
determined by the Minister of Labour whose decision shall
be final.

These conditions shall extend and apply to moneys
payable for the use or hire of horses or teams, and the
persons entitled to payment for the use or hire of horses
or teams shall have the like rights in respect of moneys
so owing them as if such moneys were payable to them
in respect of wages.

In the event of default being made in payment of any
money owing in respect of wages of any mechanic,
labourer or other person employed on the said work, and
if a claim therefor is filed in the office of the Minister of
Public Works, and proof thereof satisfactory to the
Minister is furnished, the said Minister may pay such
claim out of any moneys at any time payable by His
Majesty under said contract and the amounts so paid
shall be deemed payments to the Contractor.

PUBLIC BUILDING, SHAWINIGAN FALLS,
QUE.

Public building, Shawinigan Falls, Que.
Name of contractor, A. Durand, Joliette,
Que. Date of contract, August 4, 1911.
Amount of contract, \$32,860.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenters.....	\$2.50
Bricklayers.....	4.50
Masons.....	4.00
Stonecutters.....	4.00
Painters and glaziers.....	2.00
Plasterers.....	4.00
Plumbers and steamfitters..	2.50
Sheet metal workers.....	2.50
Electricians.....	2.50
Builders' labourers.....	1.75
Common labourers.....	1.50
Driver, one horse and cart..	2.50
Driver, 2 horses and wagon	4.00

BREAKWATER, BREEN'S POND, N.S.

Breakwater, Breen's Pond, N.S. Name
of contractor, Thos. D. Morrison, d'Es-
couisse, N.S. Date of contract, August
8, 1911. Amount of contract, \$13,190.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter.....	\$2.50
Carpenters.....	2.00
Blacksmiths.....	2.00
Blacksmiths' helpers.....	1.50
Ordinary labourers.....	1.50
Driver, one horse and cart..	2.50
Driver, 2 horses and wagon	4.00

PUBLIC BUILDING, WETASKIWIN, ALTA.

Public building, Wetaskiwin, Alta. Name of contractor, The Brown Construction Company, Limited., of Winnipeg, Man. Date of contract, August 15, 1911. Amount of contract, \$25,650.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Stonecutters.....	\$5.50
Bricklayers.....	5.50
Masons.....	5.50
Carpenters.....	4.00
Joiners.....	4.00
Stairbuilders.....	4.00
Plasterers.....	5.50
Lathers.....	.04 per yard.
Painters and glaziers.....	3.50
Plumbers and steamfitters..	5.00
Sheet metal-workers.....	3.75
Electrical workers.....	3.00
Builders' labourers.....	2.75
Ordinary labourers.....	2.50
Driver, one horse and cart..	3.00
Driver, 2 horses and wagon	4.50

PUBLIC BUILDING, HUMBOLDT, SASK.

Public building, Humboldt, Sask. Name of contractor, The Brown Construction Company, Limited., of Winnipeg, Man. Date of contract, August 16, 1911. Amount of contract, \$37,673.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Stonecutters.....	\$5.00
Bricklayers.....	5.00
Masons.....	5.00
Carpenters.....	3.00
Joiners.....	3.50
Stairbuilders.....	4.00

Lathers.....	.04 per yard
Painters and glaziers.....	3.00
Plumbers.....	4.50
Steamfitters.....	4.50
Tinsmiths.....	3.50
Metal roofers.....	3.50
Electrical workers.....	3.50
Builders' labourers.....	2.25
Ordinary labourers.....	2.00
Driver, one horse and cart..	3.50
Driver, 2 horses and wagon	4.50

PUBLIC BUILDING, ROCK ISLAND, QUE.

Public building, Rock Island, Que. Name of contractor, N. A. Beach, Georgeville, Que. Date of contract, August 12, 1911. Amount of contract, \$17,750.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenters.....	\$2.25
Joiners.....	2.50
Bricklayers.....	4.00
Masons.....	3.50
Stonecutters.....	3.60
Painters and glaziers.....	2.25
Plasterers.....	3.50
Plumbers and steamfitters..	2.50
Sheet metal workers.....	2.25
Electricians.....	2.50
Builders' labourers.....	1.75
Ordinary labourers.....	1.50
Driver, one horse and cart..	2.00
Driver, 2 horses and wagon	3.00

BREAKWATER, POINT SAPIN, N.B.

Breakwater, Point Sapin, N.B. Name of contractor, Warren Taylor, Salisbury, N.B. Date of contract, August 17, 1911. Amount of contract, \$16,890.

Trade or Class of Labour.	Rate of Wages, Per day of 10 Hours, Not less than:
Foreman carpenter.....	\$2.50
Foreman mixing concrete..	1.75
Foreman laying concrete...	1.75
Foreman stone crusher....	1.75
Carpenters.....	1.75
Blacksmiths.....	2.00
Blacksmiths' helpers.....	1.50
Ordinary labourers.....	1.25
Driver, one horse and cart..	2.00
Driver, 2 horses and wagon	3.00

PUBLIC BUILDING, CRANBROOK, B.C.

Public building, Cranbrook, B.C. Name of contractor, McCallum & Co., Cranbrook, B.C. Date of contract, August 19, 1911. Amount of contract, \$43,833.

Trade or Class of Labour.	Rates of Wages, Not less than:
Stonecutters.....	\$5.00 per day, 8 hours.

Making and repairing miscellaneous articles of Postal Stores.....	28.00
Making and supplying articles of official uniform.....	8,573.86

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE SECOND QUARTER OF 1911.

THE upward trend of wages continued during the spring months of the present year, the changes being particularly numerous in the building trades. There were also many instances of a reduction in working hours. The principal change in hours affected bartenders of the Province of Quebec, and was due to the action of the Provincial government in causing the bars to be closed at eleven o'clock instead of twelve on Mondays to Fridays, and at seven o'clock instead of twelve o'clock on Saturdays. Apart from occasions when there was a decrease in weekly earnings owing to a reduction in working hours, the only reduction in wages was in the case of thirty

iron moulders at Guelph, Ont., who accepted a reduction in piecework prices. The number of changes reported was sixty-six, of which fifty-five consisted of increases in wages, three of reductions of hours, seven of increases in wages and reductions in hours, and one a reduction in wages. In the following table an analysis is presented showing the approximate aggregate results according to industries and groups of trades of the several changes of the quarter, in so far as detailed information was obtained by the Department. The table, however, is only an approximation, as exact particulars were not in every case available.

TABLE SHOWING BY INDUSTRIES AND GROUPS OF TRADES, THE RESULTS OF CHANGES IN WAGES AND HOURS OF LABOUR IN CANADA, DURING THE SECOND QUARTER OF 1911.

Industry or Group of Trades.	Approximate Number of Employés Affected.	Total Increase in Weekly Earnings.	Total Decrease in Weekly Earnings.	Total Increase in Hours of Employment Per Week.	Total Decrease in Hours of Employment Per Week.

Changes by Industries and Groups of Trades.

Lumbering.—On May 1, 140 broad axemen, narrow axemen, and boomsmen at Sillery, Que., received an advance of forty cents per day, upon the request of the trade union, making the wages of the broad axemen \$13.20 in place of \$10.80 per week of fifty-nine hours, and narrow axemen and boomsmen \$12 in place of \$9.60.

Building trades.—On May 1, 400 bricklayers and masons at Ottawa, Ont., received an advance in wages from fifty cents to fifty-two cents per hour, and a reduction in hours from nine to eight. This was equivalent to a reduction of five hours per week, and a decrease in wages amounting to \$2.12 per week. One hundred bricklayers and masons at Berlin, Ont., were granted a reduction in hours from fifty-four to forty-eight hours per week. Fifteen hundred bricklayers at Toronto, Ont., received an advance of two and one half cents per hour, equivalent to an increase in wages of \$1.10 per week. Seventy-eight bricklayers at Brantford, Ont., received an increase from forty-five to forty-eight cents per hour. During June, bricklayers and masons at Saskatoon, Sask., received an advance from sixty cents to sixty-five cents per hour. Seven hundred bricklayers at Brandon, Man., received an increase from sixty cents to sixty-five cents per hour. Two hundred and twenty-five bricklayers and masons at Calgary, Alta., received an increase from sixty-two and one half cents to sixty-

seven and one half cents per hour.

On May 1, 225 builders' labourers at Ottawa, Ont., received an advance of twenty-five to twenty-eight cents per hour and a reduction in hours. On May 19, 150 builders' labourers at Berlin, Ont., received an increase of two cents per hour and a reduction in hours from nine to eight, making a weekly reduction in their wages of seventy-two cents.

On May 1, 250 carpenters at St. John, N.B., had their wages increased by fifty cents per day, equivalent to an advance from \$15 to \$18 per week. From 3,500 to 4,000 carpenters at Toronto, Ont., received an increase in wages of two cents per hour, making an advance from \$15.40 to \$16.28 per week. Carpenters at Welland received an increase in wages from thirty cents to thirty-five cents per hour, minimum. On May 18, 100 carpenters at Brandon, Man., received an advance from thirty-five cents to forty cents per hour. On April 10, 1,850 carpenters at Vancouver, B.C., received an increase from \$4 to \$4.50 per day. On May 16, 2,800 carpenters of Victoria, B.C., received an advance from \$4 to \$4.25 per day. In the month of June, 1,500 carpenters at Montreal, Que., received an advance equivalent to ten per cent. of their wages, and during May and June, 300 carpenters at Hamilton, Ont., received an increase from thirty-five cents to forty cents per hour.

On April 1, 100 painters and paper hangers at Ottawa, Ont., received an increase of three cents per hour, on a scale ranging from twenty-five to thirty-three cents per hour.

On May 15, fifty plasterers of Victoria,

B.C., received an increase from \$5 to \$5.50 per day, and on May 1, 200 plasterers' labourers at Toronto, Ont., received an increase from thirty and one half to thirty-two and one half cents per hour.

On May 1, sixty-four plumbers, roofers, and tinsmiths at Quebec, Que., received an advance in wages of one cent per hour; sixty plumbers and steamfitters at Hamilton, Ont., received an advance from thirty-seven and one half cents to forty cents per hour. Twenty-five plumbers, tinsmiths, and steamfitters at St. Catharines, Ont., had their wages increased from thirty cents to thirty-five cents per hour, and seven plumbers' helpers and improvers at St. Catharines received an advance of fifteen cents to eighteen cents per hour, the fourth year helpers to get an additional twenty-five cents per day. Sixty plumbers, steamfitters, and gasfitters at Victoria, B.C., received an advance from \$4.50 to \$5.00 per day.

On April 1, 130 stonecutters at Calgary, Alta., received an increase from sixty-two and one half cents to sixty-five cents per hour, making an advance of \$1.10 per week. On May 1, 700 stonemasons at Toronto, Ont., received an advance from fifty cents to fifty-two and one half cents per hour.

On April 16, 118 employés of a construction company at Vancouver, B.C., received an advance in wages amounting to \$1.50 per week, six blacksmiths having their wages advanced from \$3.50 to \$3.75 per day, three cement workers from \$3.25 to \$3.50 per day, nine drillers from \$3 to \$3.25 per day, and 100 labourers from \$2.50 to \$2.75 per day.

Metal trades.—Six hundred car workers at Winnipeg, Man., received an advance of two cents per hour on May 1, and an additional advance of two cents per hour on June 1. During May, 400 electrical linemen at Toronto, Ont., received an advance in wages from a scale of twenty-five, twenty-eight and thirty-one cents per hour to a scale of twenty-seven and one half, thirty and one half and thirty-three and one half cents per hour. During May, telephone employés of the Alberta Government received an advance in wages, the electrical linemen being advanced from

\$3 to \$3.75 per day, telephone exchange foremen and cable men from \$3.75 to \$4.50 per day, foremen in charge of telephone plants from \$100 to \$110 per month, and telephone trouble men from \$80 per month, with no extras, to \$3.50 per day, with overtime and incidentals. On May 1, sixty-five electrical workers at Hamilton, Ont., received an advance of five cents per hour. On May 25, twenty-five electrical workers at Halifax, N.S., received an advance from twenty-five cents to twenty-seven cents per hour, and in June, 100 electrical workers (interior wiremen), at Calgary, Alta., were granted an increase from a sliding scale of thirty-five to fifty cents to a minimum scale of fifty cents per hour.

The horseshoers of Stratford, Ont., raised their prices from thirty-five to forty cents for sizes 5 to 7, and fifty cents to sixty cents for wagon-tiring.

Thirty iron moulders at Ottawa, Ont., received an advance in wages from \$2.50 to \$2.75 per day, and seventy sheet metal workers at Ottawa received an advance from thirty cents to thirty-five cents per hour, these increases dating back to January 1.

In May, 257 iron moulders and core makers at Toronto received an advance in wages equivalent to from \$16.75 to \$17.25 per week. Thirty iron moulders at Guelph, Ont., suffered a decrease, in May, through the reduction of piece work prices. On April 1, fifteen iron moulders and five machinists at Calgary, Alta., had their wages increased from \$20.70 to \$23.60, and hours reduced from fifty-nine to fifty-five per week.

Woodworking trades.—On April 6, forty-two billiard factory hands at Toronto, Ont., received an increase in wages of one and one half cents per hour, after a strike.

Food and tobacco preparation.—On March 17, seventy brewery workers at Berlin, Ont., received an increase in wages of \$1 per week, and a reduction in hours of one in summer and two in winter. In June, eighty-five brewery workers at Hamilton, Ont., received an increase in wages from \$12 to \$13 per week.

On May 1, the hours during which bars may remain open in the Province of

Quebec were reduced by ten a week, through action of the Provincial government, and the working hours of bartenders were correspondingly reduced.

Railway service.—Seventy-five railway machinists at St. Thomas Ont., received an advance in wages from thirty-one and one half cents to thirty-four and one half cents per hour, dating back to February 1. In June, twenty freight handlers and checkers at Ottawa, Ont., received an advance in wages from a scale of \$1.55 to \$1.65 per day to a scale of \$1.65 to \$1.75 per day.

General transport.—In May, 100 teamsters at Lethbridge, Alta., had their wages increased from \$60 and \$65 to \$70 and \$75 per month, and 225 teamsters at Victoria, B.C., received an increase in wages from \$2.50 and \$2.75 to \$2.75 and \$3 per day. On June 1, twenty-five conductors and motormen of the Guelph Radial Railway Company were granted an advance of one cent an hour, increasing their wages from \$12.58 to \$13.26 per week.

Miscellaneous trades.—On June 1, nine broom tyers at Toronto, Ont., received an increase in wages from \$9 to \$12 per week. On June 1, forty-five paper makers at Ottawa, Ont., were granted a reduction in working hours from eleven and thirteen to eight per day, their wages being correspondingly reduced.

Public employés.—The maximum salaries of eight teachers in Sarnia, Ont., were advanced from \$1,600 to \$1,800 from \$1,500 to \$1,600 and from \$1,000 to \$1,200 per year. Policemen at Windsor, Ont., received an advance from \$750 to \$775 per year.

Unskilled labour.—On June 12, fifty civic labourers of St. John, N.B., received an increase in wages from \$1.50 to \$1.75 per day. The wages of civic labourers at Calgary were increased to twenty-eight cents per hour, and the wages of the same class of labour were increased from thirty-seven cents to forty-five cents per hour at Prince Rupert B.C.

TRADE DISPUTES DURING THE MONTH OF AUGUST, 1911.

A PART from a general strike of coal miners in Alberta and Eastern British Columbia, which had continued since April, there was little disturbance of industry through strikes and lockouts during August. All the new disputes were of brief duration, and none of them were of great magnitude.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The number of trade disputes reported to have been in existence in Canada during August was fourteen, a decrease of five, compared with July (including one July dispute only reported in August), and the same number as in August, 1910. About forty-five firms and 8,114 employés were involved in these disputes, twelve firms and 415 employés being involved in new disputes of the month.

Loss of time in working days.—The loss of time to employés through trade disputes during August was approximately 203,200 working days, compared with a loss of 303,100 days in July, and 62,600 in August, 1910.

Trades affected by new disputes.—The following table shows the trades affected by new disputes, and the number of employés in each group of trades.

Trades.	No. of disputes.	No. of employés.
Building trades.....	2	40
Metal trades.....	1	100
General transport.....	1	275
Total.....	4	415

Localities affected by new disputes.—One new dispute took place in the province of Quebec, one in Ontario, and two in Alberta.

Causes of disputes.—The following were the causes of the new disputes of the month:—

Cause.	No. of disputes.
For higher wages and shorter hours.....	2
Alleged infraction of fair wages schedule....	1
Delay in payment of wages.....	1
Total.....	4

Methods of settlement.—Of the fourteen disputes in existence during August, six were terminated, leaving eight in existence at the end of the month. Two disputes were settled by negotiations between the parties concerned, one by the places of the strikers being filled, one partly by negotiations, and partly by the places of the strikers being filled. In one case work was resumed on the removal of the cause of the dispute, and in the remaining case work was resumed pending investigation by the Department of Labour.

Results of disputes.—Of the six disputes that were terminated during the month, two resulted in favour of the employers, and two in favour of the employés. In one a compromise was reached, and in one the strikers were partially successful, nine firms out of ten having granted their demands.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes of previous months which were still in continuance during August comprised strikes of coal miners in Alberta and British Columbia, carpenters at Montreal, Que., and Calgary, Alta., painters at Port Arthur, Ont., iron moulders at London, Ont., warehousemen at Montreal, Que., pulp mill hands at St. George, N.B., garment and electrical workers at Toronto, Ont., and a lockout of carpet weavers at Toronto, Ont.

Strike of Coal Miners in Alberta and Eastern British Columbia.

A strike of coal miners in Alberta and Eastern British Columbia, which began on April 1, continued throughout August, no settlement being reached. About sixteen companies and 7,000 men were involved in this dispute. In the course of the month it was reported that one company at Coleman, Alta., employing about one hundred men, has re-opened its mine. No other change in the situation took place during the month.

Strike of Carpenters at Montreal, Que.

A strike of carpenters at Montreal, Que., which began on July 18, was terminated on August 18. The cause of the dispute was the refusal of the employers to grant a demand for an increase in wages from 30 to 35 cents an hour. About ten firms and 800 men were originally involved in this dispute, but during July all but two firms, employing 150 men, had granted the increase demanded, and in August the only employers involved were the Montreal Harbour Commissioners and Peter Lyall and Sons, Limited. On August 18, the former, employing 110 men, granted the demand. The latter firm filled the places of the strikers, and the men who had gone out procured work elsewhere.

Strike of Carpenters at Calgary, Alta.

No settlement was reported in the case of a strike of eighty-eight carpenters at Calgary, Alta., who went out on June 20. The cause of the dispute was the objection of the men to the employment of a particular person.

Strike of Painters at Port Arthur, Ont.

No settlement was reported in the case of a strike of ninety painters at Port Arthur, Ont., which took place on April 17, on account of the refusal of the employers to grant a demand for an increase in wages from 35 to 40 cents per hour and recognition of the union.

Strike of Iron Moulders at London, Ont.

No settlement was reported in the case of a strike of iron moulders at London, Ont., which began on June 5, on account of the refusal of the employers to grant the same minimum wage for a nine-hour day which had been paid for a day of ten hours. Three firms and sixty men were involved in this dispute.

Strike of Pulp Mill Hands at St. George N.B.

No settlement was reported in the case of a strike of fifty pulp mill hands at

St. George, N.B., which began on April 26, on account of the refusal of the employers to grant a demand for an eight-hour day instead of a day of eleven and thirteen hours, with an increase in minimum wages.

Strike of Warehousemen at Montreal, Que.

On July 31, a strike of about 150 warehousemen took place at Montreal, Que., on account of the refusal of the employers to grant a demand for increase in wages from 25 to 30 cents an hour. On August 3 it was reported that the places of the strikers were filled.

Strike of Garment Workers at Toronto, Ont.

No settlement was reported in the case of a strike of about thirty-five garment workers at Toronto, Ont., who stopped work on June 28, on account of the refusal of their employers to grant certain changes in the conditions of employment. The changes involved the adjustment of piece work prices by a committee, the distribution of work so that all employés could have a share, and the payment of all employés, including pressers, by piece work. It was also recommended that persons should only be engaged or discharged if the committee on prices considered the reason for doing so sufficient.

Strike of Electrical Workers at Toronto, Ont.

No settlement was reported in the case of a strike of electrical workers at Toronto, Ont., who went out on June 21, on account of the refusal of the employers to grant the men an increase of wages from 35 to 40 cents per hour. About twenty firms and 100 employés were originally affected by this dispute, but during July fourteen firms had granted the increase demanded, and only twelve men, employed by six firms, were involved during the month of August.

Lockout of Carpet Weavers at Toronto, Ont.

No change was reported in the case of a lockout of 114 carpet weavers employed with the Toronto Carpet Manufacturing Company at Toronto, Ont., which took place March 26.

New Disputes.

The new disputes of the month comprised strikes of stonecutters at Quebec, Que., teamsters at Edmonton, Alta., plumbers and steamfitters at Berlin and Waterloo, Ont. and electrical linemen at Edmonton, Alta.

Strike of Stonecutters at Quebec, Que.

On August 3, twenty stonecutters employed on the new Customs House at Quebec declared a strike, alleging that a sub-contractor who was cutting some of the stone outside of Quebec was not paying the rate of wages required by the Fair Wage Schedule. Work was resumed on August 11, pending an investigation by the Department of Labour. The Department was subsequently informed by the contractor for this work at St. Marc des Carriere that he was paying his men 40 cents per hour for an eight hour day, as required by the Fair Wage Schedule.

Strike of Teamsters at Edmonton, Alta.

On August 8, a strike of teamsters, members of the Team Owners' Association, took place at Edmonton, Alta. The object of the dispute was to procure from the Municipality of Edmonton a rate of wages amounting to 80 cents per hour, and a ten hour day. On August 9, the request of the teamsters was granted by the Municipality. It was reported by the Team Owners' Association that 160 men were directly involved in this dispute, and 115 were indirectly affected. Three firms were also directly affected.

Strike of Plumbers and Steamfitters at Berlin and Waterloo, Ont.

A strike was declared on August 21, by fourteen plumbers and steamfitters employed by six firms at Berlin and Waterloo, Ont., six men being indirectly affected by the dispute. The object of the strike was to secure an increase in wages and shorter hours of labour. On August 22, an agreement was reached, according to which they received 30 cents

<i>General transport—</i> Teamsters.....	Edmonton, Alta. . .	For rate of 60 cents an hour and a ten-hour day.....	1	3	160	Aug. 8 Aug. 9 Demand of teamsters granted.

Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

per hour, with Saturday afternoons off, until November 1, after which date they would be granted 35 cents per hour, with a nine-hour day, and Saturday afternoons off.

Strike of Electrical Linemen at Edmonton, Alta.

On August —, about 100 electrical linemen employed by the Provincial

Government of Alberta stopped work at Edmonton, Alta., on account of a delay in the payment of their wages. The wages were paid on the following day, and work was resumed.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of August, and which have been reported to the Department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF AUGUST, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 237 individual work people in Canada during the month of August, 1911, were reported to the Department of Labour. Of these 104 were fatal and 133 resulted in serious injuries. In addition six fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before August, 1911.

In the preceding month there were ninety-two fatal and 195 non-fatal accidents reported, a total of 287, and in August, 1910, there were eight-two fatal and 140 non-fatal accidents, a total of 222. The number of fatal accidents reported in August, 1911, was, therefore, twelve more than in the preceding month and twenty-two more than in August, 1910. The number of non-fatal accidents reported in August, 1911 was sixty-two less than in the preceding month and seven less than in August, 1910. Altogether there were fifty industrial accidents reported in August, 1911, less than in the preceding month and fifteen more than in the same month of the preceding year.

Of 237 returns received during the

month giving the ages of the victims of industrial accidents, thirteen referred to persons under twenty-one years of age, fifty-six to persons between twenty-one and forty-five, and twenty-four to persons over forty-five. One hundred and forty-four persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING AUGUST 1911, BY INDUSTRIES AND TRADES.

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman were: the foundering of a tug boat in Georgian Bay, in which the captain and

his wife, and a crew of eight were drowned; a collision on the Grand Trunk Pacific Railway line, near Regina, Sask. in which five men were killed; and a head-on collision on the line of the Canadian Pacific Railway, at St. Cuthbert, Que., in which three railway employ  s were killed.

Drowning of Crew of Tug-boat, off French River, Georgian Bay.

On the night of Monday, August 21, the barge *Albatross* in tow by the tug *C. C. Martin* of Midland, Ont., foundered and sank, carrying the tug down with it. The crew of the barge made their escape, but were unable to warn the crew of the tug-boat, which carried, besides the captain and his wife, a crew of eight, all of whom perished.

Fatal Train Wreck, Near Regina, Sask.

In a collision which occurred on the Grand Trunk Pacific Railway line near Regina, Sask., on August 28, five construction hands were killed, two of them instantly. The men were sitting on the rear end of a caboose which collided with a flat car.

Fatal Collision Near St. Cuthberts, Que.

On August 15, three railway employ  s were killed and one badly injured in a head-on collision of two Canadian Pacific Railway trains which occurred while passing through St. Cuthberts station yard. The dead included the firemen of both trains and one brakeman. The engineer of one of the trains was badly injured.

Record by Industries and Groups of Trades.

A detailed record of the industrial accidents of the month, by industries and groups of trades, is as follows:—

Agriculture.—There were five fatal and eleven non-fatal accidents in August, 1911, compared with eleven fatal and fifteen non-fatal accidents in July, and fourteen fatal and nineteen non-fatal accidents in August, 1910. Of the fatal accidents, four were caused by falls, and one by victim being crushed.

Fishing and hunting.—There were two fatalities in August, compared with none in July and none in August, 1910. The fatalities were caused by drowning after persons were swamped in a storm.

Lumbering.—There were four fatal and seven non-fatal accidents in August, compared with one fatal and six non-fatal accidents in July, and seven fatal and eight non-fatal accidents in August, 1910. Of the fatal accidents, two were caused by drowning, one by a fall, and one by flying machinery.

Mining.—There were three fatal and one non-fatal accident in August, compared with four fatal and four non-fatal accidents in July, and nine fatal and eleven non-fatal accidents in August, 1910. Of the fatal accidents, two were caused by falls, and one by victim being struck by ore cars.

Building trades.—There were twelve fatal and eleven non-fatal accidents in August, compared with eight fatal and thirty-eight non-fatal accidents in July, and five fatal and sixteen non-fatal accidents in August, 1910. Of the fatal accidents, ten were caused by falls, one by person being struck by machinery, and one by person being crushed.

Metal, engineering, and shipbuilding trades.—There were six fatal and ten non-fatal accidents in August, compared with twelve fatal and thirty-two non-fatal accidents in July, and nine fatal and seventeen non-fatal accidents in August, 1910. Of the fatal accidents, three were electrocuted, one by being struck by machinery, and one by victim being caught in machinery.

Woodworking trades.—There was one fatal and seven non-fatal accidents in August, compared with one non-fatal accident in July, and two non-fatal accidents in August, 1910. The fatality was caused by flying material.

Printing and allied trades.—There were two non-fatal accidents in August, compared with four non-fatal in July, and one non-fatal accident in August, 1910.

Clothing trades.—There were no accidents reported in August, compared with one non-fatal accident in July, and none in August, 1910.

Textile trades.—There were two non-

Brick manufacturer.....	Evelyn, Ont.....	" 16	1	Buried in collapsing kiln.
Fruit dealer's employé	Toronto, Ont.....	" 20	1	Fell under lorry.
News agent.....	London, Ont.....	" 23	1	Fell down stairs.
Night watchman.....	Toronto, Ont.....	" 2	1	Run over by street car.
Brickmaker.....	Port Credit, Ont.....	" 26	1	Fell into clay hopper.
<i>Unskilled labour—</i>				
Labourer.....	Sooke, B.C.....	" 7	2	Premature explosion.
"	Calgary, Alta.....	" 11	1	Electrocuted.
"	Calgary, Alta.....	" 7	1	Electrocuted.
"	Montreal, Que.....	" 15	1	Fell from gangway.
"	Montreal, Que.....	" 9	1	Run over by engine.
"	St. Catharines, Ont.....	" 25	1	Electrocuted.
"	Vancouver, B.C.....	" 26	1	Killed by blast.
"	Toronto, Ont.....	" 29	1	Lumber falling.
"	Walkerville, Ont.....	" 10	1	Iron collar fell and struck him on the head
"	Levis, Que.....	" 17	1	Fell off wharf and drowned.
"	Guelph, Ont.....	" 31	1	Crushed by gravel.
"	Weyburn, Sask.....	" 29	1	Run over by handcar.
<i>Public employés—</i>				
Teamster.....	Lethbridge, Alta.....	" 15	1	Run over by wagon.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN AUGUST, 1911.

Surveyor.....	Fort McMurray, Alta.....	July 25	1	Drowned.
Deckhand.....	Gulf of Georgia, B.C.....	" 29	1	Washed overboard.
Miner.....	Michel, B.C.....	" 30	1	Car fell on deceased.
"	Salmo, B.C.....	June 27	1	Struck by falling timber.
"	Rossland, B.C.....	July 17	1	Killed by blast.
Watchman.....	Quebec, Que.....	" 31	1	Drowned, fell off vessel he was watching.

fatal accidents in August, compared with none in July, and one non-fatal accident in August, 1910.

Food and tobacco preparation.—There was one fatal accident in August, compared with one fatality in July, and two non-fatal accidents in August, 1910. The fatality was caused by a fall.

Leather trades.—There were no accidents reported during August, compared with none in July, and one non-fatal accident in August, 1910.

Railway service.—There were twenty-three fatal and twenty-seven non-fatal accidents reported in August, compared with nineteen fatal and thirty-one non-fatal accidents in July, and eighteen fatal and twenty-one non-fatal accidents in August, 1910. Of the fatal accidents, ten were caused by victims being run over, nine persons met death in collisions; two from falls from engines, one by being struck by a train and one in which engineer leaped from engine and died of injuries received.

Navigation.—There were twenty fatal and four non-fatal accidents reported in August, compared with eighteen fatal and nine non-fatal accidents in July, and nine fatal and four non-fatal accidents in August, 1910. Of the fatal accidents, eighteen were due to drowning; one to a fall, and one in which victim was burned to death.

General transport.—There were eight fatal and sixteen non-fatal accidents in August, compared with three fatal and eight non-fatal accidents in July, and eleven non-fatal accidents in August, 1910. Of the fatal accidents, three were caused by trains striking victims; one each by a fall, collision, falling material, and machinery.

Public employés.—There was one fatal accident reported in August, compared with one fatal and nine non-fatal accidents in July, and seven non-fatal accidents in August, 1910. The fatality was caused by person being run over.

Miscellaneous.—There were five fatal and twelve non-fatal accidents in August, compared with five fatal and seventeen non-fatal accidents in July, and five fatal and ten non-fatal accidents in August, 1910. Of the fatal accidents, two were caused by falls; two by persons being run over; and one by collapse of a kiln.

Unskilled labour.—There were thirteen fatal and twelve non-fatal accidents in August, compared with seven fatal and twenty non-fatal accidents in July, and six fatal and nine non-fatal accidents in August, 1910. Of the fatal accidents, three were caused by electrocution; three by persons being run over; two by falls; two by premature blasts; two by falling material, and one in which the victim was crushed.

RETAIL PRICES OF STAPLE COMMODITIES IN CANADA.

The information in the present article has been furnished by correspondents of the *Labour Gazette*, under detailed instructions from the Department as to sources of information, quality of goods to be quoted, &c.

THERE was a general advance in the price of eggs and butter during August, compared with the previous month. In many localities eggs were scarce, while the dry weather in many parts of Ontario caused scarcity of butter. There were many changes in the price of potatoes, and the general trend was downward, owing to a more plentiful supply of the new crop. In some localities, however, the new crop was light, owing to dry weather. The price of coal tended to advance, and there was a

marked increase in price at Calgary, Alta. owing to the strike of coal miners in the west.

Notes on Retail Prices.

Beef.—There was an increase in the price of both sirloin steak and shoulder roast at Niagara Falls, Ont., and St. Catharines, Ont., an increase in sirloin steak at Hull, Que., and increase in medium chuck at Sault Ste. Marie, Ont., and Lethbridge, Alta. There was a decrease in the price of sirloin steak and medium chuck at London, Ont., and Winnipeg, Man. There was a decrease in sirloin steak at Peterborough, Ont., and decrease in

medium chuck at Chatham, Ont., Calgary, Alta., and Victoria, B.C. The advance in price of sirloin steak at Niagara Falls was stated to be due to a greater demand. The decrease in the price of medium chuck at Calgary, Alta., was due to better supply, and the decrease at Victoria, B.C., was reported to be due to a decrease in wholesale prices.

Veal.—The price of veal advanced at St. Hyacinthe, Que., Sault Ste. Marie, Ont., and Lethbridge, Alta., and declined at London, Ont., and Calgary, Alta.

Mutton.—The price of mutton increased at St. Hyacinthe, Que., St. Catharines, Ont., and Lethbridge, Alta., and declined at Sydney, N.S., Montreal, Que., Niagara Falls, Ont., Calgary, Alta., and Victoria, B.C. The decrease in price at Sydney, N.S., was said to be due to the difference in quality offered; at Niagara Falls, Ont., the decline was attributed to decreased demand during the summer. The decline at Calgary was said to be due to a better supply, and at Victoria, B.C., a reduction in retail prices followed a decrease in the wholesale rates.

Pork.—The price of pork, both fresh and salt, advanced at St. Catharines, Ont., Sault Ste. Marie, Ont., and Winnipeg, Man., and the price of fresh pork advanced at Westville, N.S., Hull, Que., Toronto, Ont., and Hamilton, Ont., and salt pork increased in price at St. Thomas, Ont. There was a decrease in the price of both fresh and salt pork at Three Rivers, Que., Niagara Falls, Ont., and Lethbridge, Alta. Fresh pork declined in price at St. Hyacinthe, Que., and Victoria, B.C., while the price of salt pork declined at Hull, Que. The increase in the price at Winnipeg, Man., was due to advance in the price of hogs. At Hamilton, Ont., the advance in the price of fresh pork was due to an increased demand, while at Niagara Falls, Ont., the decrease in the price of both fresh and salt pork was attributed to a decrease in the demand during the summer.

Bacon.—The price of bacon advanced at St. John, N.S., St. Hyacinthe, Que., Hull, Que., St. Catharines, Ont., Woodstock, Ont., Victoria, B.C., and Nanaimo, B.C., while the price declined at Westville, N.S., Moncton, N.B., Three Rivers,

Que., St. Thomas, Ont., and Chatham, Ont.

Fish.—The price of fish advanced at Sorel, Que., Niagara Falls, Ont., and Lethbridge, Alta., while there was a decrease at Victoria, B.C., owing to a plentiful supply.

Lard.—The price of lard advanced at St. Hyacinthe, Que., Sault Ste. Marie, Ont., and Calgary, Alta., and declined at Newcastle, N.B., Hull, Que., St. Thomas, Ont., and Victoria, B.C.

Eggs.—There was a general advance in the price of eggs throughout the country, increases having been noted at the following places: Sydney, N.S., Westville, N.S., Charlottetown, P.E.I., Moncton, N.B., St. John, N.B., Fredericton, N.B., Newcastle, N.B., Three Rivers, Que., Sorel, Que., St. Hyacinthe, Que., St. Johns, Que., Montreal, Que., Hull, Que., Ottawa, Ont., St. Catharines, Ont., Stratford, Ont., London, Ont., Sault Ste. Marie, Ont., Winnipeg, Man., Regina, Sask., Calgary, Alta., Edmonton, Alta., Lethbridge, Alta., Vancouver, B.C., Victoria, B.C., and Nanaimo, B.C. The only places where decrease in the price was quoted were Peterborough, Ont., and St. Thomas, Ont. In most districts the cause of the advance was attributed to scarcity of eggs.

Milk.—An advance in the price of milk was reported at Montreal, Que., St. Catharines, Ont., Chatham, Ont., Windsor, Ont., and Victoria, B.C. At Chatham, Ont., the increase was stated to have been due to poor pasture, and to have been made by an agreement of the dealers. At Victoria, B.C., the increase was reported to be due to a limited supply.

Butter.—The price of butter increased at Sydney, N.S., Charlottetown, P.E.I., Moncton, N.B., St. John, N.B., Fredericton, N.B., Newcastle, N.B., Three Rivers, Que., Sherbrooke, Que., St. Hyacinthe, Que., Maisonneuve, Que., Montreal, Que., Hull, Que., Ottawa, Ont., Toronto, Ont., St. Catharines, Ont., Hamilton, Ont., Brantford, Ont., Guelph, Ont., Berlin, Ont., Woodstock, Ont., Stratford, Ont., London, Ont., St. Thomas, Ont., Sault Ste. Marie, Ont., and Victoria, B.C. The only localities reporting a decrease in price were Peterborough, Ont., Chatham, Ont., Winnipeg, Man., and Edmonton,

RETAIL PRICES OF STAPLE ARTICLES OF

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month prevailing in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement usually occupied by workmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the the Department.

5. Lignite quoted at \$4.00 per ton at Edmonton.

6. Bacon at Sault Ste. Marie sold for 20 cents per pound by

the piece and 23 cents sliced.

7. Rolled oats sold for 6 lbs. for 25 cents at Sault Ste. Marie.

8. Bread at Regina also sold at 4 lbs. for 25 cents.

9. Delivery of coal at Nanaimo charged extra.

Alta. In many parts of Ontario the advance was attributed to dry weather causing poor pasture.

Cheese.—There was an advance in the price of cheese at St. John, N.B., Newcastle, N.B., and St. Thomas, Ont., and a decrease at Sorel, Que., and Winnipeg, Man.

Bread.—The price of bread remained stationary, except at Port Arthur and Fort William, where there was an increase.

Flour.—There was an increase in the price of flour at Hull, Que., and Sault Ste. Marie, Ont., and a decrease at Niagara Falls, Ont.

Rolled Oats.—The price of rolled oats increased at Toronto, Ont., and St. Thomas, Ont.

Rice.—There was a decrease in the price of rice at St. Thomas, Ont., Winnipeg, Man., Lethbridge, Alta., and Nanaimo, B.C.

Beans.—There was an increase in the price of beans at Vancouver, B.C., and a decrease at Lethbridge, Alta., and Nanaimo, B.C.

Apples.—Evaporated apples increased in price at Newcastle, N.B., and decreased at Peterborough, Ont., and St. Thomas, Ont.

Prunes.—There was an increase in the price of prunes at Newcastle, N.B., and St. Johns, Que., and a decrease at St. Thomas, Ont., Brandon, Man., and Nanaimo; B.C.

Sugar.—The price of granulated and yellow sugar advanced at Halifax, N.S., Newcastle, N.B., Ottawa, Ont., Peterborough, Ont., Woodstock, Ont., St. Thomas, Ont., Winnipeg, Man., Calgary, Alta., Edmonton, Alta., and Nanaimo, B.C. Granulated sugar increased at Montreal, Que., St. John, N.B., and Victoria, B.C., and yellow sugar increased in price at Westville, N.S. The price of both granulated and yellow sugar declined at London, Ont., and Lethbridge, Alta. Among the causes to which the increase in the price of sugar were attributed were failure of the British beet crop and an advance in the price of foreign raw sugar, which was followed by an advance in wholesale prices. The rise in the price of sugar at Niagara Falls was attributed to the in-

creased demand during the canning season.

Tea.—The only changes in tea reported were an increase in the price of green tea at Sydney, N.S., attributed to an improvement in quality, and a decrease at Lethbridge, Alta.

Coffee.—There was a decrease in the price of coffee at Lethbridge, Alta.

Potatoes.—Potatoes rose at Westville, N.S., Moncton, N.B., Sorel, Que., St. Johns, Que., Ottawa, Ont., Kingston, Ont., Peterborough, Ont., Berlin, Ont., Stratford, Ont., Windsor, Ont., Brandon, Man., and Lethbridge, Alta., while there was a decrease at Sydney, N.S., Halifax, N.S., St. John, N.B., Quebec, Que., Three Rivers, Que., Sherbrooke, Que., St. Hyacinthe, Que., Maisonneuve, Que., Montreal, Que., Toronto, Ont., Brantford, Ont., London, Ont., St. Thomas, Ont., Sault Ste. Marie, Ont., Port Arthur, Ont., Fort William, Ont., Winnipeg, Man., Calgary, Alta., Vancouver, B.C., Victoria, B.C., and Nanaimo, B.C. Where advances took place, they were due to the exhaustion of the supply of old potatoes and only a small quantity of the new crop being available. In some localities there was a scarcity of new potatoes, on account of dry weather. In localities where the price of potatoes was lowered, it was due to a greater abundance of new potatoes.

Vinegar.—The only change in the price of vinegar was at Vancouver, B.C., where there was a decrease when sold in bulk.

Starch.—There was a decline in the price of laundry starch at Sydney, N.S., St. Thomas, Ont., and Winnipeg, Man.

Coal.—The price of both anthracite and bituminous coal advanced at Niagara Falls, Ont., St. Catharines, Ont., and Calgary, Alta. The price of anthracite advanced at Halifax, N.S., Sherbrooke, Que., and Peterborough, Ont. The only decrease in the price of coal took place at St. Hyacinthe, Que. The advance at Halifax, N.S., and Niagara Falls, Ont., was due to the general practice of dealers in those places in increasing the price as the summer advances. At Berlin, Ont., the advance was attributed to an increase in price at the mines. At Calgary, Alta., the advance was attributed to the strike

of coal miners, necessitating the importation of coal from the United States.

Wood.—The price of hardwood advanced at Woodstock, Ont., and Sault Ste. Marie, Ont., and soft wood advanced at Winnipeg, Man. The cause of these increases was attributed to a limited supply.

Coal Oil.—The price of coal oil advanced at Westville, N.S., and Newcastle, N.B., and declined at Sherbrooke, Que.

Rent.—There was an upward tendency in rents of workingmen's dwellings at Sorel, Que., St. Thomas, Ont., and Brandon, Man.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during the month of August, 1911.

ONTARIO REPORTS.

Agricultural Co-operation.

Ontario Department of Agriculture, Bulletin 192. *Agricultural Co-operation*, by S. E. Todd, B.S.A., Toronto, King's Printer, 1911, pages 51.

A BULLETIN has been issued by the Ontario Department of Agriculture on Agricultural Co-operation. The progress of the movement in Europe is briefly outlined. A description is given of the methods of agricultural co-operation in Canada and the United States. It is stated that the movement originated about the year 1849, by the establishment of co-operative credit banks in Germany. Out of these credit societies there grew up supply and marketing associations, and the success of agriculture today is largely due to co-operative organization. In Denmark the highest degree of attainment has been reached in agricultural co-operation. The movement began by the establishment of the first co-operative store in 1866. In 1882 the first co-operative dairy was established, and in 1887 the first bacon factory was established. The first egg-export society was formed in 1895, and in 1906 the first shipping association. At the present time, it is estimated that eighty per cent. of the dairy products and sixty per cent. of the bacon are handled co-operatively. Under co-operation, the butter trade of Denmark has increased from seventeen million dollars in 1882 to fifty-five million dollars in 1908. In the dairy societies of Denmark the principle of unlimited liability is followed, each member assuming full

responsibility for all the liabilities of the association. There are produce societies which manage and protect the members and they are united under the marketing associations. A butter quotation committee watches the markets and furnishes quotations to the societies. The bacon and similar societies are modelled after the dairy associations, but egg-export societies are somewhat different. The form adopted with regard to the latter is to have small associations which employ men to gather the eggs of the members, and deliver them to the railway stations, for shipment, consigned to stores and packing houses, which now take the responsibility of marketing. Before the eggs leave an individual member of the society he marks them with a number given to him by the Society, so that if the eggs are found to be bad they can be traced to the place of production.

With regard to co-operation in Canada it is stated that the lack of understanding on the part of those attempting organization has been prevalent, and only lately has the true co-operative idea begun to make way. The chief fields of organization among Ontario farmers have been wholesale and retail supplies, dairying, bacon-curing, and fruit marketing. There are at present thirty-six so-called co-operative fruit associations in Ontario, but some of these are organized in the form of joint-stock companies. In investigating the failures of several fruit associations, the following causes were stated to be the principal ones: 1. Lack of knowledge of the co-operative idea. 2. The society was a joint-stock company. 3. The acreage of fruit was so small that a successful business could not be built up. 4. Bad management.

An account is given of the proper method of organization, and the form of a constitution and by-laws which is suited to any co-operative association where capital is needed to carry on business.

The Porcupine Gold Area.

Twentieth annual report of the Bureau of Mines, 1911, Vol. XX, Part II. Toronto, King's Printer, 1911. Pages 39.

In a report issued by the Ontario Bureau of Mines on the gold area of the Porcupine District, an account is given of the geological formation and of the character of the gold-bearing deposits there. It is stated that while gold veins occur over a wide area they occur in groups along certain lines, and the ore is of a streaky character. The distribution of the gold is generally irregular, occurring along one or both walls of a mine, while other portions of the vein may be very low-grade. The ore from most of the properties investigated was found to be largely free milling, while the concentrates should be amenable to cyanide treatment. An account of each of the various mines and veins in the District is given. Three valuable water-powers are described within easy radius of the Porcupine gold area. An account is also given in this report of the Alexo-Nickel deposit which is situated in Dundonald Township, Northern Ontario.

BRITISH COLUMBIA REPORT.

Mineral Production of British Columbia.

Annual report of the Minister of Mines of the Province of British Columbia, for the year ending December 31, 1910. Victoria, King's Printer, 1911.

In the annual report of the Minister of Mines of British Columbia for 1910, it is stated that the total production of mineral in that province from 1852 to 1910, amounted in value to \$374,197,650. Of this amount, \$114,012,596 represents the production value of coal and coke; \$71,213,103 the production of placer gold; \$60,811,067, lode gold, and \$60,743,405 copper. During the year 1910 the total production was \$26,377,066, compared with \$24,443,025 in 1909. The most important mineral in the value of

output during 1910 was coal, which amounted to 2,800,046 tons, and valued at \$9,800,161. The value of lode gold amounted to \$5,533,380 and copper \$4,871,512. The mineral production of districts and divisions showed a value of \$7,635,890 for the Coast Districts; \$6,998,519 for the Boundary District; \$6,121,832 for the East Kootenay District; and \$5,088,186 for the West Kootenay District.

UNITED STATES REPORTS.

Industrial Conditions in Massachusetts.

Fortieth annual report on the Statistics of Labour of the Commonwealth of Massachusetts, for the year 1909. Boston: State Printers, 1911. Pages, 404.

The Report on the Statistics of Labour of Massachusetts for 1909 comprises four parts, of which the first deals with changes in rates of wages and hours of labour during the year, the second with strikes and lockouts, and the third with labour organizations. Part IV contains a memorial of the late Carroll D. Wright, formerly chief of the Bureau of Statistics of Labour of Massachusetts.

The statistics of wages and hours of labour show that in 1907 there was a net weekly increase in wages in Massachusetts amounting to \$141,635, in 1908 there was a weekly decrease amounting to \$89,567, but in 1909 there was again an increase amounting to \$17,393. In 1909, 18,133 persons received increases, and 196, including 110 in the flax, hemp, and jute industries, sustained decreases.

The number of strikes in Massachusetts in 1909 was 183, compared with ninety-eight in the previous year, but the loss of time was only 228,363 days in 1909, compared with 325,015 days in 1908.

Industrial Conditions in New York.

Tenth annual report of the Commissioner of Labour, for the twelve months ended September 30, 1910. Albany, N. Y., State Department of Labour, 1911. Pages, 328.

The Tenth Annual Report of the Commissioner of Labour of the State of New York, contains, in addition to the Report of the Commissioner, seven appendices, dealing with the following subjects:

1. Financial Report of the Department.

2. General Report of Bureau of Factory Inspection. 3. General Report of Bureau of Mediation and Arbitration. 4. General Report of Bureau of Mercantile Inspection. 5. Index of Bills and Laws Relating to labour in the legislative session of 1910. 6. Labour laws in force October 1, 1910. 7. Opinions of Attorney-General in 1910, construing provisions of the Labour Law.

OTHER REPORTS RECEIVED.

Canada.—Department of Mines. Annual report of the Division of Mineral Resources and Statistics on the Mineral Production of Canada during the Calendar Year, 1909.

Ontario.—Report of the Ontario Veterinary College, 1910.

Annual report of the Inspector of Registry Offices for the Province of Ontario, 1910.

Great Britain.—Tables showing the Rules and Expenditure of Trade Unions in Respect of Unemployed Benefits, and also showing earnings in the insured trades.

Australia.—Vital Statistics of the Commonwealth for the Year, 1910.

United States.—Report of the Kansas State Board of Agriculture for the quarter ending March, 1911.

Thirty-fourth annual report of the Bureau of Labour Statistics of the State of Ohio for the Year, 1909.

New York State Department of Labour. Annual reports of Department Bureaus, for the twelve months ended September 30, 1909. Vol. I. Factory Inspection, Mercantile Inspection, Mediation and Arbitration. Vol. II. Bureau of Labour Statistics.

Austria.—Bericht über die Tätigkeit des K. K. Arbeitsstatistischen Amtes in Handelsministerium während des Jahres, 1910.

Belgium.—Statistique du Commerce Spécial en 1908 et 1909.

France.—Enquête sur le Travail à Domicile dans l'Industrie de la Lingerie. Tome V.

Italy.—Atti della Commissione parlamentare d'Inchiesta sulla Condizione degli operai delle miniere della Sardegna. Vols. I, II, III, IV.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

NOVA SCOTIA CASES.

Chinese Immigration.—Recovery of Penalty.—Jurisdiction.

Upon an application by a Chinese immigrant to quash the judgement of a Stipendiary Magistrate, removed into the Supreme Court of Nova Scotia, in an action brought before the magistrate to recover the head tax of \$500 payable by a person of Chinese origin on entering Canada (under R.S.C., c. 95, section 7), the court of four judges held, dismissing the application with costs and ordering a writ of *procedendo*, (1) that it is competent for the Parliament of Canada to confer upon a provincial court (like that of the Stipendiary Magistrate), having

jurisdiction in respect to matters of debt not exceeding \$80, jurisdiction in respect to amounts above that sum—following the decisions in *Attorney-General v. Flint*, 16 Sup. Ct. Cas. 707; *Valin v. Langlois*, 5 English App. Cas. 114; *The King v. Wipperfurth*, 34 N.S.R. 202. The court also held, (2) that where the procedure of the court provides for trial by jury, and the use of a jury is not inappropriate in the case, the employment of the jury is not ground for attacking the judgement of the magistrate. In this connection Mr. Justice Russell was of opinion that Parliament, in making use of the court, must be understood to have adopted its procedure. In any case the point as to the use of the jury was not open, not having been taken in the notice of motion for the removal of the case to the Supreme Court—referring to Crown Rule 33.

The motion in the matter was import-

ant, inasmuch as it was a test case affecting a number of similar suits. The *procedendo* above mentioned is a writ issued out of the court to carry back to the magistrate the proceedings brought up before him and directing the magistrate to proceed with the action, and so that the bond given by the defendant on appeal to the court might be enforced. The real point submitted to the court in the case was, whether the Chinese Immigration Act conferred jurisdiction upon the Stipendiary Magistrate to sue for the head tax imposed by the Act. The court held that there was such jurisdiction.

(The Attorney General for Canada v. Sam Chak, 44 N.S. Repts. 19.)

Chinese Immigration Act.—Arrest for Alleged Evasion.—Damages.

Upon a motion by the defendant to the Supreme Court of the Province for a new trial, it appeared that plaintiff was arrested on August 30, at the instance of defendant, a preventive officer, acting under instructions from the Collector of Customs, for an attempted evasion of the provisions of the Chinese Immigration Act, R.S.C. c. 95, and was detained for some days in custody without a warrant having been issued, and without having been brought before a magistrate for examination. Plaintiff brought an action claiming damages for such arrest and detention, on the trial of which the judge directed the jury, among other things, that defendant was only liable from the time he preferred the charge against plaintiff, which was on the sixth day of September.

The Jury came into Court, and the foreman announced that they found a verdict for defendant, and handed in a memorandum to that effect. On another piece of paper handed in, signed by the foreman but not attached to the verdict, was a memorandum to the effect that the jury found that plaintiff was entitled to \$1 a day, \$7, and his solicitor to the sum of \$40 for securing his release. This the trial judge treated as a verdict for plaintiff, and ordered judgement accordingly in favour of plaintiff for the sum of \$47 with costs to be taxed.

The Court held, setting aside the verdict and ordering a new trial, with costs, that the only matter in respect to which defendant could be held liable was the detention between the dates of the arrest and the date (September 6) when the charges were laid before the Magistrate, or whether plaintiff, having been arrested (justifiably) without warrant, was not held an unreasonable length of time before being brought before the magistrate.

The Court also held, that defendant was entitled to costs of his application to have the entry of the verdict made in accordance with the oral announcement of the jury, and the entry thereof made by the prothonotary.

(Sam Chak vs. Campbell, 44 N. S. Reports, 25.)

Intimidation by Striking Employés of Company.

An appeal to the Supreme Court of the Province from the judgement of Judge Drysdale continuing an injunction against the defendants for alleged acts of intimidation.

Judge Drysdale in his judgement said: "I have examined with care the affidavits produced by defendants' counsel in answer to the case made for the injunction, and I am of opinion the case has not been met. I am satisfied that, since the strike now existing, and since the plaintiff company have been endeavouring to carry on their works by the hiring and introduction of men for that purpose, the defendants have been and are parties to an organized system of intimidation and coercion, intended and having for its object the prevention of employment by the company of men, and the prevention of work by men engaged for work in and about the Company's property upon terms mutually agreed upon by the company and such men. This is clearly against the settled jurisprudence of the country and should be restrained. The cases are numerous on the subject, and have recently been cited by Mr. Justice Laurence, in another case, and I deem it unnecessary to expound them here. In my opinion a case has been made for a continuance of the injunction until the trial."

A restraining order was granted by the judge based upon alleged violations of the Criminal Code, section 51, restraining defendants, pending the trial of the action, from the commission of certain acts of intimidation alleged to have been committed by them for the purpose of preventing the company from carrying on operations in connection with its coal mines by hiring other men to take the places of those of its employes who had gone out on strike. The evidence showed concerted action on the part of the strikers with a view to preventing the company from working its mines until the demands of the strikers were complied with.

The Supreme Court held, (1) that where the judge, in the exercise of his discretion, after considering the affidavits before him, thought the case a proper one for a restraining order, a strong case must be made out to induce the Court to interfere; (2) that, in such a case, the balance of convenience must be considered, and in this case was in favour of continuing the restraining order. There is apparently no rule or authority to the effect that as a prerequisite to suing an association or class of individuals in the name of some of them, an order of the Court or a Judge must be obtained authorizing this to be done.

(The Cumberland Coal and Railway Company v McDougall, *et al.*, 44 N. S. Reports, 535.)

QUEBEC CASE.

Workmen's Compensation Act.—Damages for Loss of Eye.

Four hundred and twenty-five dollars and costs of action was the amount awarded William Harland by a recent judgement of Mr. Justice St. Pierre in the Superior Court at Montreal. The plaintiff had sued the Canadian Pacific Railway Company for \$600 on account of an accident which occurred on June 12 last, and as a result of which he suffered the loss of his left eye. He was at work in the Angus shops, as a frog rivetter, when a piece of iron flew from a near by flanging machine, and struck him with such force as to cause injuries which necessitated the removal of the eye. He

immediately entered action under the Workmen's Compensation Act, alleging that his earning capacity had been considerably lessened by the accident, and that, as a consequence, the company should pay him such indemnity as was provided for under the law. At the time of the accident plaintiff was earning 17 cents an hour, or \$9.35 per week. He claimed that henceforth he would not be able to earn this amount and claimed \$600 damages. The attorneys for the respective parties came to an agreement whereby the matter was settled out of Court and Mr. Justice St. Pierre rendered judgement accordingly.

ONTARIO CASES.

Workman's Compensation Act.—Negligence.—Assessment of Damages.

An appeal by the plaintiffs to the Court of Appeal from a judgement of Mr. Justice Clute at the trial, entered for plaintiff upon the findings of the jury. The plaintiff sued as administratrix of the estate of her late husband, George William Dawson, on behalf of herself and Sarah Dawson, her husband's mother, to recover damages for his death alleged to have been caused while a workman in the defendants' employment by their negligence.

The deceased was foreman of the defendants' repair shop, and on November 20, 1908, was ordered by the superintendent to do certain work upon an overhead wire in order to permit a swing bridge across which such wire had been placed to be opened, and while engaged in doing such work he fell from the ladder upon which he was standing and was instantly killed. The work which he was called upon to do was in the nature of emergency work, and not in the line of his ordinary duties. The ladder, supplied by the defendant, was a substitute for the safer repair-car commonly used for doing such work. There were questions of more or less importance at the trial as to whether the deceased was killed by falling from the ladder simply, or by a shock of electricity from an insufficiently insulated wire, or by a combination of these alleged

causes. And a further question as to whether or not he had been guilty of contributory negligence in not using a pair of gloves supplied by the defendants for the purpose of being worn when handling live wires. A release was pleaded but was abandoned at the trial.

The plaintiff had received the sum of \$1,000, the proceeds of an accident insurance policy on the life of her late husband, which the defendants at the trial and on the appeal contended should be deducted from any sum to which the plaintiff might be held entitled.

The jury found, (1) that the defendants were guilty of the negligence which caused the accident; (2) in not repairing the feed-wire to the bridge; (3) the death was caused by a defect in the condition of the ways, &c., (in the language of the statute); (4) the particular defect being in not repairing feed-cable on bridge and not providing safe ways to repair or connect jumper at bridge; (5) and (6) the death was caused by Superintendent Robertson, a person to whose orders the deceased was bound to conform and did conform, taking him from his regular work, and in not providing him with safe appliances; (7) Q. Could the the deceased, by the exercise of ordinary care have avoided the accident? A. No, by not having proper appliances, and in making connections deceased lost his balance and fell to the ground; and (9) they assessed the damage at \$1,200.

The main ground of the appeal was that it was erroneous for the trial judge to increase the finding of \$1,200 by the jury by the amount of the insurance money.

The Court of Appeal held that, judgement at the trial having been given in favour of plaintiff, a new assessment of damages was permissible. The election to be made within 30 days. Costs of appeal to the defendants. If defendants take advantage of new assessment, the costs of the trial to be costs in the cause.

(*Dawson v. The Niagara, St. Catharines and Toronto Railway Company*, 19 Ont. W. R. 242.)

Negligence.—Personal Injury to Labourer.

An appeal by the defendant to the Divisional Court from the judgement of

the senior judge of the County Court of the County of York, and a cross appeal by the plaintiff as to the amount of damages.

The plaintiff, on May 28, 1910, was at work as a labourer upon Yonge street in the city of Toronto. He was "paving" alongside the street railway track. He was on the west side of the track about 27 feet southerly from the corner of Scollard street and was kneeling on one knee. The distance between the west rail and the curb at that point was 14 feet 6 inches. Plaintiff's foot projected westerly 3 feet, which left the space of 11 feet 6 inches between his foot and the west curb. The defendant's servant, Stanley J. Kemp, a young man of about 16 years of age, was driving a horse with light rig. He had just come out of the stable, drove easterly on Scollard to Yonge, turned down Yonge, and one wheel of the rig went over plaintiff's foot causing the injury complained of. Kemp says he saw the plaintiff and he thought the plaintiff saw him. Kemp was experienced in driving and his horse was going, as he says, only at a slow walk. Under such circumstances there would be no excuse, in the opinion of the court, if plaintiff's story was correct, for the accident. The so-called excuse given by Kemp was "that in going round the corner, the back wheel caught the curb, and slung it over and it went over plaintiff's leg."

The trial judge did not accept as correct the explanation given by Kemp. There certainly was evidence of negligence and the question was wholly for the trial judge. Upon the evidence the conclusion would be warranted that, Kemp, having seen the plaintiff, carelessly drove too close to him, and, seeing the danger, turned the horse sharply to the west, but not in time to prevent one wheel going over the plaintiff's leg and causing the injury. All we need say, said the Court, is, that there was evidence of negligence, and we must so say. Had there been a jury the case could not have been withdrawn from them, and a verdict for the plaintiff for \$150 would not have been disturbed. The appeal of defendant should be dismissed with costs. There is no reason for increasing the damages. There was no permanent injury. The

plaintiff has had good, practically complete recovery. The cross-appeal should be dismissed with costs.

As a whole the Divisional Court held that, in a non-jury trial for personal injuries, the trial judge's verdict and assessment of damages must not be changed without special reasons.

(Wright vs. Radcliffe, 19 Ont. W. R. 439.)

Injury to Person.—Negligence.—Contributory Negligence.

A car cleaner employed by the defendants was injured through being struck by a locomotive engine while walking upon the track upon which the engine was moving. The jury at the trial found that the injured party was not guilty of any negligence which caused or contributed to the accident, but that the negligence which caused the accident was improper light of yards during the time of alterations, and the train being a little ahead of time, running at an excessive speed.

Chief Justice Mulock, who presided at the trial, in his charge to the jury said; "It is said that the train came in at an excessive rate of speed, and here you have a conflict of testimony also. What is an excessive rate of speed? You cannot fix a particular rate and say that it is excessive?" The jury did not answer the charge of failure to ring the bell. The defendants appealed from these findings, but the findings of the jury were in favour of the plaintiff.

Upon an appeal to the Court of Appeal, Chief Justice Moss held, that when a jury exonerates an injured party from the charge of contributory negligence, upon evidence which, but for the finding, would appear to show very convincingly that he was the author of his own injuries, the Court should ascertain whether there is evidence to find actionable negligence on the part of the defendants which actually caused the injury, and whether the findings of the jury are upon elements upon which the plaintiffs do not rely.

Charges expressly put to the jury upon which the jury do not make a finding must be taken to have been negatived.

Mr. Justice Meredith was of opinion that there was no duty owed by the defendants to the plaintiff regarding the

time of arrival of any of its trains; and that there is no rule of law limiting the rate of speed of railway trains in the interests of railway workmen.

The appeal was allowed and the action dismissed with costs, if demanded.

(Paquette v. Grand Trunk Railway Company, 19 Ontario W. R. 305.)

MANITOBA CASES.

Mechanics' Lien Act.—Building Contract.

Appeal by the defendant to the Court of Appeal from the judgement of the trial judge in favour of the plaintiff, in an action to recover moneys expended in building, and to enforce a mechanics' lien.

In this action to enforce a mechanics' lien, the plaintiff alleged that the defendant, F. C., was the owner of the land upon which the work was done and for which the materials were supplied, and that the defendants, F. C., P. A. C., and T. H. C., employed the plaintiff to do the work and supply the materials for building on the land owned by the defendant F. C. The trial judge held that the defendants, F. C. and P. A. C., were not liable because they had not entered into any contract with the plaintiff, but he held the defendant T. H. C. liable because he was the promoter of a company for which the work was done. The work was done under a written agreement purporting to be between the plaintiff and the defendant P. A. C., but not signed by the latter. The company was incorporated before the agreement was made; the three defendants were among the incorporators; and the company was created for the purpose of building a theatre on the land owned by the defendant F. C.

The Court held that there was nothing in the evidence to support the finding that the defendant T. H. C. employed the plaintiff to do this work for the company. No such case was made in the statement of claim. If T. H. C. was liable at all, it was because the company pretended to employ the plaintiff, and because T. H. C. represented that he was the agent of the company; but no such case was made out by the evidence or by the pleading. Appeal allowed with costs;

verdict set aside and entered for defendants; plaintiff to pay cost of trial and of the appeal.

(*Desrochers v. Crump*, 17 W. L. R. 47.)

**By-law as to Building Restrictions.—
Exceptions, etc.**

Upon an application to Mr. Justice Prendergast to quash a certain by-law of the City of Winnipeg, it appeared that a by-law of the city provided that no building upon a certain street should be placed within a distance of 15 feet from the street line. This by-law was amended by another by-law, which provided that the prohibition should not apply to two lots upon the street on which a large building, within 5 feet from the street line, was, after the passing of the by-law, erected by M., upon whose application the amending by-law was passed, M. conveying to the city corporation 6 feet of land between the building and the street line and so widening the sidewalk at one point. The amending by-law was passed on April 12, 1907, and W., on February 17, 1910, moved to quash it. W. was aware that M's building was being erected, and did not object or protest in writing or otherwise.

Mr. Justice Prendergast held, that the amending by-law interfered actively with other persons' rights as established under the original by-law; it constituted a discrimination; it was an exemption, as it excepted M. from a common restriction; it was a privilege, as allowing him to do something which no other was allowed to do; it resulted in establishing a kind of servitude right in his favour; and the advantages gained by the corporation from the addition to the sidewalk and from an improvement made by M. were not sufficient to outweigh these considerations. The by-law was, therefore, not in the public interest, but in the interest of M., and was unreasonable and discriminating; but it should not be quashed, because the applicant was fully cognizant of the progress of the work from its inception, and took no action until M.'s building was fully completed, and the other persons whom the applicant might be said to represent were in the same position.

The judge's judgement followed the following decisions: *Re Tabor and Township of Scarborough*, 20 U. C. R. 549; *Re Grant and Township of Puslinch*, 27 U. C. R. 154; and *Re Platt and City of Toronto*, 33 U. C. R. 53. *Re Wood and City of Winnipeg*, 17 W. L. R. 220.

THE

LABOUR GAZETTE

OCTOBER, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF SEPTEMBER, 1911.

I.—GENERAL SUMMARY.

INDUSTRIAL conditions throughout Canada during September were characterized by steadiness on the level of marked activity which prevailed during the summer months. The latest estimates of the crop yield showed no falling off from those made earlier in the season, the agricultural year being, on the whole, considered very favourable. Manufacturing and transportation continued very active. The mining industry also had a good month. The outlook in the lumbering industry in Ontario and Eastern Canada is for a somewhat smaller cut during the coming winter season, and the exceptionally low water in the streams also hampered the industry. Fishing reports, however, indicated fair catches, the salmon pack in British Columbia turning out larger than had been expected. The construction trades in many cities were more active than at any previous period, while unskilled labour was in very active demand, except at points in Western Canada where the completion of the harvesting operations left a surplus of labour. The immigration movement continued heavy. The outlook at the close of the month was for a period of marked activity until the close of the season of outdoor employment, with workmen favourably situated as to earnings in hand to meet the period of idleness.

Wages.

Wages have been characterized by steadiness throughout September. An

increase of $2\frac{1}{2}$ cents per hour in the wages of plumbers and steamfitters occurred at Edmonton. Railway labourers on the Intercolonial Railway were granted an increase.

Interruptions to Industry.

Among industrial establishments, &c., destroyed by fire or through other causes, during September, 1911, as reported in the press of the Dominion, the following may be mentioned:—

Prince Edward Island.—Telephone Exchange at Charlottetown, loss, \$8,000; two stores, loss, \$3,000.

New Brunswick.—Sawmill at Hillside, loss, \$7,000; fire in the hold of the steamer *Nancy Lee* destroyed cargo to the value of \$5,000; woodworking factory at Woodstock, loss, \$6,000.

Quebec.—Dwelling house, farm buildings, implements and season's crops at Brisette Corner, Hatley; sawmill at Lennoxville, loss, \$20,000; oil storage yards at Montreal, loss, \$15,000; restaurant, Montreal, loss, \$6,000; awning manufacturing establishment, Montreal, loss, \$6,500; a shoe manufacturing establishment at Montreal, loss, \$6,000; shingle mill at Rimouski.

Ontario.—Sawmill, residence, barns and contents at Ailsa Craig; barn and contents at Albermarle; cheese factory at Belleville; sawmill at Bewdley; barn with contents at Brantford; barn with season's crops at Don Mills; evaporator at Delaware, loss, \$3,000; barn with contents at Edgely, barn with contents at Fisherton; elevator and coal shed at Granton, loss, \$10,000; farm-house, barn and contents; sawmill and lumber at Kingsville, loss, \$15,000; barn with contents at Lambton; barn with contents at London; barn with contents at Londesboro; barn with contents at Milverton; barn with contents at North Dorchester; casket factory at Orangeville, loss, \$10,000; coal sheds at Picton, loss, \$3,000; garage with contents at Queenston, loss, \$2,200; cooperage and lumbermill at Ridgetown; barn with contents at South Monaghan; drygoods store, Toronto, loss, \$10,000; shirt factory at Toronto, loss, \$5,000; hardware store at Toronto, loss, \$27,000; railway station at Stevensville; sawmill and blacksmith shop at Stanley; stables of brew-

ery firm at Walkerville, loss, \$3,000; skating rink and residence at Waterloo, loss, \$30,000.

Saskatchewan.—Livery stable at Regina, public hall at Wynyard, loss, \$2,000.

British Columbia.—Brewery at Nelson, loss, \$30,000, lumber yards at Nelson, loss, \$50,000; smelting plant; Nelson, loss, \$750,000; sawmill at New Westminster.

Conditions in the Industries and Trades.

Conditions of employment during September in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to *The Labour Gazette*, and by information received by the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Threshing, plowing, and the harvesting of the root and ensilage crops, provided the chief employment throughout September in Ontario and the eastern provinces. Owing to recent rains the root crop will turn out more favourably than was expected in August. Pastures also have improved, and plowing and sowing have been facilitated. In Western Canada, rain interfered with harvesting operations, but most of the grain was saved in good condition, the estimate of the yield showing no falling off at the close of the month. Apple picking was actively in progress.

Wages throughout the western harvesting season ranged from \$1.75 to \$2 per day with board, the rates being somewhat lower than last year.

A report of the field crops issued by the Census and Statistics Office, Canada, showed conditions for wheat, oats and barley from five to seven per cent. higher than last year, and nearly the same as two years ago. Other crops ranged in condition somewhat lower than in 1909 and 1910.

The most recent forecast of the Ontario Department of Agriculture shows a considerable decline in the production of wheat, barley, oats, peas and hay, with an increase in the production of beans and rye.

The September fruit crop report of the Department of Agriculture, Canada, refers to the effect of the drouth of July and

August. The prospect for apples, as a whole, depreciated slightly. Early pears were harvested in good order. Plums, peaches, and grapes were a fairly good crop. Dry weather seriously shortened the tomato and other canners' crops. Prices for all kinds of fruit have been well maintained.

A cable, dated September 25, from the International Agricultural Institute, Rome, Italy, gives the official figures published there on that date concerning the production of wheat during the present season in Great Britain and Ireland, France, the Russian Empire, Algeria and Egypt. Revised figures are also given for Belgium, Hungary, Italy and Tunis. The estimated production for the latter countries on September 1, compared with that of August 1, is given in bushels as follows, the August estimate being in brackets:—Belgium, 14,617,000 (14,054,000); Hungary, 192,691,000 (187,760,000); Italy, 192,170,000 (203,192,000); Tunis, 6,625,000 (7,716,000). For the totality of the countries so far reported, the 1911 wheat crop is expected to be 100.5% of that of last year.

The latest estimate of the yield of the four principal grain crops of Saskatchewan, prepared by the provincial department of agriculture, is as follows:—

	Acres Sown	Bushels per Acre.	Yield
Wheat.....	5,598,000	16.5	92,367,000
Oats.....	2,292,000	45.0	103,140,000
Barley.....	246,000	27.0	6,642,000
Flax.....	377,000	10.0	5,770,000

Allowance has been made in the estimated yield for areas that were hailed or otherwise destroyed and will not be cut. These figures compare with the total yields in 1910 of the four grains as follows: Wheat, 72,666,000; oats, 63,315,000; barley, 5,859,018; flax, 3,044,138 bushels. The yield per acre in 1910 was: Wheat, 15.58; oats, 30.40; barley, 24.58; and flax, 7.68 bushels.

Winnipeg Grain Exchange contract grades for 1911-12 have been fixed as follows: No. 1 Manitoba Northern wheat is to be the contract grade of wheat for the

season of 1911-12, with the privilege of delivering No. 1 Manitoba hard wheat on contracts at one cent premium over No. 1 Manitoba Northern, and of delivering No. 2 Manitoba Northern wheat on contracts at 3 cents discount under No. 1 Northern, and the privilege of delivering No. 3 Manitoba Northern wheat on contracts at 8 or 10 cents discount under "old style" or "new style" contract respectively. No. 2 Canadian western oats will be the contract grade of oats for the season of 1911-12, with the privilege of delivering on contracts higher grade oats.

Fishing.

Cod, haddock, and hake made up the major portion of the fishing catch in the Maritime Provinces during September. A scarcity of bait was complained of at points, but on the whole the returns for the month were regarded as satisfactory. Several of the lobster canneries, which have now closed, report the season the most profitable in several years, prices having ruled unusually high. Very good runs of herring were reported. The catch of cod on the north shore of the Gulf of St. Lawrence has been very light. In British Columbia final estimates of the salmon pack are higher than earlier in the season, the total pack for 1911 being placed at 750,000 cases, as compared with 762,200 in 1910. The sockeye salmon catch, however, has amounted to only 265,000 cases, compared with 566,000 cases in 1910. The whaling stations on Vancouver Island have made exceptionally good catches. A special committee appointed by the Governor of the State of Washington visited British Columbia during the season for the purpose of investigating conditions in the salmon spawning grounds.

The seventh annual convention of the Fishermen's Union of Nova Scotia was held at Halifax on August 31, the president, vice-president, secretary-treasurer and the executive being present, with delegates from Queens, Digby, Inverness and other counties. The following officers were elected for the ensuing year:—

President—Angus R. McDonald, Port Hood.

Vice-President—Augustus Harris, Digby.

Secretary-Treasurer—Bernard Cummings, Port Joli, Queens.

Executive—A. D. McErachean, Craigmore, Inverness, D. Lewis, Little Harbor, Shelburne county; J. Meagher, Canso; and Charles H. Thomas, Halifax.

The Union held a conference with the Superintendent of Fisheries, Canada, whose attention was called to the following resolution which had been adopted at previous annual meetings of the Union, viz.: Favoured equal distribution of fishing bounties between boat and vessel fishermen; favouring the removal of duties from gasoline engines for fishermen's use; favouring international laws to prohibit beam trawlers from operating outside of three-mile limit; favouring better transportation regulations for shipping lobsters from Yarmouth to Boston, by having cold storage and larger carrying capacity in steamers; favouring better regulations for the preserving of berried or seed lobsters; favouring the establishment of a legal size for sea-packed herring, and of a standard measure of barrel for all kinds of fresh fish used for bait or other purposes, and protesting against certain proposed lobster regulations.

Lumbering.

At the close of September, the outlook in Ontario, Quebec, and the Maritime Provinces was for a diminution in the cut during the coming winter season, owing in part to dullness in the British market. The forwarding of men to the camps had begun, but the number was smaller than in 1910. Wages range for the most part from \$28 to \$35 per month. Sawmilling operations continued active with prices firm, except at points where the exceptional lowness of water in the streams prevented work. In British Columbia, the sawmills were working steadily and the general condition of trade was from fair to buoyant.

Mining.

Mining was very active throughout Canada during the past month. In Nova Scotia, coal shipments were heavy and the collieries were for the most part busy,

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, active, very active; (2) quiet and very quiet.

with prospects of an active winter. In Quebec, the copper and asbestos mines were working to the limit of their capacity. Outputs in the Cobalt camp have been well maintained, and continued activity was reported from the Porcupine and Larder Lake districts. There was some improvement in the collieries of Alberta and Eastern British Columbia affected by labour disturbances, outputs being reported to be gradually increasing. On Vancouver Island, the coal trade continued buoyant. Favourable reports were received from the metalliferous camps of the interior of British Columbia.

The seventh annual report of the International Coal and Coke Company, whose colliery is situated at Coleman, Alta., shows net profits of \$300,097. During 1910, the average number of men employed was 524, and the number of days worked 280.

The eleventh annual meeting of the Western Branch of the Canadian Mining Institute, was held at New Denver, B.C., September 3. Several valuable papers were read, and an interesting discussion on zinc ore reduction and other questions held.

The annual session of the Grand Council of the Provincial Workmen's Association of Nova Scotia was held at Halifax, N.S., during the third week of September. The following officers were elected:—

Grand Master.—S. B. McNeil, Glace Bay, (re-elected).
Associate Grand Master.—Thomas Peggott, of Springhill.

Grand Secretary.—John Moffatt, Dominion, (re-elected)
Grand Treasurer.—Ronald Nicholson, of Reserve.
Grand Chaplain.—Arthur Davis, Sydney Mines.
Grand Guardian.—Duncan McDonald, New Aberdeen.
Grand Inside Watch.—Vincent Hall, Sydney.
Grand Outside Watch.—Harry McKenzie, Reserve Mines.

Grand Sub Secretary.—A. B. McIsaac, Inverness.
Past Grand Master.—Mark Connors, Westville.

Improved methods of mining and several other important matters were discussed during the sessions. It was decided to approach the Government to urge an amendment to the Mines Regulation Act requiring weekly payment of wages instead of, as is now the case, semi-monthly payment. Efforts will be put forth to install a more improved type of riding rakes than are now used. The roads about the mines it was

urged should be put in better condition. The meeting passed a resolution in favour of abolishing mining machines operated by electricity.

Manufacturing.

Nearly all branches of the manufacturing industry were employed to full capacity throughout September, and many instances were recorded of factories working overtime and employing extra help. In view of the satisfactory crop yield and the prevailing firm tone of trade, the outlook for the winter season is regarded as more than usually favourable.

The annual report of the Dominion Textile Company showed a net profit of \$998,710. The turnover for the year was \$1,947,270, compared with \$8,743,706 in the preceding year. The Company has in operation 8,997 looms and 427,084 spindles. It employs over 6,500 hands, and paid out in mill wages during the year the sum of \$1,874,612.

The iron and steel industry has been very active, companies reporting the output as comparing very favourably with that of 1910. The annual meeting of the Lake Superior Corporation held during September, showed that the various branches of the Company are making good progress and that orders are satisfactory. Good progress has been made with the construction of the Algoma Central Railway, and with the Algoma Eastern Railway. A surplus of \$1,200,216 was announced. The output as compared with the previous year was as follows:—

	1909-1910	1910-11
Pig iron.....	153,528	170,359
Steel rails.....	201,615	208,283

Flour mills have been quiet, but flour prices have been lower in relation to wheat prices than a year ago. The demand for mill feed has been very active.

The annual convention of the Dominion Millers' Association was held at Toronto, August 31. The Secretary's report dealt with the recent amendments to the Grain Act, package goods, uniform sales contracts, &c. Reports were received from the freight committee and from

central wheat buyers. The annual report of the executive dealt at length with the subject of terminal grain elevators and the Grain Commission.

An investigation conducted by the *Montreal Daily Star*, showed that 184 branches of United States manufacturing enterprises having a combined capital of 233 million dollars have been established in Canada.

Railway Construction, &c.

Work on the various contracts under way progressed favourably during September. The supply of labour was somewhat greater in Western Canada in the closing weeks of the month.

Among important contracts let during September was the contract awarded to J. D. McArthur, of Winnipeg, Man., for the construction of the first section of the Hudson Bay Railway, from Le Pas to Thicket Portage, a distance of approximately 185.5 miles. A contract for extensions to the Intercolonial Railway terminal wharf, bulkhead, and concrete shed at Halifax, was awarded by the Department of Railways and Canals to the Nova Scotia Construction Company for \$914,600. The contract for the construction of the new National Transcontinental terminal station at Quebec was also awarded.

According to plans announced by the Harbour Commissioners of Montreal, the sum of \$6,000,000 will be spent on development work within the next year.

Orders for twenty-five large-type locomotives have been placed by the Grand Trunk Pacific Railway Company, with the Canadian Locomotive Company.

It was announced that the Canadian Northern Railway Company would double the capacity of its present elevator at Port Arthur, Ont., double the capacity of the blast furnace, establish an iron foundry to use the product of the furnace, and, contingent upon action by the city, supply it with gas, the total expenditure to be between \$3,000,000 and \$4,000,000.

General Transport.

Railway and water traffic continued very heavy during September, recent canal returns showing increases over the

corresponding month of 1910. The outgoing shipping traffic at Montreal has been considerably heavier during the present year than in 1910; increases in the flour trade and general manufactured articles have been noteworthy; another feature of the year has been the largely increased business with South Africa and Australasia.

The arrival in Canada, at Montreal, of the freighter *Toiler*, the first vessel driven by oil engines in the Canadian trade, was reported during September. The vessel will run between Montreal and Lake Erie.

Notwithstanding the large increases of last year, the gross earnings of Canadian railways continued to advance during September, though the movement of the crop has been later in starting than in 1910. Street railway earnings also continued to show increases as compared with last year; the increase amounting in the case of the Montreal Street Railway Company to over 11 per cent.

The Department of Trade and Commerce has inaugurated the publishing of a monthly bulletin giving a list of steamship sailings from Canadian ports.

The following is a statistical summary of lake commerce through the United States and Canadian Canals at Sault Ste. Marie, Michigan and Ontario, for the month of August, 1911:—

	U.S. Can.	Can. Can.	Total.
Vess. Passag. No.....	2,064	1,022	3,086
Reg. Tonnage Net.....	3,823,878	2,952,817	6,776,695
Freight—			
East Bound Sh. tons	1,746,878	4,053,958	5,800,836
West Bound Sh. tons	2,123,580	624,396	2,747,976
Tot. Freight Sh. tons	3,870,458	4,678,354	8,548,812

In view of the mutual interests of the steamship companies in the development of the foreign and coastwise passenger and freight transportation traffic in British Columbia, the owners of vessels in the province have formed the Ship-owners' Association of British Columbia, with headquarters in Vancouver.

The Trades.

Building.—In view of the approach of the end of the building season, outside

operations were very active in most localities. The total value of new buildings erected will considerably exceed that of any previous year. The outlook for winter employment is favourable.

The activity in the building operations at Toronto during the present year is reflected in a comparative statement which has been issued by the City Architect. The figures show that for the period from January 1 to the end of September, permits have been issued for new buildings to a total value of \$18,508,655. During the same time last year, permits issued totalled in value \$14,819,508, the present year thus showing an increase of \$3,689,147.

Metal and wood working.—Most branches had a busy month.

Printing and allied.—The first half of the month was exceptionally busy, due to the preparation of the voters' lists in connection with the holding of the Dominion elections, which gave a large number of men extra employment. The bookbinding trade was active.

Clothing.—Journeyman tailors were very active. Boot and shoe workers were resuming their season of activity. Garment workers also were becoming active.

Leather.—Steady conditions prevailed among tanners, curriers, and leather workers.

Food and tobacco preparation.—Confectioners were becoming very busy. Tobacco workers and cigar makers had a good month.

Miscellaneous.—Retail clerks were very busy in connection with the fall fairs. Tourist traffic has been heavy, and gave a considerable amount of employment during the first half of the month.

Unskilled labour.—This class was very actively employed throughout September in nearly all localities. In several cities, the supply was exhausted and additional men could have found employment. The close of the harvesting season, however, released a considerable body of men, and in Western Canada a surplus of this labour was reported at several points. The year has been one of exceptional opportunity, and the close of the season of outdoor activity will find the majority of workmen with earnings in hand suffi-

cient to meet the period of enforced idleness.

Canadian Trade and Revenue.

Foreign trade.—During August, 1911, the total value of imports entered for consumption in the Dominion of Canada was \$47,405,591, compared with \$38,420,957 in August, 1910. During the five months ending August 31, 1911, the total value of imports amounted to \$204,372,971, compared with \$181,743,000 in August, 1910. The total value of domestic exports during August, 1911, was \$26,618,164, compared with \$22,461,918 in August, 1910.

During August, 1911, there were increases in exports of the products of the mine, fisheries, agriculture and manufactures, and decreases in the products of the forest, animals and their produce, and miscellaneous.

The grand total of Canadian trade for the month of August, 1911, was \$91,490,654, compared with \$63,187,521 in August, 1910; for the five months ending August, 1911, the total was \$330,522,426, compared with \$295,817,781 for the corresponding period of 1910.

Domestic trade.—Trade in wholesale lines was fairly active, notwithstanding some disturbance caused by the elections. Sorting orders for dry goods were satisfactory. The movement of groceries and hardware lines was fair, with the leather trade more active. Reports were generally to the effect that fall trade had opened up favourably.

The bank statement for August showed an increase in paid-up capital of \$1,090,000. Circulation also increased \$1,612,000. Deposits on demand decreased \$5,862,000, and current loans increased by \$10,918,000.

A steady increase in bank clearings has been recorded throughout the year, especially in the cities of Western Canada. At Victoria, clearings for the year to the end of August have totalled \$89,126,652, an increase over the same period of last year of \$24,261,995, or thirty-nine per cent. During the past two years, the clearings of that city have increased over one hundred per cent.

Notes.

The fourth annual convention of the Retail Merchants' Association of British Columbia was held during September.

Insurance premiums paid in Saskatchewan during 1910 were fifty per cent. greater in amount than the total for 1909.

Real estate transactions in most of the cities were characterized by dullness prior to the holding of the Dominion elections.

The fifth annual convention of the Western Canada Irrigation Association was held in Calgary, seventy-three delegates being present from British Columbia, Alberta and Saskatchewan.

The Canadian Credit Men's Association held its first meeting of the winter at Winnipeg, during the week commencing September 11. The secretary reported that the membership was 243. Committees for the extension of the organization to Ontario and Quebec have reported favourably.

The Royal Commission under the Public Inquiries Act, appointed some few weeks ago to conduct a general investigation into taxation problems throughout British Columbia, began its study of

assessment and taxation conditions with sittings in Vancouver on September 21.

An investigation into cost of living has been instituted by the City Council of Victoria, B.C., the following resolution having been recently passed:—

"Resolved that the matter of the appointment of a commissioner to investigate and report as to the excessive cost of certain necessities of life and staple commodities be left in the hands of His Worship the Mayor, to appoint a suitable non-partisan person as such commissioner."

The services of a suitable person were subsequently engaged by the Mayor for the purpose, for a period of two months.

The members of the Royal Commission on Industrial Training and Technical Education, who had been during the summer conducting their investigations in different parts of Great Britain and the continent, returned to Canada during September, and it was understood that the Commission would be called at an early date in October to report to the Minister of Labour, and to arrange its programme of procedure. A summary of the points visited and matters investigated, as received from the Chairman, was printed in the September issue of the *Labour Gazette*.

II.—REPORTS OF LOCAL CORRESPONDENTS.**SYDNEY, N. S., AND DISTRICT.**

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions continued active throughout the month, and business generally was in a healthy state. All public works operated steadily, while the larger industries, such as the coal and steel trades, were very busy. Factories of all kinds, foundries, the tar and chemical works, and the cement works, were all active. Owing to the amount of coal in the heaps, the Dominion Collieries had an occasional idle day to permit the filling of the coal that had been stocked during the winter months. The steel works were in continuous operation, and the steel industry is in a

healthy condition. Large quantities of limestone, dolomite and iron ore are being stocked at the plant for winter use. Construction work is being rapidly pushed forward with the purpose of completing as much as possible before the winter season sets in. The Nova Scotia Steel Company had a busy month. All departments of the steel plant were active and the Company reports good prospects in the steel trade. Derangement in shipping caused an idle day or two at the Collieries but the coal output for the month was fairly good. The building trades were very busy and work on some of the larger buildings will run on during the winter. Transportation by rail and water was heavy. The wholesale and retail trades did a large volume of business. There is no labour unrest in the district.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—All the crops compare favourably with those of last year. The grain looks well and the root crops are of much better quality than in 1910.

Fishing.—Fair catches of cod were obtained during the month, but the scarcity of bait has been a retarding factor throughout the season.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were active, and unskilled labour was in demand.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions throughout this town and district continued brisk; labour, both skilled and unskilled, not meeting the demand in many instances. The shipments of coal from the town and district collieries, for the month of August, 1911, showed an increase of about 6,000 tons over the corresponding month of 1910.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers of this district and county are at present busy harvesting their grain crops, ploughing, and doing other farm work. The Pictou County Exhibition of stock and farm produce was held at Pictou on the 27th and 28th of the month. The exhibits in the various departments were good, but smaller in number than usual. The drought in the early part of the season was given as the reason for the smaller display of vegetables.

Lumbering.—This industry is at present quiet,

Manufacturing.—The various departments were active.

Mining.—This industry is at present busy.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were active, with the exception of the woodworking

and furnishing trades, which were quiet. The supply of unskilled labour was not equal to the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

September showed a decided improvement, industrially speaking, over August. In the building trades, extensive enlargements and new structures added to the demand for labour. The most important building permit issued was for the enlargement of the Union Bank of Canada's new premises, and there was an apparent desire on the part of contractors to finish the work on hand that caused the activity. With the building of the new freight shed on the Government pier, the construction of the new pier, and other contemplated improvements, the season should be good until the setting in of the cold weather. Along the waterfront work has been rather quiet, but with the apple shipments and the opening of the winter trade improved activity should prevail. The largest shipment of apples ever made from this port to London was in November, 1907, when the *Shenandoah* took 27,700 barrels. This stood as a record until September 7, 1911, when the *Queen Wilhelmina* took 29,700 barrels (mostly Gravensteins) for London and Hamburg. But on September 17, 1911, the latter record was broken, when the *Kenawha* took 34,000 barrels direct for London.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Some late wholesale prices are as follows:—

Butter, creamery, prints, 28c.
Butter, creamery, boxes, 27c.
Butter, dairy prints, 22-23c.
Cheese, large, 15c.
Cheese, twins, 15½c.
Eggs, fresh, box, 23c.
Beef, front quarter, 7-8½c.
Beef, hind quarter, 8-11½c.
Pork, 8-9c.
Bacon, side, 18½c., roll, 13½c.
Mutton, 7-8½c.
Veal, 6-8½c.
Potatoes, P. E. I., per bbl., \$1.75.

Fishing.—Fishing was quiet.

Manufacturing.—Manufacturing was fully up to the average.

Mining.—Mining and other industries were about normal.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners and plasterers had a good month. Painters and decorators were active, plumbers busy, gasfitters quiet, steamfitters active, stonecutters fair and builders' labourers active. Electrical workers were fair. Blacksmiths were busy; boilermakers and iron shop builders were fair. Shipwrights and caulkers were better employed than in August. Printers and pressmen were more active than in August. Bookbinders had a fair month. Tailors were dull, with prospects fair. Bakers, confectioners, butchers and meat cutters had an active month. Barbers, hotel, restaurant and theatre employes had a fair month. Transportation men, railroad, maintenance-of-way men, clerks, trainmen, &c., had a good average month. Street railroad men were busy. Freight handlers were active. Longshoremen were quiet in the early part of the month, but showed activity towards the end. Unskilled labour was active.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During the month of September, the labour market as a whole was very active. Building operations were carried on extensively. The Canada Car Company continued work on its new buildings. Those destroyed by fire were of a temporary character; those now under course of construction are made of cement, reinforced by steel. The Malleable Iron Company started work on a new pattern shop, also a brick structure. Both of these concerns were handicapped in the progress of the work in not being able to secure men. Many other buildings were also under construction, and in addition

to these a large number of men found employment in the construction of cement sidewalks, sewer extensions and other public works. During the month, the Canada Car Company bought a large area of land adjoining its extensive plant, and it is said to be the intention of the Company to add largely to the passenger department. Farmers throughout the county were complaining strongly of the scarcity of labour to harvest their crops and at any time during the month there was abundant work for all who desired employment. The Canada Electric Light Company also had a large number of men at work changing the lighting system of the town of Amherst. The light is now supplied directly from a central station at the mouth of the Chignecto Mines, about eight miles from Amherst, and the town now has its power supplied direct from the colliery. It was formerly supplied from a central station in the town of Amherst. The change will be a great saving in the way of freights and the hauling of coal. Taken altogether, the month of September was one of the best months in the history of Amherst and vicinity for the past three or four years.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The grain and hay crops have been harvested. The former was well up to the average, but the hay crop was light. This will not be felt in this section, as much hay is held over from the former season.

Fishing.—There was some shad fishing through the month, but the catch was light.

Lumbering.—Inability to secure steamers for the lumber trade seriously handicapped the shippers, and a large amount of last season's cut must be held over until next year.

Manufacturing.—Our industries have all been busily employed during the month, and a full complement of hands employed.

Mining.—Mining operations were proceeding briskly, and Springhill has once again become a hive of activity. The output of the mine is now nearly 1,100 tons daily. Some 1,200 men are at work

in these mines, and the working force will be shortly increased.

Other industries.—The plaster quarries near Amherst have about eighty men employed, and large shipments are being made to the American market.

CONDITION OF PARTICULAR TRADES.

Bricklayers have been steadily employed. Carpenters and joiners were very busy, lathers and plasterers active. Painters and decorators report business dull, and stonecutters were busy. Iron moulders were busy; iron workers and helpers well employed. Machinists and engineers, electrical workers, boilermakers and blacksmiths were busy. Woodworkers, carriage and wagon makers were busy. Car builders were active. Pattern makers were busy. Printers and pressmen were busy. Journeymen tailors were well employed. Garment workers were busy, and boot and shoe workers very active. Bakers and confectioners, butchers and meat cutters were busy. Trunk and bag makers were very busy. Barbers were busy. Clerks and stenographers were well employed. Unskilled labour was greatly in demand all through the month.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market for the month of September was not quite so favourable as that of August, supply being in excess of the demand, but not to a very great extent. Wet weather interfered with outdoor work. Good progress was made, however, on the new Zion Church, the Royal Bank, and other buildings in Charlottetown. The construction of the Tracadie breakwater, and of the Elmira branch railway, were two prominent sources of employment in the country. The prospects of a good crop gave an optimistic tone to business, and wholesale and retail merchants report sales satisfactory.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of the month found all the harvest gathered in and potato digging begun. The crop, on the whole, this year will be up to the average, though there will be a shortage in some sections, occasioned by the unprecedented drought.

Fishing.—Operations in this line were confined mainly to cod and hake fishing, with fairly satisfactory results.

Manufacturing.—The few factories in this province were carried on under normal conditions, the supply of and demand for labour being well balanced. The burning of the condensed milk factory threw a number of men out of employment, and it has been decided not to rebuild, as the business had not been as profitable as was expected.

Railway construction and employment.—The building of the Elmira branch and several new stations were among the features during the month. The holding of the two county exhibitions swelled the passenger receipts this month. In other respects, conditions were normal.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were active. Unskilled labour was in fair demand.

MONCTON, N.S. AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Very active conditions prevailed in all the various branches of employment in this locality during the month, maintaining about the same volume of work as that of the two preceding months. In the case of skilled labour the local supply has been about equal to the demand, but owing to the number of operations in progress requiring a large amount of unskilled labour, the demand for the class has been considerably in excess of the local sources of supply and there has been an influx of common labourers. The Moncton Tramways and Gas Company is em-

employing about seventy-five hands upon the street railway bed and about forty more upon the laying of gas mains. The excavations for the waterworks extensions and the laying of concrete walks also employ large crews. Building operations are still active, and the new annex to the Intercolonial Railway general offices, number 4 fire station and the new Methodist parsonage, three of the largest contracts, are being rapidly advanced. The foundations for several new residences have been laid, in addition to a large number in more advanced stages of completion. The Paul Lea Woodworking Company as having an exceptionally active time in filling orders and has much work ahead. Exceptional activity is also reported from the Marvin biscuit factory, the New Brunswick Wire Fence Company, Lewisville brick yards, Acadia barrel factory and the Abrams machine shop. Retail trade still shows good and wholesale trade normal. Real estate remains firm but with few movements. Rents are stationary with a fair choice of houses. Customs duties for August collected at this port amounted to \$6,689, with import value at \$63,973, as compared with duty \$6,154 and import value \$39,890 in August, 1910, being a material increase in both instances. The increases in pay to the Intercolonial Railway clerks and shopmen granted last month and dating back to July were paid this month. No other changes in rates of wages were noted, and hours of labour remain unchanged. Relations between employers and employes still continued cordial, and there was no unrest in evidence.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had an active and fairly favourable month harvesting grain crops and making marsh hay. Grain is practically all harvested and the cutting of the marshes well advanced, but work has been considerably retarded of late by broken weather. The local apple crop is very large, and there is a surplus of early varieties upon the market, retailing from \$1 to \$2 per barrel. Dairy

products showed an advance, country butter being quoted at 25 cents creamery 30 cents at retail, while cheese is up to 14 cents wholesale; eggs 25 cents per dozen, chickens 20 cents per pound, and potatoes 50 cents per bushel in country market.

Manufacturing.—Unchanged conditions prevailed in all local manufacturing concerns, the usual quota of operatives being employed and actively working in about every instance to fill orders, the volume of which assures a continuance of activity for a considerable time.

Railway construction and employment.—Railway construction locally has been limited to general repair work upon the roadbed of the Intercolonial Railway and yard improvements. Considerable work has been done in the Grand Trunk Pacific terminal yards near the city, where a considerable number of labourers are employed. A subway is being put in under the North Main Street crossing of the Intercolonial Railway where about forty labourers are employed. The overhead bridge on St. George street is also well advanced, the abutments being now ready for the superstructure. About twenty-five men are employed.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and carpenters were active, painters and plumbers were busy. Stonecutters and builders' labourers were active with a fair demand. Iron moulders and workers were steady. Machinists and linemen were active, blacksmiths were fairly busy, boilermakers were active and horseshoers steady. Woodworkers were active, upholsterers steady, carmen busy, coopers active; printers, pressmen and bookbinders were active but with local supply equal to demand. Photographers were busy, journeymen tailors and garment workers were active. Bakers, butchers and ice drivers were active. Leather workers and saddlers were busy. Barbers were active, clerks and stenographers busy. Hotel, restaurant employes and laundry workers

were active. Railway crews report active conditions, the heavy amount of both freight and passenger traffic causing considerable special work. Trackmen and freight handlers were very active. Carters, teamsters and expressmen were busy. The demand for unskilled labour continued good, the local supply being insufficient. Wages varied from \$1.50 to \$1.80 per day.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market was very active during September, and all the trades were well employed. Work is progressing on the armory and the contractor was advertising for bricklayers. The planing mill of Atkins Bros. in Fairville is now in full working order. It is equipped with ten machines. On September 6 the steamer *Sincennes* was burned to the water's edge at Cole's Island, on the St. John river. Bank clearings for the three weeks ending September 14 were \$3,874,381, and for the corresponding period last year \$4,361,613, being \$487,232 less in 1911 than in 1910, and \$1,669,044 less than during the four weeks ending August 24 of the current year. The deposits in Government Savings Bank for the month of August were 79,565.29, and the withdrawals \$6,878.51. The Customs receipts for the month of August were \$129,267.46, an increase of \$5,794.99 over the corresponding period of last year. The inland revenue receipts for the month of August were \$18,940.96, an increase of \$3,453.68 as compared with the same period last year. The city cashier paid out \$10,821.06 in wages to civic employes for the month ending September 20.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The apple yield this year has been good, and owing to the

dry season the quality has been of a superior grade. All agricultural products are abundant this season, with the exception of English hay.

Mining.—The Rothwell Coal Company controls a large area in the Grand Lake district, and have just installed a modern mining plant. Active operations are now in progress, and the company expects to be in a position at an early date to undertake large contracts.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were from active to busy, with unskilled labour busy.

FREDERICTON, N.B., AND DISTRICT.

Mr. R. P. Allen, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market during the month of September differed but little from that of August. There has been no lack of employment for both skilled and unskilled labour. Work on the new Intercolonial Railway station is proceeding briskly, and a large force of men is employed. The work of repairing the Anglican cathedral is going along satisfactorily. All of the local industries are fairly busy. Rafting operations at the booms of the St. John River Log Driving Company were suspended on September 19. The returns have not yet been made up, but it is scarcely likely that the total quantity of logs rafted during the season will exceed 90,000,000 feet. About 20,000,000 feet of logs were hung up at the head of the river, and will not be moved until the ice breaks up next spring. The Canadian Colored Cotton Company's large mill at Marysville closed down on September 14, for two weeks, to allow repairs to be made to the machinery.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers have finished harvesting, and are now gathering their

potato and root crops. The yield is reported to be well above the average, and there has been no scarcity of labour. A very successful agricultural and industrial fair was held in Fredericton from September 16 to September 23. The attendance for the week exceeded thirty-two thousand.

Lumbering.—On account of the depression in the lumber market, operators in this section will curtail their operations during the coming winter from twenty-five to fifty per cent. Wages offered men to work in the woods range from \$28 to \$32 per month.

Railway construction.—The Southamptton Railway Company has a crew of men at work clearing the right of way for a branch line from Maillville on the Gibson branch of the Canadian Pacific Railway to Hawkshaw on the St. John river, a distance of twelve miles. The Gibson and Minto Railway Company has commenced surveying a line from Gibson, York county, to Minto, Sunbury county, to tap the Grand Lake coal fields. The Canadian Pacific Railway Company authorities are said to be behind the project and may operate the road when completed.

CONDITION OF PARTICULAR TRADES.

Carpenters and masons, painters and decorators have been busy. In the tailoring trade, business has been a little slack. The carriage factories have been running full time. The big influx of visitors to the city during the month kept the bakers very busy. The steamships plying on the St. John river and tributaries have had a big passenger and freight traffic during the month. Cab drivers reaped quite a harvest as also did the carters and draymen. Barbers, hotel clerks and restaurant employes report the past month as being the best of the year. Several hundred non-resident big game hunters from the United States and Great Britain are now in the New Brunswick woods. From one hundred and fifty to two hundred cooks, guides and helpers are employed by them at wages ranging from \$2 to \$4 per day.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market at the present time is dull; there being very little activity in any branch of trade in this section of the Dominion outside of the lumber business, and that trade is embarrassed by the small demand for lumber in Europe. The lumber merchants are overstocked, and for that reason there will not be as many logs got out this winter as usual. The men will have to depend on the smelt fishing. That industry alone gives employment to about two thousand. There is no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are now through harvesting the grain and are busy getting it threshed. The yield is fairly good. The late oats are threshing out best. The early oats ripened too fast, and consequently are lighter, but on the whole there has been a very good harvest. Potatoes are also a good crop, and so far there is no appearance of rot. The month of August was very warm, and therefore the turnip crop will not be quite as good as was expected.

Fishing.—The fishing season is now over until the river freezes. Smelt and bass fishing will then give employment to a large number of men.

Lumbering.—The sawmills are all running yet, and quite a number of men are in the woods cutting logs for next season.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and carpenters were very quiet in the town, but there is considerable building going on in the country. Painters have done pretty well this season, and plumbers are now quite busy.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:—

GENERAL CONDITION OF LABOUR.

The demand for labour has been well maintained, and general employment was active throughout September, though no new work of any extent was begun. The building trades were very busily engaged and will continue so while the fine weather lasts. There were no labour disputes during the month. The shoe trade has been dull for some time past, but some of the factories are resuming activity. Tourist traffic was very heavy in the early part of September.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy harvesting and indications point to a heavy root and grain crop. Weather conditions were favourable.

Fishing.—Cod fishing on the north shore has been a failure this season, and the fares of the coast vessels have been light.

Railway construction.—The railway from St. Joachim to Murray Bay is being rushed to completion.

CONDITION OF PARTICULAR TRADES.

Very busy conditions prevailed in the building and metal trades, but shipwrights were quiet. Woodworkers were busy, but carriage and wagon makers and coopers were quiet. The printing and allied trades were active, as were tailors; but garment workers, food and tobacco workers were quiet. Hotel and restaurant employés were very busy in the early part of the month. Transportation employés also were busy, with the exception of ship labourers and long-shoremen, who were somewhat quiet. The supply of unskilled labour was equal to the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour generally has been well employed during September. This applies to all lines of industry. Several large industrial concerns have been advertising in the local papers for help. The weather has been exceptionally good, so that those employed at outside work have had practically no broken time. All the manufacturing concerns report good business, and the different plants have been running to their full capacity. Work is being rushed on the construction of several large building contracts, and full complements of men have been engaged. The retail trade was exceptionally busy during the first half of the month, due to the influx of strangers who visit the city during the period of exhibition. The latter institution also gives employment to a large number of men. This year the weather conditions were such that the gate receipts were behind to the extent of over \$3,000. Otherwise the fair was a success. An important arrangement has been completed, whereby the Quebec Central Railway Company has gone under the control of the Canadian Pacific Railway Company. It has been officially announced that the change will in no way affect the staff of the Quebec Central Railway Company in Sherbrooke, nor interfere with the plans approved of for new head offices and other changes contemplated on the road before the deal was taken up. It will mean, however, that the road will be governed by a board in Canada and not, as at present, in London, England. The city valuers have made their report to the city clerk. It shows an increase in valuation of about \$1,000,000 over that of last year. This amount is not made up altogether with regard to new property, but about one-half means an increase on business blocks and premises in the centre of the city. This increased revenue will allow the council to proceed with new projects without increasing the taxes. The valuers, while at work, also took a census of the population. Their report shows an increase in this direction of 691 over 1910, and brings the population up to 16,709. With the population of Lennoxville, which practically adjoins the city of

Sherbrooke, the population of the two places is now well over 18,000 people.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The open weather has allowed the farmers to proceed with their fall work. As a general run, the harvest of grain turned out well, and the crop of potatoes is about the average in quality. In several sections, however, the quantity is light as compared with other years.

Lumbering.—Preparations are being made for lumbering operations, and several camps have already been opened up preparatory for the winter's work.

Manufacturing.—All branches of manufacture were fully employed, and each plant was running full time.

Mining.—The mining industry was fully engaged, and all available men are being taken on at the copper mines in this section, while in the asbestos region the mills and pits are being worked to the limit.

Railway construction.—Construction work on the street railway is suspended in the city. There is considerable work to be done yet, but the company is awaiting the decision of the city council with regard to certain matters now before that body. The different railway companies have extra men at work on the tracks repairing and fixing up prior to the advent of the winter.

CONDITION OF PARTICULAR TRADES.

The building trades were busy. Iron moulders, machinists, and all workmen employed in machine shops were busy. These shops have orders ahead to keep up this state of affairs for some time. Electrical workers, blacksmiths, jewelry workers were active. The wood-working trades were busy, as also were carriage and wagon makers. Printers, pressmen and bookbinders were busy. Journeymen tailors and garment workers were busy. The latter in the wholesale establishments here are now starting on the next summer's goods, and extra hands are being employed. Bakers, confectioners and butchers were busy. Cigar makers were active. Miscellaneous

trades were busy during the month. Railway men, both steam and electric, cabmen, teamsters and expressmen were busy. Unskilled labour was in demand.

DISTRICT NOTES.

Sutton.—Mr. Geo. N. Boright has started up his sawmill in this village, giving employment to some ten or twelve men. The Clark Bros.' tub factory will remain closed for several weeks, or till early winter, when logs can be moved in from the mountains on snow.

Danville.—The brickyard owned by Mr. Emile Simoneau is in full operation, a night and day gang being employed.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was well employed during the month, and indications are that it will continue so for some time. All the industries were running full time, with the cotton factory and the lumber mills working day and night. The building trades have been exceptionally active this month. Work is being rushed with construction for the Wayagamaack Pulp and Paper Company. Wholesale and retail trade was active. Rates of wages and hours of labour remained the same, with the best of understanding between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have finished harvesting and report a very good crop of grain. Potatoes are also a fair yield, selling at \$1 per bag of 1½ bushel.

Fishing.—There was very little fishing done in this district this month.

Lumbering.—Lumbering has been very active the whole month, most of the mills working night and day.

Manufacturing.—All factories were busy, from the Wabasso Cotton Company to the smallest firm, including sash and door factories, coffin and casket trim-

mings, boot and shoe, glove, cigar or biscuit factories.

Railway construction and employment.—The Canadian Pacific Railway Company is still at work building a short line from its main line to the Wayagamack Pulp and Paper Mills.

CONDITION OF PARTICULAR TRADES.

All employed in the building trades were kept busy. Iron moulders, iron-workers and helpers and coremakers, machinists and engineers were active. Electrical workers and linemen were busy. Blacksmiths, bicycle workers and horse-shoers were active. Woodworkers were very active this month, and there are good prospects for the rest of the fall and winter. The printing and allied trades were exceptionally active. Journeymen tailors, garment workers, glove makers and boot and shoe workers were all well employed. Bakers and confectioners, butchers and meat cutters, ice drivers, cigar makers and tobacco workers had a busy month. Tanners and curriers had a quiet month, but leather workers and saddlers were fairly active. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés and laundry workers were all busy. All transportation companies report a good month, with every department busy. Cab drivers, hackmen, carters, teamsters and expressmen also report a busy month. There was a good demand for unskilled labour, but the supply was equal.

DISTRICT NOTES.

The Grès Falls Company is enlarging its pulp mill at the Cape de la Madeleine, and has been exceptionally busy this month manufacturing and shipping pulp.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during the month was generally satis-

factory. The building trades were not as active as during the preceding month on account of the season being so advanced. The City Corporation is giving employment to many labourers. The Langevin Company, Limited, is enlarging its biscuit factory, where many men and young girls will be employed. Sash and door factories had an active month, employing full staffs. The iron industry also had a good month. Musical instrument factories were very active. The leather industry resumed its former activity; the owners of the tannery are building a large addition for the installation of new machinery. The boot and shoe industry was more active than during the preceding month. The O. Chalifoux & Son's farm implement factory, which is being enlarged, had a good month. Commercial activity is greater this fall than at the corresponding period last year. Retail business was very active; farmers, being through harvesting, come to make their purchases before the bad season sets in. Wholesale business also reported an active month. Banks reported a good month with easy collections. There was no change in the rates of wages or hours of labour. Relations between employers and employés were cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had good crops in almost all farm products, which find ready buyers at very high prices. Dairy products sold well at good prices. There was a large yield of apples.

Manufacturing.—All manufactures had a good month.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a rather quiet month. Carpenters and joiners, lathers and plasterers, painters and decorators were quiet. Plumbers, gas and steamfitters were active. Stonecutters were quiet and builders' labourers well employed. The metal, woodworking, printing, clothing, food and tobacco preparation, leather, mis-

cellaneous and transport trades had a good month. Unskilled labour was very active.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during September differed very little from that of August. All branches of industry continued fairly active. The government shipyards were very active. The dry goods business was very active. Grocers and provision dealers were quite satisfied with the month's trade. In all trades wages are good. Great activity prevailed in the harbour. There never was so large a number of steamers loading with ore and unloading coal.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop was gathered in good condition; the quantity differs little from that of last year. Vegetables were abundant and sold well. Dairy products also brought good prices. The potato crop, which it was feared would be killed by the warm and dry weather, turns out fine both in quantity and quality. Potatoes are selling from 60 to 65 cents a bushel, but it is believed the fall prices will come down to 45 or 50 cents a bushel.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners, lathers and plasterers and painters had a good month. Iron workers and helpers, machinists, engineers electrical workers, blacksmiths, boiler-makers were fully employed.

DISTRICT NOTES.

In the small towns surrounding Sorel, such as St. Ours, Berthierville, Pierreville, the few manufactures have received large orders, and activity prevails in these places. Farmers harvested good crops.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was no change in the condition of labour during September. The extensive repair work on the new college and hospital maintained an active demand for labour. Much overtime was worked on the above and other buildings. Two new requests are before the City Council, asking some privileges for new manufactures. The building of the Cluett-Peabody Company is almost completed and machinery is being installed. All the other factories are employing their full staffs, some of them increasing the number of their employés. Business, both wholesale and retail is very prosperous. Banks are doing twice as much business as they did last year. There has been no difficulty between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm products come to the local market in fairly large quantity, but prices are very high.

Potatoes, \$1.30-1.35 for 90 pounds.

Apples, 30-40c. per peck.

Fresh eggs, 25-30c. per dozen.

Butter, 28-30c. per pound.

Tomatoes, 40-60c. per box.

Plums, 40c per small basket.

Plums, 75c. per large basket.

There is practically no other small fruit, on account of the drought.

CONDITION OF PARTICULAR TRADES.

The building trades were all very active. The metal and engineering trades had a good month, with shipwrights, ship carpenters and caulkers quiet. The woodworking, printing, clothing, food and tobacco preparation, leather, miscellaneous and transport trades had a good month. Unskilled labour was active.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

September was in no way less active than the preceding month and was in every way better than the corresponding month of last year, although there was a few days' slackening in the building trades, caused by a shortage of brick and cement. Business both wholesale and retail was very active and collections easy. There was no change in the rates of wages, except that a few contractors have increased the pay of bricklayers, plasterers and builders' labourers by five to seven and a half cents per hour; but this increase was only partial and in order to secure the best workmen, and there is no sign of its becoming general. The prospects for the winter are very good; work will be continued on several buildings under way and will employ many men all winter.

CONDITION OF PARTICULAR TRADES.

The building trades were all very active, bricklayers, joiners, plasterers and builders' labourers being in demand. Linemen, blacksmiths, tinsmiths, and horseshoers were in demand, the other metal trades being active. Upholsters, polishers and wagon makers were in demand, with the other woodworking trades busy. The printing trades were active, pressmen being in demand. Journeymen tailors were in demand and garment workers active. In the food and tobacco preparation trades bakers were in demand and the others active. The leather trades had a good month. Barbers and delivery employés were in demand. All the transport trades were good, carters and draymen being in demand. Unskilled labour was very active.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Customs receipts at this port for August totalled \$1,656,863.27, as against \$1,642,628.62 for the corresponding month of last year, or an increase of \$14,234.85. Post Office receipts for August amounted to \$96,072, as against \$84,978 for the same month last year or an increase of \$11,094. The export trade from Montreal during the present season shows a satisfactory increase over the same period last year. The following table is taken from the official report:

	1911	1910
Wheat.....Bushels.....	8,873,325	10,314,880
Corn.....Bushels.....	4,361,350	691,800
Peas.....Bushels.....	9,566	17,138
Oats.....Bushels.....	4,751,920	3,168,553
Barley.....Bushels.....	35,227	342,121
Rye.....Bushels.....	17,141	63,661
Flax.....Bushels.....	940
Flour.....Bags.....	1,011,533	540,284
Slip.....Bags.....	56,025	13,700
Butter.....Boxes.....	63,051	18,028
Cheese.....Boxes.....	926,956	929,668
Pork.....Barrels.....	1,183	61
Salt pork.....Barrels.....	274,552	227,667
Meat.....Packages.....	88,791	64,999
Apples.....Barrels.....	1,078	584
Hay.....Bales.....	415,912	229,295

Local industries, as a general rule, were all very active.

The skilled trades were from active to very active. Unskilled labour was active.

HULL, QUE., AND DISTRICT.

Mr. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was well employed during September, but indications are that it will not continue so for the balance of the year in the lumber mills and other large industries at Chaudiere Falls. This is due to the waters of the Ottawa and Gatineau rivers being exceedingly low, thus depriving the mills from getting their logs, also of the water necessary to run all the turbines. At Booth's and Eddy's sawmills, only three-quarters of the summer gang is employed, and the chances are that it will be further reduced before the ice sets in, as the water is getting

lower and lower. The lumbermen not having been able to bring more than three-quarters of their logs to their mills, the cut in the bush next winter will be reduced considerably. Many men who left early to go west for the harvest will not return, according to the hiring agents for the large concerns. Wages for shanty-men will be steady, from \$30 to \$35 a month with board, and \$40 for the best men. The employers will have the choice among the best old hands working in the mills just now. The Corporation of the City of Hull has just given out a few contracts that ought to give employment to some one hundred men until late this fall. They include two new fire stations at a cost of \$10,000 and \$11,000 respectively; an extension of the water works at \$77,000 and repairing the sewer pipes to the extent of \$7,000. Outside of the lumber industry, every other line of business is active. The tradesmen are well employed. Clerks in general stores, especially in hotels, were very busy. There is still great activity for unskilled labour in and around Hull. The farmers throughout the district are well satisfied with the crops.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

September was an active month in nearly every branch of employment. The civic corporation maintained a staff of 900 labourers, but even with this force several works have been left over for next season. The increase of new houses called for considerable sidewalk construction, and the opening and improvement of streets. There is no decline in local building, permits for August amounting to \$262,430, compared with \$146,800 for the corresponding month last year. The city engineer stated that most of the present staff of workmen will be kept on till Christmas. It will be a record season for laying pavements and granolithic walks. Large crews were sent away to the lumber camps, the men in many instances receiving \$2 per month more than

last year. Teamsters, log makers and rollers are paid from \$32 to \$35 per month. The destination of the men frequently governs the rate of wages. The Rescue Mission, which provides cheap meals and lodging for needy applicants, reported only twelve inmates in the middle of the month and these were in demand. Work was begun on a bridge crossing the Rideau canal at Bank street, which will cost \$130,000. The Dominion Government appropriated \$80,000 of this amount and the ratepayers voted the balance on September 7. Two other money by-laws were passed at the same time, one providing \$195,000 for water-works improvement, and the other granting \$60,000 for a high fire pressure system. Wholesale and retail trade was reported active for the month. Merchants benefitted by the largest influx of visitors on record for the annual Central Canada Exhibition. The total attendance at the exhibition is estimated at 175,000 or 18,000 more than last year. Ottawa bank clearings for August were reported at \$16,932,356, being \$1,000,000 more than the previous August. The first three weeks of September showed a drop of \$500,000 compared with the corresponding period of 1910. No labour disputes occurred during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fall fairs were well patronized by farmers. Exhibits indicated good crops and live stock in favourable condition. The entries of horses at the Ottawa exhibition showed an increase of fifty per cent. over last year. The hay crop was abnormally heavy in the Ottawa valley, and owing to scarcity of labour many meadows were left uncut until the quality of the crop deteriorated. Owing to outside demand, the price of hay advanced a few dollars per ton. Dairy produce rose rapidly in price.

Lumbering.—Normal market conditions prevailed for lumber. Sawmills had difficulty owing to low water, and pulp and paper manufacture was handicapped in the same way. Auxiliary steam and electric power had to be used at extra cost. Owing to reduction of the

lumber cut in one of the largest mills in the Ottawa valley, the owner has enough sawlogs ahead to permit curtailment of usual shanty operations by one-third.

CONDITION OF PARTICULAR TRADES.

The building trades had an active month. Iron workers were busier than the previous month. The threshing season created a demand for stationary engineers. Upholsterers were well employed. The woodworkers in house furnishing factories were busy. Orders were plentiful in the printing houses. The clothing trades, especially milliners, had a brisk month. Theatre employés were busier than for some months. All branches of transport experienced an active month. The Ottawa Electric Railway Company did a record business during the exhibition, carrying 420,000 people in four days. Unskilled labour was very well employed.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Building, manufacturing, and other industries were active. During the month an order was received by the Canadian Locomotive Works Company, from the Grand Trunk Pacific Railway Company, for the building of twenty-five locomotives, to be delivered next year. The local plant has orders ahead now to keep it busy for more than a year. A foundation of cement, on which to build the government boats, has been completed by the Kingston Shipbuilding Company. The keel blocks have been placed in position, and everything is in readiness for building operations. Most of the material is also here. The dry dock presents a very active scene of labour, a large number of men being employed. In the northwestern suburb of the city—Williamville—building operations are now, and for some months past have been, extremely active. The season for boat traffic among the islands is nearing a close, and it is said to have been a great success.

The vessels running out of Kingston report a great season, far better than last year, which was above the average. The Customs revenue at the port of Kingston for the month of August totalled \$41,603.66. A comparison of the revenue for the first five months of the fiscal year, and the same months last year, shows an increase for 1911 of \$30,727.20. The collections at the inland revenue office for the month of August, 1911, were as follows: Spirits, \$5,669.01; malt, \$456.81; tobacco and cigars, \$2,341.52; bonded factory (vinegar) \$336.85; other receipts, \$26; total, \$8,830.10. Let passes were issued during August for grain and coal en route for Montreal as follows: Grain, 1,753,501 bushels; coal, 3,063 tons. The attendance at Queens University just opened is expected to reach 1,700. Last year it was 1,612. There were no changes in the rates of wages or hours of labour reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Farming, fishing, lumbering, manufacturing, mining, railway construction, and other industries were active during the month. Six carloads of provisions arrived in the city during the month over the Grand Trunk Railway for the Canadian Northern Railway Company construction camp at Sydenham. This camp has caused considerable business among the farmers in the vicinity of Sydenham. All branches of the skilled trades, as well as unskilled labour, reported an active month.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market has been active during September. The building trades were more active than in any previous month this year, though no large works were under construction. There are a lot of small dwellings as well as repairs and extensions. The mills are all run-

ning full time, and there is considerable work in other branches. The Peterborough Cheese Board met during the month and disposed of 2,759 boxes at prices ranging from $13\frac{1}{4}$ to $13\frac{3}{4}$ cents, this being the highest price paid this season so far. The sawmill at Bewdley was struck by lightning and burnt to the ground. Wholesale trade was good, and for retailers the trade was satisfactory. The rates of wages and hours of labour remained the same.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural conditions were active, and will likely continue so until the crops are harvested. The potato crop is a failure this season.

Lumbering.—Lumber companies find it difficult to get men to go to the woods. The farmers are at present monopolizing all of the available men. Next month will see a big demand for able bodied men to work in the woods.

Manufacturing.—All the factories are running full time, with the Canadian General Electric Company working overtime. The Wm. Hamilton Company is working night and day shifts in its machine shop.

Railway construction.—The Canadian Pacific Railway grain lines are busy. They are complaining of the scarcity of labour, but expect to have the line from Victoria Harbour finished by December.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters, plumbers, and gas and steamfitters had plenty of work. Iron moulders, iron workers, machinists and engineers were active. Electrical workers and linemen were very busy. Blacksmiths were active. Boilermakers were working overtime. Woodworkers and upholsterers were active. The printing trades had a busy month. Journeymen tailors, garment workers, bakers, confectioners, butchers and meat cutters were active. Leather workers had a good month. Textile workers were busy. Railway and street railway employes, teamsters and expressmen, and those

engaged in connection with navigation, had an active month. Unskilled labour was in active demand at good wages.

DISTRICT NOTES.

Whitby.—The Martin Manufacturing Company and S. Trees & Sons are both enlarging their factories. The former is erecting a large brick building separate from the others, and the latter an extension to the building constructed recently.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

September was a busy month in all lines of industry, both skilled and unskilled labourers having plenty of work. During the earlier part of the month the great influx of visitors to the Canadian National Exhibition gave a stimulus to business. The total attendance was about 916,000, being 79,000 in excess of that of last year. Building continued very active, a number of large contracts being undertaken, which will provide indoor work during the winter for a large number. Building permits were issued in August representing an approximate value of \$1,877,369, as compared with \$1,713,040 for August, 1910. The contract for the erection of the Canadian Pacific Railway Company building of sixteen stories, on the south-east corner of King and Yonge streets, was let to the George A. Fuller Company, of New York, and work begun. The Steele Briggs Seed Company, Limited, is erecting a five story brick warehouse on South Spadina avenue, to cost \$100,000. The Home Life Association is putting a five story addition to its present eight story building on Victoria street, at a cost of \$150,000. The Consolidated Plate Glass Company will erect a warehouse on West Wellington street, to cost \$60,000. A three story building will be erected for the Women's Temperance Union on Gerrard street, at a cost of \$55,000. The assessment of the city for 1912 has been completed, showing a total assessment

of \$343,703,276, an increase of \$37,098,502 over that of the current year, the population being given as 374,672, an increase of 32,681. The receipts of the Toronto Railway for August were \$428,960, as compared with \$386,805 for August, 1910. Inspection by the Medical Health Department of the city into the condition of the bakeshops has shown that many of them are in a highly unsanitary condition. Prosecutions under the Health Act have been begun against some of the worst offenders.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm work has been unusually well advanced for the season. Heavy rains have improved the pasturage and put the ground in good condition for fall ploughing. Towards the end of the month the farmers were busy harvesting the ensilage crop, which turned out much better than was anticipated. Potatoes and root crops generally were poor.

Manufacturing.—Manufacturers were generally active. Orders have been coming in more freely and many establishments have enough in hand to keep them busy for some time. The E. W. Gillett Company is erecting a four story brick factory for the manufacture of baking powder, at the corner of Liberty street and Fraser avenue, to cost \$100,000. A two story brick addition to the Bredin Bakery at Bloor and Dundas streets will be built by the Canada Bread Company, at a cost of \$30,000. Work has been begun on the erection of the Elliott Manufacturing Company's mill for the manufacture of paper boards in the Ashbridge's Marsh district. The capacity of the mill will be 15 tons per day.

Railway construction.—Seventy-five of the new street cars required on account of the extension of the street railway system have been built and put into service. Twenty-five more will be ready in October. The new Harbord street line is in operation, but the other lines were not completed by the end of the month. The Toronto-Trenton division of the Canadian Northern Railway, 105 miles in length, has been completed and will be opened for traffic early in October.

CONDITION OF PARTICULAR TRADES.

The building trades were all busy. Blacksmiths, boilermakers, moulders, machinists, structural steel workers and sheet metal workers were active. Electricians were busy. Brass workers, jewellers and silversmiths had plenty of work. The woodworking trades were well employed. Printers, bookbinders, pressmen, and stereotypers had an active month. Custom tailors were busy during the latter part of the month. Garment workers, hat and cap workers, boot and shoe workers and whitewear workers had plenty of work, manufacturers complaining of a scarcity of female help. The provision and tobacco trades were steady. Harness and leather workers were active. Railway and street railway employes, teamsters, expressmen, sailors, longshoremen and others engaged in transportation had steady work. Hotel and restaurant help, barbers, laundry workers, clerks and salesmen, had an active month. An agreement was concluded between the theatre employers and the Theatrical Stage Employes' Union, giving the latter an increase of twenty-five per cent. in wages. Unskilled labour was generally well employed.

DISTRICT NOTES.

Mimico.—The ratepayers on September 16 adopted a by-law for the installation of the provincial hydro-electric lighting and power system.

North Toronto.—On September 9 the electors ratified by-laws approximating \$45,000 for opening new streets.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The highly favourable conditions which characterized the industrial situation throughout the summer continued during September. There was the usual falling off of employment in some lines which always occurs at this time of the year, but

otherwise there was little change. Work on the enlargement of the power houses of the Canadian Niagara Power Company and the Electrical Development Company to complete the full designs of the plants, was actively commenced and will be an important employment factor for some time to come. A number of masons, concrete men, structural iron workers and labourers will be employed. At the Queenston quarries twenty stonecutters are engaged in cutting stone for the former building. The new building at the works of the American Cyanamid Company was completed and machinery was being installed. The new armoury building was enclosed, and the new fire station at the south end of the city was finished and occupied. An extension of the Grand Trunk Railway Company's station was nearly finished. Many dwellings were commenced. Sidewalk and sewer construction continued to give a good deal of employment. The Bell Telephone Company occupied its new central exchange building. Financial and commercial conditions were satisfactory.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Late peaches and grapes were harvested in this month, making busy times in the fruit districts, while farmers everywhere were actively engaged with their vegetable and root crops, corn harvest and fall ploughing.

Manufacturing.—Factories of every sort were busy, several running overtime, and others advertising for female workers for steady employment.

Railway construction and employment.—Railway traffic continued to be heavy, though the summer tourist business was falling off.

CONDITION OF PARTICULAR TRADES.

Every one of the building trades was active, most of them very busy. At times there were a few idle bricklayers. The outlook in these trades is good for October and November. The metal working trades continued busy, though there was some decrease in the rush of work from the previous month. Line-

men were in great demand. Tailors, hat, tie, suspender and shirt makers were all active. Bakers and meat handlers were quieter, but the shredded wheat factory was still very busy, and the canneries were running to their full capacity most of the time. Barbers were quieter, as were also salespeople and hotel and restaurant employés. Delivery employés were active. Freight traffic continued to be very heavy on both steam and electric lines, but the falling off of summer tourist and excursion business was affecting the latter, and autumn schedules were in effect. A few less motormen and conductors were employed. On steam roads there was practically no change in the number of men employed. Steamboat lines were cutting down their services and a number of crews, as well as water-side labourers, were laid off. Teamsters and carters were busy. Unskilled labour was very well employed.

DISTRICT NOTES.

Bridgeburg.—The Lautz Marble Company, of Buffalo, will establish a shop here which will eventually employ forty marble dressers.

Fort Erie and Crystal Beach.—The summer season being over, hundreds of employés of hotels, restaurants and other places of entertainment and amusement were discharged. A large portion of these persons seek employment for the winter in resorts in the Southern States.

ST. CATHERINES, ONT., AND DISTRICT.

Mr. James A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market was never more active than for the month of August, proving to be the busiest month of a very active season for the employment of labour. All branches of industry were active to busy, with conditions of employment good. The building trades were rushed, with plenty of work ahead. Contractors refused to take on more work, as they had all they could handle this

season with their present staff and the rush conditions at the mills getting out the necessary material. The contract for the erection of the new buildings for the Towne-Yale Lock Factory was let to the Bishop Construction Company of Montreal and Toronto. The first building, to be ready for occupation on January 1 next, will be of brick, steel and concrete, and cost \$100,000. The work on the new buildings of the Steel and Radiation Company, is progressing very favourably. Owing to the increased volume of trade in the shipping of grain, &c., through the Welland canal, the canal was kept open Sunday, September 11, and will remain open continuously till the close of the season. Business, wholesale and retail, was reported good. The canal employés, employed on locks and bridges, are expecting an increase in their pay. The men formerly received \$1.50 per day, and now the lockmen will receive \$60.00 and bridgemen \$55.00 a month, the same to date back to April last, when the change comes into effect. The mechanics are also to receive an increase.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fruit men and farmers were busy harvesting crops. The late fruits, peaches, pears, grapes, &c., are proving of very good quality and good average to heavy crops. Tomatoes proved also a better crop than at first anticipated. The shipping companies and canneries were busy to rushed handling the heavy volume of fruit trade.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were very busy. The metal and engineering trades were all well employed. The woodworking and furnishing trades were active to busy, with conditions of employment good. The allied printing trades were all busy. Journeymen tailors and boot and shoe workers were busy. Bakers and confectioners, butchers, and meat cutters, ice cutters and drivers, cigar makers and tobacco workers had a good month. The leather trades were

busy. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant and theatre employés and laundry workers were active. All lines of transportation were busy. Unskilled labour was well employed, with the supply and demand fairly well balanced.

DISTRICT NOTES.

Thorold.—The very satisfactory conditions of the labour market for last month continued during this month.

Merriton.—Labour was well employed, all mills and factories running full time.

Port Dalhousie.—The labour market proved very satisfactory for the month, the supply and demand being well balanced.

HAMILTON, ONT., AND DISTRICT.

Mr. William T. Cooper, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

With a few exceptions, September was a busy month among all classes of skilled and unskilled labour. The building trades continued very busy, and civic work has kept a large number of men steadily employed. The Casselli Chemical Works, of Cleveland, Ohio, have purchased a 160 acre site in the east end, and will erect a mammoth plant here, giving employment to many hundreds of people. Among the products the company will manufacture are mixed acid nitric acid, muriatic acid, sulphuric acid, spelter and lithopone. Mr. Archdale Wilson will erect a large three story factory on Hughson street north. The contracts for the new ten room school on Maple avenue have been awarded, the bulk amount of the tenders is about \$60,000. Customs collections for the port of Hamilton for the month of August amounted to \$202,572.22, an increase of \$20,981.35 over the corresponding month last year. Building permits for August totalled \$246,150, an increase of \$16,050 over the same month last year. A permit has been taken out by the Board of Education for a brick addition to the Trolley street school to cost \$87,500. The Inter-

national Harvester Company has secured a permit for a large addition to its plant, the erection of a brick wood-turning building at a cost of \$245,000. The contract goes to a Welland firm. A permit has been taken out to build a \$65,000 brick factory for the Diamond Flint Glass Company on Trolley street. The factory when completed will be one of the most modern on the continent. The Otis-Fensom Elevator Company is having a brick addition to its factory built at a cost of \$25,000. A permit has been taken out for a brick addition to the Sawyer-Massey Company's factory to cost \$15,000. Bank clearings for the four weeks ending September 2, 9, 16 and 23, as compared with the corresponding weeks of last year, were as follows:—

1911	1910
2,227,007	1,829,183
1,913,684	1,736,460
2,398,872	2,088,678
2,204,337	1,908,171

Both wholesale and retail trade are active and the indications are that the steady tone will continue for the balance of the season. Some of the manufacturers are complaining of the scarcity of girl labour here, especially experienced office workers. In all probability the grocery stores here will close Wednesday afternoons all the year round, and will also shut up at 10 o'clock on Saturday evenings, instead of remaining open until nearly midnight. A motion to this effect will be submitted at the next meeting of the Retail Grocers' Association. The prices of sugar and coal have both advanced during the month. A new company, known as the Climax Good Roads Company, Limited, has been formed with a capitalization of \$40,000. A site has been purchased at the corner of Clark avenue and Barton streets, upon which is being erected a two story building 60 x 72 feet, to manufacture road-making machinery, dumping wagons, &c.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—September was as usual a very busy month with the farmers, fall plowing and threshing operations being in full swing. Fruit growers and truck

gardeners have been marketing large quantities of produce daily during the month. Tomatoes are more plentiful than last year and are of a good quality. Canning factories hereabouts are very busy, and the fruit and vegetables going into the cans are the finest the district produces.

Manufacturing.—Active conditions prevailed in this industry during the month. Many of the large factories are very busy, and some are working overtime. Large additions are being made to some of the establishments, and the indications are that a very busy season is ahead.

Railway construction.—The construction of the Guelph to Hamilton line of the Canadian Pacific Railway is progressing rapidly. Large gangs of men are steadily engaged, and every effort is being put forth to complete the work as soon as possible.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters, and lathers and plasterers have had a busy month. Plumbers, gas and steam-fitters, and builders' labourers have also been rushed with work. Iron moulders have had steady work. Stove mounters found trade a little more brisk than in the previous month. Horseshoers were well employed, and jewellers and silver-smiths were busy. Carriage workers were busy. Pattern makers found trade rather quiet. Printers were less busy than during the previous month. Pressmen were working steadily. Journeymen tailors were rather quiet during the early part of the month, but improved conditions prevailed toward the close. Garment workers had a fair month. Butchers and meat cutters were busy. Cigar makers and tobacco workers had steady employment. Barbers and broom makers were busy. Stenographers were hard to get. Railway employés had steady employment. Street railway employés and teamsters and expressmen were well employed. Unskilled labour found steady employment, the demand being about equal to the supply.

DISTRICT NOTES.

Grimsby.—On September 5, the rate-payers carried a by-law to grant a loan of \$10,000 to the Radiant Electrical Company. A fine new concrete building is in course of construction for the company. Electric flat irons, chafing dishes, kettles, &c., will be the principal output of the new firm. About twenty-five hands will be employed to start with.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was well employed during the month, which compared favourably with the preceding month, and was better than the corresponding month of last year. The building trades were especially active, and there has been a strong demand for extra workmen. This will only continue until the present season's work is completed. The scarcity of brick is causing some delay. The iron trades were busy, and from indications more men will be employed during the coming winter than formerly. There is a strong demand for female operatives. Steady employment, under sanitary conditions, with cheerful and pleasant surroundings, is offered by the Penman Manufacturing Company, and the paper box factories. The report of the assessment department gives the city a population of 24,084, an increase over last year of 2,120. The total assessed value is \$13,402,005, an increase over last year of \$853,690. This is the largest increase in population recorded in any year, and exceeded expectations.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy. The root crop in some sections is light. Potatoes this fall will be high.

Manufacturing.—Manufacturers were busy. The large new factory erected by the Ham & Nott Manufacturing Company is being equipped with machinery. The Massey Harris Company will occupy

the large additions to its warehouses at once. The large and modernly equipped new moulding shops erected by the Waterous Engine Works Company are nearing completion. The Cockshutt Plough Company is making additions to four departments, costing \$40,000. The additions to the mills of the Penman Manufacturing Company, which will nearly double their capacity, will be completed by the end of the year.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators, plumbers, gas and steamfitters, iron and brass moulders, coremakers, machinists and engineers, electrical workers, linemen, metal polishers, buffers and platers, stove mounters, blacksmiths, boilermakers and sheet metal workers were busy. Horseshoers were active. Woodworkers, carriage and wagon makers, pattern makers, coopers, printers, pressmen and the allied trades, tailors, tailoresses and shoemakers, bakers and confectioners were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were busy. Barbers, clerks, delivery employés, hotel and restaurant employés were actively engaged. Laundry workers were busy. Railway trackmen were active. Freight handlers were busy. Street railway employés worked steadily. Carters, draymen and teamsters were busy. Unskilled labour was fully employed.

DISTRICT NOTES.

Paris.—Labour was well employed; mills and factories ran steadily.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Continued activity prevailed in the labour market during September, all the building trades having a very busy month, with good prospects for as long as weather will permit. Contracts have been let for

the new Young Men's Christian Association building, and work commenced thereon. Work is being pushed ahead rapidly on the new factory of the Independent Fire Company. The building was originally to have cost \$50,000, but it is now intended to spend \$60,000 in an up-to-date plant. The Gilson Manufacturing Company is building another extension to its factory; the new addition will be used as a core room. The new Colonial whitewear factory is nearing completion, and will be when finished one of the finest and most modern in Canada. The building, which is 120 x 65 feet, is of solid brick, will cost \$28,000, and will have room for 400 operators. The company expects to move into its new premises about the first of November, when 300 operators will be given immediate employment. The County Council has awarded contracts for two new concrete bridges at a cost of \$4,350, both to be finished this fall. The assessor's roll for the year 1911 has been returned to the City Council, and shows a total assessed value of \$9,262,136, which is an increase of \$339,299.60 over the year 1910. The population of the city is 15,107, an increase of 240 over last year. Customs returns for the month of August were \$23,195.94, an increase of \$1,705.93 over the corresponding month last year. Wholesale and retail merchants report a quiet month. On September 25, Sir James Whitney laid the corner stone of the new Administration Building at the prison farm. There were no changes in rates of wages and no unrest in the labour market reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a very busy month; fall ploughing, threshing and filling silos. Corn and root crops are below the average, the potato yield being very light and prices high.

Manufacturing.—Satisfactory conditions were reported in nearly all lines of the manufacturing industry, with every reason to anticipate a continuance of activity.

CONDITION OF PARTICULAR TRADES.

The building trades were all actively employed with prospects good till the end of the season. Iron moulders, core makers, and helpers, and tube mill workers were busy. Machinists and electrical workers were well employed. Metal polishers, stove mounters and blacksmiths had a fair month. Piano and organ makers were busy, also sewing machine makers. Sash and door mills were very active. Carriage makers and pattern makers had a fair month. Coopers were very busy. Printers and allied trades, journeymen tailors and garment workers had a fair month; also boot and shoe workers. Railway trackmen were very busy raising tracks through the city to allow for subways on the principal streets under the Grand Trunk Railway. Carters, draymen and teamsters were very active. Unskilled labour had a good month, with the supply and demand about equal.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of September was a busy one in labour circles, all classes being fully employed, with a demand for help in nearly all branches. Good progress was made on the new buildings under way. The large addition to the Western Shoe Company was completed during the month. There were issued during September, thirteen building permits, valued at \$32,600; these were mostly for workingmen's houses. Shipments and bank clearings were favourable. Business, both wholesale and retail, was very favourable. There were no changes in the rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy during the first half of the month doing their fall seeding, and during the latter half

cutting corn and filling their silos. The corn crop is a fairly good one. Market prices remained about the same as last month.

Lumbering.—This industry was active.

Manufacturing.—All plants were busy, and in many of them there was a demand for help. Many of the factories have been enlarged, and this created a greater demand for help.

Railway construction and employment.—Work on the People's Railway was quiet. The Berlin and Waterloo Street Railway Company is putting down a permanent roadbed through Waterloo.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators, paper hangers, plumbers, gas and steamfitters, stonecutters, and builders' labourers, were very busy. Iron moulders, iron workers and helpers, coremakers, machinists and engineers, steam engineers, electrical workers and linemen, were fully employed. Metal polishers, buffers, platers and brass workers; stove mounters blacksmiths, boilermakers, sheet metal workers, bicycle workers, tool sharpeners, and horseshoers, were active. Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, car builders, pattern makers and coopers, were busy. Printers, pressmen, bookbinders, steel and copper plate printers and photo engravers, were all busy. Journeymen tailors were somewhat quiet during the first part of the month, but became active toward the close. Garment workers, glove makers and boot and shoe workers, were very busy. Bakers and confectioners, butchers and meat cutters, ice cutters and drivers were fully employed. Cigar makers and tobacco workers were active. Tanners and curriers, leather workers, saddlers, trunk and bag makers were very busy. Barbers, broom makers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés, laundry workers, cotton workers, suspender workers, glass workers, and rubber workers, were fully employed. Railway employés and freight handlers

were active. Street railway employés, cab drivers, hackmen, carters, draymen, teamsters and expressmen, were active, and unskilled labour very busy.

DISTRICT NOTES.

Waterloo.—All classes of labour were fully employed during the month. All manufacturing establishments were busy. The Bithulithic Paving Company has been awarded the contract for the paving of King street from the Alexander House to the car stables, and is busy on the job. The curbing is completed.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The industrial and labour conditions of last month continued with but little change. The local factories are mostly all working full time with complete staffs, and some are working overtime. The reports continue very encouraging. Both the foreign and the local demand are keeping up. The certainty of a good crop in the west is credited already with a considerable increase in the demand for local goods; but, indeed, the demand from the Canadian west has been unusually good all season. The organ and piano factories report business excellent, and prospects very bright. The wagon factories are very busy, and the outlook is most encouraging. The furniture manufacturers were very busy. The Stewart Manufacturing Company (stoves and furnaces) finds it difficult to keep up with the demand. The foundry is running to full capacity. Generally speaking, the merchants report business very good. There has been a more or less urgent demand all summer for labour of all kinds, and there is still a fairly active demand for skilled men, such as cabinet makers, bench hands and good general mechanics. There is a constant demand for female help. The demand for unskilled labour is not so great as it was, owing to the fact that a good many men are returning from the country.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, labourers, and all employed in the building trades, were busy. There has been a good demand for both skilled men and labourers. Iron workers, moulders, machinists, &c., were busy. There has been considerable difficulty experienced in securing enough good moulders and stove mounters for the local demand; but the situation is now reported more satisfactory. Blacksmiths and horseshoers were busy. Woodworkers, upholsterers, varnishers and polishers, carvers, carriage and wagon makers were all busy. Printers and pressmen, were busy. Journey-men tailors and garment workers were steadily employed. Bakers, butchers and cigar makers were regularly employed. Tanners were working steadily. The demand for unskilled labour is easing off. The rush on the farms is over, and a good many men are returning to the city.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour during September has been as fully employed as during the preceding month. The building trades were actively engaged. Building permits to the value of \$34,795 were issued during August, as against \$13,215 for the same month of 1910. Several large permits were issued, among which was that for St. Andrew's church. A large number of men and teams were employed in the paving of streets and laying of cement walks. In most cases a considerable improvement in business conditions over last year is reported. Wholesale and retail trade has been steady during the month, and merchants are looking forward to a big fall trade. The customs returns for the port of Stratford during the past month totalled \$18,303.17, an increase of \$2,052.08 over the same month last year. No changes in the rates of wages and no trouble in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy during the month sowing fall wheat, threshing, cutting corn and filling silos for the winter. Potatoes were selling for \$1.50 per bag; chickens, 50 cents to 75 cents a pair; apples, \$1 a bag; hay, \$15 a ton.

Manufacturing.—All manufacturing establishments were running full time with full staffs.

Railway construction.—Re-laying and improvement of trackage has given employment to extra forces of men.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, and plasterers, were busy. Painters, paper hangers, plumbers and builders' labourers were active. Iron moulders, iron workers and helpers, were active. Machinists, engineers and electrical workers were busy. Blacksmiths and boiler makers were active. Woodworkers, upholsterers, polishers and carriage and wagon makers were active. Coopers were busy. Printers were busily engaged during the month. The clothing trades were busy, especially factory workers. Bakers, confectioners, butchers and cigar makers were active. Harness makers were doing a good business. Barbers, clerks and delivery employes were active. Hotel, restaurant and laundry workers were busy. Railway conductors, engineers, firemen and trainmen were active. Freight handlers, cab drivers, draymen, teamsters and expressmen were busy. Unskilled labour was fully employed.

LONDON, ONT., AND DISTRICT.

Mr. A. Wootton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

September has been an exceptionally busy month in all lines of work. Quite a number of buildings are being erected, notably among them being the Canadian Pacific Railway round house; Canadian Pacific Railway bridge over the Thames; Ontario Spring Bed and Mattress Com-

pany's addition; McClary Company three story warehouse; new station for London and Southwestern Traction Company. Besides the above, the Masons are to erect a \$45,000 temple and the Canadian Pacific Railway a \$10,000 station in East London. Several new stores are being erected in the centre of the city. During the first eight months of the year ninety-one permits were issued for the total amount of \$618,224. At the last meeting of the City Council contracts were let for \$29,000 worth of asphalt pavements to be laid this year. The Western Fair held during the month brought thousands of visitors to the city, and was a great incentive to retail trade. Tuckett's cigar factory, a branch from Hamilton, which was closed a couple of years ago, has been opened up again, and has made a demand for help in that line. A number of factories are experiencing difficulties in not being able to secure enough female help. On September 1 coal prices were increased 50 cents a ton in all lines, and now sell at the following prices:—

	Ton.	$\frac{1}{2}$ -Ton	$\frac{1}{4}$ -Ton
Chestnut.....	\$7.50	\$3.75	\$2.00
Stove and chestnut.....	7.40	3.70	1.90
Egg and stove.....	7.25	3.65	1.85
Pea.....	6.00	3.00	1.60

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fruit crop in this section was a good one and apples, pears, plums, peaches and grapes are plentiful and cheap. Experienced farm labour cannot be got here, and it is necessary to employ unexperienced help from the British Isles, who, as soon as they become proficient, leave for Western Canada.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were from busy to very busy, some working overtime. Unskilled labour was well employed, with supply sufficient to meet the demand.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during the month of September was generally good in this city and district. Towards the close of the month business showed an increase over the first part of the month. Conditions on the Michigan Central Railroad were slightly better than during the mid summer months, and a general revival of traffic is now looked for. On the Pere Marquette and Wabash Railways, conditions continue favourable. Unskilled labour has been well employed, the favourable weather conditions contributing markedly to the employment of that class of labour in civic circles. Brisk business is reported in local industries, with a good supply of fall orders ahead. In the building trades, mechanics were well employed. The Wednesday half holidays in effect during July and August were discontinued September 1. The extension of the hydro-electric power line from St. Thomas to Port Stanley, will be commenced at an early date. It is expected that power will be transmitted before the advent of cold weather.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were generally quiet. Threshing was in order throughout September, with very satisfactory results.

CONDITION OF PARTICULAR TRADES.

Mechanics employed in the building trades had a good month, and found steady work. Machinists, boilermakers and blacksmiths in the local railway shops were busy. Upholsterers report an increase in business towards the end of the month. A good supply of orders is on hand and tailors anticipate a good fall business. Cigar makers and unskilled labour were well employed. Orders have been issued for the resumption of work on the new Michigan Central Railroad round house in this city, and it is expected some forty workmen will be put on the job immediately and the structure rushed to completion. It is stated unofficially that the work will cost in the neighbourhood of \$50,000.

CHATHAM, ONT., AND DISTRICT.

DISTRICT NOTES.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was little change in the labour market during the past month, all branches being still very active. Contractors were rushing their jobs in order to have them enclosed before the cold weather sets in. Considerable delay was caused by the recent heavy rains, to outside contractors, resulting in having to lay off men quite frequently. Manufacturing of all classes was active. The Wm. Gray & Son Carriage Company resumed operations after two weeks' stock taking, with an increased staff. The outlook for the coming winter appears better than in 1910. Wholesale and retail trade was still active. The City Council has advertised for a large amount of granolithic pavement, to be completed before the season closes. There was no labour trouble reported. Freight traffic was active on all railways, particularly on the Chatham, Wallaceburg & Lake Erie Electric Railway. The work of deepening the Thames river gave employment to a number of men.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy seeding and preparing to harvest sugar beets. The frost on September 18 did considerable damage to tobacco and many farmers were heavy losers. The price of live hogs was from \$6.50 to \$6.75, farmers holding for better prices.

Manufacturing.—The canning companies were working overtime, but the evaporating factory was practically idle for want of fruit.

CONDITION OF PARTICULAR TRADES.

All branches of the building, metal, woodworking and printing trades were actively employed. Bricklayers and carpenters especially were in demand. All other skilled trades were employed steadily. Unskilled labour was well employed.

Tilbury.—Building operations were brisk, principally on private houses. Factories were working full time. The contract for a \$26,000 post office was awarded, and work will be commenced in a short time.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during the month has been exceedingly active, both for skilled and unskilled labour. There are a great many buildings, mostly dwellings, in course of construction, and several of the manufacturers are building large additions to their plants to keep up with the trade. There is a demand for labour, both skilled and unskilled, and more especially in the building trades. Wholesale and retail trade has been very active.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have practically finished their harvest, which has turned out better than was expected. They are now busy digging roots. Outside of potatoes, roots are a fair crop.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering, woodworking and furnishing trades were very active, and all connected with them were fully employed. Printers and pressmen were busy. Tailors and garment workers were steadily employed. Bakers, butchers and cigar makers were busy. Barbers report a good month. First-class clerks are in demand. Railway employes were active. Freight handlers were busy.

PORT ARTHUR AND FORT WIL-
LIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There has been an improvement in labour conditions in these cities during the last month, and although conditions are not so good for the workers as during the same period last year, they are a great deal better than they were a few months ago. The improvement has been due to the fact that many workers left the cities and a comparatively small number settled in the district. Then the railway camps opened which drew off the unskilled element and made the labour market firmer than it has been all summer. The new factory for the wagon works at Port Arthur has been commenced, and also buildings for a match factory, and in both cities quite a number of residential buildings and blocks have been started, which has fully employed the building operatives still left in the cities. Everywhere there has been quiet and harmony in labour circles. With the increase of work there has been an increased activity in business and commercial circles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During the month of September the West Algoma Fair was held in the twin cities, and the farm produce exhibited proved the growth of the agricultural industry and also the high quality of the root and grain crop.

Railway construction and employment.—Railway construction has been very brisk, and contractors report that they have no difficulty in getting all the men they need. The line from Port Arthur east is now in full operation, and some hundreds of men have left these cities for the camps.

CONDITION OF PARTICULAR TRADES.

The printing and allied trades have been busy all the month, and other trades have also had a steady business. Journeymen tailors, bakers, butchers, clerks, stenographers, delivery employés, hotel and theatre employés, have all been fully employed, also all workers engaged in transport business. The building trades in all branches have steadied owing to

new buildings started and the leaving of several workers. Unskilled labour was fully employed, and a good deal of public work is now going ahead in both cities.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market has not changed materially during the month. Supply and demand have balanced each other. In some trades there has been a keen demand for skilled workers, the result of special rather than general conditions. Indifferent weather for harvesting throughout the west has steadied the demand for harvest help. Rain and snow have necessitated the delaying of operations in northern Manitoba, Saskatchewan and Alberta, with the result that the men released from the fields in the more southern districts will be available for those districts where harvest operations are unusually late. A marked activity in building is apparent. The total building permits up to the end of September represent a proposed expenditure of \$2,594,800 ahead of the complete total for the same period of 1910, which was the record year to that date. The returns show that for the first nine months of the current year, 3,111 permits have been issued, representing 3,694 buildings at a total estimated cost of \$15,828,650. For the same period last year 2,799 permits had been issued for 3,358 buildings at an estimated cost of \$13,233,850. Permits issued during the month of September were over three times as great as during September of 1910. This month there were 311 permits for 376 buildings, costing \$2,547,000. For September of last year there were 287 permits for 330 buildings at a cost of \$814,350. The largest item during the past month was for the Fort Garry hotel, at an estimated cost of \$1,300,000. Up to the end of September there has been much bad weather, which, unless exceptionally favourable weather is enjoyed during the early part of October, will result in material depreciation in the value

of the crop. On this account, many of those erecting large buildings may not hasten operations. The crop has not moved out as quickly as was anticipated. Business generally is active, but is not showing the expansion anticipated. The bank clearings for September amounted to \$86,640,717, as compared with \$76,957,048 in September, 1910.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting and threshing in the southern parts of the Province are practically completed, and the average of the crop will be quite up to expectations. In the northern parts of the Province there is still much threshing to do.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was very busy during the past month. The demand for bricklayers, carpenters and builders' labourers exceeded the supply. Work has been commenced on laying the rails for the Brandon Street Railway. Great progress has been made on street paving by the City Council, several of the main streets being finished. Tenders are being called for a fireproof addition to the Brandon Steam Laundry; also a cold storage building for the Brandon Creamery.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops, which were very good, have all been harvested, and threshing is well under way.

Manufacturing.—The manufacturing companies are all working full time, and several of them are very busy and working overtime.

CONDITION OF PARTICULAR TRADES.

The building trades were very busy with the exception of painters, decora-

tors and paperhangers, who were dull. All the other skilled trades were from active to very busy, and unskilled labour was also very busy.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Since the beginning of the month labour, in general, has been employed to a larger extent than the preceding month, and the month compared favourably with the corresponding month of last year. Apparently the supply of labour, generally speaking, is sufficient to meet the present demands, though prospects for a busy fall are very bright. The building trades chiefly, will benefit in this direction owing to the number of large buildings now in course of construction. Both wholesale and retail trades continued to experience general business activity.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Cutting is all but a thing of the past and threshing is in progress throughout the district. Though no official statement has been given concerning the yield, reports are current that there is not so much harm done to the grain as was at first anticipated.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been fairly active. Carpenters and joiners were well employed. Lathers and plasterers were busy. Painters and paperhangers, though very quiet at the beginning of the month, were well employed towards the end. Plumbers and steamfitters were very active. Stonecutters and builders' labourers were busy. Machinists and engineers were active, also electrical workers. Bicycle workers were quiet. All branches of the printing trades experienced an active month. Journeymen tailors and garment workers

were busy. Bakers and confectioners, butchers and meat cutters were active. Barbers were well employed, also clerks, stenographers and delivery employes. Hotel and restaurant employes were active. Laundry workers were very active. Cabdrivers, hackmen, carters and draymen were busy. Teamsters and expressmen were active. Unskilled labour was active.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour generally was very active during the month, building operations were brisk, and all classes of labour were fully employed. The Great Northern Tannery Company is preparing for the immediate erection of an extension plant. The new Tegler block of seven stories is nearing completion, and James Ramsey has opened up a departmental store, using the first three floors. Work has commenced on a sewer system in the east end. This sewer when completed will be 3,290 feet in length, and of this 3,000 feet will be tunnel work exclusively. It will be 100 feet below the surface of the ground. The sewer main is ten feet, six inches in diameter, and constructed of concrete blocks reinforced by steel bands, and also supported by concrete backing. The expansion in the city's distributing and industrial business continues, as indicated by the figures for bank clearings and customs shown below:—

	Aug. 1910	Aug., 1911	Inc.
Customs Returns.....	\$ 32,811	\$ 62,104	89½%
Building permits.....	133,900	611,440	356%
Bank clearings.....	6,274,604	9,543,495	52 %
Post Office (stamps only) .	6,184	9,625	55½%
<i>Street Railway—</i>			
Passengers carried.....	389,639	663,242	70 %
Revenue.....	\$ 17,059	27,708	62 %
Homestead entries.....	478	578	21 %

The following comparison shows the returns for the first eight months of the past three years:

	1909	1910	1911	Inc. 1911 over 1910
Cust. Ret.	\$ 175,769	\$ 219,573	\$ 417,812	90 %
Bldg. Perm.	1,466,246	1,650,692	2,706,780	64%
Bank Clear.	31,732,576	42,028,729	70,315,003	67%
P.O. (St'm's Only)	44,827	50,595	68,557	35½%
St. Rwy—				
Pass. Car.	1,206,238	2,299,762	3,768,004	63½%
Revenue.	\$ 52,281	\$ 99,198	\$ 158,097	60 %
Hom. Entr.		3,448	3,448	20½%

The expansion in wholesale and industrial business naturally necessitates expansion in other lines, and the demand for office premises, stores and residences has been such as to promote activity in the building trades, and the demand for premises is still far in excess of the supply. All railway freight departments report the Edmonton earnings of their respective roads as enormously in excess of previous years.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—While weather conditions were most unfavourable, a large percentage of the grain was harvested without any very serious damage, and a very large yield is anticipated.

Lumbering.—All mills are working to their full capacity, as there is a steady demand for native lumber.

Mining.—Great developments are taking place in the coal industry, and it is estimated that by the time the heavy demand comes in the fall, mines in Edmonton, Strathcona and vicinity will be producing 2,500 tons daily.

Railway construction.—Reports from the grading camps west of the city are to the effect that good progress is being made on the main lines of the Grand Trunk Pacific and Canadian Northern railways.

CONDITION OF PARTICULAR TRADES.

Plumbers and steamfitters renewed their agreement with the master plumbers by which the men receive an increase of 2½ cents per hour. All classes of labour were well employed during the month, the supply and demand being about equal.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There is very little change in labour conditions in September over August, with the exception of the harvesting finding employment for some who were idle before harvesting commenced. Building operations continued dull for this time of the year, and as there has been little hope that it would improve this season, the brick making fell off in quantity, and now there is likely to be a shortage if building should get brisk.

Coal mining in this district is standing still and the price of coal rising, with the supply not nearly equal to the demand made in the city. The overhead traffic bridge is almost ready for the steel upper structure. When finished it will be a great advantage to teaming in the city. The City of Lethbridge has 122 men employed on the streets, with twelve teams at work. The contractors for sewers and water mains have 134 men and four trenching machines at work. The Alberta Government has thirty-five men at work in the city; they are putting the telephone wires underground. Building permits for August were 17, value \$63,590.00. Up to September 24 there were twenty permits issued valued at \$77,094, showing a slight increase over last month. The customs returns for August were \$42,920.93, for the same month of 1910 the amount was \$28,840.60. For July of this year it was \$42,690.75. Homesteads filed in August—55; pre-emptions—10; purchased—4; total—69 entries. Bank clearings for August totalled \$2,314,989.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The cutting of grain in this district is nearly over. Wet weather has been keeping it back, but mostly all are satisfied with the crop.

Mining.—The Lethbridge Collieries are developing the mines and getting ready to hoist coal. Twelve cottages have been

built for miners besides others by private parties. The Chinook Mines Company is building a power house and hoisting tippie, and putting up cottages for miners. There are only two small coal mines in the district putting coal on the market. The two flour mills here are both busy, one of them working at night.

CONDITION OF PARTICULAR TRADES.

The building trades, considering the number of men and the season, were dull. Electrical workers were busy. Printers and pressmen were very busy. Journeymen tailors and garment workers were very busy, as well as bakers and confectioners. Hotel and restaurant employes and laundry workers were busy. Teamsters were busy. Unskilled labour was well employed.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of labour during the month of September throughout the Kootenay district was normal, so far as the lumbering industry was concerned, but quiet as regards quartz mining and transportation, owing to the strike of the coal miners in East Kootenay and adjoining territory in Alberta. Many of the best coal miners in this district have left, and should the strike continue throughout the coming winter the suffering will be greatly multiplied.

The Standard mine situated in the Slocan district, is proving one of the greatest silver-lead mines within the Province of British Columbia. It is reported that the concentrator will be in operation by the end of October. Another Slocan mining property it is reported will start operations about the end of October, known as the "Alpha." This property was operated during 1904, when about 800 tons of silver-lead ore was shipped, which gave average smelter returns of 107 ounces of silver and sixty-four per cent. lead. This property adjoins the

"Standard." The restoration and operation of the Kaslo & Slocan Railway is to be proceeded with at an early date, the Provincial government having promised financial aid to this railway. The Canadian Pacific Railway Company has a force of men on construction of a new spur of several miles length, from Three Forks, B.C., to the Lucky Jim mines, McGuigan and Whitewater, although report says the Lucky Jim is the furthest objective point for the immediate present. The total number of passengers carried by the Nelson Street Railway Company for the week ending September 14, was 6,993, bringing in a revenue of \$291.35.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Permission to build the subway at the lines of the Canadian Pacific Railway at Columbia avenue was granted to North Vancouver by the Board of Railway Commissioners, it being assumed that the work will cost \$25,000. The British Columbia Electric Railway Company called for tenders for the rebuilding of the Kitsilano bridge so as to provide accommodation for double tracking. The Norton-Griffiths Construction Company was awarded the contract for the new King Edward High School on Eleventh Avenue for \$125,665.

The Vancouver Harbor and Dock Extension Company, with \$10,000,000 capital, was incorporated to undertake large harbor developments here. Building permits for the first twenty days of this month reached a total of \$1,229,050, or roughly \$76,000 a day for the working days. For the present year to the middle of this month they amounted to \$13,017,042. Total for the whole of 1910, \$13,150,365. It has been stated that Vancouver will have a new depot for the Canadian Pacific Railway and that a new freight yard will be constructed at Coquitlam, upon which work will be started forthwith. The Health Committee decided to call for tenders for the erec-

tion of the new isolation hospital for the city, to cost probably \$56,000. The new pier of the Grand Trunk Pacific Railway Company, next to the North Vancouver ferry slip is nearly finished, and will extend out in deep water 500 feet. It will be ready for use by October 15. The real estate market was inactive in business locations, though in Greater Vancouver there has been a steady and consistent demand for lots in sub-divisions at firm prices. The White Pass & Yukon Railway reports gross earnings for the six months ended June 30, \$397,130, against \$413,334 for the same period of last year.

CONDITION OF PARTICULAR TRADES.

The state of trade was fair in the building trades, the weather being most favourable for outside work. The sheet metal workers, however, report trade quiet. Machinists were dull. The different branches of the woodworking industry reported activity. Work has been dull in most of the job printing offices, though the larger plants report the state of trade fair. The newspapers have decreased their forces slightly. Butchers and meat cutters were active. Cigar makers report trade exceedingly dull owing to competition of eastern made cigars. Leather workers report trade fair. Barbers report trade fair, with a surplus of men, mostly new arrivals. Clerks and stenographers were very much overcrowded. All carriers report freight and passenger traffic as active.

DISTRICT NOTES.

North Vancouver.—Development work, new roads, sewers, etc., serve to steady the price of real estate. Optimism prevails for fall business. The building trades and Wallace's shipyards were very active.

Prince Rupert.—By a vote of 414 to 44 the ratepayers ratified the agreement with respect to the Grand Trunk Pacific Railway Company's taxation, and by a vote of 331 to 125 sanctioned the by-law to provide \$550,000 for the purpose of installing permanent water works and a hydro-electric system.

Point Grey (suburb of Vancouver).—Building permits were, for June, \$109,050; July, \$159,200; August, \$329,100.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chow, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions in this locality during September have been similar to those of the previous month. Building continued active and unskilled labour was largely employed. Work has commenced on the construction of the library block and two new wings of the Provincial Parliament buildings. The total cost will be about \$1,000,000, and it is expected will be completed in about three years. The City Council recently awarded contracts for about 135,000 yards of street paving at a cost of approximately \$1.40 per yard. This is in addition to the large contracts already in hand. At the present time the city is employing a larger number of men than ever before, about 1,600 being engaged on sewer, drain and sidewalk construction, and about 400 in the waterworks department. The street paving contractors employ fully 1,000 men as well as a large number of teams. The Victoria Trades and Labour Council has recently opened an Employment and Statistical Bureau, and will register the name of every person (union or non-union) requiring employment, without charge, and will endeavour to provide capable help at a nominal fee of 50 cents to the one employed. It will take the names of those who have furnished rooms or houses to let, or those who have accommodation for families. In connection with the agency a bureau of statistics will be formed. Sixty applications for employment were received during the first two weeks. The scheme meets with the hearty approval of all the workers in this vicinity. The Union Club of this city has commenced the erection of a new club house at a cost of \$100,000. The British Columbia Telephone Company is erecting a new building, to be used as a telephone exchange and offices, at a cost of \$60,000.

The bank clearings for the first eight months of the year amounted to \$89,126,650, as against \$64,261,995 for the same period of 1910. For August, 1911, the clearings amounted to \$11,394,981, as compared with \$8,865,350, for the same month a year ago. The value of building permits for August, 1911, amounted to \$429,960, compared with \$335,375 for July, and \$212,814 for August, 1910.

The customs duties for August amounted to \$171,317; head tax on Chinese, \$204,042, making a total of \$375,359. The traffic returns of the British Columbia Electric Railway Company's lines show that the number of passengers carried during August was 773,958, compared with 504,253, for August, 1910. The total revenue from the timber branch of the Department of Lands for August, 1911, was \$188,379.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops in this locality, excepting some of the root crops, are harvested and may be said to be a fair average. Generally speaking, the fruit crop will not be as good as last year.

Fishing.—The salmon fishing season for 1911 is practically over, the estimated pack for the year being about 750,000 cases, which is better than was thought likely earlier in the season. In 1910 the total pack was 762,201 cases, but the catch of sockeye salmon was far larger than this season. The sockeyes, which are the most valuable of the salmon tribe, were scarce this season, and the total catch amounted to 365,000 in comparison with 566,000 cases last season. The whaling stations have made good catches recently. At one of the stations a monster sperm whale was secured from which ninety barrels of oil was taken. The catch at the two stations this season will surpass any former year.

Lumbering.—The lumbering industry is in a flourishing condition, all the mills running to their full capacity.

Manufacturing.—All the various manufacturing firms are well employed, with good prospects for the future. A new

shingle mill has recently been erected in this city, and is now in running order, employing about twenty-five hands.

CONDITION OF PARTICULAR TRADES.

The various branches of the building trades report work as brisk, with an ample supply of help. The majority of the metal and engineering trades report work as about normal, but the machinists report work as dull. Woodworkers, upholsterers, carriage and wagon makers were fair. Shingle weavers report work as good. The printing and allied trades have been steadily employed. Tailors report work as dull. Cigar makers were active. Leather workers, etc., have been steadily employed. Barbers, teamsters, clerks, stenographers, waiters, laundry workers, etc., have been fully employed during the month. Unskilled labour was well employed, but there were some men out of employment.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of labour in this district has shown very little change since last month, nearly all of the different branches of industry having been fairly active. There is still a good deal of outside work for unskilled labour, but the supply of men is larger than the demand. Business is reported as good, and the flow of travellers keeps up to that of the summer months. There have been no changes in rates of wages or hours of labour, but the Western Fuel Company

and its underground employés have agreed upon a two years' contract at the same rate of wages as in the agreement which has just expired.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers of the district are busy with fall work.

Lumbering.—The sawmills and logging camps are still working actively.

Mining.—The coal mines of this city are working steadily, and with a few exceptions, so are the other mines of the district.

Railway construction.—Tracklaying on the extension of the railway to Alberni is about completed, and the Eastern & Nanaimo Railway Company is calling for tenders for clearing the right of way for another branch to Comox.

There is a lot of work being done in this city in the way of street paving, sidewalk and sewerage construction, employing a large number of men.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons report work as active. Carpenters and joiners were still actively employed on new buildings, and repairing and improving old ones. Painters and paperhangers were active. Plumbers were very active, largely on account of the installation of the sewerage system through the city. Builders' labourers have had a good month. Blacksmiths and carriagemakers report work as active. Printers have been active during the month. Teamsters and expressmen have had a good month. Unskilled labour has been well employed, but the supply of men has been larger than the demand throughout the district.

TWENTY-SEVENTH ANNUAL CONVENTION OF THE TRADES AND LABOUR CONGRESS OF CANADA.

THE twenty-seventh annual convention of the Trades and Labour Congress of Canada was held in the City of Calgary, Alta., from September 11 to 16. This was the first time that the Congress has met in the Province of

Alberta, and the attendance of delegates was the largest on record.

Fraternal greetings from organized labour in the city were extended by Mr. W. J. Dyson, president of the Trades and Labour Council, while a civic wel-

come was extended by Mayor J. W. Mitchell, and that of the province by the Premier, Honourable A. L. Sifton. Mr. I. S. G. Van Wart, ex-sheriff; Mr. Arthur Masters, Mr. R. B. Bennett, of Calgary, and Mr. Frank J. Duffy, of Indianapolis, Ind., general secretary of the United Brotherhood of Carpenters and Joiners, fraternal delegate from the American Federation of Labour, also contributed short addresses to the opening proceedings. The various expressions of good-will were replied to by the President of the Congress, Mr. William Glockling of Toronto, Ont.

The report of the Credential Committee showed 195 delegates entitled to take part in the proceedings—seventeen Trades and Labour Councils being represented by thirty-six delegates and 113 local and district international trade unions by 1358 delegates. There was one delegate from the Provincial Federation of Labour and one fraternal delegate from the American Federation of Labour.

Report of the Executive Council.

The following is a summary of the report of the Executive: In opening, the best wishes of Congress were extended to their Majesties King George and Queen Mary for a long and happy reign. Congratulations were offered to the British Labour Party on its success in the recent elections as well as to the Labour Government of Australia. Gratification was expressed at the success of the officers of the American Federation of Labour in winning in the United States Supreme Court the appeal against the committal order in the Buck case. Organized labour was urged to come to the defence of John J. McNamara, charged with being connected with the dynamiting of the *Los Angeles Times* building. The Executive Council stated that they believed that the pending reciprocal trade agreement between Canada and the United States was in the interests of the Canadian people. The interview with the Federal Government was reported upon, as was also the progress of legislation affecting labour in the Dominion Parliament. The Ex-

ecutive had refused to accept the eight-hour bill in its amended form, and asked Congress to make a pronouncement. Under the heading of immigration, it was reported that in numbers of instances men had been sent from the Old Country under misrepresentation as to working conditions in Canada; that the matter had been called to the attention of the Minister of the Interior, who had acted promptly in an endeavour to counteract the effect of the misrepresentation. Protests had been made against the relaxation of the \$25 landing money provision in the immigration regulations, and the Congress was urged to declare on the subject. After referring to the announcement that Japan had given notice of the termination of the existing treaty with Great Britain, the Executive reported that a perfect understanding had been arrived at between the Congress and the American Federation of Labour in regard to the autonomy of each. The Executive was pleased at the increased activity of the workers in seeking to elect their own representatives to Parliament. Reference was made to the strikes of the United Mine Workers in Nova Scotia and the members were commended for the fight which had been waged. Referring to the Industrial Disputes Investigation Act, the Executive stated that careful inquiry should be made into the cause of the western miners who are now on strike, and whose cases have just recently been investigated by a Board of Conciliation. It was also suggested that recent legal decisions indicate changes being required in the Act, and these should be carefully considered. The Privy Council having given leave to appeal from the decision in Manitoba refusing the surrender of Fedorenko, the Russian refugee, the Executive recommended that every effort be made to have the Minister of Justice refuse his surrender. The correspondence which took place between the Executive and the Department of Labour on the question of Imperial Labour Exchanges and the remarks of the Right Honourable Sir Wilfrid Laurier on the subject when it was before the recent

Imperial Conference were embodied in the report, and credit was given to the Canadian Premier for the defeat of the proposition. Approval of the claim for the appointment of fair-wage officers by municipal bodies to enforce fair-wage regulations was expressed. In conclusion the Executive recommended that the business of the convention be dealt with so as to prevent hasty action.

Report of Provincial Executive Committees.

The reports of the Provincial Executive Committees may be summarized as follows:—

British Columbia.—A large number of new unions have been formed in the coast cities, and organized labour's forces are keeping pace with the rapid development of the province. The report contained a copy of the memorial presented to Premier McBride and members of the Executive Council asking for earnest consideration of the matters contained therein, all of which affected the welfare of the wage-earners of British Columbia. A copy of the reply of the Premier was given. Appreciation was expressed for the passage of the Coal Mines Regulation Act at the last session. Reference was made to the first annual convention of the British Columbia Federation of Labour, which was held in Victoria in the month of March.

Alberta.—A deputation waited on the Premier at the opening of the last session of the Legislature, and presented an outline of some of the legislation deemed essential to the wage-earners of Alberta. None of this, however, had been passed. Reference was made to an effort by the Builders' Exchanges of Edmonton and Calgary to secure mechanics from abroad at a time when there were plenty of unemployed men. The effect of the jurisdictional disputes of the Building Trades Department of the American Federation of Labour on local unions in some of the cities of the province was referred to, as was also the outlook for the formation of a Provincial Federation of Labour. Reference was made to the disagreement between the Western Coal

Operators' Association and the United Mine Workers of America, and the efforts which had been made to bring about a settlement. Mention was also made of the dispute between the electrical workers and the City of Edmonton which was settled by a conciliation board appointed under the Industrial Disputes Investigation Act.

Saskatchewan.—The Committee reported that at the last session of the Legislature a workmen's compensation act had been passed, to go into force on November 1, 1911. Other concessions secured were an amendment to the Cities Act granting householders the municipal franchise and the option of lowering the tax on improvements. The minimum number of employés necessary to bring an establishment employing labour under the provisions of the Factory Act has been reduced from five to three, but the limit of working hours has been increased from forty-five to forty-eight. A labour bureau has been opened by the Government. It was recommended that the scope of the office of secretary-treasurer of the Congress be enlarged and a sufficient salary be paid so that the official could give his entire attention to the work of the Congress.

Manitoba.—The Committee waited on the local Government and presented their claims for legislation on matters referred to them. Efforts have been made to have a better enforcement of the Factory Act. The attention of the Executive Council had been called to the relaxing of the immigration regulations requiring immigrants to be in possession of \$25 landing money, with the result that the Immigration Department had undertaken to conduct an investigation. The Committee was of the opinion that the Congress should endeavour to offset the advertising campaign carried on in Great Britain to induce the immigration of artisans to Canada. No legislation in the interests of the workers had been secured during the year.

Ontario.—The committee interviewed the Ontario Cabinet on the matters referred back by the previous convention. To the requests submitted the

Premier had replied by letter, pointing out the cases where existing legislation was sufficient to meet the complaints.

Quebec.—The Committee waited on the Provincial Cabinet and presented the claims of organized labour for new legislation and the enforcement of existing laws. Regulations relating to foundries had been passed by the Executive Council and the Committee hoped that inspectors would be appointed to have the same enforced. It was stated that national trade unionism was disappearing in the province. The Executive of the Congress was urged to have the American Federation of Labour appoint an organizer speaking both French and English for Eastern Canada.

New Brunswick.—The secretary of the Trades and Labour Council of St. John reported on the progress of the labour movement in that City, and urged that an organizer be sent. The report from Moncton dealt with the efforts being made there to form organizations.

Nova Scotia.—After asking for action for the better organization of the workers of the Province, the Committee reported the coming into operation of the Workmen's Compensation Act. A delegation had asked for the better enforcement of the law relating to the hours of labour for women and children. Acts providing for the prevention of accidents by fire in hotels, and also for egress from places of amusement had been passed. Reference was made to several strikes as well as to the frustration of the efforts to organize the workers in the steel industry, and recommendation made that a systematic campaign be undertaken and organizers sent into the province. The reports also contained a statement referring to the Springhill coal strike and the terms of settlement.

Report of Fraternal Delegate.

Mr. R. P. Pettypiece, of Vancouver, B.C., delegate to the convention of the American Federation of Labour, which was held in St. Louis, Mo., in November, 1910, presented a resumé of the proceedings, pointing out the matters of especial interest to the Congress.

Report of Parliamentary Solicitor.

Mr. J. G. O'Donoghue, of Toronto, Ont., parliamentary solicitor, reported on the matters of interest to labour which had been brought before the Dominion Parliament in the form of proposed legislation or answers to inquiries which had been made from the Government. The subjects included Railway Act Amendment, Railway Accidents, Railway Mail Clerks, Accidents on Canadian Railways, Labour Conditions on National Transcontinental Railways, Wages of Labourers on Grand Trunk Pacific Railway, Railway Carmen, Boiler Inspection Act, Bi-Weekly wages on Railways, the Senate, Co-Operative Credit Societies Unclaimed Bank Balances, Immigration, the Salvation Army, the Chinese Immigration Act Amendment, Japanese and Hindoo Immigration, Workmen's Compensation, Daylight Saving Act, Tipping, Loadline on Ships, Dominion Election Act, Letter Carriers' Superannuation, Toronto Mail Collectors, Explosives, Manufacture of Matches with Phosphorus, Springhill Strike, Mergers, Proportional Representation, Wireless Telegraphy on Passenger Vessels, Old Age Pensions, Industrial Disputes Investigation Act, the Intercolonial Railway, Alien Labour Act, Fair Wage Clause in Quebec Bridge Contract, Sick Mariners and the Eight-Hour Bill.

Reports of Organizers.

William Gloeking, of Toronto, Ont., reported on organization in the province of Ontario, stating that he found a weak condition of organization in many places, and urged that more attention be given to the strengthening of the weaker unions.

J. C. Watters, of Victoria, B.C., submitted a report of the places and unions visited in British Columbia. He described the conditions in each of the localities, and the efforts made to increase interest in the districts where organizations were dormant.

The report of George Howell, of Calgary, Alta., for the province of Alberta, showed that an active interest is being taken in the work of the Congress.

Report of Committee on Reports.

The report of the committee to which the above reports were referred concurred in the report of the Executive Committee with the exception of the clause referring to reciprocity, which the Committee recommended should be debated. Among the other recommendations were: That a campaign be urged for subscriptions to the McNamara defence fund; that the Executive keep up the agitation for making the immigration law effective; that the Congress endorse independent political action by the provincial executives or federations. The Provincial Executive Committees' reports were in the main concurred in. It was recommended in regard to a jurisdictional dispute referred to in the Alberta report that it be left to the various departments of the American Federation of Labour. The recommendation of the Saskatchewan Committee relating to a permanent secretary-treasurer of the Congress was not favourably considered. The placing of organizers in New Brunswick and Nova Scotia was approved, and a recommendation made that the Executive endeavour to have a commission appointed to inquire into the conditions of the steel industry of the latter province.

The report of the Solicitor, as well as those of the fraternal delegate to the American Federation of Labour, and the organizers were concurred in.

When the Solicitor was reporting on the course of the Bi-Weekly Wages Bill in the Senate, and before the report had been referred to Committee, the following resolution was unanimously carried:

"That the insult to organized labour by those who appeared before the Senate Committee in opposition to the Bill in referring to workingmen as being improvident be protested against by the Executive."

Subsequently a further resolution was passed instructing the Executive to press for this legislation.

Report of Secretary-Treasurer.

The report of the secretary-treasurer showed receipts for the year, including

balance from last year, of \$12,496.60; expenditure, \$9,139.64; leaving a balance of \$3,356.96. The report was referred to the Audit Committee, which later reported that the accounts had been found correct.

Appropriations.

The following appropriations were made under recommendations of the Ways and Means Committee:

To the Secretary, \$800; \$400 to the fraternal delegate to the American Federation of Labour; \$15 to the caretaker of the hall; \$50 to the Moral, Social and Reform Council; \$50 to W. R. Trotter for work in connection with immigration matters; \$300 to District 18, United Mine Workers; and payment of hotel expenses of fraternal delegate from the American Federation of Labour.

Fraternal Message.

Mr. Frank J. Duffy, of Indianapolis, Ind., fraternal delegate from the American Federation of Labour, presented fraternal greetings. He gave a review of the problems confronting the wage-earners of the United States and the progress which has been made both in the political and industrial field by the organized labour forces of that country, and pointed out that the questions which he had heard discussed in the convention were similar to those which had, from time to time, been before the American Federation of Labour. The McNamara case was reviewed at length.

Moral and Social Reform.

A communication was received from Rev. J. G. Shearer, Secretary of the Moral and Social Reform Council, referring to proposed amendments to the criminal code in regard to race track gambling and social vice, and asking the support of the Congress in an endeavour to secure the desired changes. The letter was referred to a special committee of one delegate from each province. The report of the committee admitted the importance of seeking to check the evils complained of, but pointed out that

gambling is a part of the existing economic order, and that as economic conditions change so do social institutions. Race track gambling was considered a minor issue as compared with gambling on the stock exchange, where men are endeavouring to control all the means and necessities of life to the great disadvantage of society as a whole. The report advised that the Congress continue to co-operate as heretofore and help to have the amendments suggested become law. In the matter of social vice, the Committee agreed to the suggested amendments recognizing the need of controlling segregated areas and of protecting girls and women working in factories and the like from the vicious attentions of officials in charge. It was pointed out that the pittance paid for female labour in industrial centres is to a great extent responsible for the existence of the social evil. The committee expressed its belief that the solution is only to be found in the ultimate social and economic equality of the sexes. In the meantime it welcomed any move that tends to alleviate the conditions to which a percentage of the women and girls of the working classes are exposed.

A lengthy discussion took place on the report of the committee, which was finally adopted on a vote of fifty-two to fifty.

Industrial Disputes Investigation Act.

Four resolutions asking for amendments to the Industrial Disputes Investigation Act, and two calling for a repeal of the law, were introduced, and referred to a special committee composed of one delegate from each trade affected by the Act. The committee recommended the following as a substitute for the resolutions submitted: "That this Congress instruct its Executive Officers to press for the repeal of the Industrial Disputes Investigation Act." After considerable discussion the committee's report was defeated by a vote of seventy to sixty-five. Upon inquiry of the Chairman of the Committee as to what disposition would be made of the resolutions, in view of the action of the convention on the committee's report, the President stated

that the resolutions in question should be referred to the Resolutions Committee, after which the following motion was adopted:

While this Congress still believes in the principle of investigation and conciliation, and while recognizing that benefits have accrued at times to various bodies of workmen under the operation of the Lemieux Act, yet in view of decisions and rulings and delays of the Department of Labour in connection with the administration of the Act and in consequence of judicial decisions like that of Judge Townshend, in the Province of Nova Scotia, determining that feeding a starving man on strike is an offence under the Act: Be it resolved, that this Congress ask for the repeal of the Act.

Internal Affairs.

The Constitution was amended providing for giving international unions, which affiliated all their Canadian unions, representation by one delegate elected from their Canadian membership.

Article VI was amended by adding to the list of standing committees a Label Committee, to which all matters pertaining to label matters should be referred.

Section nine of the Platform of Principles providing for exclusion of Chinese was changed so as to include all Orientals.

The following resolutions dealing with Congress matters were referred to the Executive:

That particular attention be paid to organizing mechanics and other workmen in the rural towns.

That the constitution of the federal labour unions be printed in the Ruthenian and Polish languages.

That the secretary send to all affiliated unions, at least four times a year, information as to the most important proposed legislation affecting labour.

Workmen's Compensation.

A resolution setting forth that the Workmen's Compensation Act of Alberta was limited in its scope, and the amount of compensation inadequate, was adopted, and the Provincial Executive of Alberta was instructed to take steps to secure the passage of amendments to remedy the defects complained of. It was also decided to ask that the electricians employed on power, light, telephone and telegraph lines be included in the list of those entitled to benefit under the law.

The following resolution was concurred in:

Whereas recent decisions in connection with the "Workman's Compensation Act," in British Columbia provide: "That no compensation shall be allowed in

the case of death where the plaintiffs at the time of the accident were not residing in the provinces," and whereas the aforementioned decision is now being used as a basis of protest in the province of Alberta and will without doubt be brought forward in other provinces in the Dominion; and whereas District 18, United Mine Workers of America in conjunction with District 6, Western Federation of Miners have made appeal against such ruling to the Privy Council of Great Britain; be it resolved that a time be agreed on when the matter will receive the special attention of the convention.

In accordance with the terms of the resolution the convention gave the subject earnest consideration. The necessity of having a favourable decision rendered in order to protect the families of workingmen in other provinces was pointed out. To assist in the payment of the legal expenses which will be incurred in having the matter taken to the Privy Council, it was decided to solicit a ten-cent per capita tax from all affiliated unions.

The following resolution was also passed:

That the Ontario Executive Committee act in conjunction with the labour forces who are now preparing evidence to submit to the Commission on the proposed new Ontario Act, and also endeavour to ascertain the cause of the delay since the Commission was appointed.

Factory Inspection.

Several resolutions asking for the appointment of additional factory inspectors and better sanitary arrangements in foundries were adopted as follows:

That the Executive Committee of Quebec ask for the appointment of one foundry and four additional factory inspectors, and that the new inspectors be chosen from members of trade unions.

That with the object of reducing the number of industrial accidents, the officers of Congress petition the proper authorities to appoint at least one person with proper qualifications to act as factory inspector in each industrial centre.

Asking for the enactment of provisions in factories acts to provide for better sanitary conditions in the metal foundries of Canada.

In favour of the appointment of a permanent factory inspector for the province of Manitoba, said inspector to be paid a living salary and to devote his whole time to the work.

In favour of having the regulation of Chinese laundries brought under the factories acts so that the proprietors who violate the Lord's Day law can be dealt with under the act.

Oriental Immigration.

Resolutions asking for certain restrictions on Orientals as employers or employes were approved as follows:

Whereas, it has come to light from time to time, especially in our coast cities, that Chinese employing white girls have used their positions as employers to seduce and destroy all sense of morality by the use of drugs and other means, bringing them down to the lowest depths of humanity; therefore be it resolved, this congress impress on the Federal government the necessity of passing legislation making it a criminal offense for Orientals to employ white girls in any capacity.

That this congress instruct their executive board to impress upon the Dominion and Provincial governments the necessity of passing legislation barring Orientals from any employment directly or indirectly on any licensed premises.

Industrial Unionism.

A lengthy discussion was held on the following resolution which was reported favourably by the Resolution Committee:

Whereas, craft unions have proved inadequate to successfully combat the present day aggregations of capital; and whereas, the activities of the craft unions are almost entirely absorbed by jurisdictional disputes causing an internal warfare that prevents any continued successful co-operation among crafts in any given industry. Therefore, be it resolved, that this convention endorse the principle of industrial unionism.

Two amendments were introduced, but the report of the committee endorsing the resolution finally carried by a vote of seventy to fifty-two. A motion was subsequently adopted specifically stating that the passage of the resolution did not in any way endorse the Industrial Workers of the World.

To Prevent War.

The following resolution having for its object the inauguration of the general strike to prevent war was adopted:

Whereas, the workers of many countries are now alive to the fact that Capitalists of the world cause all war and should be allowed to do all the fighting, and; whereas, the idea of a general strike of the workers in countries considering war is at present the most powerful preventive; therefore, be it resolved, that the Trades and Labour Congress of Canada endorse the idea of a general strike of the workers between countries considering war, to prevent it, so that the workers also may see the pitiful exhibition of fighting of those capitalists who seem so fond of it. That this resolution be sent to the American Federation of Labour, the British Trades Congress, the German Federation of Labour and any other country with a Federation of Labour.

Industrial Accidents.

The following resolution asking for an inquiry into the causes of industrial accidents was approved by the Resolution Committee and adopted by the convention:

Whereas, during the last session of the House of Commons most startling figures were presented to the House by the Minister of Labour with reference to the number of fatal and non-fatal accidents during the course of every year; and

Whereas, the Minister of Labour pointed out that about 2,000 workers are killed every year in the course of their employment, and that the number of workmen whose industrial efficiency is impaired for all time through loss of life or limb, or through some impairment of physical health, is five times the number who are killed—that is to say, 2,000 killed and 10,000 whose industrial efficiency is permanently impaired; and

Whereas, these facts point to a condition of affairs that threatens the industrial life of Canada, besides being a most appalling sacrifice of human life, worse even than has been caused by any war of the past; be it

Resolved, therefore, that this Congress is strongly of the opinion that a royal commission should be immediately appointed by the Dominion government to fully investigate the causes of these accidents and to recommend appropriate legislation for their prevention.

Extension of Fair Wage Clause.

The following resolution seeking to have the fair wage clause of the Dominion Government extended was approved:

"Whereas the fair wage clause is confined to the contracts let by the government and is not extended to cases where the government contribute a portion of the funds for public buildings, be it resolved that the executive committee take the necessary steps to have the fair wage clause also apply in all cases where the government funds are granted in aid of the construction of public buildings."

Technical Education.

Technical education and industrial training was endorsed by the passage of the following resolution:

That this Congress goes on record as being in favour of technical education and industrial training, but is not in favour of trade schools.

Be it further resolved, that provision be made for a course of study in the economics of the labour problem, including instruction on the development of machine production and its effect upon the working class; how wealth is produced; by whom and how distributed; the relations of the capitalist and worker to the machinery of production, distribution and exchange. Also that the biographies of men who have taken a prominent part in industrial development, as inventors, should be given prominence in public schools. And that a copy of this resolution be forwarded to the Royal Commission on Technical Education and Industrial Training.

Ask for a Commission to Inquire into the Steel Industry.

The Executive Council was instructed to ask for a Commission to inquire into the steel industry in Canada by the adoption of the following:

Resolved, that the Congress, through their Executive, bring before the Government the need of an investigation by a Commission into the conditions prevailing in the

highly "protected" steel industry of Canada, regarding hours, wages, and the general conditions of the wage-workers.

And further resolved, that a protest be entered against the renewals of bounties on steel products until an investigation has been made and the intolerable conditions removed.

It was also resolved that the following telegram be immediately forwarded to the Prime Minister:

CALGARY, ALTA., September 15, 1911

Right Honourable

Sir Wilfrid Laurier, G.C.M.G.,
Premier of Canada, Ottawa.

The Trades and Labour Congress of Canada in annual convention by unanimous standing vote most emphatically protest against the renewal of steel bounties to the Dominion Iron and Steel Company in case any such action is contemplated.

WILLIAM GLOCKING,
President.
P. M. DRAPER,
Secretary.

Sympathetic Strikes.

The resolution which brought the question of sympathetic strikes to the attention of the convention was as follows:

Whereas it is the belief of organized labour as a whole, and whereas a Union or Congress divided against itself cannot stand; be it resolved, that this Congress is totally opposed to the attitude of any body of organized labour making agreements with employers, in which agreement there exists a non-sympathetic clause.

During the discussion of the resolution the building trades strike in Vancouver was referred to by the delegates from that city. The necessity of having all wage agreements contain sympathetic strike clauses was pointed out. It was also argued that all such agreements should end simultaneously.

Immigration.

Opposition to the relaxation of immigration regulations was voiced in the following resolution:

Whereas the Department of Immigration has seen fit to nullify the immigration regulations in certain important particulars during the summer season for the last two years; and whereas the said modifications amount in effect to the suspension of the most important provisions of the Alien Labour Act, enabling employers to hire and import workmen from foreign countries, thus intensifying the competition for employment in Canada; be it resolved that this Congress of representatives of the working class emphatically protest against any such tampering with the immigration laws, and instruct the Executive Council to make strong representations to the government opposing any relaxation of same.

As a means of supplying the wage-earners of Europe with reliable informa-

tion respecting working conditions in Canada, it was decided that Canadian unions send regular reports relative to wages, cost of living, working hours, &c., to headquarters of organizations in Europe.

It was also resolved that employers when advertising for help at home or abroad be compelled to state in said advertisements the true condition of the labour market.

It was brought to the attention of the Congress that there was a movement on foot to bring from Great Britain orphan pauper children to be placed in foster homes in Manitoba, and the following resolution expressing the sentiments of the convention on the subject was approved:

That this Congress is opposed to the immigration of pauper children between the ages of six and sixteen to this country to work for wages, and the Dominion Executive and the Manitoba Executive be instructed to oppose any move designed to promote this class of immigration."

Other Resolutions Adopted.

The following additional resolutions dealing with a variety of subjects were concurred in:

Lord's Day Act.—That the Executive be requested to take action with the view of having the Lord's Day Act amended so as to permit musicians to take part in Sunday church parades, funerals, masses, Bible classes and other like exercises without making them liable to penalties.

Letter carriers.—Asking for betterment in the conditions of employment of letter carriers as to provisional allowance, hours, sick pay, uniforms and superannuation.

Unemployment.—That the Minister of Labour be asked to have the local correspondents of the *Labour Gazette* furnish monthly a statement of the number of unemployed in their respective districts.

Organization.—That efforts be made to assist in the organization of the brewery workers of Brandon.

Civic autonomy.—That the Congress endeavour by both provincial and dominion legislation to secure the enactment of laws which will give complete

civic autonomy to the municipalities of Alberta.

Eight-hour Day.—That the Congress endeavour to obtain an eight-hour working shift in all cases where said work is carried on consecutively during the whole twenty-four hours of the day.

That in the event of an eight-hour day law being passed, the Executive Council use every effort to have a provision inserted that all employers be forced to pay a reasonable living wage.

Political discussion.—That all international unions rescind as soon as possible any clause in their respective constitutions which debar from free discussion any and all of the political issues being discussed from time to time.

Safety of carmen.—That an effort be made to have an Act passed giving to all car workers employed on repair and workshop tracks the right to lock all switches with private keys in order to protect the lives of car repairers while engaged at their employment.

Customs exemption.—That the Minister of Customs be petitioned to exempt all international local unions of Canada from payment of duty on supplies shipped from headquarters in the United States.

Employment agencies.—That Congress endorse the establishment of free municipal or provincial employment agencies, and will make an effort to have private employment offices abolished.

Labour College.—That the Executive Council consider and report on at the next convention the possibilities of establishing a labour college in Canada in which the fundamental principles of political economy and the technical processes of industry would be taught.

Pure food.—That the Executive Council endeavour to have the Dominion Parliament pass a law prohibiting any person afflicted with any contagious or infectious disease from working in or about any place where food products are manufactured or prepared for food.

Wages.—Making the payment of wages by cheque illegal.

In favour of the fortnightly payment of wages on the railways of Canada.

Telegraphers.—Asking the Dominion

Government to pass a law prohibiting the employment of telegraph or telephone operators or other employés under twenty-one years of age, or with less than one year's experience in practical railroad work, who have under their control the movement of trains by order or fixed signals, and said employés shall not be employed for a longer period than eight consecutive hours daily.

Uniform text books.—That the Provincial Executive for Quebec continue to agitate for uniformity in text-books in all municipalities of the province, and also asking that these books be sold at cost pending their gratuitous distribution.

Senate.—That the Executive Council be instructed to demand of the Dominion Government the abolition of the Senate, and also endeavour to make this question a live public issue; and further that the Provincial Executives be instructed to develop a campaign to abolish the Senate in their respective localities.

Shop management.—Protesting against the introduction of the so-called "scientific shop management" commonly known as the "Taylor System" in Canadian manufacturing establishments, and instructing the Executive to assist any body of workers who may have this system forced upon them in securing government investigation and protection.

Sunday labour.—In favour of one day's rest in seven and recommending that a penalty clause be added to the Lord's Day Act placing a fine on both employer and employé who violate the law, and for a second offence a jail sentence be provided.

Justices of the peace.—That the Executives of all provinces submit to the Premiers of their respective provinces names from central bodies or local unions under their jurisdiction, and ask that at the creation of justices of the peace the names submitted be added thereto.

British Trades Congress.—That the Executive Council open up communication with the British Trades Congress with a view of having an exchange of fraternal delegates.

Boy Scouts.—Opposition to the in-

fusion of the military spirit in the boy scout movement.

Alien Labour Act.—Asking for the repeal of the present Alien Labour Act, and in favour of a new law, which would be more easily worked, and to be informed by the immigration officers.

Piece work.—Opposition to the piece-work system now in existence in many of the Eastern manufacturing concerns.

Plumbing.—In favour of uniform provincial legislation in regard to plumbing and also asking for the licensing of those engaged in the trade.

First aid.—In favour of the establishment of classes of first aid to the injured in all cities and towns.

Barber colleges.—Asking for legislation to abolish barber colleges.

Electrical construction.—In favour of better methods of construction of electrical line work.

Carmen.—Asking for the better protection of railway carmen.

Health of workmen.—Asking for stricter measures to protect the health of workmen in mining and lumber camps.

Mining shafts.—To petition the Dominion and Provincial governments to provide for more thorough examination of hoisting ropes, cages and safety catches &c., on perpendicular mining shafts.

Organization.—In favour of the appointment of an organizer speaking both the English and the French languages.

Asking for an organizer in Canada of the Teamsters, Chauffeurs, Stablemen and Helpers' Union.

Co-operative technical education.—In favour of the co-operative system of technical education, whereby apprentices may attend technical schools in the daytime, the employer to pay wages for the time spent in such training.

Eviction law.—Seeking amendments to eviction laws of the provinces with a view to preventing their enforcement during strikes against tenants of houses owned by employing corporations.

Scaffold inspectors.—In favour of the appointment of qualified scaffold inspectors.

Industrial accidents.—In favour of a law that will compel the stoppage of

work where an industrial accident occurs, and that the evidence be taken in writing by a neutral party, such to be a policeman wherever possible.

Blacklisting.—In favour of an amendment to the Railway Act so as to make black-listing a criminal offence.

Safety appliances.—In favour of making it compulsory that the most up-to-date safety appliance be provided for workmen employed on high tension electric power lines.

In favour of an amendment to the Safety Appliance Act to compel railway companies or other owners of heated or refrigerator cars to provide safer means of working on them.

Assessment law.—In favour of an amendment to the Assessment Act of Ontario providing for lower tax rate on improvements than on land values, business assessments, incomes and salaries, and urging all labour organizations to seek to secure similar amendments to the assessment acts of their various provinces.

Musician's Union.—Calling attention of the fraternal delegate from the American Federation of Labour to unsatisfactory conditions in the Musicians' Union of Ottawa owing to the fact that some of the members do not belong to their craft union, and urging that the matter be laid before the proper authorities with a view of having the difficulty remedied.

Union label.—In favour of having labour organizations use paper bearing the label of the Papermakers' Union.

In favour of promoting a better demand for union label goods and the forming of union label leagues.

Benefits.—Seeking provincial legislation to provide that where workmen have contributed to benefit schemes in connection with their employment, they shall upon leaving said employment have all moneys paid in by them returned with interest at the rate of five per cent.

Rights of foreign labourers.—That owing to alleged abuses being practised upon foreigners engaged on construction work who have frequently rebelled and quit work and been imprisoned therefor, that the Solicitor be instructed to pursue an investigation in any further cases

with a view of public exposure of methods in order to prevent such abuses of authority.

Boiler inspectors.—In favour of boiler inspectors being selected from boiler-makers with the necessary qualifications.

Stipendary magistrates.—That owing to coercion being brought to bear by officials of coal companies on justices of the peace to give decisions unfavourable to miners accused of alleged violence towards strike breakers, that Congress record, itself in favour of stipendary magistrates being appointed where possible.

Tariff on cut stone.—Referring to the Executive the question of securing uniformity in tariffs between Canada and the United States on cut stone.

Sub-letting.—In opposition to the sub-letting of building contracts.

Trackmen.—In favour of asking the Dominion Parliament to give the Railway Commission power to deal with the length of railway sections or reduction in force of men who are employed to keep the roadbed in proper repair.

Wire nails.—In favour of more sanitary methods in the packing of wire nails in barrels.

Weavers' Union.—Expressing appreciation of the stand of the Brussels Carpet Weavers' Union of Toronto in their struggle for the right to organize and to belong to an international union.

Fortnightly payday.—In favour of asking the Provincial Government of Alberta to pass legislation providing for a fortnightly payday for all industries in the province.

Discrimination.—In favour of legislation that will make it a criminal offence on the part of employers and their agents who discriminate against members of labour unions.

Fire bosses.—Requesting the Congress to use every effort to have governments appoint and pay all fire bosses in mines, or at least one fire boss or inspector in each mine.

Municipal auditing.—Asking for the appointment of permanent auditors by provincial governments, whose duty it will be to at all times conduct an audit of the books of municipalities.

International Unions.—In favour of an active campaign from Springhill to Sydney in the Province of Nova Scotia to organize the wage-earners into the international unions of their respective crafts.

Injunctions.—Instructing the Executive Council to endeavour to have the Federal Government pass an act abolishing the system of government by injunction during labour disputes.

Western Coal Miners' Dispute.

A review of the dispute in the Crow's Nest Pass Coal mines was given by the vice-president of District 18, United Mine Workers of America. A motion was subsequently adopted endorsing the stand of the miners.

Officers—1911-1912.

The election of officers resulted as follows:

President—J. C. Watters, Victoria, B.C.

Vice-president—Fred Bancroft, Toronto, Ont.

Secretary-treasurer—P. M. Draper, Ottawa, Ont.

Executive Committees.

Alberta—W. Symonds, Lethbridge, Alta, Vice-president; Geo. Howell, Calgary, Alta; Donald McNab, North Lethbridge, Alta.; T. Hughes, Edmonton, Alta.

Saskatchewan—Jas. Somerville, Moose Jaw, Sask., Vice-president; John Magrath, Saskatoon, Sask.; W. McAllister, Moose Jaw, Sask.; H. Murray, Regina, Sask.

Manitoba—R. S. Ward, Winnipeg, Man., Vice-president; R. A. Rigg, Winnipeg, Man.; H. Irwin, Portage la Prairie, Man.; H. Taylor, Brandon, Man.

Ontario—William Lodge, Ottawa, Vice-president; Geo. Crammond, Toronto Ont.; Robert Elliott, Toronto, Ont.; William Worrell, Toronto, Ont.

Quebec—Fred Robert, Montreal, Vice-president; Joseph Gauthier, Montreal, Que.; O. Proulx, Montreal, Que.; R. Lynch, Montreal, Que.

Nova Scotia—John T. Joy, Halifax, N.S., Vice-president; J. B. McLachlan, Glace Bay, N.S.; H. Gregory, Sydney, N.S.; W. Watkins, Glace Bay, N.S.

Fraternal Delegate to American Federation of Labour—William Glocking of Toronto, Ont.

Guelph, Ont. was chosen as the place of meeting for the year 1912.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF SEPTEMBER, 1911.

DURING the month of September one application was received in the Department for the establishment of a Board of Conciliation and Investigation, as follows:—

On behalf of linemen, installers, &c., employed by the British Columbia Telephone Company, operating lines in the province of British Columbia; the number of employés directly affected being estimated at 220.

Other Proceedings Under the Act.

In the September number of the *Labour Gazette* reference was made to the establishment of a Board of Conciliation and Investigation to which certain mat-

ters in dispute between the Grand Trunk Pacific Railway Company and its machinists, relative to wages, hours, and other conditions of employment, were referred for adjustment.¹ The Board in question was established on August 23, the Honourable Wallace Nesbitt, K.C., of Toronto, Ont., and Mr. Thomas J. Murray, of Winnipeg, Man., being appointed members thereof on the recommendation of the employing Company and of the employés respectively. In the absence of any joint recommendation from the foregoing, the Board was completed by the Minister on September 5 by the appointment of Dr. J. W. Sparling, of Winnipeg, Man., as Chairman.

¹See *Labour Gazette* for September, 1911, p. 248.

Dr. Sparling was also appointed Chairman of the Board of Conciliation and Investigation to which certain matters in dispute between the Grand Trunk Pacific Railway Company and its boiler-makers had been referred for adjustment.¹ The other members of this Board were the Honourable Wallace Nesbitt, K.C., of Toronto, Ont., and Mr. Thomas J. Murray, of Winnipeg, Man., appointed on the recommendation of the employing Company and of the employés respectively.

The application of the linemen, installers, &c., employed on the lines of the British Columbia Telephone Company in the Province of British Columbia for the establishment of a Board of Conciliation and Investigation was received in the Department on September 6. The dispute was understood to relate in the main to the employés' demand for an increased rate of wages, and to involve also the Company's attitude towards union men. A board was established by the Minister on September 29, Mr. Charles Enright, of Vancouver, B.C., being appointed a member thereof on the recommendation of the employés concerned.

TREATING THE FOREST AS A CROP.

The progress of the Conservation policy of Canada, as applied to forest resources, depends more upon the Forestry branch of the Department of the Interior than upon any other organization. Upon the technical knowledge and executive ability of the officers of the Forestry branch depends the future of the forest on 16,000,000 acres of Dominion Forest Reserves, as well as upon the large area of non-agricultural forest land in Western Canada, which for the good of the country may yet be set aside as permanent forest reserves. In addition to looking after Dominion lands the Forestry branch is now being asked by eastern land owners to furnish advice as to the best means of securing at the earliest date a profitable crop of timber on waste land or wood-lots. The proper administration of forest lands requires a special knowledge of the trees adapted to each region, of their uses, and of the markets. Further there is needed

knowledge of the habits of all trees, especially of the merchantable species, so that it may be known how rapidly they grow, how they produce their seed, when and under what conditions the seed germinates, and in what way the seedlings and young trees are affected by their surroundings. Such knowledge is gained only by long study and experience. In order that the new Rocky Mountain Forest Reserves may be administered according to the latest scientific knowledge and the best experience, the Forestry branch is now making detailed studies of the habits of the merchantable species of trees on the eastern slope of the Rockies in Alberta and has sent one of the men in charge of the work to study the systems of forest management practised during the past few years by the highly developed United States Forest Service in the national forests of Montana. The United States foresters have spent large sums of money and availed themselves of the experience of many men in developing plans of lumbering which do not inconvenience the lumbermen, but which ensure the protection and reproduction of the forest and the Canadian Forestry branch intends to benefit largely by their experience.

WOODLOT INSPECTION BY GOVERNMENT.

Increasing difficulty is being found in obtaining an adequate supply of hardwood lumber for the industries of Canada. The hardwood tracts of the eastern provinces for a long time have not been able to meet the demand, and in 1910, sixty per cent. of the hardwood used in Canada was imported from the United States. The United States, although with a much larger supply of hardwood on hand, is also seeing that the annual consumption far exceeds the annual growth, and that the virgin supply is being rapidly reduced. By practical demonstration it has been proven, that waste land if planted in young hardwoods, will prove a profitable investment at the end of twenty-five years or more, and will improve the productiveness of the surrounding farm land. In the eastern provinces of Cana-

da and in Ontario, particularly, are large tracts of such land, covered at present with an unprofitable tree growth, which through being sandy, rocky or low-lying, cannot be treated as agricultural lands. The Forestry branch of the Department of the Interior is taking a practical interest in the farmer's woodlots of Ontario, in an effort to make otherwise useless land supply hardwood lumber to an eager market, with profitable returns to the woodlot owner. Parties interested in this matter should correspond with the

Department at Ottawa, which is already giving practical assistance on important tracts. Foresters will be supplied by the Department to look over tracts of timbered land, estimate the quantity of timber, advise as to what species to encourage or plant according to the locality and general conditions, and suggest a general working plan. Such scientific knowledge, the result of former investigations, will be of great benefit to private owners and should be sought after at once.

THE COOPERATIVE UNION OF CANADA.—FIRST CONGRESS.

THE first Congress of the Co-operative Union of Canada was held at Ottawa on Labour Day. Mr. Samuel Carter (Guelph Society) president of the Co-operative Union, presided.

An address on the development of the movement in Canada was given by the Honourary Secretary, Mr. G. Keene, in the course of which he pointed out that the failure in some cases to successfully apply the principles of the movement in Canada in the past has been due to a misconception of the ideals and purpose of the movement and to the fact that there has been no central guiding or legislative authority. He took the view that the primary need was co-operative education as a preliminary to the organization of co-operative stores; that the movement has passed the experimental stage, and that it was essential its development should be put upon a systematic and business-like footing. He suggested that the Union should be incorporated, and submitted several alternative methods of financing its propaganda. The delegates, subsequently, resolved that the Union should be incorporated, but that the share-capital should be subscribed by co-operative societies only, debentures also being issued to

societies and individual co-operators alike, both to bear interest at five per cent. per annum. The United Board, which is the executive of the movement, was instructed to appoint as Dominion organizer an experienced propagandist with expert distributive knowledge to assist in establishing co-operative societies and to guide inexperienced committees in the initial stages of the business. It was understood that such organizer should operate principally in Ontario, but should be available in case of need for other sections of the country, and that he should do the routine work now falling upon the Honourary Secretary.

The Honourary-Secretary reported the results of negotiations with the Post Office Department as to granting publisher's mailing privileges to the *Canadian Co-operator*, the organ of the Movement. A committee was appointed to wait on the authorities in this connection. The Congress further resolved to ask the Government to again introduce the Co-operative Bill as a Government measure and the best thanks of the movement were accorded to Messrs. F. D. Monk, K.C., Lloyd Harris, and Alphonse Desjardins for their efforts in the past

NOTE.—Blanks indicate that information has not been given thereon. The Inverness figures are compiled from its last balance sheet. Preston Society reports that for the six months ending April 30, 1911, it made \$502 in profits after writing off twelve per cent. depreciation. It paid five per cent. per annum on capital, four per cent. on purchases and carried \$322.89 to reserve.

to secure the enactment of the same. It was decided that the executive committee should secure affiliation with the International Co-operative Alliance.

Mr. A. McNeill, who attended the Congress as delegate of the Ottawa Civil Service Co-operative Supply Association, proposed that a committee should be appointed to investigate the trade policy of the canners' combine, with a view to the establishment of a co-operative canning factory to supply the needs of Canadian co-operators. Mr. Wieland, the Montreal representative of the English Co-operative Wholesale Society which purchases \$500,000 worth of Canadian produce annually, stated that if production could be satisfactorily arranged, the proposed canning Society need not trouble as to placing its output; his society would easily be able to absorb the surplus.

President Carter was reelected for the ensuing year with the following vice-presidents, Ald. Walter Dodd (New Westminster) for British Columbia; W. McLeod (Glace Bay) and A. McMullen (Dominion) for Nova Scotia; O. Kummer (Preston) for Ontario and Mr. Broadbent (Magog) for Quebec. Honourary Secretary-Treasurer Keene was reelected for that position and also as Honourary editor of the *Canadian Co-operator*. J. F. Van Lane (Brantford) was appointed auditor, those officers to form the United Board (the executive) of the Union for the year.

The accompanying table gives a statistical view of the extent of the operations of Canadian Co-operative Societies during 1910.

ORGANIZATION OF INDUSTRIAL SCHOOLS IN ONTARIO.

A CIRCULAR has been issued by the Department of Education of Ontario, setting forth the method of organizing industrial schools under the Industrial Education Act, Ontario, 1911,¹ and giving the regulations issued by the Department for the establishment and organization of evening industrial classes. The circular opens with a few introductory remarks, in which it is shown that in this Act, and in the regulations of the Department of Education, the name Industrial is applied to schools and classes for the preparation of workmen and workwomen, and the name Technical to those for the preparation of foremen and forewomen, while manual training and household science, hitherto designated technical, are now classed as cultural and practical subjects of the High and Public Schools, and still remain wholly under the control of the school boards.

Evening Industrial Schools.

In the last session of the Legislature the sum of \$20,000 was appropriated for evening industrial classes, the rest of the cost to be defrayed as in the case of high schools. It is pointed out that in establishing these schools the following three main obstacles will be encountered at the outset: (1) Indifference on the part of those for whose benefit they are intended; (2) Lack of competent teachers; and (3) The difficulty of constructing courses of studies suitable to the requirements of the locality. In order to surmount these obstacles, the advisory committee, appointed in accordance with the Act, is recommended to confer with employers and employes, before attempting to organize a school, and secure their sympathetic co-operation. It is pointed out that in other countries where a compulsory attendance law is not in operation, employers offer their workpeople various inducements to attend, such as a reduction in the hours of day labour, increased wages and more rapid promotion, and the

opinion is expressed that a similar course will be found necessary in many parts of Ontario.

With regard to teachers, the importance of securing thoroughly competent ones is emphasized, and it is stated that for the purely industrial subjects, foremen or forewomen, or others specially trained for the purpose in industrial or technical colleges are indispensable. If competent teachers cannot be obtained in the locality it is suggested that they might be obtained in the vicinity. The classes should be under the charge of a principal who possesses both executive ability and general mechanical knowledge, and such a principal should have full control of the school, subject to the advisory committee.

With regard to the third obstacle, it is suggested that after the subjects to be taken up have been chosen, a report upon the details, equipment, &c., should be submitted by the principal, and duly considered by the advisory committee and the school board, before submission to the Minister for his approval. The first year must be one of experiment, and the courses should be modified from time to time in accordance with experience.

Regulations for Evening Industrial Schools.

The following regulations for evening industrial schools have been issued by the Department of Education.

CONDITIONS OF ESTABLISHMENT.

1. No Industrial Evening School shall be recognized by the Department of Education which has not a total enrollment for each of (1) men and boys and (2) women and girls, of at least ten members in regular attendance from the beginning to the end of each term.

2. At dates to be selected by the Advisory Industrial Committee, the Session shall begin in the last week of September and shall close in the last week of April.

NOTE.—If found necessary, a Board may defer the opening of this session until the end of the first week in October.

3. The Session shall consist of two terms, the first ending the last week in December and the second the last week in April.

4. The School shall be open for at least two hours on each of at least two evenings a week.

5. As provided in 4 (6) of the Act, quoted above, the members of the classes shall consist of workmen and workwomen who are employed during the day.

¹A review of this Act appears in the April issue of the *Labour Gazette*, on page 1139.

6. (1) Each teacher shall possess expert knowledge of his subject. In the appointment of such experts, the preference shall be given to those who, being otherwise qualified, are now engaged or have been engaged in the form of industry which they are to teach.

(2) When day teachers are employed also in the Evening Industrial Schools, their work shall be so arranged that no teacher shall teach more than six hours a day.

7. The organization, qualifications of the staff, accommodations, equipment, courses of study, and textbooks shall be subject to the Minister's approval.

8. (1) As far as it may be suitable, the equipment already provided for the Science, Manual Training, and Household Science courses of the High and Public Schools and the Day Industrial and Technical Schools shall be used for the Evening Industrial Schools.

(2) Where no, or sufficient equipment has been provided which is suitable for Evening Industrial Schools, the Boards shall provide from year to year such equipment for these schools as the Minister may deem necessary. The equipment thus provided shall, when needed, be used for Day Industrial Schools also.

COURSES OF STUDY.

9. All the subjects of the courses shall be so taught as to have a direct application to the industries.

10. From the lists below, the Advisory Industrial Committee shall make such selection as, in its judgement suits the requirements and capabilities of the locality; but in addition to these subjects, any other subject or subjects which have a direct application to any of the industries may be taken up with the Minister's approval.

11. From the following lists for boys and men and for girls and women respectively, each student shall take up at least one of the subjects in A, and may take up in addition one or more of the subjects in B. The total number to be taken up by each student shall, in each case, be determined by the Principal.

12. In localities where there are Evening Commercial Classes under the same Board, business English, business arithmetic, and commercial work shall not be included in the courses for Evening Industrial Classes; but it shall be the duty of the Advisory Commercial Committee, acting in concert with the Advisory Industrial Committee, to provide courses in these subjects suitable for workmen and workwomen engaged in the industries.

I. List of Subjects for Boys and Men.

A. Freehand drawing, mechanical drawing, architectural drawing, design, modelling; wood working, metal working, electrical working, building construction, printing, plumbing, physics, chemistry, mechanics.

B. Workshop mathematics, estimating, business English, commercial work, first aid.

II. List of Subject for Girls and Women.

A. Cookery, home economics, first aid, home nursing; hand sewing, machine sewing, dress making, millinery,

embroidery, laundry work; free-hand drawing, design, colour harmony.

B. Business arithmetic, business English, commercial work.

APPORTIONMENT OF THE LEGISLATIVE GRANT.

1. On Salaries.

13. The Department of Education will pay the following proportion of the total salaries of the staffs of the Industrial Evening Schools:

In cities with populations of 150,000 and over, one-third; in other cities, one-half; in towns, two-thirds; and in villages, five-sixths.

2. Equipment.

14. Where no, or insufficient, equipment is available, the Department will pay for each of the first four years 25 per cent. of the cost of equipment approved by the Minister, up to a maximum of \$1,000 in the case of the classes for boys and men, and \$500 in the case of the classes for girls and women. Thereafter, the Department will allow 25 per cent. of the cost of renewals and additions approved by the Minister, not exceeding, in any one year, \$300 in the case of the schools for boys and men, and \$150 in the case of the schools for girls and women.

ACCOUNTS.

15. The receipts and expenditures on account of the Evening Industrial Schools shall be kept separate from those for other school purposes.

Day Industrial Schools.

The general industrial schools should offer courses partly cultural, including literature, history, geography and composition in particular, in addition to their vocational courses. The general industrial course should extend over two years, and should be followed by two more years in special industrial schools, or in special courses in the general industrial school, conducted in co-operation with the apprenticeship systems.

It is announced that the Director of Technical and Industrial Education will visit the industrial centres of the Province and assist school boards in organizing their local systems.

TRADE DISPUTES DURING THE MONTH OF SEPTEMBER, 1911.

THE only serious disturbance to industrial conditions through trade disputes during the month of September, was in Alberta and Eastern British Columbia, where a general strike of coal miners had been in progress since April. There was, however, some improvement in the situation, a few mines having re-

commenced operations on a small scale in the course of the month.

Analysis of Trade Disputes During the Month.

Number and magnitude.—The number of trade disputes reported to have been

in existence in Canada during September was eleven, a decrease of three compared with August, and a decrease of three also, compared with September, 1910. About eighty-five firms and 7,772 employés were involved in these disputes, fifty-five firms and about 271 employés being involved in new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during September was approximately 189,750 working days, compared with a loss of about 203,400 days in August, and 39,280 days in September, 1910.

Trades affected by new disputes.—Only three strikes were reported during the month. Of these, one involving eighteen men occurred in the railway service, one involving about 200 men was of concern to general transport, and one involving fifteen men and thirty-eight women, occurred in the trade of tobacco preparation.

Localities affected by new disputes.—One of the new disputes took place in the Province of Quebec, and the other two in the Province of Ontario.

Causes of disputes.—One of the new disputes arose from a demand for an increase in wages, and the other two from an objection to the employment of particular persons.

Modes of settlement.—Of the eleven disputes in existence during September, four were terminated, leaving seven still in existence at the end of the month. One dispute was settled by negotiations between the parties concerned, two by the places of the strikers being filled, and one by the grievance of the strikers being removed without negotiations.

Results of disputes.—The employers were successful in three of the disputes that were terminated during the month, and the employés in one.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes of previous months, which were still in existence during September, involved coal miners in Alberta and Eastern British Columbia, carpet

weavers at Toronto, Ont., carpenters at Calgary, Alta., painters at Port Arthur, Ont., iron moulders at London, Ont., pulp mill hands at St. George, N.B., electrical workers and garment workers at Toronto, Ont.

Strike of Coal Miners in Alberta and Eastern British Columbia.

The strike of 7,000 coal miners in Alberta and Eastern British Columbia, which began on April 1, on account of failure to reach a new agreement, continued throughout September. Sixteen companies were involved in this dispute, but of these four reopened their mines with a small staff of men, between two and three hundred being employed at the end of the month.

Lockout of Carpet Weavers at Toronto, Ont.

A lockout of 114 carpet weavers employed by the Toronto Carpet Manufacturing Company, at Toronto, Ont., which took place on March 26, was terminated on September 5. The dispute arose on account of the desire of the employers that their men should cease to belong to the Carpet Weavers' Union, and it is reported by the Company that the men returned to work on the understanding that the shop would be a strictly non-union one. It was further stated that no discrimination had been used by the management in taking back the old weavers.

Strike of Carpenters at Calgary, Alta.

No change was reported in the case of a strike of carpenters at Calgary, Alta., who stopped work on June 20, on account of their objection to the employment of a particular person.

Strike of Painters at Port Arthur, Ont.

No settlement was reported in a strike of ninety painters at Port Arthur, Ont., which took place on April 17, on account of the refusal of the employers to grant a demand for an increase in wages and recognition of their union.

Strike of Iron Moulders at London, Ont.

No definite settlement was reported in a strike of sixty iron moulders at London, Ont., which began on June 5, on account of the refusal of three firms to grant the same minimum wage for a nine hour day, as had been paid for a day of ten hours. Many of the strikers, however, had obtained work elsewhere, and at the end of the month only fifteen men were receiving strike pay. The employers claimed they no longer felt any effects of the strike although all the places of the strikers were not yet filled.

Strike of Pulp Mill Hands at St. George, N.B.

No settlement was reported in a strike of fifty pulp mill hands at St. George, N.B., which began on April 26, on account of the refusal of the employers to grant a demand for an eight hour day, instead of a day of eleven and thirteen hours, with an increase in minimum wages. The owner of the mill made an offer of 16½ cents an hour, but this was not accepted, the men demanding twenty-two cents.

Strike of Electrical Workers at Toronto, Ont.

No complete settlement was reported with regard to a strike of electrical workers at Toronto, Ont., which began on June 21, owing to the refusal of twenty firms to grant a demand for an increase in wages from 35 to 40 cents per hour.

Strike of Garment Workers at Toronto, Ont.

No settlement was reported in a strike of thirty-five garment workers at Toronto, Ont., which began on June 28, on account of the refusal of the employers to make certain changes in the method of conducting the business, with regard to the adjustment of piece work prices, and the engagement and discharging of employés.

New Disputes.

The new disputes of the month comprised strikes of freight handlers at Mon-

treal, Que., railway yardmen at Hamilton, Ont., and cigar makers at London, Ont.

Strike of Freight Handlers at Montreal, Que.

On September 26, a strike of about 200 freight handlers was reported to have taken place at Montreal, Que., in which the Dominion Transportation Company, the Shedden Forwarding Company, and the Great Northern Railway Company, were concerned. No complete settlement of the dispute was effected during the month, but the places of many of the strikers were reported to have been filled.

Strike of Railway Yardmen at Hamilton, Ont.

On September 20, a strike of eighteen yard men of the Grand Trunk Railway Company, took place at Hamilton, Ont., owing to their refusal to work under an alleged strike breaker, who had been temporarily appointed assistant yardmaster. The Company immediately assigned experienced yardmen from other branches to yard service and proceeded to fill the places rendered vacant by the strikers. About fifty firms were reported to have been indirectly affected by this dispute.

Strike of Cigarmakers at London, Ont.

On September 7, a strike of cigar makers employed by the firm of Brenner Brothers, took place at London, Ont., on account of the employment of eight coloured men, with whom the others refused to work. On the next day, the firm sent the eight men back to Montreal, from where they had come, and the strikers returned to work. About fifteen males and thirty-eight females were involved in this dispute.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of September, and which have been reported to the Department.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE SERIES C., No. 132.

TABLE OF TRADE DISPUTES DURING THE MONTH OF SEPTEMBER.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.			Date of commencement.	Date of termination.	Result.
					Directly.	Indirectly.				
			Di- rectly	Indi- rectly	Males	Fe- males	Males			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.										
<i>Mining—</i> Coal miners.	Alberta and Eastern British Columbia.	Failure to reach new agreement.	16	7,000	April 1	No settlement reported at end of month, but operations had been resumed at four collieries.
<i>Building trades—</i> Carpenters.	Calgary, Alta.	Against employment of particular person.	1	88	June 20	No settlement reported at end of month.
Painters.	Port Arthur, Ont.	For increase in wages from 35 to 40 cents per hour and recognition of Union.	1	90	April 17	No settlement reported at end of month.
<i>Metal trades—</i> Iron moulders.	London, Ont.	Men demanded that a minimum wage for a 10-hour day be paid for a day of nine hours.	3	60	June 5	No settlement reported at end of month, but employers claimed they were no longer affected.
Electrical workers.	Toronto, Ont.	For increase in wages from 35 to 40 cents per hour.	6	12	June 21	No settlement reported at end of month.
<i>Clothing trades—</i> Garment workers.	Toronto, Ont.	For change in conditions of employment.	1	35	June 28	No settlement reported at end of month.
<i>Textile trades—</i> Carpet weavers.	Toronto, Ont.	Lockout on account of firm's opposition to employees belonging to a Union.	1	114	March 24	Sept.	Work resumed, factory to be non-union shop.

Miscellaneous trades—		St. George, N. B....	For day of eight hours instead of thirteen and eleven with increase in minimum wages.	1	52	April 26	No settlement reported at end month.
DISPUTES WHICH BEGAN DURING THE MONTH.							
<i>Food and tobacco preparation.</i>							
Cigarmakers.....	London, Ont.....	Against employment of negroes.	1	53	Sept.	7 Sept.	8 Negroes discharged and work resumed.
<i>Railway service—</i>							
Railway yardmen...	Hamilton, Ont.....	Against appointment of alleged strike breaker as assistant yard-master.....	1	50	Sept.	20 Sept.	Places of strikers were filled.
<i>General transport—</i>							
Freight handlers...	Montreal, Que.....	For increase in wages.....	3	200	Sept.	28	No settlement reported at end of month, but places of many strikers were filled.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

CANADIAN GOVERNMENT ANNUITIES.

The Weekly Payment Plan.

THE weekly payment plan affords wage-earners an easy and sure way of making provision for the time when their earning powers have ceased. For example, if a man at present aged forty years were to deposit with the Canadian Government \$1 a week until he was sixty-five, for the purpose of buying a Canadian Government Annuity, he would receive \$261 a year for the remainder of his days. And if he died before he was sixty-five, what he had paid in accumulated at 3% compound interest would be refunded to his heirs. Full particulars concerning the scheme may be had by any one over the age of five years if he or she will apply to the Superintendent of Canadian Government Annuities, Ottawa, stating age last birthday, the age at which annuity is desired to begin, and the amount which it is desired to pay each week.

The Power of Compound Interest.

A man may secure an absolutely sure income of \$600 a year for his 5 year old daughter, or granddaughter, from the time she is fifty-five to the end of her days, if he will pay to the Canadian Government the sum of \$964.75. If she should die at any time before reaching the Annuity age, the money paid, together with three per cent. compound interest will be refunded to the purchaser, or as he may direct. There are but few parents who, when they understand the matter, will not be anxious to make the investment, if they can spare the money, in order to have the assurance that their daughter, no matter what reverses overtake her after she is fifty-five, would have a comfortable income in her old age—an income that she cannot be deprived of by any person or by any process of law. Full particulars of this excellent scheme may be had on application to the Superintendent of Canadian Government Annuities.

PRICES, WHOLESALE AND RETAIL, CANADA, SEPTEMBER, 1911.

I. WHOLESALE PRICES.

Index Number, September, 1911—129.3.

Index Number, August, 1911—129.9.

Index Number, September, 1910—125.6.

THE Department of Labour Index Number of wholesale prices stood at 129.3 for September, as compared with 129.9 in the preceding month and 125.6 in the corresponding month last year. The numbers, it will be understood, are percentages in each case of the average price level prevailing during the de-

cade 1890-1899, the period selected by the Departments as the standard of comparison throughout its investigation into wholesale prices. Over 200 articles, carefully selected so as to represent Canadian production and consumption, are included in the calculation.

The following is a table of the Department's Index Numbers arranged by the various groups of commodities into which the investigation has been divided, showing the average price level for September, 1911, compared with that of the preceding month and with the same month last year.

TABLE SHOWING INDEX NUMBERS BY GROUPS OF COMMODITIES FOR SEPTEMBER, 1911, AUGUST, 1911, AND SEPTEMBER, 1910.

(Average Prices 1890-1899 = 100.)

	Sept. 1911.	Aug. 1911.	Sept. 1910.

(c) Sundries..... (5 ").....	108'6	108'1	122'5
Average of all commodities.... (201 ").....	129'3	129'9	125'6

It will be seen that wholesale prices are slightly lower than in the preceding month, but considerably higher than at the same period of 1910. The chief increases during the past year contributing to this result, occurred in grains and fodders and in miscellaneous foods, there being a decrease in animals and meats, while the other groups were for the most part steady.

The chief features of the price movement during September as compared with the preceding month were as follows:—

Grains and fodders.—A general rise took place in the price of grains, chiefly in western barley and in oats, due to reports of short crops in the United States and throughout the world. There was also a rise in shorts and straw but a decline in hay.

Animals and meats.—An increase occurred in the price of cattle, dressed hogs, hams, lard and barrelled pork, and a decrease in hogs, sheep and mutton.

Dairy produce.—Butter, cheese and eggs advanced.

Fish.—An increase was reported in the price of fresh fish and canned salmon, the latter due to a short catch in British Columbia and a short supply in Europe. The price of dry cod declined.

Miscellaneous foods.—A rise in the price of peaches, plums, beans, coffee, Manitoba flour, maple sugar, oatmeal, and sugar was accompanied by a decline in grapes, pears, potatoes and tomatoes. The phenomenal rise in sugar, of which the price has already been advanced eight times since February 1, is attributed to failure of the sugar beet crop in Europe and Cuba.

Textiles.—A slight decline in raw silk was the chief feature of the month.

Hides, leather, boots and shoes.—There was a rise in the price of calfskins, harness leather, and a decline in that of sole leather.

Metals and implements.—Lead, zinc, spelter and tin were somewhat higher than in August.

Fuel and lighting.—Anthracite coal advanced 10 cents a ton at Montreal.

Building materials.—There was a slight decline in linseed oil, from 98 to 97 cents a gallon, in continuance of the marked decline which has occurred from last year's prices.

House furnishings and drugs and chemicals were steady.

Miscellaneous.—Rises in malt and rubber were the chief features of the month.

RETAIL PRICES OF STAPLE ARTICLES OF

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month prevailing in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement usually occupied by workmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of the quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the the Department.

II. RETAIL PRICES

The information in the accompanying table and article has been furnished by correspondents of the *Labour Gazette*, under detailed instructions from the Department as to sources of information, quality of goods to be quoted, &c.

The most general change of the month in the retail price of articles entering into domestic consumption was an advance in the price of butter, cheese and eggs. Sugar also showed a general and pronounced rise. Coal was upward at points. Potatoes, on the other hand, declined in a large number of the cities.

Notes on Retail Prices.

Beef.—There was a decrease in the price of sirloin beef at Belleville, Ont.; Lethbridge, Alta.; and Victoria, B.C., and a decrease in the price of medium chuck at Moncton, N.B.; Lethbridge, Alta., and Vancouver, B.C.; an increase occurred in the price of medium chuck at Berlin, Ont., owing to local conditions.

Veal.—The price of veal advanced at Brantford, Berlin, and London, Ont., but decreased at St. Thomas and Windsor, Ont., and at Lethbridge, Alta.

Mutton.—Mutton advanced in price at Sydney, N.S., and Chatham, Ont., and decreased at Ottawa and Berlin, Ont.; Lethbridge, Alta., and Vancouver, B.C.

Pork.—Fresh pork advanced at St. Catharines and St. Thomas, Ont., and at Vancouver, B.C., but prices decreased at Westville, N.S.; Charlottetown, P.E.I.; St. John, N.B., and Ottawa, Ont. Salt pork advanced in price at St. Thomas and Chatham, Ont., and at Vancouver, B.C.

Bacon.—The price of bacon increased at Sydney, N.S., Moncton, N.B., Newcastle, N.B., Peterborough, St. Catharines and Berlin, Ont., and decreased in price at Westville, N.S.; St. John, N.B.; Belleville and St. Thomas, Ont., and Lethbridge, Alta.

Fish.—Fish increased in price at Sydney, N.S.; Three Rivers, and Sherbrooke, Que., and St. Thomas, Ont., and decreased at St. John, N.B.

Lard.—The price of lard increased at Sydney, N.S.; Newcastle, N.B.; Berlin and St. Thomas, Ont., and at Victoria, B.C. The price of this commodity declined since August at Charlottetown,

P.E.I.; Moncton, N.B.; St. Johns, Que.; Ottawa and Sault Ste. Marie, Ont., and at Lethbridge, Alta.

Eggs.—The price of fresh eggs increased in twenty-six of the cities and the price of packed eggs in twelve.

Milk.—Milk increased in price at St. Johns, Que., Ottawa, Belleville and Stratford, Ont., and Edmonton, Alta. The price declined at Westville, N.S., and St. Catharines, Ont.

Butter.—The price of dairy butter increased since August in twenty-four cities and that of creamery butter in twenty-two.

Cheese.—The price of old cheese increased since August at St. John, N.B.; Three Rivers, Sorel, and Hull, Que., Belleville, Berlin, and Sault Ste. Marie, Ont.; and at Winnipeg and Brandon, Man. New cheese increased in price at Moncton, N.B.; Three Rivers, Sherbrooke, Maisonneuve, and Hull, Que.; Belleville, Toronto, Berlin, Woodstock and St. Thomas, Ont.; and at Winnipeg, Man.

Flour.—Flour increased in price at Newcastle, N.B., and Winnipeg, Man., and decreased at Westville, N.S.

Rolled oats.—The price of this commodity increased at St. John's, Que.; Toronto, Ont., and at Winnipeg, Man., and decreased at St. Thomas, Ont.

Rice.—The price of rice increased at Toronto, and St. Thomas, Ont.; Winnipeg, Man., and Lethbridge, Alta.

Beans.—Beans increased in price at Three Rivers, Que., and decreased at Niagara Falls, Ont.

Prunes.—This commodity increased in price at Sherbrooke, Que., and Ottawa, Ont., and decreased in price at Westville, N.S., and at Vancouver, B.C.

Sugar.—There was a general rise in the price of granulated and yellow sugar. The points affected by a rise in both kinds were: Halifax, N.S.; Moncton, St. John, and Newcastle, N.B.; Three Rivers, St. Johns and Hull, Que.; Ottawa, Belleville, Peterborough, Toronto, Brantford, Guelph, Berlin, Woodstock, London, Chatham, Windsor and Sault Ste. Marie, Ont.; Winnipeg and Brandon, Man.; Edmonton and Lethbridge, Alta.; Vancouver and Victoria, B.C. The fol-

lowing places experienced a rise in the price of yellow sugar only; Quebec, Que.; St. Catharines, and Port Arthur, Ont.

Potatoes.—The price of potatoes declined generally. Among the points affected were: Sydney, Westville and Halifax, N.S.; Charlottetown, P.E.I.; Moncton, Fredericton and Newcastle, N.B.; Quebec, Sherbrooke, Sorel and Hull, Que.; Ottawa, Kingston, St. Catharines, Stratford, London, St. Thomas, Chatham, and Sault Ste. Marie, Ont.; Winnipeg, Man.; Edmonton and Leth-

bridge, Alta.; Vancouver, B.C. There was an increase in price at Windsor, Ont.

Starch.—Laundry starch increased in price at Sydney, N.S.

Anthracite coal.—The price of coal increased since August at Halifax, N.S.; Quebec and Sherbrooke, Que., and at Brantford and Guelph, Ont.

Bituminous coal.—The price of coal advanced at Quebec, Que., and at Halifax, N.S.

Wood (soft).—Soft wood increased in price at Belleville, Ont.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 180 individual work people in Canada during the month of September, 1911, were reported to the Department of Labour. Of these, fifty-eight were fatal and 122 resulted in serious injuries. In addition, five fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before September, 1911.

In the preceding month there were 104 fatal and 133 non-fatal accidents reported, a total of 237, and in September, 1910, there were ninety-one fatal and 181 non-fatal accidents, a total of 272. The number of fatal accidents reported in September, 1911, was, therefore, forty-six less than in the preceding month, and thirty-three less than in September, 1910. The number of non-fatal accidents reported in September, 1911, was eleven less than in the preceding month, and five less than in September, 1910. Altogether there were fifty-seven less industrial accidents reported in September,

1911, than in the preceding month, and ninety-two less than in the same month of the preceding year.

Of 180 returns received during the month giving the ages of the victims of industrial accidents, four referred to persons under twenty-one years of age, fifty-three to persons between twenty-one and forty-five, and fifteen to persons over forty-five. One hundred and eight persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING
SEPTEMBER, 1911, BY INDUSTRIES AND
TRADES.

Trade or Industry.	Killed.	Inj.	Total.

Total.....	58	122	180

Nature of Fatalities and Accidents.

The chief disaster of the month, causing the death of more than one workman, was an explosion in a powder factory at Belcœil, Que., in which one man was instantly killed and four others injured, one of whom died a few days later. The explosion is said to have been caused by fire originating from sparks from the rollers of a machine which had for some time been exposed to the rays of the sun. The men had hardly reached apparent safety when the explosion occurred.

The following is the jury's finding in connection with the death of five railway construction hands which occurred on August 27, 1911, near Melville, Sask., a record of which accident appeared in the September issue of the *Labour Gazette*:—

"That R. T. Reid and others came to their death on the night of Sunday, the 27th day of August, 1911, by riding on the platform of the caboose in question, and by doing so were taking their lives in their own hands, and were using their own discretion.

"We are further of the opinion that the employés in question did not show negligence in the performance of their duties on the night in question."

Record by Industries and Groups of Trades.

A detailed record of the industrial accidents of the month, by industries and groups of trades, is as follows:—

Agriculture.—There were seven fatal and five non-fatal accidents of record in September, compared with seven fatal and eleven non-fatal accidents in August, and twenty-two fatal and thirty-five non-fatal accidents in September, 1910. Of the fatal accidents, one was due to asphyxiation in a well, one to a kick from a horse, one to being run over by a wagon, one to a collision, one to being caught in threshing machine, one to the explosion of a boiler of threshing engine, and one to the bursting of a wheel on a corn cutting machine.

Fishing and hunting.—There was one non-fatal accident recorded in September, compared with two fatal in August, and one fatal accident in September, 1910.

Lumbering.—There were five fatal and five non-fatal accidents recorded in September, compared with four fatal and seven non-fatal accidents in August, and seven fatal and seven non-fatal accidents in September, 1910. Of the fatalities, two were due to being crushed by logs, two to machinery, and one to a fall.

Mining.—There were three fatal and six non-fatal accidents recorded in September, compared with three fatal and one non-fatal accident in August, and eleven fatal and fifteen non-fatal accidents in September, 1910. Of the fatalities, one was caused by asphyxiation, one was due to the fall of a roof in a mine, and one to a collision of ore cars.

Building trades.—There were six fatal and seventeen non-fatal accidents in September, compared with twelve fatal and eleven non-fatal accidents in August, and six fatal and thirty non-fatal accidents in September, 1910. Of the fatal accidents, five were due to falls, and one to the collapse of a floor.

Metal trades.—There were three fatal and twenty-three non-fatal accidents recorded in September, compared with six fatal and ten non-fatal accidents in August, and five fatal and thirty non-fatal accidents in September, 1910. Of the fatal accidents, two were due to electrocution, and one to the bursting of an emery wheel.

Woodworking trades.—There were one fatal and eight non-fatal accidents in September, compared with one fatal and seven non-fatal accidents in August, and one fatal and six non-fatal accidents in September, 1911. The fatality was caused by a piece of wood thrown from a machine.

Printing and allied trades.—There were three non-fatal accidents in September, compared with two non-fatal accidents in August, and two non-fatal accidents in September, 1910.

Clothing.—There was one non-fatal accident in September, compared with none in August, and one non-fatal accident in September, 1910.

Textile.—There were no accidents recorded in September, compared with two non-fatal accidents in August, and none in September, 1910.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES F, No. 95

TABLE OF ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer	Kirkfield, Ont.	Sept. 4	1	Fell off wagon and run over.
"	Fraserville, Ont.	" 12	1	Killed by a horse.
"	Beauport, Que.	" 6	1	Wagon struck by a car.
"	Sacre-Cœur, Beauce....	" 7	1	Caught in threshing machine.
Farm hand.....	Ottawa, Ont.	" 23	1	Harvesting machine boiler exploded.
Farmer	Hazel Bluff, Alta.	" 7	1	Asphyxiated, digging well.
"	Beaver, Man.	" 26	1	Bursting wheel, corn cutting machine.
<i>Lumbering—</i>				
Lath Sawyer.....	St. John, N.B.	Sept. 11	1	Caught in revolving shaft.
Employé.....	Fernie, B.C.	" 8	1	Crushed by a log.
"	Gres Falls, Que.	" 6	1	Fell from ladder.
"	Sudbury, Ont.	" 7	1	Struck by falling tree.
"	Rainy River, Ont.	" 16	1	Caught in loading chains.
<i>Mining—</i>				
Miner.....	Cumberland, B.C.	" 17	1	Fall of roof.
"	Thorburn, N. S.	" 2	1	Collision of ore cars.
"	Salmo, B.C.	" 20	1	Asphyxiated.
<i>Building trades—</i>				
Labourer.....	Winnipeg, Man.	" 7	1	By collapse of floor.
"	Montreal, Que.	" 1	1	Fell down elevator shaft.
Brick pointer.....	Maisonneuve, Que.	" 2	1	Fell off scaffold.
Painter.....	Pte. Claire, Que.	" 20	1	Fell from roof.
Carpenter.....	Toronto, Ont.	" 23	1	Fell from roof.
Labourer.....	Vancouver, B.C.	" 28	1	Fell from scaffold.
<i>Metal trades—</i>				
Lineman.....	Toronto, Ont.	" 14	1	Electrocuted.
Electrician.....	Toronto, Ont.	" 10	1	Electrocuted.
Iron worker.....	Toronto, Ont.	" 30	1	By bursting emery wheel.
<i>Woodworking trades—</i>				
Furniture worker.....	Strathroy, Ont.	" 23	1	Struck by flying piece of wood.
<i>Food and tobacco prepar.</i>				
Empl., canning factory	Tilbury, Ont.	" 1	1	Crushed by cover of retort.
<i>Railway Service—</i>				
Brakeman.....	Carlyle, Sask.	" 12	1	Jerked off train, run over.
Fireman.....	Irricana, Alta.	" 9	1	Derailment, pinned between tender and engine.
Switchman.....	Richmond, Que.	" 2	1	Crushed between cars.
Brakeman.....	Watson, Ont.	" 8	1	Crushed between cars.
Brakeman.....	Spragues Point, Ont.	" 2	1	Crushed between cars.
Mechanic.....	Rivière du Loup, Ont.	" 2	1	Fell from locomotive into a well.
Conductor.....	Ottawa, Ont.	" 13	1	Caught in frog, broke thigh and died.
Trainman.....	Golden Lake, Ont.	" 19	1	Run over.
Car checker.....	Sarnia, Ont.	" 27	1	Run over by a train.
Brakeman.....	Chatham, Ont.	" 22	1	Crushed between car and engine.
Labourer.....	Baie St. Paul.....	" 26	1	Premature explosion of dynamite.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL SERIES, TABLE F. No. 95.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Navigation—</i>				
Cook.....	Coles Island, N.B.....	" 8	1	Burned to death.
Longshoreman.....	Port Arthur, Ont.....	" 18	1	Struck by a steel rail and knocked into hold of ship.
Fireman.....	Levis, Que.....	" 5	1	Head crushed by machinery.
Longshoreman.....	Quebec, Que.....	" 25	1	Fell into hold of barge.
<i>General transport—</i>				
Teamster.....	Hamilton, Ont.....	" 25	1	Skull broken, runaway.
Carter.....	Maisonneuve, Que.....	" 18	1	Crushed under load.
<i>Miscellaneous—</i>				
Watchman.....	Saskatoon, Sask.....	" 9	1	Boiler exploded.
Quarryman.....	Dundas, Ont.....	" 22	1	Crushed between engines.
Elevator boy.....	Toronto, Ont.....	" 22	1	Fell down shaft.
Clerk.....	Winnipeg, Man.....	" 23	1	Missed footing and run over by engine.
Emp. (powder factory)	Belœil, Que.....	" 23	21	Explosion from fire of factory.
Chauffeur.....	Davisville, Ont.....	" 28	1	Automobile turned over.
Emp. (grain elevator) ..	Winnipeg, Man.....	" 28	1	Crushed by elevator.
" ..	Virden, Man.....	" 29	1	Collapse of weigh scale.
<i>Railway construction—</i>				
Labourer.....	Merritton, Ont.....	" 2	1	Fell through hopper of ballast car.
" ..	Colwood, B.C.....	" 2	1	Run over by train.
" ..	Sooke, B.C.....	" 3	1	Run over by train.
<i>Unskilled labour—</i>				
Labourer.....	Fernie, B.C.....	" 15	1	Premature blast.
" ..	Peterborough, Ont.....	" 1	1	Crushed between freight shed door and loading table.
" ..	Quebec, Que.....	" 25	1	Asphyxiated.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN SEPTEMBER, 1911.

Labourer.....	Quebec, Que.....	Aug. 30	1	Fell off caisson and drowned.
Builders' labourer.....	Port Colborne.....	" 28	1	Fell through floor of new building.
Electrician.....	Toronto, Ont.....	" 28	1	Blood poisoning from injuries to foot.
Driver.....	East Wellington.....	" 30	1	Caught in runaway cars.
Rope rider.....	East Wellington.....	" 30	1	Caught in runaway cars.

Food and tobacco preparation.—There were one fatal and four non-fatal accidents in September, compared with one fatality in August, and two fatal and two non-fatal accidents in September, 1910. The fatality was caused by person getting crushed by a cover of a retort in a canning factory.

Leather trades.—There was one non-fatal accident in September, compared

with none in August, and one fatal accident in September, 1910.

Railway service.—There were eleven fatal and fourteen non-fatal accidents in September, compared with twenty-three fatal and twenty-seven non-fatal accidents in August, and fifteen fatal and thirteen non-fatal accidents in September, 1910. Of the fatalities, five were caused by persons getting crushed between cars, three

by being run over, and one each to a premature explosion of dynamite, to a fall, and to having thigh broken when caught in a frog.

Railway construction.—There were three fatal and four non-fatal accidents of record in September, compared with none in August, and none in September, 1910. Of the fatal accidents, two were caused by persons getting run over by trains, and one to victim falling through hopper of a dump car.

Navigation.—There were four fatal and two non-fatal accidents recorded in September, compared with twenty fatal and four non-fatal accidents in August, and one fatal and five non-fatal accidents in September, 1910. Of the fatalities, two were caused by falls into the holds of vessels, one by machinery, and one person was burned to death.

General transport.—There were two fatal and nine non-fatal accidents recorded in September, compared with eight fatal and sixteen non-fatal accidents in August, and three fatal and thirteen non-fatal accidents in September, 1910. Of the fatal accidents, one was caused by a

runaway, and one to collapse of load on wagon.

Public employés.—There was one non-fatal accident recorded in September, compared with one fatal and eleven non-fatal accidents in August, and five fatal and nine non-fatal accidents in September, 1910.

Miscellaneous.—There were nine fatal and nine non-fatal accidents recorded in September, compared with five fatal and twelve non-fatal accidents in August, and two fatal and six non-fatal accidents in September, 1910. Of the fatal accidents, three were caused by victims being crushed, two by explosions, and one each by a fall, run over, and collapse of scale in an elevator.

Unskilled labour.—There were three fatal and ten non-fatal accidents in September, compared with thirteen fatal and twelve non-fatal accidents in August, and nine fatal and seven non-fatal accidents in September, 1910. Of the fatal accidents, one was caused by asphyxiation, one by a premature blast, and one in which the victim was crushed between freight shed door and freight car.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, &c., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

THE total immigration to Canada during the five months from April to August, 1911, inclusive, was 212,854, compared with 180,348 in the corresponding months of the previous year, the increase amounting to eighteen per cent. Of the total arrivals for the five months, 141,021 were at ocean ports, compared with 115,159 during the corresponding months of last year, an increase of about twenty-two per cent. There was an increase in the arrivals from the United States from 65,189 during the months of April to August, 1910, to 71,833 during the same months of the present year.

IMMIGRATION TO CANADA, FROM APRIL TO AUGUST, 1911, COMPARED WITH THAT OF THE CORRESPONDING MONTHS OF 1910.

Chinese Immigration.

On October 2, the office of Controller of Chinese Immigration was transferred by Order-in-Council, from the Department of Trade and Commerce to the Department of the Interior, and the following appointments were made:

Chief Controller of Chinese Immigration, Mr. W. D. Scott, Superintendent of Immigration.

Assistant Chief Controller of Chinese Immigration, Mr. E. Blake Robertson, Assistant Superintendent of Immigration.

Controller of Chinese Immigration at Vancouver, Mr. J. H. MacGill, Immigration Agent; at Victoria, Dr. G. L. Milne, Immigration Agent; at Nanaimo, Mr. Henry L. Good, Immigration Inspector; at North Portal, Mr. George McIntyre, Immigration Inspector; at Winnipeg, Mr. J. Bruce Walker, Commissioner of Immigration; at Toronto, Mr. G. L. Stewart, Immigration Agent; at Montreal, Mr. Alphonse Regimbal, Assistant Immigration Agent; at Quebec, Dr. J. P. Lavoie, Immigration Agent; at St. John, Mr. J. V. Lantulum, Immigration Agent; and at Halifax, Mr. W. L. Barnstead, Acting Immigration Agent temporarily.

At other ports the Controller of Chinese Immigration shall be the Immigration Officer, or in the event of there being none, the Chief Customs Officer.

This change was made on the recommendation of Mr. Justice Murphy, the Royal Commissioner appointed to investigate certain alleged Chinese frauds and opium smuggling on the Pacific Coast. In his report Mr. Justice Murphy states:

"At present Chinese Immigration falls within the scope of three different Departments; the Department of the Interior is concerned with it as much as the provisions of the general Immigration Act administered by that department belong to Chinese as well as to all other classes of immigrants except where their operation is excluded by the *ad hoc* provisions of the Restriction Act. The Restriction Act itself is administered by the Department of Trade and Commerce, but this is now done by utilizing the services of the Customs Department. The result is seen in the abuses that have crept in as outlined in this report. There is divided authority and no definite responsibility."

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF JANUARY, 1911.

The following is a list of contracts awarded by the Department of Public Works, the Department of Railways and Canals and the Department of Marine and Fisheries which have received the signatures of both parties, together with the fair wages schedules inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

The general clause for the protection of labour was inserted by the Department in the following contracts awarded during September, 1911.

FITTINGS, CENTRAL POSTOFFICE, TORONTO,
ONT.

Fittings, Central post-office, Toronto, Ont., Name of contractor, J. T. Schell Company, Alexandria, Ont. Date of contract, September 20, 1911. Amount of contract, \$1,505.

SUPPLY AND INSTALLATION OF FITTINGS
FOR POST OFFICE WINNIPEG, MAN.

Supply and installation of fittings for post-office, Winnipeg, Man. Name of contractor, J. T. Schell Company, Alexandria, Ont. Date of contract, September 20, 1911. Amount of contract, \$2,109.

ALTERATIONS AND ADDITIONS TO CUSTOMS
FITTINGS, CALGARY, ALTA.

Alterations and additions to customs fittings, Calgary, Alta. Name of contractor, J. T. Schell Company, Alexandria, Ont. Date of contract, September 20, 1911. Amount of contract, \$1,091.

FAIR WAGES CLAUSE.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district

where the work is carried on, except for the protection of life and property, or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the contractor.

BREAKWATER, LITTLE ANSE, N.S.

Breakwater, Little Anse, N.S. Name of contractor, Thos. D. Morrison, D'Es-cousse, N.S. Date of contract, September 21, 1911. Amount of contract, \$21,500.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenters.....	\$2.50
Carpenters.....	2.00
Blacksmiths.....	2.00
Blacksmiths' helpers.....	1.50
Ordinary labourers.....	1.35

Masons.....	3.50
Labourers.....	1.50

LIGHTHOUSE AND DWELLING, BOATHOUSE AND OIL SHED AT OWL'S HEAD HARBOUR, COUNTY OF HALIFAX, N.S.

The construction of a combined lighthouse and dwelling, boathouse and oil shed at Owl's Head, entrance to Owl's Head Harbour, in the county of Halifax, N.S. Name of contractor, Fred H. Stoddard, carpenter and builder, Jeddore, Halifax, N.S. Amount of contract, \$2,700. Date of contract, July 13, 1911.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenters.....	\$2.25
Painters.....	2.25
Bricklayers.....	4.00
Masons.....	4.00
Labourers.....	1.50

Post Office Department.

During the month of September, orders were given by the Post Office Department for the supplies below mentioned, subject to the regulations for the suppression of the *Sweating system*, and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 586.33
Making and repairing rubber dating stamps and type, also other stamps.....	40.00
Supplying stamping material and wooden boxes, and repairing stamping pads.....	347.95
Supplying mail bags.....	3,540.00
Repairing mail bags.....	3,297.03
Making and repairing Post Office scales.....	190.00
Making and repairing mail locks and supplying mail bag fittings.....	294.40
Supplying Railway Mail Clerks' tin travelling boxes and street letter boxes and repairing portable letter boxes, parcel receptacles and railway mail clerks' tin travelling boxes.....	374.21
Making and repairing miscellaneous articles of postal stores.....	23.75
Making and supplying articles of official uniform.....	214.75

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during the month of September, 1911.

MANITOBA REPORT.

Agriculture and Immigration.

Report of the Department of Agriculture and Immigration for the year ending December 31, 1910. Winnipeg, King's Printer, 1911, pages 114.

THE report of the Department of Agriculture and Immigration of Manitoba for the year 1910 contains statistics for that year showing the area of land under crop; the yield of the various grain and root crops and grasses; the number of threshing outfits, dairy products, poultry and other live stock. Comparative statistics are also given covering a number of years, in some cases giving back as far as 1883. The volume also contains reports of the Manitoba Agricultural College, the Manitoba Dairy Association, Live Stock Associations of Manitoba, Manitoba Horticultural and Forestry Associations and reports of the various charitable institutions of the province.

BRITISH REPORT.

Changes in Rates of Wages and Hours of Labour.

Eighteenth annual report on Changes in Rates of Wages and Hours of Labour in the United Kingdom, in 1910, with Comparative Statistics for 1901-1909. London. Darling and Son, Limited, 1911.

The eighteenth annual report on Changes in Rates of Wages and Hours of Labour presented by the British Board of Trade to both Houses of Parliament deals with the record in the United Kingdom during the year 1910. It shows that the downward movement in wages which began in 1908 and continued during the greater part of 1909 was checked towards the close of the latter year. The year of 1910 was one of improved trade and employment and this effect was reflected in wages. Early in the year a slight upward tendency was noted and this was on the whole maintained during the re-

mainder of the year, with the result that the general level of wages at the end of 1910 was higher than at the end of any year since 1893, with the exception of 1907 and 1908. The net effect of all changes reported to the Department as taking effect during 1910 was an increase of £14,500 per week in the wages of 548,900 workpeople.

FRENCH REPORT.

Wages and Cost of Living.

Ministère du Travail et de la Prévoyance Sociale, Statistique Générale de la France. Salaires et Cout de l'Existence. A Diverses Epoques Jusqu'en 1910. Paris, Imprimerie Nationale, 1911.

A report has been issued by the Department of Labour of France on wages and cost of living in France for the different periods from 1806 to 1910. Assigning the index number 100 to the year 1900, wages are shown to have increased from forty in 1806 to 110 in 1910, and the cost of living from seventy-four in 1810 to 104 in 1910, while the purchase power of wages rose from 55.5 to 106 in the same period. This general result is derived from statistics which are given in detail in the report, showing the wages prevailing in the various trades and in different localities. The average prices of certain commodities and budgets for families of four persons are compiled from various sources. Other portions of the report deal with the current prices of articles in Paris from 1851 to 1910, rentals in Paris, and the cost of board and lodging in different districts of France.

OTHER REPORTS RECEIVED.

Canada.—Sixth report of the Bureau of Archives for the Province of Ontario, by Alexander Fraser, Provincial Archivist, 1909. Toronto: King's Printer, 1911.

Great Britain.—Summary of Accidents and Casualties, reported to the Board of Trade by the several railway companies in the United Kingdom, during the three months ending March 31, 1911, together with reports to the Board of Trade by the Inspecting Officers, Assistant Inspecting

Officers and Sub-inspecting Officers of the Railway Department, upon Certain Accidents which were inquired into. London: Wyman and Sons, Limited, 1911.

Belgium.—Royaume de Belgique. Ministère de l'Industrie et du Travail. Office du Travail. Le minimum de salarie et les Administrations Publiques en Belgique. Bruxelles: 1911.

Finland.—XII. Undersökning af Mekanska Varkstadena i Findland. Pa uppdrag af industristyrelsen och under dess öfverinseende varkstald af G. R. Snellman. Helsingfors, 1911.

France.—Ministère du Travail et de la Prévoyance Sociale. Résultats Statistiques du recensement Général de la Population, effectué le 4 Mars 1906. Tome I. Troisième Partie. Etat Civil de la Population Active. Paris: Imprimerie Nationale. MDCCCX.

Paraguay.—Concurrencia del Banco Agrícola del Paraguay a la Exposición Internacional de Agricultura de Buenos Aires, en el Centenario de la Revolución de Mayo. 1910. 2a Edición, 1911. Asunción: Talleres Nacionales de H. Kraus, 1911.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

ONTARIO CASES.

Master and Servant.—Workmen's Compensation for Injuries.

An appeal was taken to the Divisional Court by the defendants from the judgment of Mr. Justice Sutherland, in an action tried at Brockville with a jury. The plaintiff was the widow of a man who was killed while in the defendants' employment in their factory, and the action was to recover, for herself and her two children, damages for his death. The man was killed by a blow from a stick which he was using in attempting to adjust a belt upon a fixed pulley on the main shaft in the defendants' factory, while this shaft was rapidly revolving.

The questions submitted to the jury, with their answers, were as follows:—

1. Were the injuries which occasioned the death of the deceased caused by any negligence of the defendants? A. Yes. 2. If so, wherein did such negligence consist? A. (1) In defect of pulley on main shaft; (2) by defective way of adjusting belt; (3) by not having sufficient room for men while in the discharge of their duties; and (4) for poor system of management. 3. Were the deceased's injuries caused by any negligence on his part? A. No. 4. If so, wherein did

the negligence consist? 5. Could the deceased, by reasonable care, have avoided the accident? A. We think not.

The Jury assessed the damages at \$1,600, apportioning \$800 to the plaintiff and \$400 to each child.

Chief Justice Falconbridge said that, in the answer to question 2, No. (2) above was alone required to be considered. No. (1), the small defect or slip out of the rim of the pulley, was practically abandoned at the argument. No. (3) a mere temporary obstruction, not affecting the permanent condition of a way, is not a defect in the condition of a way: (Referring to *McGiffin v. Palmer's Company*, 10 Q. B. D. 1); and the crowding was caused by the deceased himself depositing closet-seats there. No. (4) is not warranted by the evidence.

The evidence, however, justified the answer (2). The plaintiff can recover only under the statute (the Workmen's Compensation for Injuries Act), and the damages must be reduced to the statutory limit, \$1,500, apportioned as follows: to the widow, \$750; to each child, \$375. With this variation, the appeal is dismissed. Because of this small reduction, the defendants are ordered to pay only three-fourths of the plaintiff's costs of appeal. Mr. Justice Britton agreed in the result.

Mr. Justice Riddell dissented. He was of opinion, for reasons stated in writing, that, upon the findings and evidence,

the plaintiff could not succeed, and that the appeal should be allowed and the action dismissed with costs.

(*Kirby v. Briggs*, 2 O. W. N., 1511.)

Collapse of Building During Alterations.—Personal Injuries.—Negligence.

Appeal by the defendant Reid from the order of a Divisional Court (21 Ont. L. R. 545) affirming the judgement of Mr. Justice Latchford at the trial, in favour of the plaintiff, upon the findings of a jury. Leave to appeal to the Court of Appeal was granted upon the appellant undertaking to pay the costs of the appeal in any event. The action was for damages for injuries sustained by the plaintiff by the collapse of the appellant's building, in the city of London, the plaintiff having been at work as a clerk in a neighbouring building when the collapse occurred. The Court of Appeal directed a new trial.

Mr. Justice Moss said, that it would aid materially in arriving at a final conclusion as to the defendant R.'s liability in law, if more light was thrown upon the part of the case relating to the employment of and instructions to the architects by whom the plan was prepared, and under whose direction the work of altering the building was done, and his knowledge and means of knowledge of the condition of the walls, as well as his competency.

Mr. Justice Garrow held, that an owner may be liable, although out of possession, if he created or permitted to be created the nuisance complained of, or if the injury complained of was brought about through the defective condition of the premises which it was his duty, under a covenant with his tenant, to repair. The alterations which brought about the disaster were none the less R.'s because he did not perform the work with his own hands, for he authorized and commanded it by an express covenant in the lease. The injury was the direct consequence of the very thing contracted to be done, for which the defendant R. was responsible, unless otherwise excused. His real defence must be that, in doing as he did, he took reasonable care; and the

question was one of fact—did he, by employing an independent contractor, and by adopting and acting upon a plan prepared by an architect, do all that a reasonable man, in such circumstances, should have done? That was a question for the jury, to whom it was not clearly submitted at the first trial.

Mr. Justice Maclaren held, that in such a case as this, it is the tenant or occupier, and not the landlord, who is responsible to third persons. When the building collapsed, the tenant was actually in possession under the lease. The defendant R. was not liable for an accident resulting from the negligence of the tenant or his architect, in the circumstances of this case. The plaintiff did not make out such a case as would entitle her to a verdict.

Mr. Justice Riddell held, that the defendant R. was not responsible for the negligence of his tenant; the tenant was not the agent of R. in making the change in the building—nor could it be fairly said that the change was being made for R. The improvements were to become and remain the property of R., but the changes were for the defendant's advantage and at his desire. The mere fact that there was a possibility that the work would be done in such a way as to do harm, would not fix R. with liability—the use of the building in the manner contemplated by the lease would not naturally and necessarily cause damage. All the facts, however, not being before the Court, there should be a new trial.

(*Earl vs. Reid*, (1911) 23 Ont. L. R., 453.)

Master and Servant.—Negligence.—Injury to Servant.

An appeal by the defendants from the judgement of Chief Justice Mulock, upon the findings of a jury, in favour of the plaintiff. The action was brought to recover damages said to have been caused to the plaintiff, through the negligence of the defendants, under the following circumstances: About the middle of June, 1910, the plaintiff, an English lad, eighteen years of age, who had been in Canada for about three

years, was employed by the defendants' steward to act as assistant porter. At that time one Charles Tabbert was the head porter. One of the head porter's duties was, each morning and evening, to load and fire a small brass cannon. The plaintiff was instructed to assist the head porter in this operation, which he did on several occasions. He had also assisted him in loading the cartridges with powder, which was done in the basement of the club-house. Some of the cartridges or shells, which were also of brass, had expanded, and required to be sand-papered to make them fit. This was done, from time to time, by the head-porter. Of seven shells produced in Court, five fitted, and a sixth went in with some pressure from the fingers. When the cartridge did not go in easily, Tabbert used the ramrod to force it in. The plaintiff saw him doing so when he was assisting. Tabbert seems to have deserted his employment on June 30; and the plaintiff was promoted to his place as head-porter. What took place on the occasion of his promotion was thus described by him in his evidence: "I was cleaning the yard with the hose, and he (the steward) came up to me and said, 'Charlie is gone, and you will take his place and do his duty;' and he asked me if I understood how to fire the gun: and I said, 'Yes, sir,' and he said, 'If I would be a good boy, there would be more money for me'."

The plaintiff, then, as head-porter loaded and fired the gun himself, once on July 1, and again on the morning of July 2, using the ramrod as he had seen Tabbert use it to force in a shell inclined to stick. And it was while loading it in the evening of that day that the explosion which injured him occurred. He had partly inserted a shell which stuck. He had brought out from the basement two shells, loaded and capped. The other was left by him lying on the grass beside him. This he picked up, intending, as he says, to pick up the ramrod, and had it in his right hand, when it exploded, and he was severely injured. The partly inserted cartridge did not explode. The plaintiff said he did not

remember exactly what took place. He did not remember using the shell in his hand to drive the other in; but he did not deny, and in effect admitted that that was what he was doing with it when the explosion occurred, which entirely agreed with the evidence of two witnesses called for the defence, and was assumed to be the fact by the Chief Justice in his charge to the jury. And, unless that was so, that the explosion occurred because the plaintiff was using the shell which exploded as a hammer, there was no explanation given nor cause shewn in the evidence for the explosion—a matter vital to the plaintiff's case.

In answer to the questions put to them, the jury found negligence on the part of the defendants, and the absence of contributory negligence on the part of the plaintiff. Judgement was given in favour of the plaintiff for \$3,975.

In the judgement of the Court of Appeal, delivered by Mr. Justice Garrow, he said that he was clearly of opinion that the action should have been dismissed upon the ground that there was no evidence from which the jury could reasonably infer that any act of negligence on the part of the defendants had caused the injury—that, in fact, the injury, on the undisputed evidence, was solely caused by the plaintiff's own extraordinarily careless act in using the shell which exploded in the manner described. How there could be any question for the jury of the defendants' system in carrying on their operations, or of proximate cause other than the plain and obvious one, he was quite unable to see. And he was equally at a loss to see how the plaintiff's case could be supported upon the ground of the alleged failure to instruct. The plaintiff was not a baby, or even a youth of tender years. He had been in Canada, first in Quebec and afterwards in Ontario, earning his living, for several years. He was filling a man's place and getting a man's pay. He had received certain instructions, which he was not following when he was injured. He had not, it is true, been told not to use a loaded and capped

shell as a hammer—an instruction which would scarcely have been regarded as necessary by the most careful of masters. When he received his promotion, he stated to the defendants' representative that he knew how to fire the cannon, which, of course, included loading it; and if, at variance with this statement, he intended to rely upon an ignorance so gross as to be almost inconceivable in one of his years and experience, he certainly ought to have had the courage to pledge his oath to the fact.

There was in the judge's opinion, under all the circumstances, no proper evidence to warrant submitting the questions which were submitted to the jury, and the action should have been dismissed.

The appeal should, therefore, be allowed and the action dismissed, both with costs, if demanded.

(*Smith vs. Royal Canadian Yacht Club*, 3 O. W. N., 19).

SASKATCHEWAN CASE.

Master and Servant.—Dismissal of Servant.—Damages.

An appeal by H. and Company, by way of stated case, from an order made by a magistrate under the Masters and Servants Ordinance.

G. was hired as a clerk by H. and Company for a month on trial; he worked for one day more than a month, was paid for a month, and was then discharged without notice and not for misconduct. Upon a complaint by G. before a magistrate under the Masters and Servants Ordinance, the magistrate awarded G. \$56 and costs, the wages agreed upon being \$40 a month, with board and lodging.

Mr. Justice Lamont⁷ held, (1) that upon this appeal by way of stated case under section 761 of the Criminal Code, the magistrate had jurisdiction, under section 3 of the Masters and Servants Ordinance, to award damages for improper dismissal, although no claim for wages was made; (2) that the order of the magistrate could be questioned on the appeal only on the ground that it was erroneous in point of law, or on the

ground that it was in excess of jurisdiction; (3) that H. and Company had no right to dismiss G. without notice. When G. entered upon a second month the employment was continued on the terms of the original contract, so far as remuneration was concerned, and H. and Company could not dismiss G. without reasonable notice; (4) that whether \$56 was more than four week's wages at the rate of \$40 a month, with board and lodging, was a question of fact, the determination of which by the magistrate was not reviewable on an appeal by way of stated case; but, if it were reviewable, the amount did not appear to be excessive. The appeal was dismissed with costs.

(*Re Halter and Company and Goody*, 17 W. L. R., 261.)

BRITISH COLUMBIA CASES.

Implied Contract to Pay Wages.

Action to recover the sum of \$788, made up of \$30 for money lent, and the balance for services rendered to the defendants in their ranch in the Otter Valley. The plaintiff was engaged by the defendants to do work on certain mineral claims, for which he was to be and was remunerated. In this action he claimed additional remuneration for work done upon the defendant's ranch. He admitted that there was no bargain as to any service to be rendered on the ranch, no agreement as to wages, nor as to the kind of work to be done, but said that the work was done from time to time, with the knowledge and consent of the defendants. The plaintiff kept no track of the time employed in working on the ranch, and never, while he was in the defendant's employment, asked for wages for that work, and did not, when leaving the defendant's employment and receiving remuneration for his work on the mineral claims, ask for any settlement of his wages for work on the ranch.

Judge Swanson of the County Court held, that where services have been rendered without an express contract to pay for them, it is a question of fact whether or not there was an implied con-

tract to pay, and the onus is upon the one seeking payment. The authorities on the question were reviewed in the judgement, and *Hingston v. Kelly*, 18 L. J. Ex. 360, specially referred to.

The judge held, upon the whole circumstances, that the plaintiff had failed to make out his case.

(Angel vs. Bresnik, 17 W. L. R., 233.)

Master and Servant.—Injury to Servant.—Negligence.

An appeal to the Court of Appeal by the defendants, from the judgement of Mr. Justice Martin in favour of the plaintiff, in an action for damages for injuries sustained by him owing, as alleged, to the negligence of the defendants, in whose service the plaintiff was.

In the defendants' mine there were a main tunnel and several drifts connected therewith. A line of rails was laid along the main tunnel and into the drifts, and the train for carrying the ore, rock, &c., out of these drifts and along the tunnel was operated by an electric motor by trolley-wire overhead. The trolley-wire did not enter one particular drift, where ore was being taken out, so that the cars which had to be put into that drift could not be placed in by the motor. The system followed was to uncouple such cars as were to be put into that drift from the rest of the train, while the train had sufficient momentum to "kick" these cars into the drift. The plaintiff was head brakeman on the train, and

was injured when attempting to uncouple in order to "kick" into the drift three cars out of a train of six cars. He was upon the motor, and, when it came opposite to the mouth of the drift, he jumped off, and, when the first three cars had passed, tried to swing in between cars three and four to uncouple. His statement was, that, before he had got up on the platform formed by the floor of the car at the end, one of the cars jumped the track, and, the coupling-pin coming out, his leg was caught between the draw-head of one car and the frame of the other, and so badly crushed that it had to be amputated. In an action for damages for the injury.

The Court held (Mr. Justice Irving dissenting), that there was evidence of negligence on the part of the defendants in operating upon a defective system, sufficient to support the finding of the trial judge that the plaintiff was entitled to damages at common law.

Mr. Justice Gallihier was of opinion that it was practicable, at the time of the injury, to place and operate the trolley line in the drift; and the failure to do so was such a defect in the system of operation as would render the defendants liable. There was no contributory negligence, and the plaintiff was not otherwise blameworthy.

The appeal was dismissed with costs, Mr. Justice Martin dissenting.

(Carrigan vs. Granby Consolidated Mines, Limited, 17 W. L. R., 459.)

THE LABOUR GAZETTE

NOVEMBER, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF
OCTOBER, 1911.

I.—GENERAL SUMMARY.

RAINS in the opening week of the month delayed threshing operations in western Canada, and some deterioration in the quality of the grain as well as a decrease in the amount of the yield, especially in the case of oats, was reported. In view, however, of the relatively high totals of the yield this year, general trade and manufacturing continued buoyant. General prices advanced, being on the whole considerably higher than at the corresponding period of 1910. The collieries of Nova Scotia and Vancouver Island were working for the most part to full capacity; in the mines of Alberta and Eastern British Columbia where strike conditions have prevailed for several months, the outlook was for a resumption of work in November. Metalliferous camps reported continued activity, with an increase in the scale of operations in the interior of British Columbia. In the lumbering industry, the outlook is for a smaller winter cut in the eastern provinces, stocks carried over being larger than last year; but in British Columbia, trade was active. The railway construction camps continued to give employment to large numbers of men, the work being rushed in anticipation of the advent of cold weather. The same statement applies to the building trades, in which operations have been considerably more extensive than at the corresponding period last year and give promise for an active winter season for inside workers. The

supply of unskilled labour was well absorbed, no surplus being observed except in a very few localities. The immigration movement was considerably heavier than last year.

Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during October, 1911.

Building trades.—Lather (twenty-two) at Victoria, B.C., were granted a rate of \$3 per thousand piece work, or \$5.50 for an eight-hour day, in place of a rate of \$3.50 per thousand, the men supplying their own nails.

Metal trades.—Iron moulders (thirty-three) at London, Ont., who prior to June 5, had been receiving \$2.50 for a ten-hour day, obtained employment since that date at a rate of \$2.50 for a nine-hour day.

Public employés.—Public library employés (eleven) at Hamilton, Ont., received an advance of 50 cents per week.

Other industries.—Telephone operators (197) at Ottawa, Ont., were granted an increase in their wages from a scale of \$17.50-30 per month, to a scale of \$5-8.50 per week.

Interruptions to Industry.

The Department's record of strikes and lockouts, during October, shows

that there was the same number as in September, and two more than in October 1910. The loss of time to employes, through trade disputes, during October was approximately 191,200 working days, an increase of about 1,400, compared with the preceding month, and an increase of about 48,800 over the corresponding month of last year.

Among industrial establishments, &c., destroyed by fire or through other causes, during October, 1911, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Aerated water establishment, loss \$10,000; railway station at Kentville; hotel at Shelburne partially burned; lumber mill and lumber at Weymouth, loss \$25,000.

New Brunswick.—Outbuildings on farm at Bass river Kent County), loss \$5,000; pulpmill at Chatham partially destroyed; government dredge *New Brunswick* damaged in storm, loss \$35,000; sawmill and lumber at Tobique river, loss \$7,500.

Quebec.—Barn with contents at Joliette; sawmill and two million feet of lumber at Labelle, loss \$30,000. The following fire losses occurred at Montreal: dry-goods store, loss \$8,000; block of dwelling houses, loss \$7,000; six lodging houses, loss \$8,000; rear of premises occupied by grocery store and butcher shop, together with several dwelling apartments, loss \$10,000; buildings of oil company's works at Outremont, loss \$15,000; church, loss \$90,000. At North Hatley the electric light power house was destroyed. Fire station at Quebec, business portion of St. Roch (Quebec city), loss \$50,000; buildings of explosive manufacturing establishment blown up, at Rigaud: there were four men killed in this explosion. Barns and contents at Ste.-Anne des Plaines.

Ontario.—Printing establishment at Belleville, loss \$3,000; stove and lumber mill at Blenheim, loss \$6,000; sawmill and stock of lumber at Blind river, loss \$125,000; planing mill at Brantford, loss \$2,000; picking department of a hat factory at Brockville, loss \$2,000; garage at Clandeboye, loss \$4,000; evaporator at Delaware, loss \$3,000; two barns with contents at East Zorra; Grand Trunk Railway station at Exeter, loss \$2,500; lumber yard at Englehart, loss \$20,000; bakery and general store at Fort Erie, loss \$15,000; pottery works at Hamilton, loss \$1,500; building at Hamilton destroyed through the falling of water tank, damage \$60,000 barn and contents at Ingersoll; lumber and mill machinery at Kenora, loss \$10,000; outbuildings with contents, consisting of live stock, poultry, farm machinery and season's crops at Markdale, loss \$12,000; barn and contents at North Augusta; barn and contents at Ripley; Pointe Aux Barques (Lake Huron) schooner *Azov* capsized, total loss; tug *Gauthier* burned at Port Arthur, loss \$2,000; barn destroyed at Park Head, loss; barn with contents at Rosanna, loss; schooner *Naida* abandoned in midlake (Lake Huron), total loss; livery stable at Simcoe, loss; church at Strathroy, loss \$8,000; clothing establishment at St. Catharines, loss \$20,000; clothing manufacturing establishment at Toronto, loss \$12,000; harness factory at Toronto, loss \$11,000; butcher shop and boot and shoe factory at Wheatley, loss \$8,000; barns at Woodstock.

Manitoba.—Planing mill and lumber at Birch river; school house at Killarney; barn and contents at Morden; stables at Virden, loss \$2,500.

Saskatchewan.—Barn and sixteen horses at Borden.

Alberta.—Livery stable at St. Albert, loss \$15,000.

British Columbia.—Blacksmith shop at Kelowna, loss

\$7,000; general store and hotel at Trail, loss \$10,000; stables at Wardner, loss \$5,000; mine buildings at Ymir, loss \$20,000; tug *Noname* cut in two and sunk at mouth of Fraser river, total loss; the Canadian Pacific Railway steamer *Princess Beatrice* went on the rocks off Noble Island in Queen Charlottetown Sound.

Agriculture.

The month was very active for agriculturists throughout Canada. In the prairie provinces, threshing was general, having been delayed somewhat by rains in the opening days of the month. The quality of the grain will suffer from the same cause. Plowing was prosecuted under generally favourable conditions, and the work was well advanced in most localities at the close of the month. In the Maritime provinces, a feature of the month was the favourable yield of potatoes, heavy shipments having been made to Ontario, where the crop has been light. Corn cutting, harvesting the root crop, and plowing made the month very active in Ontario and Quebec. Large quantities of grain were marketed; shipments from western Canada were reported never so heavy before, about 1,000 cars per day passing inspection at Winnipeg. Prices have been well maintained. Eggs and butter have advanced sharply, with milk upward at several points from seasonal causes and a prevailing scarcity of feed.

According to the September issue of the *Census and Statistics Monthly*, the average yield of fall wheat in the Northwest provinces this year is 24.68 bushels per acre, of spring wheat, 19.82 bushels; of oats, 45.93 bushels; of barley, 32.93 bushels; of rye, 28.52 and of flax, 11.46 bushels. In Ontario and the Maritime provinces, the averages are 21.75 bushels for fall wheat, 19.35 bushels for spring wheat, 30.76 bushels for oats, 30.67 bushels for barley, 18.24 bushels for rye, and 12.61 bushels for flax.

A cable from the International Agricultural Institute of Rome, Italy, gives the estimated crop yields in nineteen countries for 1911, compared with 1910:

Grain.	1911 bushels.	1910 bushels.
Wheat.....	3,044,528,000	3,034,879,000
Rye.....	1,388,477,000	1,440,720,000
Barley.....	1,190,964,000	1,190,964,000
Oats.....	3,239,619,000	3,577,549,000

The total 1911 production of the countries reported to the institute compared with the totals of the same countries last year are: wheat 100·3%; rye 96·4%; barley 99·4%; oats 90·7%.

Early in the month, severe storms took place in the fruit districts of Ontario, resulting in the destruction of a portion of the apple crop. It was reported that the greatest damage was done in the Georgian Bay district.

A demonstration car exhibiting samples of products grown in Northern Ontario was sent through other portions of the province, by the Bureau of Colonization, of the Department of Agriculture of Ontario. The car was taken to North Bay on October 12, and will continue travelling to various points until November 30.

It was estimated that there were nearly 40,000 harvesters employed in western Canada during the past season. All genuine harvesters, who could prove that they had been engaged on farms for thirty days or more, could purchase a return ticket at the rate of one cent per mile. It was estimated that 27,000 labourers were brought from the eastern provinces and Newfoundland, and about 5,000 harvesters came from the north-western states.

Fishing.

Stormy weather interfered with operations in many parts of Nova Scotia. Mackerel and herring were on the whole scarce, and only small catches of cod and haddock were taken. The catch of the Lunenburg fleet exceeds all previous records.¹ In Prince Edward Island, however, oystering was actively in progress, and the returns were generally above the average. The sardine season in New Brunswick has been successful thus far, and some good shipments have been made. In British Columbia, a feature of the month was the heavy catch of whales off the coast of Vancouver Island where upward of 1,450 had been taken up to the close of September.

Lumbering.

Sagging prices and a rise in freight rates have combined to increase stocks

carried over in lumber yards in the Maritime provinces, and the general outlook is that winter cutting will be on a less extensive scale than last year. In Ontario and Quebec, sawing has been continued throughout the month, though low water hampered operations in some localities, notably, at Ottawa. Prices, however, have been fairly steady and preparations are being made for a normal cut. Several gangs were sent to the woods during October, with wages approximately unchanged from last year. In British Columbia, the mountain mills were closing down, but the camps were in full operation. Mills on the coast were still running actively, and the general tone of the market was favourable.

The yield of the lumbering industry in Canada, during 1910, is officially placed at 4,900,000,000 board feet, worth over \$77,000,000. Compared with 1909, there was a falling off of four per cent. or 142,000,000 feet in the yield of white pine, while the cut of yellow pine in British Columbia increased nearly 600 per cent., or over 150,000,000. While in 1909, the four species, douglas fir, hemlock, cedar, and yellow pine amounted to one-quarter of the total cut, in 1910, these four amounted to seventy per cent. of the total.

The Forestry Branch of the Department of the Interior has compiled statistics showing that over 1,500,000 cords of pulpwood were cut in Canada during 1910, worth nearly \$9,800,000. Over sixty per cent. of this amount was sent out of Canada without further labour being expended on it. According to another bulletin issued by the Branch, in October, ten species of wood are used in the manufacture of shingles in Canada, of which cedar is the most important. Over nine-tenths of the 2,000,000,000 shingles produced in Canada during 1910, were of this species, and over one-half of these were western cedar, cut in British Columbia. The consumption of spruce and white pine has decreased suddenly in 1910, eighty-two per cent. less of the former being made than in 1909, and scarcely one-fifth the usual amount of white pine being produced. Nova Scotia and Quebec cut most of the spruce shingles.

¹See report of Halifax correspondent.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue. The table has reference only to the amount of employment in several trades and industries throughout the Dominion. In tabulating the information in question, the terms employed are divided into two groups, headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, fair, active and very active; (2) quiet and very quiet.

Nearly 3,000,000 more of hemlock shingles were produced in 1910, than during the year previous, and of the total of 15,000,000 pieces, over nine-tenths was produced in Ontario and Quebec. The above four species furnished over ninety-eight per cent. of the wood used in shingles. Balsam, dougals fir and jack pine, although of less importance were used during 1910, in increasing quantities, and for the first time, tamarack and red pine were reported as shingle wood. There was less fluctuation in the value of the species than formerly. Balsam shingles were the cheapest at \$1.48 per thousand, and tamarack the most expensive at \$2.49.

Mining.

The coal trade in Nova Scotia has been very active and employment steady throughout October. Work at Springhill is now proceeding at full capacity. In Quebec, the output of copper and asbestos has been steadily maintained, notwithstanding some weakness in the price of the latter product. Conditions in the Cobalt and Gowganda camps showed little change from the preceding month; shipments from the former camp, from January 1 to September 30, were 19,343 tons. In Alberta and British Columbia, conditions compared favourably with the preceding month: negotiations for the termination of the strike in the collieries of Alberta and eastern British Columbia having been concluded, on October 26, and the outlook being for an early resumption of work. In the interior of British Columbia, metalliferous camps reported increasing activity, several old mines having re-opened and expansion being noted in operations generally. On Vancouver Island the collieries were working steadily, and the coal trade was generally prosperous.

The preliminary report of Granby Consolidated showed the year's production as amounting to 17,855,130 pounds of copper, a decrease of 3,000,000 pounds, compared with the previous year, involving a decrease of about \$800,000 in gross, and about \$250,000 in net earnings.

Manufacturing.

Little change was apparent during the past month in the general outlook. The prevailing tone of the industry was one of buoyancy, which the latest reports received with regard to crop yields and trade conditions tended to confirm.

The Canada Carbide Company has been formed by the consolidation of the Shawinigan Carbide Company, the Ottawa Carbide Company, and the Willson Carbide Company of Merriton, Ont. The capital of the new company is \$5,000,000.

It is expected that the new plant of the Canada Cement Company, now under construction southwest of Winnipeg, will be put in operation next spring. It is to cost \$1,500,000, and to have an initial capacity of 3,000 barrels per day.

At the tenth annual meeting of the Ogilvie Flour Mills Company it was reported by the President that an enlargement of their oatmeal plant at Winnipeg had been completed, and was in successful operation. The Company owns 119 interior elevators throughout the Northwest.

The Saskatchewan Bridge and Iron Company, of Moosejaw, Sask., capitalized at \$250,000, will erect a large plant at Moosejaw, for the manufacture of bridge and structural iron.

The Saskatchewan River is being tested at Saskatoon, as to its possibilities of power production, in connection with the projected new dam.

Railway Construction.

Work continued steadily on the many contracts under way. The labour supply has been well maintained, and most of the camps mustered a larger pay roll than in the preceding months of the season. It was stated that the National Transcontinental Railway would be completed across the divide within a few weeks' time.

The thirtieth annual meeting of the Canadian Pacific Railway Company's shareholders was held on October 4, at Montreal. It was announced at the

meeting, that the western mechanical shops of the Company would be located at Calgary, providing satisfactory arrangements could be made. It was reported that the first season's work of the eastern block of the irrigation district was gratifying. The dam at Horseshoe Bend, on the Bow river is almost finished, and the work will be completed in a couple of years. Some of the land will be served with water before that time. The President referred to the condition of the crop in the West, as having shown some deterioration, but as the crop was a large one, good returns were anticipated. He stated, also, that the volume of business had exceeded expectations, and in consequence, the Directors proposed to double-track the line, from Brandon to Medicine Hat. Two new steamships are being placed on the Pacific, and other smaller boats are being built. Extension to terminals are being arranged for at Montreal, Toronto, Winnipeg, Calgary and Vancouver.

The adjourned annual meeting of the Grand Trunk Pacific Railway Company was held during October. The President stated that on the main line track-laying had been extended during the year, from Wolf Creek to Fitzhugh, 1,027 miles west of Winnipeg, and it was expected that it would reach to a point 1,094 miles west of Winnipeg, before the close of the year's operations. A chain of first-class modern hotels will be constructed. On the Eastern Division, 1,223.45 miles of main line track, and 136.5 miles of sidings had been laid, and the remaining portions are all under contract.

Extensive developments were reported on the British Columbia Electric Railway Company's new line. An extension of twenty-two miles in length was begun on Vancouver Island, connecting Victoria and Deep Bay on the west shore of the Saanich Peninsula. The contract for the grading of eighteen miles of this extension has been awarded. The contract was also let by the Company for an addition to their auxiliary steam power plant at Vancouver, the equipment for which will include four boilers each of 500 horse power, bringing the available power from this plant to 12,000

horse power. The Company recently made a ten-year agreement for supplying power to Sumas, a city in the State of Washington, and is carrying on negotiations for a similar agreement, with the Municipality of Blaine, also in Washington.

The Canadian Pacific Railway Company is making extensive additions to hotels in the West, at Lake Louise and Banff; other hotels are being constructed for the Company, at Calgary and Victoria. Work was begun on the construction of the new hotel at Winnipeg, for the Grand Trunk Pacific Railway Company, to be named the "Fort Garry."

Good progress was made in the construction of the main line of the Canadian Northern Railway, between Edmonton and the Pacific Terminals. The line from Edmonton to Athabasca Landing is expected to be ready for operation during October, and that 125 miles of grading will be completed, on this section, before the work is stopped by frost.

It was stated that at the next session of the Alberta Legislature, the Canadian Northern Railway Company will seek the right to build and operate fourteen new railway lines in that province, opening up a large area of country hitherto unreached by railways.

The first spike of the Brandon Street Railway was driven by the Mayor, on October 11.

General Transport.

Railway and canal traffic was heavy during October, especially in connection with the movement of the western grain crops. Earnings of railway companies showed increases, compared with last year. Canal returns, owing to a decrease at Sault Ste-Marie, have been below those of last year.

The keen demand for coal in Western Canada led to increased activity on the upper lakes. It was stated that the Canadian Northern Coal and Ore Docks Company, at Port Arthur, would operate a double shift at their docks, until the close of navigation, beginning October 6.

In compliance with an order of the Board of Railway Commissioners, the

express companies of the Dominion filed a new schedule of rates. These schedules show a marked reduction between Winnipeg and Calgary; Regina and Edmonton; London and Brandon; London and Winnipeg; and Toronto and Winnipeg. There was no change in the rate between the cities of Montreal, Hamilton, and St. John, N.B., with Brandon, but between London, Toronto, Hamilton, Montreal and St. John, N.B., with Calgary there was a large reduction. There was also a large reduction to and from Vancouver and the same points. A reduction of five cents was made on shipments of thirty pounds weight between local points, such as Toronto, Hamilton, London, Winnipeg and a reduction of 35 cents between St. John and Winnipeg. Corresponding reductions were made between other points, but the rate between Montreal and Winnipeg is unchanged.

The annual statement of the Calgary Municipal Street Railway Company for the year ending June 30, 1911, which was the second year of operation, shows net profits amounting to \$87,206.09, an increase of \$57,770.56, over the preceding year's report, while the number of passengers carried was 7,176,086, compared with 3,649,697 in the previous year.

The adjourned annual meeting of the Quebec Railway, Light and Power Company took place early in October. It was reported that the gross earnings of the year ending June 30 amounted to \$1,380,126; chargeable to operating expenses, \$661,907, and the fixed charges, \$44,539, leaving a surplus of \$273,000.

On October 5, the shareholders of the Montreal Street Railway Company ratified the proposed amalgamation of their Company with the Street Railway and Park Island Railway Company, the Terminal Railway and the Public Service Corporation. The new organization to be known as the Montreal Tramways Company. Action was subsequently taken in the Courts by opponents of this amalgamation, to prevent its being carried out.

A great increase in the grain traffic was reported at the Port of Montreal during the year, compared with 1910.

From the opening of navigation to October 11, in 1910, there were received 19,067,779 bushels of wheat, corn and oats, compared with 24,269,258 bushels during the present year, an increase of 5,201,564 bushels. The chief increase was in corn, for which the figures 1,284,536 bushels, given in 1910, rose to 4,807,213 bushels in 1911.

The Trades.

Building.—Exceptional activity prevailed in the building trades throughout October, in nearly every industrial centre. Contractors were rushing operations in order to finish the outdoor work before the winter set in, and they were able to work almost uninterruptedly, through the continuance of favourable weather. Building permits at Calgary, Alta., amounted to \$10,860,078, during the first nine months of 1911. It was reported that building operations at Orillia, Ont., were expected to reach the value of \$500,000 during the present year, half of which amount has been expended in new factory buildings.

Metal and woodworking trades.—All branches of the metal and woodworking trades were generally well employed.

Printing and allied trades.—Printers and pressmen, and the allied trades had a good month, though they were not quite so active as in the previous month.

Clothing trades.—Nearly all branches of the clothing trades were well employed. In some localities there was a demand for female labour. Boot and shoe workers were somewhat quiet.

Textile trades.—The textile trades were steadily employed during the month.

Leather trades.—Leather workers were well employed, but tanners and curriers had a quiet month in some places.

Food and tobacco preparation.—Normal conditions prevailed in all the trades relating to the preparation of food and tobacco, and the workers found steady employment.

Miscellaneous.—Hotel and restaurant employes, retail clerks, &c., were well employed. In the jewellery business, the manufacturers found some difficulty in securing enough hands.

Unskilled labour.—Unskilled labour was very actively employed during the month, outdoor work being carried on to a greater extent than is usually the case in October.

Canadian Trade and Revenue.

Foreign and Imperial trade.—During September, 1911, the total value of imports entered for consumption in the Dominion of Canada was \$42,337,716, compared with \$37,312,695, in September, 1910. During the six months ending September 30, 1911, the total value of imports, excluding coin and bullion, amounted to \$246,710,887, compared with \$219,055,635, in the corresponding period of the last fiscal year. The total value of domestic exports during September, 1911, was \$24,284,702, compared with \$24,110,936 in September, 1910. The total value of domestic exports during the six months ending September 30, 1911, was \$129,606,982, as against \$127,525,432 in the corresponding month of last year.

During September there were increases in exports of the products of the mine, animals and their produce, and agriculture, and decreases in the products of the fisheries, the forest, and manufactures, and in miscellaneous merchandise.

The grand total of Canadian trade for September, 1911, was \$69,868,429, compared with \$64,459,495 in September, 1910, and for the six months ending September 30, 1911, the grand total was \$400,270,855, compared with \$360,277,276, in the corresponding months of 1910.

The trade commissioners and commercial agents of the Department of Trade and Commerce reported that there was a good market for Canadian grain and flour in the West Indies and British Guiana. The total grain of all kinds imported into the West Indies and Bermuda is approximately of the value of £530,000. In addition to the grain, flour to the value of upwards of £900,000 is imported annually. There are no mills in these colonies for producing wheat flour, and those for other grain and starch are small in size and capacity, with the exception of the mills in British Guiana for prepar-

ing rice. There are six breweries in Jamaica, and one in Trinidad, all of which import their malt and grain. It is stated that shippers of Canadian hay can find profitable markets in Holland and Great Britain, owing to the failure of the crop through dry weather.

There is also a good market in England, for onions. There is a growing trade in England in certain lines of Canadian canned goods, particularly apples and salmon.

Domestic trade.—Satisfactory trade conditions, both wholesale and retail, prevailed in the principal industrial centres. According to R. G. Dun and Company, business failures during the four weeks ending October 26, numbered 100, compared with 137 in the corresponding period of 1910. During the third quarter of 1911, the commercial failures in the Dominion numbered 286, with liabilities amounting to \$3,514,345, compared with 271 failures during the same period of 1910, with liabilities of \$2,246,071.

The bank statement for September, showed an increase of \$675,320 in paid up capital over the previous month. Notes in circulation, which amounted to \$97,197,176 on September 30, showed an increase of \$5,934,893. Deposits payable on demand increased by \$2,473,225, and current loans in Canada increased by \$14,323,645. Bank clearings continued to increase in volume in all the principal industrial centres.

The Royal Bank of Canada has issued the annual report for 1910, which is its forty-first annual report. The reports show, compared with 1909, that the paid-up capital was increased from \$5,000,000 to \$8,200,000; the reserve fund from \$5,700,000 to \$7,000,000; deposits from \$50,822,129 to \$72,079,607; loans from \$43,838,544 to \$60,586,261, and the total assets from \$67,051,102 to \$92,510,346. There were also undivided profits in 1910 of \$243,230. The latest official statistics are given in the report relating to area, revenue and expenditure, the public debt of Canada, returns of chartered banks production of wheat and other grain and field crops; trade of Canada; mineral production; railway statistics;

statistics of insurance, immigration and population, and the customs tariff.

During the first half of September, twenty-seven companies were incorporated under the Alberta Legislature, with a total of capitalization of \$3,250,600, of which number ten will have their head offices at Calgary, with a total capitalization of \$2,438,000.

Notes.

The sixth annual convention of the Union of New Brunswick Municipality was held at Newcastle.

The British Columbia branch of the National Peace Association has recently elected officers, and an executive committee of five members from each city represented in the Association.

The union of the cities of Edmonton and Strathcona will be authorized during the coming session of the Alberta Legislature, the ratepayers of both municipalities having decided in favour of amalgamation.

Owing to the strike of coal miners in Alberta and eastern British Columbia, there were grave fears of a fuel famine during the coming winter. In order to prevent suffering from this cause, the settlers are advised to band together so that several families may shelter under one roof.

The Canadian Western National Gas, Light, Heat and Power Company, Limited, has absorbed the Calgary Gas Company, supplying coal gas, and the Prairie Fuel Company, supplying natural gas. It is the intention to bring natural gas

from Bow Island, 150 miles southeast of Calgary.

The Civic Light and Power plant of Winnipeg commenced operations on October 16, when the first private users were supplied with current and the streets were lighted for the first time. The rate charged for light was provisionally fixed at 7½ cents per Kilowatt hours.

Announcement has been made of the offer of four prizes for the best studies in the economic field. Contestants are divided into two classes, Class "A" and Class "B". Class "B" includes undergraduates of any American college, and Class "A" any other Americans without restriction. The first prize is \$1,000, and the second prize \$500, for contestants in Class "A", and a first prize of \$300, and a second prize of \$200 for contestants in Class "B". The following topics are proposed for the competition:—Wage theories of American economics; agricultural education; the influences affecting the prices of agricultural products; a lumber policy for the United States; would public interests be subserved by the amendment or repeal of the so-called Sherman anti-trust law; capital building through corporation savings; control of securities of public service corporations; a scientific basis for tariff revision. The competition, however, is not confined to the above topics, but any other subject chosen must first be approved by the Committee. Papers should be sent in before June 1, 1912, to J. Laurence Laughlin, University of Chicago, Chicago, Ill.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions were active during the month, and all the industries, works, trades and factories, shared in the general prosperity. The coal trade was very

active and very little broken time was experienced at the collieries, as the coal in the heaps was filled away in the early part of the month, causing the collieries to supply the full demand of the market. The steel industry was also very active, and large outputs of steel were produced. Construction work on the Sydney plant is fairly well advanced, but much more progress would have been made had the supply of skilled labour for construction purposes been more plentiful. The ex-

cavation work on the foundation of No. 7 furnace is complete, and the concrete finished. Owing to the lack of material, the structural iron work of No. 8 furnace was stopped for two months, but a supply came in during the month and the work of construction was resumed. The ore bins were enlarged, and an extension of the railway made to reach the bins. One of the piers is to be extended 100 feet. The steel plant at Sydney Mines had a very good month, and large outputs were obtained. The Company contemplates large expenditures on machinery for handling the molten metal intended for use as ingots. The new process will care for the metal in its molten state, and save the expense of re-heating. The Nova Scotia Steel Company is developing its coal areas, by opening up a new colliery towards Little Bras d'Or.

The building trades were busy and all outdoor labour was well employed. Railway transportation was fairly heavy, and shipping was brisk. The wholesale and retail trades were in a healthy condition and did a good month's business. During the latter part of the month, the Dominion Coal Company and its employes, members of the Provincial Workmen's Association, renewed their wage agreement for two years, ending December 31, 1913. The rates and conditions of the agreement are precisely those of the agreement made in 1909, which agreement was based on the award of the Shortt Conciliation Board, of March 16. This is the second renewal with the award of that Board as a basis, an increase to the labouring classes being given at the renewal in 1909.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—All crops were a good average, with fruit and potatoes much superior in quality to that of last year. The latter part of the month was favourable to fall plowing.

Fishing.—Fishing in October was less successful than in the earlier months of the season, the first part of the month being very stormy.

CONDITION OF PARTICULAR TRADES.

All the skilled trades as well as unskilled labour were active.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of labour in this district continued brisk in all the leading industries.

The farmers were busy gathering in their crops, and the fall ploughing is now, in most places, well forward.

The shipments from the collieries in this town and district, for September, were about 44,000 tons, a small increase over the corresponding month of 1910.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in all branches were busy. They find a ready market for their farm produce. Good prices prevailed.

Lumbering.—Preparations were being made in this industry for the usual winter's cut. Some of the collieries in this district require a large quantity of pit timber to supply their needs.

Manufacturing.—All the leading manufacturing industries were busy.

Mining.—The mining industry was very brisk. The collieries in the district show an increase in shipments for the year so far, compared with the previous year, and preparations are being made at most of the collieries for a further increase in their output, by installing larger and more modern machinery. The Technical Schools have again taken up the work of winter instruction for mining engineering, mechanical drawing, etc. Their classes are held at all mining centres.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were fully employed with good prospects of continuance as long as the weather

will permit. Iron moulders, iron workers and coremakers, machinists, engineers, electrical workers and linemen were busy. Blacksmiths were actively employed and horseshoers had a fair trade. Activity prevailed in the printing trades and among tailors, boot and shoe workers and leather workers. Barbers reported a fair business. Clerks, stenographers, hotel and restaurant employés, delivery employés, laundry workers, railway employés, cab drivers, teamsters and expressmen were all active. Unskilled labour was in demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:

GENERAL CONDITION OF LABOUR.

The industrial activity which marked September, continued, only to a greater degree, during October. The number of building and repairing permits, with the exception of a \$3,000 and \$1,800 dwellings, and an altering and extension permit for the Merchants Bank of Canada's new premises, were not extensive; but the large contracts on hand caused the increased activity. The chief operations were the work of erecting the new brick Tower Road school, the Union Bank of Canada extension, Mahon Bros.' dry goods building, the latter two also being of stone and brick, besides several of a lesser degree. Excavations were also pushed along for new edifices, one being for a new factory for Moirs' big bread and biscuit works, and the new market building, the contract for which has not as yet been awarded. Along the waterfront increased activity prevailed, with prospects greater for the winter months. The work on the new shed at Pier No. 9, delayed through the non-arrival of the Georgia pine, is now being pushed forward. Pier No. 2 of the Intercolonial Railway work, which was delayed for a few days is also being pushed ahead, and is to be finished by December, 1912. The big apple shipments still form a large portion of our exports. The record of 34,000 barrels shipped on September 17, 1911, has been beaten by a shipment made

on October 7, when the Furness liner *Rappahamock* sailed for London with 34,374 barrels, 273 half-barrels and 246 boxes. The total amount shipped up to the last week in October, was about 450,000 barrels, which is over 100,000 barrels in excess of the entire shipments of 1910. So great is the demand by the growers for barrels, that the manufacturers are having a difficult job to fill all orders, and this may slightly retard the shipments for a few days. The winter course of the Provincial Technical College was opened on October 24. The Mayor of Halifax presided, and the students were addressed by representative educational men and others. Some 400 registered, including 100 in the dress-making class. The branches taught are: book keeping, mathematics, architectural drawing, mechanical drawing, electricity, chemistry, machine design, garment making, direct current machinery, alternating current machinery, chemical analysis, English and arithmetic.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Some late October wholesale prices:—

Beef, forequarter, 5½-7½ cents; hindquarter, 7-10 cents, per lb.
Mutton, 5-7 cents.
Veal, 6-8 cents.
Geese, 16 cents, per lb.
Ducks, 17 cents.
Fowl, 10-12 cents.
Turkeys, 20 cents.
Chickens, 15 cents, per lb.
Pork, 6-7½ cents.
Bacon (roll) 12 cents, per lb.; side, 17 cents, per lb.

Fishing.—Local fishermen made but few catches, few mackerel, cod or other fish being taken.

Manufacturing.—Manufacturing was brisk, more so than in October, 1910. The Nova Scotia Car Works report many orders on hand, among the chief being a supplementary one for freight cars from the Canadian Northern Railway, embracing about 1,000 in number.

Mining.—Mining has been about up to the average.

Other industries were normal.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy. Carpenters and joiners had the best

month for some time. Lathers and plasterers were fair. Painters and decorators had a fair month; the former being more active than during a similar period for some years. Plumbers, stone cutters and builders' labourers were brisker than in September. Electrical workers were fair. Boilermakers, iron ship repairers and blacksmiths were fairly active. Printers, pressmen and bookbinders showed an improvement over September, but there are still a few idle hands. Tailors and garment workers were quiet; factory hands were fair. Bakers and confectioners had an average month. Butchers and meat cutters were fair. Barbers were busy. Furriers showed increasing activity. Hotel and restaurant employes were not as active as in September. Railroad men were busier than in September. Street railway men were busy. Longshoremen were fairly well employed, as were unskilled labourers.

DISTRICT NOTES.

Liverpool.—A fine fishing schooner was launched here on October 20, to be placed on the bank fishing.

Lunenburg.—The catch of the fishing fleet of Lunenburg for 1911, was the biggest in our history. There were 122 vessels engaged, and the catch totalled 216,450 quintals against 209,205 last year.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of October was an exceptionally busy one in this industrial centre. The Canada Car Company was employed during all the month adding large extensions to their plant. Land was purchased in the early part of the month for the purpose of adding to their passenger shed and work on the foundation has now been begun. The new buildings when completed will give the Canada Car Company twice the floor capacity for passenger work that it has at the present time, and the Company expects

to double the output of this department. A number of other new shops have also been under construction, and orders have been received that are a guarantee of steady work in this large industry during the winter months.

The other industries in town are all working steadily with a full complement of hands employed. In Springhill, for two years the scene of a regrettable strike, the mines are now working to full capacity. The payroll will now total about sixteen hundred men, and the wages paid during the month of October will probably total nearly \$80,000. At Chignecto, Joggin Mines and Kimberley Mines work has been steady, and these mines have maintained about a normal output. In the town of Amherst the railway department are paving the street leading to the station, which is the property of the Government, and men have been so scarce that the contractors were obliged to bring a number of Italians from Montreal and Ottawa, to complete the work this season. Taken on the whole, labour conditions in the county, considering the season of the year, were never better than at present. Building operations on an extensive scale are still being carried on and every indication points to a prosperous and busy winter.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops have now all practically been harvested and in this section, farmers report them to be very satisfactory with good prices for all produce of the farm. Large shipments of potatoes are being made to the West Indies and there is a market in the town of Amherst for nearly everything that this immediate vicinity produces.

Fishing.—There is little or no fishing being carried on at this season of the year.

Lumbering.—The lumber season, so far as shipping goes, has practically closed and many of our lumbermen are carrying over a large quantity until next year owing to the fact that prices during the latter part of the summer were rather low and freights exceedingly high. The lumber cut this winter will

probably be materially reduced as compared with last year except in districts which were swept by disastrous forest fires during the past summer, and which the lumbermen will operate extensively this year to save the lumber from total destruction.

Manufacturing.—Manufacturing is exceedingly brisk in all the different workshops of our town. Every industry is working with its full complement of men, and in many instances additional men are required.

Mines.—In the town of Springhill, during the past month, probably 200 men were added to the working staff in the mines, and the output of the Company increased from 800 to nearly 1,200 tons of coal per day. The Strathcona and the Eastern Mines, which ceased operating some time ago, were sold for comparatively small sums of money during the month to new companies. These mines never were factors in the production of coal in this country but it is to be hoped that the men who now control them, will soon put them on a good working basis.

CONDITION OF PARTICULAR TRADES

Bricklayers and masons were well employed. Carpenters and joiners were very active. Lathers and plasterers, plumbers gas and steam fitters were busy. Stone cutters and builders' labourers were well employed. Iron moulders were all busy. Iron workers and helpers were well employed. Coremakers were active. Machinists and engineers had steady work. Electrical workers and linemen were very busy. Boiler makers and horse shoers were busy. Wood workers were all well employed. Carriage and wagon makers very busy. Car builders working full time. Pattern makers were busy. Printers were exceptionally busy, and pressmen were well employed. Journeymen tailors and garment makers were busy, and boot and shoe makers were well employed. Bakers and confectioners were very busy. Butchers and meat cutters were well employed. Trunk and bag makers were very active. Barbers were well employed. Clerks and sten-

ographers were active. There was a great demand for unskilled labour, but the probabilities are that this demand will lessen during the coming month with the approach of cold weather.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during the month of October, was practically the same as that of September, the supply being a little greater than the demand. Good progress was made on the construction of the new Zion Church, the corner stone of which was laid, the Tracadie breakwater, and other public works, and the Royal Bank was completed. The weather during the greater part of the month was very favourable for outdoor work. Wholesale and retail merchants report business conditions satisfactory, the volume of trade being fully equal to that of last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of the month found the potato crop all dug and shipping started with a good demand for produce.

Fishing.—Oyster fishing was prosecuted vigorously during the month. The weather was very favourable.

Manufacturing.—The few factories were carried on under normal conditions, the supply of labour being equal to the demand.

Railroad construction and employment.—A number of new stations were constructed during the month and conditions in other departments were normal.

CONDITIONS OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, builders' labourers, lathers, plasterers, painters, paper hangers, plumbers, gas and steam fitters, stone cutters and decorators were busy. Iron moulders, iron workers and helpers, machinists and engineers,

line men and sheet metal workers were active. Wood workers, upholsterers, carriage and wagon makers and car builders were active. Printers, pressmen and bookbinders, journeymen tailors, garment workers and boot and shoe workers, bakers, confectioners and tobacco workers, tanners, curriers and saddlers, railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainment switchmen, trackmen, freight handlers, steamboatmen, steamboat firemen, longshoremen, teamsters and expressmen were active. Barbers, clerks and stenographers were busy. There was a fair demand for unskilled labour in its various branches.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

In volume of work performed and in state of activity the labour market in October was fully on par with September. Weather conditions particularly during the latter half of the month were admirable for the prosecution of all outdoor enterprises, and advantage was in all instances taken by contractors to forward their work. Building operations still go on briskly, the foundations of several new cottages being laid, while many others are in the various stages of completion. The new brick fire station on High street is roofed in and the new ell to the Intercolonial Railway's general offices are ready for roofing. Upon the latter about seventy bricklayers, stone masons, labourers, etc., are employed. The Maintenance-of-Ways department of the Intercolonial Railway is constructing a subway under the Main street north crossing, and also placing a steel overhead bridge on St. George street. The excavation for the subway is completed and the retaining wall well advanced. The superstructure of the bridge has been placed upon the abutments and the approaches are being made. About seventy-five men are employed upon these two jobs. Four electric street cars for the Moncton

Tramways Company have arrived, and the rails have been laid and spiked along John street, High street and Main street as far as the general offices. The car barns and terminus works are well advanced. The laying of the main pipe line from the Coverdale Gas wells to the City is well advanced. The pipe will be carried across the Petitcodia River, upon the abutments of the roadway bridge and the necessary work for its reception is about finished. About thirty-five men are now employed upon the permanent sidewalks and the contracts are nearly completed. The excavations for the water extension service and the laying of the main pipe is progressing rapidly, over 100 men being employed.

The Maritime Hat and Cap Company have removed their plant from Truro and installed it in the old Lock factory building, and will shortly be ready for operation. The Company has been granted fifteen years free water and a fixed tax valuation of \$1,000. The Maritime Press Association held their annual meeting in Moncton on October 10 and 11, which was well attended. The New Brunswick Union of Municipalities was also held at Newcastle, on October 11-13. Wholesale and retail trade has been good. Customs returns for the Port of Moncton for September, showed a substantial increase over the corresponding month of 1910, the collections for 1911 being \$8,648, against \$5,590 in September, 1910. Hours of labour remain unchanged, and no increase or decrease in rates of wages was noted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had a very active month, being engaged in the harvesting of potatoes and other root crops and in fall ploughing. Weather conditions were very favourable, and the housing of the vegetables is about completed. Large shipments of potatoes were made, the prices in some instances reaching \$1.60 per barrel. All root crops were up to the average. Dairy products are still quoted high, and a number of cheese factories have decided to continue the cheese making into November instead of closing October 31 as heretofore.

Cheese was quoted at 14½ cents wholesale at the factories. Very little butter is packed, the output of farms and factories both being nearly always put up in 1-lb. prints. Country butter retails at 25 cents and factory prints at 28 cents. Eggs retailed at 25 cents per dozen; chicken, 16 to 18 cents per pound, and pork, 9 cents per carcass. Farm help still continued scarce, and farmers were much handicapped in the output of their farms by the difficulty of getting help, and by the high price requiring to be paid to experienced helpers.

Railroad construction and employment.—Railroad employment is now limited to the ordinary track work preparatory to winter. The Grand Trunk Pacific Railway Company's terminal yards here are well under way, and the excavating and filling will be completed in about four weeks. Three steam shovels and about 100 men are employed.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and carpenters were active and in fair demand. Painters and decorators were quieter. Plumbers were busy, stone cutters steady and builders' labourers active with considerable demand. Steady and fairly active conditions prevailed in the various branches of the metal, engineering and ship-building trades in operation in this locality. Woodworkers as represented in our various woodworking factories all reported active conditions. Upholsterers in the Intercolonial Railway service have had a very active month, also the varnishers and polishers in that service. Car builders and coopers were active. Printers, pressmen and bookbinders all reported active conditions throughout the month. Journeymen tailors reported activity increasing towards the end of the month. Garment workers were busy also milliners and a good demand for milliners' apprentices. Bakers and butchers were busy. Leather workers and saddlers report steady conditions. Barbers are active, clerks and stenographers steady but limited in demand. Hotel, restaurant and theatre employes were busy and laundry workers active. Rail-

way operating crews have been in good demand, owing to special work required in the movement of freight, the volume of which still continues heavy. On October 29, the winter time tables come into effect upon the Intercolonial Railway and among passengers trains discontinued will be the Ocean Limited (Nos. 199 and 200) between Montreal and Halifax, and numbers 3 and 4 between St. John and Point du Chene. This change will relieve a number of operating crews and also lay off a number of express messengers. Trackmen and freight handlers were active, teamsters and carters busy. The demand for unskilled labour continues good with wages ranging from \$1.60 to \$2.00 per day.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market continued active during October, all branches being busy. Work is rapidly progressing on the new armoury, the new car barn for the street railway, and several other new buildings. The customs receipts for the month of September were \$113,832.38, an increase of \$6,937.27 over the corresponding period last year. The Inland Revenue receipts for September amounted to \$24,555.13, an increase of \$6,140.31 over the same period last year. Deposits in the Savings Bank for September were \$48,569.12; withdrawals, \$62,358.54. Bank clearings for the five weeks ending October 26 were \$7,374,579, and for the corresponding period last year, \$7,573,029, being \$197,450 less in 1911 than in 1910. The city cashier paid out in wages to workmen for the four weeks ending October 27, the sum of \$16,899.52, and for the four weeks ending October 20, paid out in salaries to civic officials \$10,665.86, making a total of \$275,65.38.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The fishermen have been doing a good business in sardines. From August 2 to August 7 there were shipped

from Lepreau sardine herring valued at \$6,348, and in nine days there were shipped from Musquash to Lubec and Eastport 455 hogshead, of sardine herring, valued at \$2,730.

CONDITION OF PARTICULAR TRADES.

Bricklayers were very busy. Carpenters and joiners, painters and decorators, plumbers, gas and steam fitters, stone cutters and builders' labourers were all busy. All branches of the metal trades, woodworkers, shingle weavers, printers, pressmen, bookbinders, tailors, bakers and confectioners, cigarmakers, broom and brush makers were actively employed. Railway employés, steamboat men and firemen, teamsters and expressmen were busy, but ship labourers had a dull month. Activity prevailed among unskilled labourers.

DISTRICT NOTES.

Sackville.—Work in connection with the water system is pretty well completed for the season, and men are now putting in a 2,000 feet stretch of sewer. The new wharf will not be completed this season. The main body of the structure, 300 feet long, is well advanced. Operations will commence at once on the concrete sidewalks by the Sackville Concrete Company.

St. Stephen.—The Town Council has offered exemption from taxation for ten years to the Buffalo Fertilizer Company, which proposes to build a wharf and warehouse here and make this point a distributing centre for their eastern trade. They expect to invest in their buildings and plant about \$25,000, and to employ from twenty to sixty men.

Tobique River.—Gendall's mill, together with a quantity of lumber, was entirely destroyed and a potato house damaged by fire October 22. The machinery in the mill was destroyed. The loss is estimated at upwards of \$7,500, being partly covered by insurance.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market was unusually quiet, the principal reason probably being the stagnation in the lumber industry. Every mill on the river is about buried with sawn lumber. Some of the lumbermen have not sold any or very little of their summer sawing, consequently there will not be much more than fifty per cent of logs cut this winter. As this is the largest industry of the locality, all classes will feel it very much, but it may have the good effect of driving people to work more on their farms. This is a good farming country, and has one of the best markets in the Dominion, there being always a demand for everything a farmer can grow. Hay is selling from \$12 to \$14 per ton. Oats, 50 cents per bushel; potatoes \$1 to \$1.10 per barrel of 180 lbs. Turnips, carrots and beets are also in good demand. Beef is selling at from 10 to 12 cents per lb. Chickens are bringing 18 cents per pound. Butter is selling at 25 to 30 cents per pound, and eggs are 25 cents per dozen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers have now all their crops housed for the season, and most of the fall ploughing is done. The crops were on the whole fairly good. The oat crop was very good, but it ripened rather early. The potato crop was good, some farmers having as much as thirty-five barrels to one planted. The turnip crop was hardly as good.

Fishing.—There was a large catch of oysters this year. They are bringing from \$3.50 to \$4.50 per barrel. There will not be any bass or smelts until the river begins to close.

Lumbering.—Lumbering will be much lighter this winter than it has been for some years, on account of heavy stocks on hand; consequently wages will not be as high as last winter.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet, only two new houses having been built

this year, and they are nearing completion. Carpenters were busy preparing for the winter. Plumbers were also busy. There was very little activity in the carriage shops, not even much repair work being done.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:—

GENERAL CONDITION OF LABOUR.

During October the demand for labour was well maintained, and the month compared well with the previous month. Building operations were actively carried on, but there was a stoppage of outside work for a few days on account of rain in the latter half of the month. Activity in the coasting trade was very pronounced, and although the tourist season was virtually over the hotels were well filled. The free night schools for the working classes (male and female) were opened for the winter months on October 9.

Amongst the different buildings making rapid progress may be mentioned the Quebec Railway Light Heat and Power Company's new offices in St. Roch's; the custom house, Lower Town; new wing (library) Parliament buildings, branch of Quebec Bank and new Roman Catholic schoolhouse, Montcalm ward. A large number of the labourers, "sand hogs", brought here in the early part of the season to work at the Quebec bridge, returned to New York during the latter part of the month. The paving on different streets of the city, which has been in progress since June last, is now very near completion. The National Telephone Company's Automatic service is still laying conduits for their wires in a number of streets of the City.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were actively engaged in ploughing with very favourable weather conditions.

Lumbering.—Gangs of men left for the winter camps. The wages offered are about the same as last year.

Railway construction.—The work on the Quebec and Saguenay Railway between St. Joachim and Murray Bay, was being rapidly pushed forward.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were actively employed; bricklayers, masons, carpenters and joiners being very busy. In the metal trades, all branches were busy except boilermakers and iron ship-builders who were quiet. Dull conditions prevailed among shipwrights. All branches of the clothing trades were busy, with the exception of boot and shoe workers who were very quiet. Quiet conditions also prevailed among the trades connected with food and tobacco preparation and leather. Hotel, restaurant, theatre and laundry employés were actively engaged. Railway employés of all classes were busy, as well as teamsters and expressmen, but steamboat employés, ship-labourers and longshoremen were quiet. The supply of unskilled labour was equal to the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour during October was well employed. This applies to all inside and outdoor work, the weather being most favourable for the carrying on of the latter. Work is being rushed on the large extension to the St. Charles College building. An effort is being made to have the construction in such shape that the interior work may be proceeded with during the winter months. The Canadian Rand Company have also a large extension to the foundry and drill shop under way. When completed the foundry will be the largest in the Province, outside of Montreal. This Company is very busy; in fact more so than for some years past. The Company has been advertising for extra men. The erection of the new monastery is also giving employment to all branches

of the building trade. The different machine shops located here are very busy, and large orders are in hand for future work.

The Sherbrooke Power and Railway Company had a good quarter which closed in August. There was a net gain in earnings of \$9,572.49 over the same period of the previous year. The Company has practically finished all extension work for this season. At a meeting of the *Chambre de Commerce*, it was decided to support the Canadian Manufacturers' Association in their efforts to have the tax on commercial corporations removed. The British and Canadian Explosive Company have decided to erect a branch of their old country plant near Sherbrooke, and have selected a site. The company will employ fifty hands to start with.

Wholesale and retail trades were good during the month. There was no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The good weather has enabled the farmers to do considerably more outdoor work than is usually the case. The last of the crops have been gathered. The threshing is now about over, and a good crop of grain is reported.

Lumbering.—Active preparations are under way for the lumbering season. In certain sections men are being advertised for, and wages are offered ranging from \$30 to \$35 per month.

Mining.—The mining industry was busy.

Railway construction and employment.—Railway employes were well employed.

Other industries.—All other industries were busy. Preparations are being made to remove the machinery in the carpet factory to Paris, Ont., where the Company has erected a new factory building, having secured a bonus from that municipality.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were busy during October, with no stoppage through weather conditions. Iron moulders, iron workers, machinists, electrical workers and linemen were busy.

Jewellery workers had an active month. The woodworking trades were busy keeping up with the work of construction now going on of both public and private buildings. Carriage workers were busy, as were also pattern makers. The printing trades had a busy month. Journeymen tailors and garment workers were busy. Bakers and confectioners, butchers and cigarmakers were actively employed. Miscellaneous trades were busy. All branches of transportation had an active month. Unskilled labour was in demand.

DISTRICT NOTES.

Farnham.—The Pickering Patent Wheel Company, of Canada, are about to commence business in Farnham. They make all kinds of wheels.

On October 10, the ratepayers of Farnham voted the property on which the old sugar factory stands to the Company. The Company agrees to pay \$40,000 in wages for five years. This new industry will employ quite a number of hands.

Scotstown.—A large gang of men are now working at the waterworks.

Beebe.—The Granite Company has started work on the new work sheds to replace those recently destroyed by fire.

Sutton.—Garland's handle factory opened up work on October —, after standing idle several weeks.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of October was a busy one in labour circles, all classes being fully employed, with a demand for help in nearly all branches. Good progress was made on the new buildings, especially on those of the the Wayagamack Pulp & Paper Company. Wholesale and retail dealers had a busy month. There was a demand for female operatives, principally in connection with the manufacture of white wear. Rates of wages and hours of labour remained unchanged.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy, with the marketing of produce, threshing and fall ploughing.

Lumbering.—Lumbering was very active and the season just opening promises to be even more active.

Manufacturing.—All manufacturing establishments were active.

Railroad construction and employment.—Railroad construction and employment compared favourably with the preceding month.

CONDITION OF PARTICULAR TRADES.

The building trades were very active. Iron moulders, machinists and all workmen employed in machine shops were busy. Electrical workers, blacksmiths, sheet metal workers, bicycle repairers and jewellery workers were active. Wood workers, carriage and wagon makers, printers, pressmen and bookbinders were busy. Journeymen tailors, garment workers, glove makers and boot and shoe workers reported a good month. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers, had a busy month. There was not much change in the leather trades: tanners and curriers having a quiet month, and the leather workers a busy one. Miscellaneous trades were busy. All employés of the transportation companies had a busy month. Ship labourers had to be procured by the hundred from neighbouring cities as there could not be found enough here. The demand for unskilled labour was greater than the supply.

DISTRICT NOTES.

The Cap de la Madeleine is continuing to grow wonderfully since the construction of the new pulp and paper mill, but Shawinigan Falls showed a change for the worse during October.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during the month was good. The building trades had a fairly active month, weather conditions being favourable. Sash and door factories had a good month, with enough orders on hand to keep their staffs working full time. The boot and shoe industry was quiet, though there was some improvement as compared with the preceding month. The leather industry was very active, production being considerably increased. All other local industries were well employed, and in some they were working overtime to fill orders. City work lasted longer than usual, on account of exceptional weather conditions during the month, and a number of men are still employed. The same favourable business conditions as were noted last month still prevailed. Wholesale dry goods merchants were busy filling and sorting orders, and the retail trade was equally busy. In the grocery trade conditions were very good, but a considerable increase in the price of dairy products was noted. Banks reported a good month with easy collections. There was no change in the rates of wages or hours of labour, and relations between employers and employés were cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The general condition of agriculture was excellent, and on account of the fine weather, farmers were able to market their products, which were easily sold at good prices. Fruits, such as apples and grapes, were of good quality and in active demand. Work on the farm was active. Farm hands were well employed at fair wages, but demand did not exceed supply.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators, plumbers and gas and steam fitters had an active month. Stone cutters were quiet. Builders' labourers were fairly active. Iron moulders, iron workers and helpers, machinists,

engineers, electrical workers and linemen, blacksmiths, boilermakers, tinsmiths and horseshoers were active. Woodworkers, upholsterers, varnishers and polishers, wood engravers, carriage and wagon makers and pattern makers had a good month. Printers, pressmen and bookbinders were very active. Journeymen tailors, garment workers, hatters and boot and shoe workers had a fair month. Bakers and confectioners, butchers and meat cutters, ice cutters and handlers were active. Tanners and curriers, leather workers and saddlers were very active. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés and laundry workers were very well employed. Railway conductors, engineers, firemen and telegraph operators, trainmen, switchmen, maintenance-of-way men, freight handlers, cab drivers, hackmen, carters and draymen, teamsters and expressmen had a very active month. Unskilled labour was very well employed.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of labour continued active, and the prospects are that it will remain so till late in the winter. Two new firms have started the building of factories, to be completed as early as possible. The Cluett-Peabody Company commenced operations about the middle of the month, employing over 300 hands. Sash and door factories are rushed with orders, building operations being quite active. All other manufacturing establishments were also active. Navigation was very active, largely on account of the export trade in hay. Wholesale and retail business was good. Banks reported a very active month. There was no change in the rates of wages or hours of labour, and no unrest in labour circles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy finishing their work before the heavy frosts

set in. Ploughing was well advanced. Prices remained firm, but farm products were fairly abundant and of a good quality.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators, plumbers and steamfitters, stone cutters and builders' labourers were very active. Iron moulders, iron workers and helpers, coremakers, machinists, engineers, mechanical engineers, electrical workers, linemen, metal polishers and brass workers had a busy month. Shipbuilders and caulkers were dull. Tinsmiths, tool sharpeners, horseshoers and jewellers were active. Woodworkers, upholsterers, varnishers and polishers, wood engravers, carriage and wagon makers, pattern makers and coopers reported a busy month. The printing, clothing, food and tobacco preparation, leather, miscellaneous and transportation trades were well employed. Unskilled labour was very active.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour in all branches of industry has been very active during the month. Pontbriand & Company employing over 100 men, had to work day and night in order to fill their orders. All the other factories were also busy and many new hands had to be hired. Two new factories have been established here, one a cast steel foundry employing over 200 men, and the other a machine shop. The building operations commenced last spring are about completed, and a large building, to be used for a few years as a church, has been started, giving employment to a large number of workmen. Navigation was very active, several steamers having come into port to load and unload freight. The price of coal and wood has remained the same. Dry goods merchants had large orders for the fall trade.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The meat, vegetable and fruit market was well supplied, but prices have increased, especially for dairy products. Butter now sells for 28-30 cents instead of 25; fresh eggs, 30 cents instead of 25. Potatoes sell for 90 cents per bushel. Common apples sell from for \$3 to \$4 a barrel, and winter apples from \$5 to \$7.

CONDITION OF PARTICULAR TRADES.

The building trades have been active. Tinsmiths, painters, roofers and plumbers had a good month, and the prospects for the remainder of the season are splendid.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

October was as favourable to the labouring class as September, and more so than the corresponding month of 1910. All industries were active and every man in the building trades easily found work. A scarcity of brick is feared, however; the price has increased from two to four dollars per thousand, and the price of sand from twenty to twenty-five per cent. Common labourers have become so scarce that the city has been delayed in its work. Several industrial establishments have increased their staffs to be able to fill the fall orders. Unless there is a shortage of brick, work will be continued throughout the winter on several large contracts, employing several hundred men.

CONDITION OF LOCAL INDUSTRIES.

Bricklayers were in demand and masons active. Carpenters and joiners were active. Lathers and plasterers were in demand, painters very active, decorators good, plumbers and gas and steam fitters in demand. Stone cutters were good and builders' labourers in demand. Iron

moulders, iron workers and helpers were active. Coremakers, machinists, and engineers had a good month. Electrical workers were in demand and linemen active. Stone mounters were in demand. Blacksmiths and tinsmiths were in demand. Boilermakers were good, horse-shoers very active and jewellers well employed. Varnishers and polishers, and carriage and wagon makers were in demand, the other woodworking and other trades being active. The printing trades were busy. Journeymen tailors and garment workers had a good month. Bakers were in demand; confectioners, butchers, meat cutters, cigar makers and tobacco workers were active, and ice handlers quiet. The leather trades were generally busy. Barbers were in demand, the other miscellaneous trades being active. Cab drivers, carters and draymen were in demand. The other transportation trades were very busy, and unskilled labour was active.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The official report on building operations during September showed the following figures:—

1911—346 permits valued at.....	\$1,157,876
1910—444 permits valued at.....	993,386

or an increase of \$164,490 over 1910. From January 1, to September 30, the result was as follows:—

Permits.	Year.	Value.
2,950	1911	\$11,419,210
2,625	1910	13,043,392
Decrease for 1911.....		\$1,624,182

The above decrease is explained by the fact that last year the Canadian Pacific Railway Company alone, took out permits valued at \$3,000,000. The report of the Customs Department, for September shows an increase of \$93,280.92 over September, 1910, the respective figures being \$1,622,632 and \$1,715,911. The revenue of the Montreal Post Office for September was \$106,201.23, or an increase of \$11,196.18 over September of last year.

The city has received from the Street Railway Company \$335,007.87, being the amount due by the Company on its gross earnings inside the city limits. The above contribution was for the year ending September 30 last, and was \$58,359.34 more than the amount received last year.

All the various industries were busy, as well as all the skilled trades and unskilled labour, with the exception of ice cutters and handlers, were active.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

A scarcity of work in the large mills, at Chaudière Falls, was the feature of the labour market, in Hull, during October. Mills had to shut down at night, at Eddy's. Two plants of the J. R. Booth's mills have been shut down, and operations by day, had in certain cases, to be curtailed. The scarcity of work was caused by the low water in the Ottawa river.

A number of men, not as many as last year, have left for the shanties, where they will stay all winter and return again in the spring. During the slack season, repairs will be made in all the departments of the works at Eddy's, Booth's and Gilmour & Hughson's mills, and some new machinery is to be installed in view of a better season next year.

CONDITION OF LOCAL INDUSTRIES.

High wages still prevail for the common labourers, owing to the large demand for railway construction in the West. A number of men left for the Western provinces, where they secured permanent employment on the farms, and in the mills.

In Hull proper, every factory is still running full time. The Canada Mica Manufacturing Company, on Brewery street, is employing a large number of girls, both in their shop and at home, picking mica. They claim to have 484 persons on their pay list.

Messrs. Morisset & Morisset, Real Estate Agents from Ottawa, have bought over 100 acres of land, on Chelsea road, just outside the toll gate which they divided into building lots. They are now employing forty men laying cement sidewalks along the streets, outlined by an engineer. One dollar and sixty-five cents per day is paid those labourers.

CONDITION OF PARTICULAR TRADES.

Corporation work is still progressing, and the sum of \$100,000, will be spent before the winter sets in. About 150 men are employed on these jobs, mostly excavating. The men work either nine or ten hours, at pleasure, as they are paid by the hour.

Navigation is also effected by low water, and will probably close earlier than last year. The season was as busy and as profitable as last year.

Hull building contractors have lots to do specially in Wrightville, where a number of lot purchasers are rushing to get into their property before winter.

As to the saw mills, the same conditions as at Chaudières Falls prevail at Lake Deschênes, Aylmer and Buckingham.

The farmers are satisfied to see the prices of their produces going up.

OTTAWA, ONT., AND DISTRICT.¹

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Although autumn conditions necessitated a slackening of work, to some extent, in farm, lumbering and building industries, labour was well employed during October. Help released from farms or saw mills was eagerly sought for shanty and railway employment. A considerable number of labourers were thrown out of work as a result of lumber and pulp mills closing, due to low water in the Ottawa river, but these also were engaged for lumbering in the woods.

¹In the September issue it was stated that plasterers had obtained a new scale of 28c per hour; this should have read 30c per hour.

The force of civic labourers was maintained at about 900, and corporation work was never brisker at this time of year. There was a slight cessation of building activity, except on large structures, but most of the building trades were employed fully. September building permits were reported at a value of \$277,275, an increase of \$116,325 over the corresponding month last year. One of the October permits calls for a pulp mill to be erected at the Chaudière, costing \$30,000 on which work is in progress.

The assessment of Ottawa, on which 1912 taxes will be levied, was \$76,262,809, an increase of nearly \$13,000,000 over last year. About ninety per cent. of the increase was on realty. The population was computed by the assessors at 90,520, showing the year's gain to be 4,414.

Wholesale and retail trade reflected an excellent state of business. Paper dealers report a big increase in Canadian orders. Clothing manufacturers were very busy. Much money was put in circulation among farmers for cattle which were taken away at the end of the pasture season. September bank clearings were reported at \$16,251,000 compared with \$16,616,850 for the previous September. The clearings for the first three weeks of October were \$13,884,568 compared with \$12,136,782 during the corresponding time in 1910.

An increase in wages went into effect in the Ottawa central exchange of the Bell Telephone Company, affecting 197 girls. The operators were placed on a weekly wage, ranging from \$5 to \$8.50, the former rate being \$17.50 to \$30 per month. Several additional hands were employed in order to carry out another reform of the Company, which requires every employé to take a day off each week, so that Sunday work will be no longer carried out by operators working overtime.

The Ottawa Separate School Board advanced the salary of ninety-five nun teachers \$25, \$50 and \$75 per year, making the scale \$275 to \$425 per year, the change becoming effective January 1, 1912. Lay teachers are already paid more than this.

The City Electric Commission recommended an increase of ten per cent. in the wages of thirty-five outside employés, but the matter has yet to be considered by the City Council.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The local crop of potatoes and apples was light. Farmers quote \$1.25 to \$1.40 for potatoes, retail. A big sale of fowl marked the Thanksgiving market in Ottawa, turkeys at 20-23 cents per pound, and geese at 15-18 cents. The supply was normal. Very high prices were received for the product of local cheese factories, and butter advanced accordingly. Scarcity of water interfered with late pasturing of cattle.

Lumbering.—The output of J. R. Booth's saw mill was much reduced on account of low water during October. Owing to shortage of logs, lumber sawing was stopped at Braeside mills, early in October. Lumber firms shipped away big gangs for shanty operations. Sash and door factories were very busy. Steady prices were maintained for lumber.

Railway construction.—The Canadian Pacific Railway Company will make application to the Railway Commission for approval of plans for a tunnel through the city, a mile long, connecting the Union Depot with the proposed Canadian Pacific Railway entrance near the City Post Office.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons are well employed for the late season. Several stone cutters left the city owing to brisker demand prevailing elsewhere. Normal conditions existed in the plasterers' trade, and none are idle. Plasterers' labourers are reported all employed. The employment of painters is considered good for autumn. Carpenters, electrical workers and linemen were busy. Wiring of the new Grand Trunk Railway hotel will give employment to a large number of electricians until spring. The metal and engineering trades were fairly well employed. The

vice-president of the machinists' union states that in three establishments in the city, the wages are 45, 33 and 32½ cents an hour, respectively, and the general average elsewhere, 27½ cents an hour. Car builders were well employed.

Printing shops were well supplied with orders. Tailors were busy. Meat dealers had some extra labour handling stocks owing to the ice supply running out. Employment was brisk for express drivers and clerks in the retail trade. Furriers were busy. Freight handlers and teamsters had a month of heavy business.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There were not any marked changes in the labour market, during the month of October, in Kingston. Activity continued to characterize every department. The opportunities for employment were quite as good as during the previous month, and superior to those of the corresponding period last year. Weather conditions were favourable to the building trades, and other out-door work.

On October 26, work was commenced on the addition to the Kingston Post Office; work that has been contemplated for many years, thus becomes a reality. The corner stone for the Nicol Metallurgy building was also laid during the month, and the new Gordon Hall formally opened at Queen's University. During the month, Kingston received the offer of the establishment of a tack factory to employ 200 hands. The matter is under consideration. Arrangements have been completed for a new Salvation Army Barracks. The deeds and plans are completed. Work on the new public school is being rushed along, also the new lead smelter, and other private and public works. The Canadian Locomotive Works Company is trying to secure more land for an extension of the works. The Company has a large number of orders ahead. Five locomotives per

month, are now being turned out.

On Thursday, November 16, the qualified rate-payers will vote upon a by-law to guarantee bonds to the amount of \$100,000 for the erection of a new hotel. The Board of Trade will also raise \$50,000 stock among citizens to this end. A wealthy company is promoting the new hotel scheme. The saweyors of the Kingston and Ottawa Electric railway were working in this district. Other lines were also very active.

During the quarter ending September 30, the declared value of exports from Kingston to the United States was, \$119,773.91, an increase of \$16,707.22, over the same quarter of 1910, and the largest quarterly value of exports in the history of the Kingston consulate. The following passes were issued at the local Canal Office during September: Grain, 1,915,203 bushels; flour, 100 tons; merchandise, 59 tons; coal, 4,041 tons.

The assessment statement just issued by the Tax Collector show a gain, of \$300,000 in the total value of Kingston property.

The Kingston school teachers are seeking an increase in salaries, and ask that the following plan be adopted: That all teachers, regardless of the minimum salary at which they started, be paid on a basis now offered to new teachers.

For second year city experience, \$425; third year, \$450; fourth year, \$475; fifth year, \$500.

That the maximum salary be increased to \$750, and that the members of the staff who have reached the maximum under the present schedule, receive the new maximum after January 1, 1912.

There were not any strikes, lockouts, or changes in the rates of wages or hours of labour reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Farmers, fishermen, lumbermen, manufacturers, miners, railroad workers and other industries reported an active month.

CONDITION OF PARTICULAR TRADES.

All branches of the building, metal, engineering, shipbuilding, woodworking,

and furnishing trades, together with printers, tailors, bakers, butchers, ice cutters, cigar makers, tanners and curriers, barbers, broom makers, clerks, delivery employés, furriers, hotel, restaurant, theatre, laundry workers and all branches of the transport business, as well as unskilled labour reported an active month.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

While there has been no unusual activity in any department, during the month, the situation was steady. There was a noticeable demand for unskilled labour, good wages being offered. The building trades continued active, favoured by mild and fine weather. The Board of Education are making arrangements to build two new schools, at a cost of \$85,000, and the City Council is considering the building of a new city hall. The new power dam, at Auburn, is well on its way to completion; it is expected to be in running order before the end of the year. It will supply power for the Auburn Woollen Mills and the Peterborough Light and Power Company. The Geo. Matthews Company is in a big packing merger, and the new company announces that it is its intention to extend its plants, and to enlarge both its domestic and export business. Business, both wholesale and retail, has been very active. There were no changes in the rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very busy, and fall ploughing was well advanced, the weather having been generally favourable. Milk dealers have advanced the price of milk, beginning with November 1, owing to the increased price of feed. The retail price will be 7 cents per quart, for loose milk, and 8 cents for bottled milk.

Lumbering.—Large gangs of men are leaving for the lumber camps. There are about 700 men in the wood, north of here, and the demand for more is keen. The wages this winter, are from \$26 to \$32 per month.

Manufacturing.—Manufacturers were generally active during the month.

Railroad construction.—The Canadian Pacific Railway Company has the entire steel laid on its new line from Coldwater to the Toronto-Ottawa line at Bethany. It will take two months or more to complete the ballasting of this new line.

CONDITION OF PARTICULAR TRADES.

The building trades were all busy. Iron moulders were busy up to the latter part of the month. Machinists, engineers and electric workers were active. Linemen were in demand. Metal polishers and brassworkers were busy. The wood-working trades were well employed. Printing and allied trades had an active month. Journeymen tailors and garment workers were busy. Bakers and confectioners were active. Butchers and meat cutters had plenty of work. Leather workers were fairly well employed. Carpet weavers reported trade quiet. Railway and street railway employés were active. Teamsters, express men, steamboat men and freight handlers had active employment. Unskilled labour was in active demand at good wages.

DISTRICT NOTES.

Lindsay.—The National Concrete Manufacturing Company is erecting a modern plant. The building will be of concrete. The Company's premises will cover about two and a half acres of ground.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Activity continued to prevail during the month in nearly all branches of industry. Skilled labour was well em-

ployed and owing to the continuance of fine open weather, and the large number of construction works on hand, unskilled labourers found work much more plentiful than is usual at this season. During September, permits were issued for 805 buildings, representing a total approximate value of \$1,904,810, as against 626 buildings, representing a value of \$1,-332, 535, for September 1910. For the nine months, ending with September, permits were issued for 5,752 buildings, of the value of \$18,508,655, as against 4,744 buildings, representing a value of \$14,819,508, for the corresponding nine months of 1910. Contracts have been let for excavation and concrete work on the new Knox College building, work on which will be continued through the winter. The new high level bridge, over the Don, on Queen street, was completed sufficiently to be thrown open for traffic on October 8.

The City Engineer's annual report shows an expenditure during the last year of \$4,496,429 by the Civic Works Department, including \$1,060,450 for water works; \$2,160,007, for general and special work; \$76,606 for street railway track allowance pavements; \$1,-186,160 for local improvements, and \$13,-203 for island works. This expenditure was the heaviest in Toronto's history, owing to the rapid growth of the city and recent accessions of new territory, increasing the area to twenty-eight square miles. The water works system has cost a total of \$10,000,000 to date, and the sand filtration plant in course of construction, on the Island, will cost \$750,000 more. The Technical School has opened with nearly 2,000 pupils, extra space having been provided by temporary buildings. A large number of applicants were unable to obtain admission, owing to the crowded condition of the school.

The total receipts of the Toronto Railway Company for September were \$465,-298, of which the share of the city was \$37,223, as compared with \$428,924, of which the city received \$34,313, for September last year. The city Council has definitely decided to accept the gift of 105 acres in the Humber Valley, as a park, offered by Home Smith, on condition of

the city constructing a boulevard along the bank of the river, Mr. Smith having agreed to some modification of the details. Legislation will be asked for power to annex the territory to the City. The city undertakes to spend at least \$25,000 per year on the boulevard, which will run from Queen street to Dundas street, and will probably cost several hundred thousand dollars. Chief Justice Sir William Meredith having been appointed by the Ontario Government, as a commissioner to enquire and report on the question of compensation to workmen for industrial accidents, held several sittings in the Parliament buildings, during the latter part of the month, at which a number of representatives of labour unions and employers presented their views.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were occupied in threshing, getting in root crops and fall ploughing, the weather being highly favourable for continuous work. Both grain and root crops were generally disappointing, but apples yielded fairly well, though some damage was caused by high winds. The Toronto Milk Producers' Association, at a meeting held on the October 28, decided to raise the price of milk for the winter months to \$1.75 per 8-gallon can, being an advance of 25 cents over last winter's rate. The reason assigned for the increase is the failure of the clover and root crops, and the increased cost of feed.

Manufacturing.—Nearly all lines of the manufacturing industry continued active, with prospects of work ahead for some time. The Russell Motor Car Company is building an addition to its plant in West Toronto, at a cost of \$30,-000. The Standard Silver Company is putting up a four-story factory of reinforced concrete on Madison avenue, to cost \$75,000. The F. N. Burt Company, Limited, check-book manufacturers, are erecting a two-storey brick factory on Wellington Place, to cost \$30,000.

Railway construction.—The branch of the Canadian Northern Railway between Toronto and Trenton was formally opened on October 9. Work is being actively

pushed on the new city car lines, three of which, the Bay street line; the Adelaide street line from Church street to Spadina avenue; and the Harbord street line, between Spadina and Ossington avenues, will be in operation by the end of the year.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, builders' labourers, carpenters, lathers, plasterers and painters were active. Plumbers, steam and gas fitters were busy. The Lathers' Union has forwarded a request to architects and builders to have the doors and windows of all buildings in course of erection properly enclosed to keep out the cold from Nov. 15 to April 1 in each year, and has decided that their members will not work in any building where this is not done. The same union has obtained a contract for 15,000 square yards of metal lathing in Halifax, N.S. A complaint has been made on behalf of the building trades that the terms of contracts for the erection of school buildings, as regards hours of labour and rate of wages are not observed. The matter is under investigation. The metal and engineering trades had an active month. Jewellers and silversmiths were well employed. Furniture workers and upholsterers, cabinet makers, carriage and wagon workers had plenty of employment. Piano workers were active. Printers were not so well employed as in September. Bookbinders, pressmen and stereotypers had steady work. The clothing trades were active. The provision and tobacco trades were normal. Harness and leather workers had a good month. Railway and street railway employés, teamsters and expressmen were actively employed. A large proportion of sailors and others engaged in navigation have been laid off for the season. Hotel and restaurant help, barbers, laundry workers, clerks and salesmen had plenty of work. Unskilled labour was in good demand.

DISTRICT NOTES.

North Toronto.—The town is now supplied with light and power by the Hydro-

Electric system, the light being turned on for the first time on October 27.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

October was a busy month and great activity prevailed among all classes of workers except those who are adversely affected by the change of season, such as electric trainmen, steamboat men and hotel employés. A notable feature of the labour market was the unsatisfied demand for female factory workers. Contractors were rushing work on concrete sidewalks, of which a large area remains to be built before very cold weather sets in. An English firm secured factory accommodation here for the manufacture of aluminum goods. Building trades continued very active. Financial and commercial interests reported satisfactory conditions. Transportation was active. There was a noticeable shifting of traffic from water to rail routes.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Apples, the last fruit crop, were picked. Corn was being husked, and potatoes and root crops taken up. Ploughing was in progress. Agricultural employment will decline from this time till March.

Manufacturing.—All manufacturing concerns were busy.

Railroad construction and employment.—Railway employment was good. On electric lines winter schedules, providing less frequent services and requiring fewer cars and men, were in effect. Contractors on the Niagara boulevard were completing their season's work. Very little will remain to be done under the contracts next spring.

Other industries.—The Ontario Power Company was closing its outside construction work for the season, but the Canadian Niagara Power Company and Electrical Development Company, were going ahead with the enlargement of their power

houses, and a considerable number of men will be employed all winter.

CONDITION OF PARTICULAR TRADES.

A large addition to a hotel building and many more new dwellings kept the outlook for the building trades bright. Bricklayers and masons were busy. No carpenters were idle and employes of planing mills were very busy. Painters and plumbers were in demand. Builders' labourers were quiet. Foundries, machine shops, and the railway switch works were busy. Cutlery and silver-plating factories were rushed with holiday orders. Electrical workers were busy, and linemen were in demand.

Journeyman tailors and hat makers were busy. Suspender and neckwear makers were very busy, and more hands were wanted in the factories. Canning companies put up very large quantities of apples this autumn, and the pack of pumpkin and late fruits was large. The busy season was closing. Office and salespeople were active as were also laundry workers. Hotel and restaurant hands were quiet. Trainmen, yardmen and freight hands in railroad employment were all busy. Many more steamboat men and longshoremen were laid off. Teamsters and expressmen were busy. Unskilled labour was very well employed.

DISTRICT NOTES.

Port Colborne.—The capacity of the cement works is being greatly increased. Work on the construction of new plant was commenced, and will occupy several months. A hundred men will be engaged in building operations. When the work is completed the capacity of the plant will be increased from 1,500 to 3,500 barrels per day, and the operatives from 175 to 300. The new Maple Leaf mill commenced to grind wheat.

Welland.—A factory to manufacture automatic weighing and vending machines will be located here, also a large ice-cream factory. An effort will be made to manufacture paper from the moss on the peat beds in this vicinity. Street railway construction was rushed.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

October proved a very busy month of an extremely active season. All trades and branches of industry were active to busy, with very active conditions prevailing in the building trades. The amount of building operations going on have taxed the building trades to their utmost and the mills have experienced extreme difficulty in supplying the demand for building material. Notwithstanding the best efforts of the building trades much work will not be undertaken or finished this season.

The assessment returns show the largest increase in population and assessed value for many years. The population has increased by 761 since and the assessment by \$902,644 over that of last year. Of this amount about \$200,000 is made upon new buildings, dwellings principally. Notwithstanding there have been many houses built this year, there is still a shortage of suitable houses for working men and for even a better class of houses. A realty company has been formed, called the Lincoln Realty Company. They have purchased lots in the east end of the city, and will build fifty-seven houses, five of which are already in course of construction.

The Canadian Yale-Town Lock Company, Limited, are making good progress on their new buildings. A big 120 x 240 foot steel structure building is being rushed ahead for the Steel Radiation Company. Good headway is being made on the construction of the \$180,000 new city water main.

The Crocker Wheeler Company were very busy, as high as five car loads constituted their shipments for one week. Six thousand kilowatts in transformers alone being shipped, and a number of motors up to 120 horse power. Although this factory has been here only a little over a year, the Company have approximately 150 hands on its pay roll, and night shifts are necessary, and by next spring

a new addition to the factory will become a necessity. Business wholesale and retail was good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The most of the crops were in, and the fruit growers and farmers have had reason to feel that this has been a good season to them; in most cases a fair average crop was marketed at good prices.

Manufacturing.—All mills and factories were running full time.

Railway construction.—The Niagara, St. Catharines and Toronto Railway Company completed their work on the new trestle between this city and Merriton.

Other industries.—The canning factories were winding up their season's work which has proved a good one.

CONDITION OF PARTICULAR TRADES.

The building trades were busy. Metal and engineering trades were active to busy. Woodworking and furnishing trades were well employed. The allied printing trades were busy. Clothing trades, journeymen tailors and boot and shoe workers were busy. Food and tobacco preparation trades were well employed. Leather trades were busy. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés and laundry workers were well employed for the month. All lines of transportation were busy. Unskilled labour was fully employed.

DISTRICT NOTES.

Thorold.—Labour conditions were good and all classes of labour were well employed. There is a strong probability of Thorold securing a \$1,000,000 paper plant in the near future. A new addition to the Montrose Paper Company's plant is contemplated.

Merriton.—Labour was well employed. A by-law to grant a fixed assessment of \$5,000 for a period of ten years to the Interlake Tissue Paper Company was carried unanimously on October 12.

Port Dalhousie.—Favourable conditions prevailed for the employment of labour.

DISTRICT NOTES.

Grimsley.—The Radiant Electric Company will commence work immediately on their new factory building. The initial cost will be \$10,000; a very complete line of electric household and other appliances will be manufactured.

HAMILTON, ONT., AND DISTRICT.

Mr. William T. Cooper, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Both skilled and unskilled labour were well employed in most lines during October, and judging from the amount of work now in sight, the building trades will be rushed with work as long as weather conditions will permit. Contractors everywhere are rushing operations, hoping to get things along far enough before winter sets in, to enable them to go on with inside work all through the winter.

The Canadian Knitting Company has been incorporated with a capital of \$300,000 and will start at once with the building of a \$22,000 factory, and it is expected that the building will be completed and the Company ready to commence operations in January. Underwear, &c., will be the product. The Hamilton Gas Mantle Company, incorporated for \$40,000 is another new industry which expects to be running in November, in a three-storey building on Wentworth street. About twenty-five hands will be employed. The Company has orders on hand already that will keep them running to capacity for some time to come. Another new industry, which is to be started here soon, is one which will do all kinds of stereotyping and electrotyping, &c. Chicago capitalists as well as local men are interested in it. The Harris Abattoir Company, of Toronto has taken over the Stroud cattle byre for one year, and if a satisfactory agreement can be arranged with the city, the

Company expects to make improvements to the cost of \$100,000.

Building permits issued during the month of September, were far in excess of those issued during any previous month in the city's history. They amounted to \$771,200, an increase of 188 per cent., over the corresponding month a year ago. The Grasselli Chemical Company have taken out a permit for two of its series of buildings, which will be frame and corrugated iron structures to cost \$21,000. About 150 men are now employed on the work. A permit has been taken out by the Climax Road Machine Company for a brick factory building on Burton street. The J. Cranstons & Son, Company is making an addition to its pottery building on Garth street. A \$2,000 brick addition is being added to the Dominion Belting Company's factory on Sherman avenue. A large storage warehouse, 50x150 feet, six-storays high, which will have a floor space of 52,000 feet will be erected shortly at the corner of Robert and Elgin streets. Street railway earnings for the quarter just closed aggregated: \$130,758.93, an increase of \$22,470.21 over the corresponding month last year. Work on the Hydro Sub-station on Hughson street north will be commenced at once. The building will be a two-storey one, costing about \$13,000. Considerable alterations will be made in the Lister Block, on James street, at an estimated cost of \$12,000.

Custom collections for the port of Hamilton, during the month of September amounted to \$195,844.23, a decrease of \$5,367.53 over the corresponding month last year.

Bank clearings for the four weeks ending October 7, 14, 21, 28, as compared with those of the same week of last year were as follows:

1911	1910
3,137,914	2,438,332
2,580,711	2,075,390
2,862,259	2,214,027
2,865,707	2,227,579

The Assessment Commissioner reported an increase in the value of property amounting to \$5,106,893. The total

assessment of the city now amounts to \$52,819,854. The population showed an increase of 8,557 over last year, and brings the population up to 82,095. A by-law to raise \$75,000 for the erection of a new fire station will be submitted to the ratepayers in January.

The retail price of milk advanced, on October 1, from 7 to 8 cents per quart.

Wholesale and retail trade during the month has been very satisfactory and indications point to a continuation of the present conditions.

The Bell Telephone Company has installed new switch-boards in its plant, and has increased its staff by twenty-five per cent. Considerable difficulty is being experienced by the Board of Education in securing teachers. Toronto, Hamilton and Buffalo and Michigan Central Railway trainmen, operating on the passenger service between here and Buffalo, applied for a change in their working conditions. The men asked that the number of crews on this run be increased, or that the wages of those doing the work be advanced. The officials of the two roads decided that they could not grant either request.

The Public Library Board has decided to increase the remuneration of the eleven assistants in the library, 50 cents per week.

The police are renewing their efforts to obtain one day a week off duty. Their request was made some time ago, but was never acted upon. For a long time the men were allowed a day off a month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had a very busy month apple picking, fall ploughing and harvesting the root crops. Many apple and pear trees were blown down, and others stripped bare of their fruit, during a severe wind storm early in the month.

Manufacturing.—Nearly all the manufacturing establishments were busy during the month, and in several instances it was found necessary to work overtime in order to fill their orders. It is understood that the Oliver Chilled Plow Works Company will build a much larger plant

here than present plans call for. Several manufacturers have been notified, that owing to the shortage in the supply of natural gas, they will not be able to get a supply this winter.

Railway construction.—Work on the Hamilton, Guelph Junction road is going along steadily.

The Grand Trunk Railway has purchased considerable property on Ferguson avenue and on Elgin streets, and will begin at once to enlarge its yards.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters, and joiners and lathers and plasterers had a busy month, plumbers' and gas and steamfitters and cement workers had steady work.

Iron moulders and electrical workers had a fair month; stove mounters were quiet; horseshoers were all steadily employed; jewellers and silversmiths were busy. Woodworkers and carriage and wagon makers were busy; pattern makers were not very busy. Job printers had a dull month; pressmen had steady work. Journeymen tailors were well employed; garment workers had a fair month; boot and shoe workers were not very busy. Bakers and confectioners were busy; cigar makers and tobacco workers found trade good. Leather workers had steady employment. Barbers and broom makers were busy. Railroad conductors had a fair month; engineers and firemen reported trade rather quiet. Teamsters and express men were busy. Unskilled labour was well employed.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour generally was well employed during the month, which compared favourably with September, and the corresponding month of last year. The building trades were especially busy, and all previous records will be broken. Should favourable weather continue, building operations will continue during much of

the winter. There is a strong demand for more houses, particularly of the class that would rent for \$12 or \$15 per month, and it has been estimated that 200 more houses could be rented at once. The iron trades were also busy, and a busy fall and winter season is expected.

The fabric mills and the paper box factories were also busy, and there is a continued demand for operatives at remunerative wages, the work is generally light and clean, and the sanitary conditions all that could be expected.

Merchants, wholesale and retail, had a good month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists were busy with fall ploughing, and harvesting the apple and root crops.

Manufacturing.—Manufacturers were busy during the month, with the exception of one factory which lost part of the month, on account of stock-taking and repairs. Prospects for a busy winter are bright.

CONDITION OF PARTICULAR TRADES.

All the building trades were very busy. Iron and brass moulders, coremakers, machinists, engineers, electrical workers, linemen, metal polishers, buffers, platers, stove mounters, blacksmiths, boiler-makers, sheet metal workers and horseshoers were busy. Woodworkers, carriage and wagon makers, pattern makers and coopers were busy. Printers, pressmen and bookbinders were busier than during the previous month. Tailors and tailoresses were busy, and in some cases very busy. Boot and shoe workers, bakers and confectioners were busy. Cigar makers and tobacco workers were from active to busy. Leather workers and saddlers were busy. Barbers and clerks, delivery employes, hotel and restaurant employes were actively employed. Laundry workers were busy. Railroad trackmen and draymen were busy. Freight handlers and teamsters were very busy. Street railway employes had steady employment. Unskilled labour was fully employed.

DISTRICT NOTES.

Paris.—Labour was well employed during the month. The factories and mills ran steadily.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions continued active during the month of October. Those engaged in the building trades were very busy, though outside men engaged in this line of work lost some time on account of wet weather. The addition to the winter fair building is being rushed to completion, so as to have it in readiness for the fair in December. A large staff of men are employed on the new Young Men's Christian Association's building. The exterior work on the Homewood Sanatorium is nearing completion, but much indoor work remains to be done. Civic work on street paving and sewer construction is being rushed; contractors are complaining of a lack of men for this class of work. Wholesale and retail merchants report trade fair. The Ontario Agricultural College has re-opened for the fall term, with a record attendance, 356 boys and 133 girls being enrolled. Every department is crowded and accommodation is being taxed to the utmost.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fall ploughing and gathering the root crops have kept farmers and helpers actively employed. The turnip crop in this locality is reported good, while potatoes are below the average. The fall fairs were well patronized.

Manufacturing.—Active conditions prevailed in this industry during the month. Many of the larger factories are very busy, and some are working overtime. The Jules Motor Company has a staff of men engaged remodelling their plant, and placing new machinery in

position. Work on the new factory of the Independent Fire Company is progressing rapidly, a large force of men being employed thereon.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers had an active month. Also painters and decorators. Plumbers and steam fitters were very active, and a scarcity of men in this line is reported. Iron moulders, coremakers and tube mill workers were active, with additional men engaged in some of the foundries. Machinists, electrical workers and linemen report a good month. Stove mounters, blacksmiths and horseshoers had a fair month. Woodworkers in sash and door factories were very active as were sewing machine makers, and piano and organ workers. Carriage makers and coopers were fairly well employed, also printers and allied trades. Journeymen tailors and garment workers were busy. Railroad trackmen were active, also carters and teamsters. Unskilled labour had a good month, with the supply hardly equal to the demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of October was a busy one in labour circles. All classes being fully employed, with a demand for help in many branches, especially among cabinet makers, machine hands and finishers, and felt and shoe making trades. Good progress was made on the new buildings under way. The large two storey brick building on Foundry street, of the Art Plate Glass Company, was completed towards the close of the month; a number of residences were also completed. There was fourteen building permits, valued at \$822,850, issued during October. This makes the value of building permits issued during the present year exceed those issued during the year of 1910, by over \$30,000, at this date. Shipments

and bank clearings were somewhat better than the previous month. Business, both wholesale and retail, was good. There were no changes in the rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a busy month harvesting their root crops, which are fairly good, especially the sugar beet crop. Potatoes are a light crop. The apple crop through the district is only a medium one, and the prices for winter apples are from \$2.75 to \$3.50 a barrel, according to kind.

Lumbering.—The industry of lumbering was active.

Manufacturing.—All manufacturing establishments were busy, and the J. Kaufman Planing Mill, door and sash factory; the Berlin Interior Hardwood Company; the C. A. Ahrens Shoe Company; the Berlin Felt Boot Company; the Kimmel Felt Company; the Anthies Furniture Company; the Lang Tanning Company and others were working overtime. The Dominion Sugar Company began operations in the early part of the month, and are running day and night with a large staff of men.

Railroad construction.—There was no railroad construction, as the work on the People's road is at a standstill.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were very active. Iron moulders and helpers, coremakers, machinists and engineers, electrical workers and linemen had a busy month. Metal polishers, buffers, platers, brass workers and stove mounters were active. Blacksmiths, boilermakers, sheet metal workers, bicycle workers, tool sharpeners and horseshoers were all employed. Woodworkers, upholsterers, varnishers, polishers, wood carvers, carriage and wagon makers, car builders, pattern makers, coopers, gilders and shingle weavers were active. Printers, pressmen, bookbinders, steel and copper plate printers were actively employed. Journeymen tailors and garment workers had a busy month, and

many of them were working overtime. Glovemakers were active. Boot and shoe workers were busy, and the greater portion of them were working overtime. Bakers and confectioners, butchers and meat cutters were active. Ice drivers were somewhat quiet, owing to the cool weather. Cigar makers and tobacco workers were active. Tanners and curriers, leather workers, saddlers, trunk and bag makers had a busy month. Barbers, broom makers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés, laundry workers, button workers, suspender workers, mattress and bed makers were active. Steam and electric railroad employés, freight handlers, cab drivers, hackmen, carters, draymen, teamsters and expressmen and unskilled labour were fully employed.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There is not much change in industrial conditions since last month. Most of the factories were working full time, with full staffs; several were working overtime. Generally speaking, business is good and prospects excellent. There is still a regular demand for skilled help for the factories. Good mechanics for both wood and iron work, bench hands, stove mounters and pipe organ workers. There is practically no demand from the factories for unskilled labour, but outside the factories employment is readily found for all that offers. There is still considerable building going on, and bricklayers are needed on some contracts.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy cutting corn, filling silos and taking up roots. Corn has turned out a fair crop in this district. Turnips are also very good, but potatoes are scarce and dear. It is probable that it will be necessary to ship in a good many potatoes to meet the local demand. There has been some movement of unskilled labour from the

country to the city; but most of the men who went on the farms for the summer season are still there. Inquiries for work in the city have begun to increase, however. This does not mean much of an increase in the supply of the labour immediately available; however, many of the inquiries came from men who are still at work in the country.

Manufacturing.—There is a constant demand for female help, both for domestic service and for the factories. The problem of securing sufficient female help for the knitting factories may become an important one.

CONDITION OF PARTICULAR TRADES.

There is considerable work going on still in the building trades. Bricklayers and masons, carpenters and joiners were busy. Lathers and plasterers, painters and paper-hangers, plumbers and stonecutters were regularly employed. There was plenty of work for builders' labourers. Iron moulders, iron workers generally, machinists, stove mounters and blacksmiths were busy, and there was a demand for stove mounters. Woodworkers generally, were busy. Upholsterers, varnishers and polishers, carriage and wagon makers were also busy. There was a demand for cabinet makers, bench hands and pipe organ workers. The printing trade was reported to be fairly good; but there was no demand for men. Journeymen tailors and garment workers were regularly employed. Bakers, butchers, cigar makers, tanners, barbers, clerks, stenographers and delivery employes were steadily employed. All the available unskilled labour found ready employment.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

October was a favourable month to all classes of labour. In the building trades mechanics and builders' labourers (unskilled) had a busy month, finishing the outdoor work on the many buildings

in course of erection, before the cold weather. Men working on civic improvement work had a very busy month. The men were well employed in the Grand Trunk Railway Company's shops, and the local industries reported a steady month, especially the woodworking factories. Wholesale and retail merchants reported business very good. The customs returns for Stratford, for the month of September totalled \$15,789.19. There were no changes in the rates of wages or hours of labour, and no trouble in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy threshing and fall ploughing. Local markets were well attended.

Manufacturing continued brisk, and prospects were bright for a very busy season.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners lathers, plasterers, painters and decorators were busy. Plumbers and gas fitters were very busy. Builders' labourers had a steady month. Iron moulders, workers, helpers, machinists and engineers were active. Electrical workers and linemen were very busy. Blacksmiths and boilermakers were active. Woodworkers, upholsterers, wood carvers, carriage and wagon makers were very busy. Coopers were active. Printers were very busy. Journeymen tailors and factory workers were active. Shoe repairers were busy. Bakers, confectioners, butchers and cigar makers were steadily employed. Harness makers did a good business. Barkers, clerks, delivery employes, hotel, restaurant and laundry workers were active. Railroad conductors, engineers, firemen and trainmen were kept busy. Switchmen and freight handlers were active. Cab drivers, draymen, teamsters and expressmen were active. Unskilled labour was very well employed.

DISTRICT NOTES.

Clinton.—A by-law to sell a partly equipped plant, to be known as the Clinton Motor Car Company was carried. The

Company starts with a capital of \$100,000. A second by-law was carried, to establish water works commissioners.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market was of the best, and equally as good as last month, with many of the factories working overtime. On the railroad, business has been good, and the Canadian Pacific Railway Company is rushing along its improvements, having completed the bridge over the Thames, nearly completed the new round house and coal shutes, and commenced the new station in the east end. Among the factories and foundries business is exceptionally good, and those employing female labour could employ quite a number more hands. Conditions in the building trades were good, and several additions are to be made to factories shortly, notably McClary's Manufacturing Company's addition to their foundry plant; Perrin's addition to biscuit factory, and Darch & Son, addition to harness and leather goods factory. Work has been begun on the new Masonic hall. The brick yards have ceased burning for this year and are laying off their employés, and the corn flake factory, which has been running both night and day forces, has laid off the night gang..

The city has a gang employed laying larger water mains in some sections of the city, and the different coal and wood yards are very busy, and taking on more drivers. There are not nearly as many vacant houses in the city as there was a year ago. The principals of the public schools with twelve rooms and over are asking for an increase from \$1,500 to \$1,700 per year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The potato crop in this locality is lighter than usual, as is also

the winter apple crop. Prices are ranging as follows:—

Hand picked spies, greenings or baldwins, \$2.50 per barrel.

Potatoes, \$1.00 per bag.

Eggs, 30 cents, per dozen.

Turkeys, 19 cents, per lb.

Chickens, \$1.00 to \$1.50 per pair.

Ducks, \$1.75, per pair.

Geese, 14 cents, per lb.

Dressed hogs, \$8.50, per cwt.

Live hogs, \$5.75, per cwt.

Hay, \$14 to \$16.50, per ton.

Butter, 29 cents, per lb.

CONDITION OF PARTICUTAR TRADES.

Business was good in all lines of the building trades. Moulders and machinists were busy. Iron workers were very busy. Electrical workers and linemen were exceptionally busy, and the city has nearly 1,000 contracts for hydro-electric power, yet to connect with residences. Metal polishers, brass workers, stove mounters, &c., were all busy. Woodworkers and coopers were busy. Carriage and wagon workers were very busy. Printers, pressmen and bookbinders were busy. Journeymen tailors and garment workers were very busy. Boot and shoe workers were also very busy and working overtime. Bakers and confectioners were exceptionally busy and working overtime. Cigar makers were busy. Furriers were busy. Railroad train crews reported an extra good month. Teamsters were busy. Unskilled labour had the best month in the year, and continued very busy at the close, plenty of work insight. In a number of the outside lines, where work was getting slack, those laid off secured inside jobs in the factories for the winter.

DISTRICT NOTES.

Sarnia.—The Imperial Oil Works have secured land and are to extend their business here to a very large extent, and will employ about 100 extra men. The following building is under way: new plant of the Canadian Woodworkers, Limited; the Bell Telephone Company are laying conduits; and the Laidlaw Lumber Company are extending their plant.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was well employed in this city and district during the month of October. Favourable weather conditions permitted uninterrupted work in the building trades. Railway shop employ  s reported a good average month. Local industries were busy. Since commencing operation, the Monarch Knitting Company has met with most favourable success. Already the new industry has made itself felt, in a most commendable way. With the new addition to their factory, which is now well under way, the Company will be in a position to handle orders with greater dispatch, through the elimination of some difficulties which have had to be met in the matter of obtaining material with which to carry on the work of the factory.

The St. Thomas Pork Packing Company is another industry which has fully justified public confidence. A staff of thirty-five is now employed, and it is authoritatively stated that about \$500 weekly is paid out in wages, in addition to their large expenditure for stock.

October was a good month on the railroads, although traffic on the Michigan Central Railway was quieter than is usual at this time of the year. During the month ten men employed by one of the city's pavement contractors quit work. The men were receiving \$2 a day, which is considered a high rate for unskilled labour, and because the contractor would not agree to pay them \$2.25 a day, they refused to continue at work. Their places were soon filled, and no great inconvenience was caused the contractor by these men leaving the service.

Because of the introduction of the piece work system in the Michigan Central Railway Company's boiler department in this city, considerable unrest has resulted. Although no strike has been declared, it is reported that few first class boiler makers are now at work. Those who have left the employ of the railway have obtained work elsewhere.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busy with the root crops during October. Local markets have been well attended. Local industries report October a good average month.

Traffic has been brisk on the Wabash & Pere Marquette railways, but somewhat quieter than usual on the Michigan Central Railway, however, employ  s with regular runs report the past month very satisfactory.

CONDITION OF PARTICULAR TRADES.

There was considerable activity in all branches of the building trades. Iron workers were well employed. Tailors reported the month active. Unskilled labour was well employed.

CHATHAM, ONT., AND DISTRICT.

Mr. A. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour during October has been well employed. The building trades in all branches were still very active. Work on the \$20,000 addition to the Ursuline Convent and the Baby block, and the \$25,000 South Chatham School were the principal large contracts started. There is a lack of medium sized tenement houses in Chatham, as a result quite a number in the vicinity of the International Harvester Company's works were living in tents during the summer. Houses that would rent from \$10 to \$12 is what are required most, and the Board of Trade, at the last meeting, took the matter up, and will endeavour to induce capitalists to remedy the want. Manufacturers were running their factories full time, with plenty of orders in advance. Retail trade was exceptionally good. There was no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy, with corn and sugar beets, both of which

crops will be better than was expected in the forepart of the season. Live hogs dropped to \$5.80 in the latter part of the month. Potatoes were selling at \$1.30 per bag of one and one-half bushels; timothy hay, \$16 to \$17.50 per ton, and clover hay at \$12 per ton. Farmers predict higher prices this year for fodder on account of the light hay crop in the district.

Manufacturing.—Everything was satisfactory in all lines of manufacturing.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, joiners and pianterers were very active. Plumbers were active, principally on new work. Gas and steamfitters were well employed. Builders' labourers were busy. Iron moulders, iron workers and helpers, and machinists report work up to the previous month. Electrical workers and linemen, metal polishers, platers and brass workers were very busy. Sheet metal workers and horseshoers reported a very fair trade. All branches of woodworking trades were very active. Especially the carriage and wagon makers. Printers, pressmen and the allied trades were active. Journeymen tailors, garment workers, boot and shoe workers were busy. Bakers and confectioners, butchers, cigar makers and tobacco workers were active. Barbers, clerks, stenographers, hotel and restaurant and theatre employés were fairly active. Laundry workers were very active. Street railway employés, cab drivers, carters, draymen and teamsters were very busy. Unskilled labour was well employed.

WINDSOR. ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

This has been the most prosperous year in the history of Windsor. Month after month Windsor has been showing a remarkable increase in the building figures as the following report of the City Engineer indicates:—

	1910	1911
January.....	5,550	16,225
February.....	5,200	35,150
March.....	27,225	60,250
April.....	18,850	85,750
May.....	21,580	69,790
June.....	31,075	126,330
July.....	37,950	43,640
August.....	63,775	77,235
September.....	38,300	49,425

There are several by-laws to be voted on for factories. In the factory district ground has been broken for a \$15,000 factory for the A. E. White Machine Works, at Eau Claire, Wisconsin, and for a \$5,000 building for the National Spring & Wire Company. Plans are also being prepared by the Hupp Motor Company, for a \$25,000 factory. Several contractors have enough work on hand at the present time to last them all winter.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are about through for the season, with the exception of bringing their produce to market, for which the prices are as follows:—

Butter, 32 cents, per lb.
Eggs, 30 cents, per dozen.
Poultry, 20 cents, per lb.
Apples, \$1.50, per bar.
Potatoes, \$1.00 per bush.

Manufacturing.—Manufactures are all very busy.

Railway construction.—All the railroads have extra men on putting their yards in shape, before the cold weather sets in.

CONDITION OF PARTICULAR TRADES.

Printers and pressmen were very busy. Journeymen tailors and garment workers were working overtime. Bakers, butchers, cigar and tobacco workers were all fully employed. Leather workers were busy, principally on repair work. Barbers reported business fair. Clerks, delivery employés, hotel and laundry workers were in demand. Transportation trades and unskilled labour were well employed.

DISTRICT NOTES.

Walkerville.—All classes of labour are well employed, as the manufacturers are very busy, and skilled men are hard

to get. The Ford Motor Company are building a \$150,000 addition to their plant, and the E. M. F. Motor Company are building a \$70,000 addition, and several others factories are being erected.

SAULT STE. MARIE, AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The supply and demand of labour were well balanced during the month. Building operations were rushed to complete jobs before the advent of cold weather, and the skilled trades were well employed. Our various industries were operating full time on orders well ahead. Business was fair in all lines, and the general outlook was good. Sidewalk construction for the season has ceased, owing to frost. About five miles were laid in the Soo, and a couple of miles in Steelton during the season. Sewer work is still being carried on, and a lot remains to be done.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The busy season for farmers was over.

Fishing.—Normal conditions prevailed in the fishing industry.

Lumbering.—Lumbering will be carried on on a large scale in the district this winter. The Lake Superior Paper Company, especially, are operating on a large scale. This Company's pulp mill is being enlarged and rebuilt at present; they are also building a large paper mill. More men are employed on construction than if the mills were operating.

Railroad construction.—Construction on the Algoma Central Railway was carried on briskly during the month, but the advent of cold weather towards the end caused a slackening of the work.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were actively employed. Normal conditions prevailed in all the other skilled trades, and unskilled labour was well employed.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of October in this district was the best month of the year, and every man needing work was fully employed. Owing to the opening of construction work on the Canadian Northern Railway Company's eastern extension, unskilled labour was in great demand, and the demand was not fully met. In addition to the railway construction work, the lumber and the camps have been recruited from these cities, and many men left for the bush. Employment in all local industries was steady, but there has been no exceptional activity; the building trade received an impetus, by the starting of many small residences, and a few business blocks, besides a factory at the wagon works at Port Arthur, and all the building trade operatives were kept fully employed. Commercial and business conditions were steady. There was nothing of exceptional importance, but a steady progress. There have been no changes in rates of wages or hours of labour, and no unrest in the labour market. The dispute on the Grand Trunk Pacific Railway affected only three machinists in Fort William, and none in Port Arthur. The street railway employes approached the Board of Management with a new agreement, which was received, and the men were asked to defer the request for one month. They acquiesced in the view of the Board.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers of the district have closed up farming operations, and are now supplying the local market with cord wood. The year's record in farming has been distinctly encouraging. Many farmers in the vicinity of the two cities, after a hard fight against natural conditions are now on the winning side, but the cry for good roads is constantly heard, and in October, a conference on

the subject was held in Fort William, with many of the farmers near that city in attendance.

Lumbering.—Active conditions prevailed in the lumbering industry.

Railway construction.—Railway construction work was very actively carried on.

Other industries.—There was great activity at the coal dock, and since the first week in October, a double shift of men has been employed; this is the usual procedure at this season of the year, and the double shift will be in operation as long as the demand calls for it. The coal dock is filled to capacity, and will be kept filled.

CONDITION OF PARTICULAR TRADES.

The building trades were all very active during the month, carpenters, lathers, plasterers, bricklayers, painters, plumbers and labourers all being fully employed. The work of repairing at the dry docks has been steady during the month, and many men were kept fully employed. All other trades in the two cities were busy. The printing and allied trades were actively employed. Journeymen tailors had a steady month, as also had the bakers and confectioners, butchers, and meat cutters, barbers and clerks, delivery employes, hotel and restaurant employes, as well as laundry workers have all been steadily engaged in their several departments. The transport trades in all branches were steadily employed.

WINNIPEG, ONT., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The market for labour of all kinds during the present month has been very strong. The greatest difficulty has been experienced in getting men for work in the harvest fields. A like difficulty has also been experienced in getting men for railroad work. It is usual at this season of the year for labour to be somewhat scarce, but the shortage has been

more marked than usual this year. Skilled labour has been fully employed, but there is a demand for men to work at other points. During the month, the shops of the National Transcontinental railway at Transcona have been opened, and in the course of a few weeks will be put into operation. Steps are being taken to construct the new Union Stock Yards at St. Boniface. Each of the railroads entering Winnipeg will have representatives on the Board, and the Government will also be represented. Particular activity is noticeable in the building and allied trades. Contractors are using all the force they can to have all buildings covered in before the severe weather sets in. Grain receipts at Winnipeg, are heavier than they have ever been. At the present time approximately 1,000 cars a day are passing inspection. The heavy grain movement is causing a very marked expansion of the bank clearings, which are now considerably over \$30,000,000 a week. Wholesalers and retailers generally are finding trade excellent. At the beginning of the month, wholesale merchants complained as to the volume of business, but towards the latter end of October, they found that orders improved in numbers as well as bulk. There has been some industrial disturbances during the month. On October 9, fifteen collar makers employed by the Great West Saddlery Company refused to work. They objected to the character of an agreement they had to sign. No settlement of this dispute had been effected at the end of the month. On October 6, officers of the Boilermakers and Helpers' Union and the Machinists' Union ordered that all men belonging to the trades named would remain out on strike until differences with the Grand Trunk Pacific Railway Company were settled. In connection with this trouble, steps had been taken to arrive at an agreement through the application of the Industrial Disputes Investigation Act. While negotiations were pending, the men at Rivers were given notice that the shops would be closed. This led to a general strike at all points of the Grand Trunk Pacific System from West Fort to Edmonton.

No settlement has yet been arrived at. During October, the municipal power plant at Winnipeg, was put into operation. At the end of the month all the power needed by the City of Winnipeg had been obtained from the municipal plant, and in addition, about 300 private services were being supplied. So far the plant has been built at slightly below the estimated cost which was approximately \$3,100,000. No decision has yet been arrived at by the City Council as to what the rates will be.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting in Manitoba is nearing completion. In the southern districts reports are to the effect that the threshing is practically over, but in the north, a large quantity of grain is still out in the stock. The yield as a whole is well up to the estimate, and in many cases it has run more to the acre than was expected.

Mining.—On the east shores of Lake Winnipeg several gold discoveries have been reported and numerous claims have been staked. The district in which interest at the present time centres is that around Rice Lake, a little north of Rat Portage Lake. Several parties are prospecting in that region, and on one claim, development work is being done. The district is easily accessible from Winnipeg, being reached by water communication.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market in this district was never better than during the past month. The demand for all trades was good, and in the building trades was never better. Advertisements appeared in the local papers for bricklayers, masons, carpenters and painters. Many additional buildings were commenced, including a cold storage plant for the Brandon Creamery, and a large power house for the new asylum.

Many of the principal streets are now paved with asphalt blocks, and the work is progressing rapidly. On October 11, the Mayor drove the first spike in the street railway. At present it is not decided whether the franchise shall be sold, or whether the city should have municipal cars, meanwhile the city is laying tracks. The Electric Light Company is doubling its present capacity in anticipation of a great increase in the demand for power.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing is still in progress, and will be late this year, owing to wet weather. The crop is not damaged to the extent expected.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters, decorators and builders' labourers were very busy. Plumbers and gas and steam fitters, stonecutters and machinists were busy. The printing trades and cigar makers were active. Those engaged in railroad transportation were very busy, and unskilled labour was actively employed.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Generally speaking labour has been well employed throughout the past month in all branches of industry; if anything in the way of a change, conditions were to a certain extent, improved over the preceding month, and were more favourable than the corresponding period of last year. At the beginning of the month much difficulty was experienced by the farmers in obtaining sufficient help, but in many districts wages were offered to the extent of \$3.25 per day and board as an inducement, which had the desired effect, with the result that the railroad construction gangs suffered greatly, on account of men leaving their employ to secure higher wages paid by the farmers.

Though unskilled labour is at present somewhat scarce, as time goes on this will be adjusted as the farmers finish threshing operations. Scarcity of unskilled labour is by no means experienced in the city; this has only applied to farmers and railroad contractors. As evidence of the activity prevalent in Regina at this season of the year, no less than fifty-four permits were taken out from October 1, to October 24, inclusive, amounting to \$175,450. There were 101 permits issued in September, amounting to \$425,700. From January 1, to date, 904 permits have been issued, which amount to \$4,443,820; whereas during the whole of 1910, there were 573 permits issued amounting to \$2,351,238. On October 3, the following by-laws were voted upon, and all carried by a large majority:—

For assisting in construction of Municipal Street Railway.....	\$400,000
For construction and extension of trunk, sewer and disposal works.....	150,000
For construction of waterworks.....	150,000
For Canadian Pacific Railway Company's Broad street sub-way (City's portion of construction).....	120,000
For pavements.....	64,400
And sidewalks.....	13,400
For Exhibition Buildings.....	35,000
For Re-distribution of Wards.....	

The drivers employed by the City of Regina in the capacity of garbage collectors recently asked for an increase of wages. They receive \$55 per month; this was considered by the Sanitary Inspector and the Health Committee to be a reasonable wage, and the request for higher wages was not granted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing operations were in full swing, and judging by reports, in another two or three weeks threshing will be a thing of the past. As regards the yield, district reports vary, as in some places exceptionally heavy crops were obtained, while in others, very little was obtained, as a result of the hail and severe frosts of the past.

CONDITION OF PARTICULAR TRADES.

All of the building trades experienced a fairly active month, though the labour

market apparently is equal to the demand. Machinists and engineers were busy. Electrical workers were well employed, while bicycle workers were quiet. All branches of the printing trades reported a good month. Journeymen tailors and garment workers were well employed. Bakers, confectioners and butchers were busy, also the cigar workers. Barbers were active, clerks were well employed, also stenographers, delivery employes, hotel and restaurant employes and laundry workers. Railroad employes and street railway employes were active. Cab drivers, hackmen, draymen and expressmen had a busy month. Unskilled labour was well employed.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

All classes of labour were in good demand during the month, and some contractors reported that they would employ more skilled mechanics if it were possible to procure them. This applies more especially to the building trades. In the post-office, the customs house, the banks, and the Board of Trade offices there was a healthy activity during the month. In every case there was a substantial increase over the corresponding month of last year, and over the previous month. Bank clearings for September amounted to \$10,221,782, as compared with \$9,543,494, during the month of August, and \$6,368,052, in September, 1910. In the Customs Department the total receipts during the month of September were \$65,076, as compared with \$30,869 for the corresponding month last year. Following are the figures from the Post-Office Department for September, together with a comparative statement with the same month of 1910.

	1911	1910
Stamps sold.....	\$9,871	\$6,750
Money orders issued.....	60,112	30,877
Money orders paid.....	66,093	30,972
Postal notes sold.....	6,275	4,312
Postal notes paid.....	5,830	3,821

Building permits for the month of September made a record for any single month in the history of the city under normal conditions. The total for the month was \$369,970, as compared with \$169,863 for September, 1910. The total for the nine months ending September 30 is \$3,076,750, at the same date last year, \$1,818,305, slightly over half of the present total. The shop hands in the local shops of the Grand Trunk Pacific Railway Company who went on strike were still out at the end of the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather was ideal for threshing, and the work was about completed at the end of the month. According to reports no serious damage was done by frost.

Mining.—Owing to the miners' strike in the Crow's Nest Pass, a large amount of coal was shipped to the east and south of this district, consequently, the price was \$1.50 higher than it was at the same period in previous years.

Railway construction.—Thirty cars of steel arrived for the Canadian Pacific high level bridge, and it is reported that the Company will endeavour to have the greater part of the steel erected while the ice is in the river. The purchasing agent of the Grand Trunk Pacific Railway Company has taken options on East End property, from Kinistino to McDougall avenue, valued at approximately \$500,000. This property will be used for freight sheds and station house purposes.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour in the first part of the month was fairly employed, owing principally to harvesting operations. Compared with last month there was more employment offered. In some localities labourers were scarce. In the city of Lethbridge the supply was in excess of the demand. The strike of the coal miners had a ten-

dency to stop the course of employment. Dealers in farming implements were busy, and had a good month. The Clearing house returns for the week ending October 5 were \$549,435; for the same week last year the figures were \$368,738. The figures for the month of September, 1911, were \$2,245,618, as compared with \$1,932,975 in 1910. Wholesale and retail may be considered dull. A decrease in the wages of unskilled labour in the city was reported. In some cases the wages were 2½ cents per hour less than two years ago. Outside of the strike of coal miners there was no unrest in labour circles. The returns at the Customs show an increase over September, 1910. Last year they were \$24,682.85, and this year, \$32,895.35, an increase of nearly thirty-five per cent.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There was general activity in agricultural districts. The result of the exhibit at the dry farming convention at Colorado Springs, and the decision to hold the convention at Lethbridge in 1912, has created a great deal of interest in dry farming.

Lumbering.—The lumber trade was very quiet.

Mining.—Nearly all coal mining has stopped.

Railway construction.—Railroad construction was active, although not in the immediate neighbourhood of Lethbridge. The branch line from Lethbridge to Alderside, on the Calgary and Edmonton line is finished, giving a direct route to Calgary. There is no move being made at the Lethbridge end yet, but the work will be continued all winter, and the spring will see work started at this end. The volume of building operations in September was in advance of what it was in September last year. The figures were \$91,094 for September, 1911, and \$77,490, for 1910. For 1909, the figures were \$92,933.

CONDITION OF PARTICULAR TRADES.

Bricklayers and plumbers were fairly well employed. Carpenters and joiners had a fair month, numbers finding work

outside the city. Painters had a dull month. Builders' labourers were well employed. Electrical workers, linemen, printers and pressmen were busy. Tailors were busy and were increasing in number. Garment workers in the cleaning and pressing line were busy. Bakers, butchers, hotel and restaurant employes, laundry workers and teamsters were all busy. Unskilled labour was well employed.

DISTRICT NOTES.

Raymond.—The Knight Sugar Factory expected to have a run of sixty days, and to handle the largest crop yet raised here.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows;—

GENERAL CONDITION OF LABOUR.

During the past month labour has been in good demand all round. Local industries have all been in active operation, whilst the Provincial Government has spent liberally on local roads and buildings. The one dark spot on our industrial horizon has been the unfortunate coal dispute in the East Kootenay and Alberta coal mines. Although no local industry has so far been shut down, the effects of the strike have been distinctly felt all over the Kootenays.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The lumber industry has had a fairly active season, and the large saw mills of East Kootenay are now being shut down except the planers, whilst logging will be in full swing. A large amount of building has been going on all over this district, and the City of Nelson made a new record the past month, with an aggregate of \$20,620.

Mining.—Is becoming more active as the season advances. Several old dividend payers in the London locality are starting up afresh; notably the Payne, now under bond to Mr. Twickey, of the Rambler-Cariboo mine,

whilst Byron N. White and John M. Harris have consolidated their interests in the Slocan Star and adjoining properties, over which there was such a long and extensive litigation. The Trail Consolidated Smelting and Mining Company is extending operations on its Sullivan Mines, near Fort Steele, and its Molly Gibson mine, at the head of Kokanee creek has been put into such shape that a large increase of shipments may be expected. The same Company has just issued a very favourable report from its Rossland mines. The report of the smelter at Trail was also favourable. In the immediate neighbourhood of Nelson, the Athabasca Mine keeps on steadily doing good work, whilst the Granite Poorman mines are doing better than ever. From Nelson to the Granite-Poorman and westward, considerable excitement, and much staking of palladium and platinum claims have been going on this autumn, and still continue. The new patent time-reduction plant, which Mr. A. G. French built here last winter, to test the practicability of handling Kootenay line, or economically, has been in constant operation all summer on a small scale, and is reported to be giving very satisfactory results.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fruit season is now over, and may be considered a fairly satisfactory one for the Kootenay fruit growers. Financial returns are also stated to be better so far than last year, and a much larger acreage will be under small fruits. Two jam factories in Nelson have been kept busily employed since the strawberry season started, with a steady demand for all the fruit they can put up.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. B. D. Grant, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour of all classes was extensively employed during the month. There were a few unemployed in nearly all depart-

ments, due chiefly to proximity to the American boundary and Vancouver. Two new schools were begun at a cost of over \$50,000. Several residences, a vaudeville theatre, and the remodelling of the opera house. Street paving and grading, also sewer extensions are being done by the city. Shipping in all lines is active, especially in lumber. Trade is brisk, and retail stores are increasing in number. A new brick block containing apartments and four stores being rented before completion. There were no changes in the wage scale or hours of labour. No trade movements during the month. Wage scales will likely remain stationary until spring.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops on the Delta lands have been excellent, including hay, oats, potatoes and roots. A fair quantity of apples has been harvested.

Fishing.—Fish have been scarce during the month but prices good.

Lumbering.—Large quantities of lumber have been cut principally for export, though there is a constantly increasing local market.

Railway construction.—One mile of street railway in the city limits is now under construction.

Other industries.—The building trade is holding on well for so late in the season. Building permits for September totalled nearly \$20,000, and more are being issued daily. Road grading in the city and adjoining municipality of Burnaby is proceeding rapidly and Burnaby is laying about forty miles of water mains.

CONDITION OF PARTICULAR TRADES.

Employment in all the building trades has been constant, excepting for one week of rainy weather. The supply of labour has always been somewhat in excess of the demand. Other trades are up to the average, and all industries are being steadily carried on.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of October saw no change in the condition of the labour market, the carpenters continued fairly busy, but tinsmiths and sheet metal workers were quiet; the state of the other building trades were normal. The trade unionists of Vancouver will soon have the new \$250,000 Labour Temple ready for occupancy. The Company is capitalized at \$100,000, and the shares in it are being sold at \$1 each, par value. The Great Northern Railway Company started work on an extensive freight yard, on the south side of False Creek, and will lay down four tracks east of Main street. The Board of School Trustees applied for a permit to erect a school-house at Kitsilano costing \$130,000, and will present by-laws, to be voted on in January, for \$1,000,000 for city schools and other purposes. The total building permits October 1 to 21, amounted to \$1,029,000. The percentage of earnings paid to the city by the British Columbia Electric Railway Company for September, amounted to \$7,236.52. In September, 1910, the amount was \$4,978.49. Last month 3,628,967 passengers were carried. For nine months this year the percentages amounted to \$44,800. A coroner's jury added a rider to its verdict, suggesting the appointment of a municipal inspector of all scaffolds, equipment and erections.

The Eastern Townships Bank will erect a one-story branch bank building, 60 by 34 feet, costing \$30,000, on Fourth avenue west. Contracts were let to build Chalmers Presbyterian Church, at Twelfth avenue and Hemlock street, costing \$70,000. The Molsons Bank purchased a building site, 25 feet, Hastings street, near Main street, next Carnegie Library, for \$100,000, or \$4,000 a front foot. A branch bank will be built there. The Provincial Government called for tenders to clear the new University site at Point Grey, and Hon. Dr. Young, Minister of Education stated that \$1,000,000 would be set aside out of next year's provincial revenue for the erection of the first building of the University. House rents were advancing, and a scarcity of houses prevailed. Rents were high. Activity prevailed on the water front, the wharves being

taxed to their full capacity at times. In some of the wholesale produce houses the imports and the demand were keen, especially in small fruits. Prices increased.

CONDITION OF PARTICULAR TRADES.

The cigar makers reported trade very quiet. Following is the wage schedule of the Shingles' Union:—

Roofs, plain, per M., \$1.10.
 Roofs over half pitch, \$1.25.
 Re-shingling plain, per square, \$1.75 up.
 Hips, ridges, valleys and freize, 3 cents per lineal foot extra.
 Fancy Hips and Ridges, Flashed Valleys extra.
 Shed Dormers, extra, 50 cents.
 Tight sheeted roofs, 25 cents per M., extra.
 Side shingling to be done by the square, openings to be measured in as solid, \$1.75 per square.
 For using paper on roof or sides 10 cents, extra.
 Openings between columns to be measured as two separate walls.
 Fancy shingling towers and circular work by the hour.
 Returns No. 2 Shingles—Bay windows tops, &c., extra.
 All day work, 75 cents per hour.
 Roofs over 27 feet to eaves, 10 cents per M., extra.
 Nails over 1½ inches, 5 cents extra.
 White nails, 10 cents, extra.
 Galvanized nails, 25 cents, extra.

DISTRICT NOTES.

North Vancouver.—Large street improvements were being carried out. The building trades continued active. G. C. Walker & Company, sold 100 feet of waterfront property for \$130,000.

Abbotsford.—The Carmadah Coal Company of Vancouver, purchased 1,500 acres of coal land for \$200,000. Lumber is being freighted in as fast as the local sources can cope with the demand.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chow, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was well employed during October, and the number of men working was fully equal to the number in September, and much greater than in October last year. Owing to the fine weather prevailing during the month, building operations and other outdoor works were carried on with unabated vigour. There was, however, in some trades, a considerable number of unemployed, particularly

carpenters and unskilled labourers, owing to the large number of arrivals from outside points, many having come from Great Britain and the United States. Several concrete and steel business blocks are under construction, the aggregate value of which is more than \$1,000,000, among the number being an addition to the Empress Hotel, at a cost of \$350,000, and a new Odd Fellow's Hall at a cost of \$140,000. The bank clearings for the month of September were \$9,652,304, and for the past nine months \$98,787,956, as compared with \$72,246,299, for the corresponding period of last year. The building permits for September amounted to \$406,295, and for the past nine months \$2,604,215. The total customs receipts for September amounted to \$439,674, of which \$263,793 was received from Chinese head tax. The number of passengers carried by the British Columbia Electric Railway during September amounted to 776,943, and for the past nine months 5,929,220, as compared with 3,941,309, for the same period last year, an increase of fifty-four per cent. Wholesale and retail trade continues in a healthy condition the number of retail houses being steadily added to. The musicians employed in the theatres and moving picture houses obtained an increase of wages from \$21 to \$24 per week for sidemen, and from \$28 to \$30 per week for leaders. One theatre refused to grant the increase, when a strike was declared, which remains unsettled.

CONDITION OF LOCAL INDUSTRIES.

Whale fishing.—The various whaling stations located on the west coast of Vancouver Island have had a very successful season to date. The following catches are reported up to the end of September: Kyuquot, 401; Sechelt, 450; Naden Harbour, 300; Rose Harbour, 300; making a grand total of 1,451.

Lumbering.—The lumbering industry continues in a healthy condition, all mills being constantly employed, to their full capacity.

Railway construction.—The Alberni extension of the Esquimalt and Nanaimo Railway Company will be open for traffic

in November. This line runs from Wellington, on the east coast to Alberni, on the west coast of the Island. The same company has recently let a contract for grading forty miles of a new line, running from McBride Junction to Union Bay, on the east coast of the Island. It is expected that ultimately this line will be extended to the north end of the island.

CONDITIONS OF PARTICULAR TRADES.

All the various branches of the building trades reported work as brisk for this season of the year. Carpenters reported that there were a number of unemployed, and that the competent mechanic is being injured by a surplus of "saw and hammer" men. Painters also reported a number out of work. Nearly all the branches comprised in the metal trades report work as only fair. In the shipyards work has been slack. For the first time in several months work has been dull in the printing trades, and there were some idle men in both job and newspaper departments. There was a large amount of work in hand, but yet there is a considerable number of idle men among the unskilled.

PRINCE RUPERT, B.C., AND DISTRICT.

Mr. Norman Mackintosh, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Employment in Prince Rupert at present, as for the past years since the city was incorporated, depended principally upon the construction of the Grand Trunk Pacific Railway, and the development of the various municipal improvements projected. There are no considerable industries yet established. General labour has been and is still extensively employed on street grading operations, there being much heavy rock work to do. This work has been so far undertaken principally by contract, and the labour employed has been non-English speaking to a great extent. During the present year the institution of a Public Works

Department by the Municipality has resulted in the employment of labour, selected as much as possible from resident citizen workers. While the progress made with the construction of streets from ground which but recently was virgin bush, is astonishing, considering that the city, as yet has scarcely 5,000 inhabitants. The building of residences, stores, has not been markedly active during the summer just passed. Buildings have been going up steadily, but there has never been any call for a special rush of labour to meet the demand for new buildings, and the fact that the sash and door factories which had done considerable business in the first burst of building activity here has closed down temporarily, is a sign that building is at present slack. It is not likely to be very active again until spring. The expenditure of about \$500,000 on a water supply and hydro-electric system for the city, which work has now just commenced, will provide considerable employment for some time to come, and extensive railway development within the city limits is promised by the Grand Trunk Pacific Railway Company. The construction of a \$2,000,000 drydock and ship repairing yards is part of the scheme. This work is being commenced, but so far it is surveying mainly, and there is no immediate demand for labour in connection with it. At the Khatahda River Falls, about forty-four miles from Prince Rupert, another very extensive hydro-electric scheme is being commenced by the Prince Rupert Hydro-Electric Company, and will occasion a demand for labour next year. A massive concrete-built cold storage plant for fish handling is being equipped, which will employ from 200 to 300 hands, and is the fore-runner of other industries to be established along Prince Rupert's extensive water front.

CONDITION OF PARTICULAR TRADES.

General labour in Prince Rupert is paid at the rate of 37½ cents per hour. Some municipal labour is paid 45 cents per hour, but it would be safe for intending incoming labour to calculate on \$3 per eight-hour day (for common labour),

or \$3.75 for a ten-hour day. On municipal work the intention at present is to enforce the eight-hour day, but contract labour is usually expected to work ten hours. There is very little Sunday work, but night shifts have been employed fairly frequently. There is not any active demand for any particular class of skilled labour in Prince Rupert as yet. The wages are as follows: carpenters get 62½ cents per hour for an eight-hour day. Masons are paid 62½ cents an hour or \$5 a day. There is not a great demand for masons, but on city retaining walls, on certain street construction, they are employed at this rate. Sheet metal workers and plumbers earn \$6 per day of eight hours. Blacksmiths make \$4.50 a day, steel sharpeners, \$4.00. Furriers \$4.50 and sometimes \$5. Mechanical work is not very extensive as yet, but machinists in iron shops get 40 cents per hour, lathe-men 45 cents, and shop-foremen, 50 cents per hour. All have an eight-hour day as a rule. Overtime is paid time and a half; Sunday labour, double. Longshoremen earn 50 cents per hour, and have been fairly well employed this summer. They will be slacker this winter probably, but next year will see an increase in waterfront work generally. Printers' wages are as follows: Compositors, \$30 per week for an eight-hour day. Full foremen, \$36 per week. Job foreman, \$33 and machinist operator, \$36. Overtime, time and a half. Sundays, double. Railway workers are paid at work train rate, until the completion of the road. Labourers from 30 cents per hour, with slightly better rates for the best men at discretion of foremen. Bridge building carpenters are paid 40 cents per hour to 50 cents, and machine shop men, 40 cents to 50 cents. The eight-hour day does not necessarily prevail on the railway work, but exists under certain conditions.

Labour in Prince Rupert, generally, is fairly well settled. There have been periods of serious unrest, and these are liable to recur. Cost of living is high in the city, and conditions of labour in wet weather are disagreeable. Regarding general conditions in the city it may be stated that there will not be any very

brisk activity in any direction immediately, but next spring, and each stage nearer to the completion of the Grand Trunk Pacific Railway will increase enterprise and employment.

NANAIMO, B.C., AND DISTRICT.

Mr. A. H. Spencer, correspondent,
reported as follows:—

GENERAL CONDITION OF LABOUR.

There was not much change in the condition of employment in this district, compared with the previous month, although there were more men drifting here from interior parts looking for work, outside work not having stopped much yet, owing to the fine weather. There was exceptional activity in the coal mines in this city and district. Transportation, both passenger and freight, keeps on steadily increasing, causing larger boats to be put on the run here. Business men, wholesale and retail, reported business to be good and steady. There were no changes in rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy with their fall work.

Fishing.—There was very little activity among the fishermen outside of catching fish for home consumption, although there are a good many making preparations for the herring run which is due at any time from now.

Lumbering.—The saw mills were all working steadily, some of them night and day, and the logging camps are also active.

Mining.—The coal mines of the district were all working full time, and the ones in this city are being pushed to their full capacity.

Railway construction.—The construction of the extension to the Esquimalt and Nanaimo Railway to Alberni, is about finished, but tenders have been called for and let for clearing the right of way for an extension to the Comox district.

Other industries.—The city is still busy

on sewerage and cement sidewalks and street paving, employing a number of men who, so far, have not lost much time from wet weather.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, lathers, plasterers, painters and paperhangers were active. Carpenters and joiners are very active completing new buildings and starting up a few more. Plumbers were very

active, the new sewerage making lots of work for them. Builders' labourers were well employed for the time of year. Blacksmiths and carriage makers reported work as active. Printers, and cigar makers reported work fair. Teamsters and expressmen were well employed during the month. Those men who have work at unskilled labour have been fairly well employed during the month, but there were quite a lot of men looking for work.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF OCTOBER, 1911.

ON September 11, an application was received in the Department for the establishment of a Board of Conciliation and Investigation as follows:—

On behalf of certain employés (clerks of all departments, freight shed foremen, checkers and truckers, station baggage-men, sleeping and dining car employés, storemen, accounting department, agents and yardmasters, and car-checkers), members of the Canadian Brotherhood of Railroad Employés, employed by the Canadian Pacific Railway Company at Calgary and Medicine Hat, Alta. The number of employés affected by this dispute is given as 6,500 directly, and an equal number indirectly.

Reports Received.

During the month of October reports were received in the case of three disputes as follows:—

1. In the dispute between the Grand Trunk Railway Company and its machinists, machinists' helpers and specialists, members of the International Association of Machinists.

2. In the dispute between the Grand Trunk Pacific Railway Company and its machinists, members of the International Association of Machinists.

3. In the dispute between the Grand Trunk Pacific Railway Company and its boilermakers, members of the International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America.

Other Proceedings under the Act.

On August 31, the Department received an application for the establishment of a Board of Conciliation and Investigation on behalf of certain employés of the Canadian Pacific Railway Company at Calgary and Medicine Hat, Alta. The application as received at that time did not conform in all respects with the requirements of the Industrial Disputes Investigation Act, and was accordingly returned for correction, being received in its amended form on September 11. The employés concerned were designated as clerks of all departments, freight shed foremen, checkers and truckers, station baggage-men, sleeping and dining car employés, storemen, agents and yardmasters, and car-checkers; being members of the Canadian Brotherhood of Railroad Employés. It was estimated that 6,500 employés were directly affected by this dispute, and an equal number indirectly. In the application it was stated that the dispute in question related to the dismissal of two employés for the sole reason that they belonged to the Brotherhood; also to alleged intimidation of and discrimination against other employés for the same reason.

A Board was established by the Minister on October 19, Mr. John Anthony McDonald, of Halifax, N.S., being appointed a member thereof on the recommendation of the employés concerned.

In the September issue of the *Labour*

*Gazette*¹ it was stated that proceedings in connection with the application of the machinists, machinists' specialists and helpers employed on the lines of the Grand Trunk Railway Company had been suspended owing to the resumption of negotiations between the Company and the employés concerned. On September 29, the Department received a telegraphic communication from the representatives of the employés stating that no settlement had been arrived at, and requesting the immediate establishment of a Board of Conciliation and Investigation. A Board was accordingly established by the Minister on September 30. The Honourable Wallace Nesbitt, K.C., and Mr. J. G. O'Donoghue, both of Toronto, Ont., were appointed members thereof on the recommendation of the employing Company, and of the employés respectively; and the Honourable Mr. Justice Teetzel, also of Toronto, Ont., was appointed Chairman on the joint recommendation of the foregoing members of the Board. On October 23, the Board presented its report, the text of which is given in following pages of the current number of the *Labour Gazette*.

In the October number of the *Labour Gazette*¹ reference has been made to the establishment of a Board of Conciliation and Investigation appointed under the terms of the Industrial Disputes Investigation Act, to inquire into and adjust certain matters in dispute between the Grand Trunk Pacific Railway Company and its machinists and boilermakers respectively. During the month of October a change was made in the personnel of this Board, the Honourable Wallace Nesbitt, K.C., of Toronto, Ont., member appointed on the recommendation of the employing Company, having resigned, and Rev. J. L. Gordon, of Winnipeg, Man., being appointed in his place. This latter appointment was made by the Minister of Labour, the Company having failed to nominate a successor to Mr. Nesbitt. The Board as finally constituted was as follows:—Rev. J. L. Gordon, of Winnipeg, Man., and Mr. Thomas J. Murray, of Winnipeg, Man., appointed on behalf of the Company and the employés respectively; and Dr. J. W.

Sparling, of Winnipeg, Man., Chairman. The report of the Board of Conciliation and Investigation was received by the Minister of Labour on October 23, and is referred to in succeeding pages of the current number of the *Labour Gazette*.

Reference has also been made in the October number of the *Labour Gazette*¹ to the application of the linemen, installers, employed by the British Columbia Telephone Company, operating lines in the Province of British Columbia, for the establishment of a Board of Conciliation and Investigation to inquire into and adjust certain differences between that Company and the above mentioned employés. These differences related principally to the employés' demand for increased wages and to the Company's attitude towards union men.

A Board was established by the Minister of Labour on September 29. Messrs. William Henry Barker and Charles Enright, both of Vancouver, B.C., were appointed members thereof on the recommendation of the employing Company and the employés respectively; and on October 6, the Board was completed by the appointment, on the joint recommendation of the foregoing members of the Board, of Mr. John Harold Senkler, K.C., also of Vancouver, B.C., as Chairman. At the close of the month of October the Board had not completed its work of investigation.

The Department was furnished, on November 3, with the terms of an agreement made on October 24, between the Dominion Coal Company, of Glace Bay, N.S., and its employés, members of the Provincial Workmen's Association, providing for a two year's continuance from January 1, 1912, of the contract at present in force. The agreement in question was originally made in March of 1908, as the result of an inquiry by a Board of Conciliation and Investigation constituted under the Industrial Disputes Investigation Act. The agreement of March, 1908, was renewed in November of 1909, for a period of two years. The terms of the agreement of October 24, 1911, above referred to, are published elsewhere in the present issue of the *Labour Gazette*.

¹See *Labour Gazette* for October, 1911, pages 349–350.

¹See *Labour Gazette* for October, 1911, page 350.

DISPUTE BETWEEN THE MONTREAL STREET RAILWAY COMPANY AND EMPLOYEES.

Reference has been made in the August and September numbers of the *Labour Gazette*¹ to the establishment, by the Minister of Labour, on July 19, of a Board of Conciliation and Investigation to which certain matters in dispute between the Montreal Street Railway Company and certain of its employés, relative to alleged dismissals and discrimination on the part of the Company, against members of the Street Railway Employés' Union, were referred for adjustment. The Board in this matter was constituted as follows:—the Honourable Mr. Justice Fortin, of Montreal, Que., Chairman; Mr. J. L. Perron, K.C., of Montreal, Que., appointed on behalf of the employing Company; and Mr. Charlemagne Rodier, of Montreal, Que., appointed on behalf of the employés. On August 15, the Chairman was served with a petition for a writ of injunction asking that proceedings before the Board should be forbidden by the courts as being *ultra vires*, the petition in question being presented on behalf of the Montreal Street Railway Company. On August 15, judgment was given on this petition directing the maintenance of the *statu quo*. On October 27 the Chairman of the Board was served with a copy of a judgment by the Honourable Mr. Justice Charbonneau, of the Superior Court, Montreal,

authorizing the granting of a writ of prohibition against further procedure by the Board of Conciliation and Investigation, until final judgment had been rendered on the point raised by the Montreal Street Railway Company, relative to the constitutionality or unconstitutionality of the Industrial Disputes Investigation Act, 1907, under which the Board in this matter had been constituted.

The judgment of Mr. Justice Charbonneau is in the following terms:

"The Court, after hearing the parties on the motion asking that a Writ of Prohibition be issued against the Defendant Board to prevent it from proceeding in above the mentioned matter:—

"Considering that, among other means invoked by the Applicant in support of its request, it is alleged that the Industrial Disputes Act, 1907, is unconstitutional, and not within the power of the Parliament which passed it;—

"Considering that, in spite of the opinion of this Court being against the claim put up by said Applicant on that point, it is in the interest of justice that this matter be further argued;—

"Allows the issuance of the writ asked for, and declares that the *statu quo* order granted on August 15, 1911, by the Honourable Mr. Justice Pagnuelo, and since continued remains in force until final judgment."

¹See *Labour Gazette* for August, 1911, page 138; also for September, 1911, page 248.

I. REPORT OF BOARD IN DISPUTE BETWEEN THE GRAND TRUNK RAILWAY COMPANY AND ITS MACHINISTS, MACHINISTS' SPECIALISTS AND HELPERS, MEMBERS OF THE INTERNATIONAL ASSOCIATION OF MACHINISTS.

THE Minister of Labour received on October 23 the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Grand Trunk Railway Company and its machinists, machinists' specialists and helpers, members of the International Association of Machinists.

In the application it was stated that

the dispute grew out of the employés' demand for a new schedule of agreement with the Company, the number of employés affected by this dispute being given as 2,000 directly and 6,000 indirectly.

The Board was established by the Minister of Labour on September 30, and consisted of the Honourable Mr. Justice Teetzel, of Toronto, Ont., Chair-

man, the Honourable Wallace Nesbitt, K.C., of Toronto, Ont., nominated by the Company, and Mr. J. G. O'Donoghue, of Toronto, Ont., nominated by the employés. The Board met on October 14, in Montreal, and continued to hold sessions from that date until October 21.

In the report it is stated that the majority (Honourable Mr. Justice Teetzel, Chairman, and Honourable Wallace Nesbitt, the Company's nominee) find that owing to the system of payment prevailing on the Grand Trunk Railway, they do not see how it is possible for the Board to lay down any schedule or minimum rate without dislocating a system having for its basis merit and qualification of the individual workman, based on the foreman's judgement. Owing, however, to the increased cost of living it is felt that the rates of pay have not kept pace in all instances, and the majority recommended that master mechanics take up the matter with the foremen and increase the remuneration according to the qualifications of the individuals. The shop rules which had previously been adopted in May, 1907, are recommended by the Board as being fair and reasonable, with the modification of Rule 11, namely that a man with a grievance shall have a right of appeal to the Master Mechanic, and from him to the Superintendent of Motive Power.

Mr. J. G. O'Donoghue, appointed on behalf of the employés, holds that the men are entitled to a grievance committee and that a minimum rate on a par with that of other Canadian roads should be established; also that double time should be paid for overtime from midnight to six a.m., and that apprentices should share in the increases above mentioned.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

We, Mr. Justice Teetzel, J. G. O'Donoghue and Wallace Nesbitt, members of the Board of Conciliation appointed under the Industrial Disputes Investigation Act, 1907, and Amendments, in a dispute between the machinists in the

employ of the Grand Trunk Railway Company, beg to report that we met on the fourteenth day of October, 1911, in the Board room, at the Grand Trunk Offices, in the City of Montreal, and subsequently in the Home Life Building on the nineteenth, twentieth and twenty-first days of October, 1911, and heard and conferred with the parties fully.

In May, 1907, a Board of Conciliation, consisting of Professor Adam Shortt and J. G. O'Donoghue and Wallace Nesbitt, investigated a dispute between the same parties. That Board and the parties unanimously agreed upon certain shop rules as being fair and reasonable, and also agreed upon a schedule of pay promulgated by the Grand Trunk at that time, as being under all the circumstances fair and reasonable. We have had the same rules fully discussed before us, and with the modification of Rule No. 11 so as to make the meaning clear, namely, that a man with a grievance shall have a right of appeal to the Master Mechanic, and from him to the Superintendent of Motive Power, we, the majority of the Board, adopt the shop rules of the Grand Trunk which were at that time adopted.

Owing to the system of payment which prevails in the Grand Trunk, and which has been fully explained to us, the majority of the Board do not see how it is possible for the Board to lay down any schedule of minimum rate without dislocating the system which has as its basis the payment according to the merit and qualification of the individual workman based upon the judgement of his foreman. The evidence, however, satisfies us that owing to the increased cost of living since 1907, the increases which have been granted by the Grand Trunk since that time in the rates of pay of the men, have not in a number of instances kept pace with the necessities of the men, while in other instances the rates of pay seem to be fair and reasonable.

The majority of the Board strongly recommend therefore that the Master Mechanics take up with their foreman, at the earliest possible moment, the individual cases in the various shops and

round-houses, where the lower rates of wages obtain, and should make advances in pay according to the merit and qualification of the individual, so that the pressure of the increased cost of living will be relieved by an advance in remuneration.

The majority of the Board are glad to report that the Superintendent of Motive Power expresses himself as anxious to do everything possible to meet the wishes of his men. The system of individual merit, while productive of much good in its result, is open to the criticism that the less efficient do not obtain the advantages which would accrue to them under a general fixed minimum.

The majority of the Board award that the rules as aforesaid remain in force, and that in our opinion the rates of pay should be advanced in a number of individual instances.

Mr. O'Donoghue is of the opinion that the men are entitled to have their grievances presented through a Committee, and that a minimum rate, on a par with that in force on other Canadian roads, should be established. This would give to the men an increase of wages that would, in some measure, compensate for the increased cost of living. He is also of opinion that double time should be paid for overtime from midnight to six a.m., and that apprentices should share in the increase above mentioned.

Dated this twenty-first day of October, 1911.

(Sgd.) J. C. TEETZEL,
Chairman.

WALLACE NESBITT,
Representing the Co'y.

J. G. O'DONOGHUE,
Representing the men.

II. JOINT REPORT OF BOARDS IN DISPUTES BETWEEN THE GRAND TRUNK PACIFIC RAILWAY COMPANY AND ITS MACHINISTS AND BOILERMAKERS RESPECTIVELY.

THE Minister of Labour received, on October 28, the joint report of the Boards of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Grand Trunk Pacific Railway Company and its machinists and boilermakers respectively.

In the application for the establishment of these Boards, it was stated that the differences in question related to wages, hours, and other conditions of employment, the number of employes affected in each case being 150.

The Boards as originally formed were composed of the Rev. J. W. Sparling, Winnipeg, Man., Chairman; the Honorable Wallace Nesbitt, K.C., of Toronto, Ont., appointed on the recommendation of the employing Company; and Mr. Thomas J. Murray, of Winnipeg, Man., appointed on the recommendation of the employes. The Department was subsequently notified that Mr. Nesbitt

was unable to act as the representative of the Company on these Boards; and, the Company failing to nominate a successor to Mr. Nesbitt, the Minister of Labour appointed the Rev. J. L. Gordon, of Winnipeg, Man., in his stead.

Prior to the appointment of the Rev. J. L. Gordon, the Chairman and Mr. Murray held meetings in Winnipeg, on October 2 and 3, and prepared a report of same, dated October 11, which was received by the Department, together with the final report, dated October 25. The final report in effect sustains the demands of the employes, and is signed by each member of the Board.

Interim Report of Board.

The text of the report prepared by the Chairman and Mr. Murray on October 11, prior to the appointment of Rev. J. L. Gordon as a member of the Board, is as follows:—

Winnipeg, Man., October 11, 1911.

F. A. ACLAND, Esq.,
Deputy Minister of Labour,
Department of Labour,
Ottawa, Ont.

SIR,—In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of the disputes between the Grand Trunk Pacific Railway Company and its employés, being members of the International Association of Machinists, and of the International Brotherhood of Boilermakers, Iron Ship Builders and Helpers of America, the undersigned, two members of the Boards of Conciliation and Investigation, established under the provisions of the Industrial Disputes Investigation Act 1907, to whom the above disputes were referred under the provisions of the said Act, beg to report as follows:—

Two Boards were established, one to deal with the dispute between the Company and its machinists, and the other to deal with the dispute between the Company and its boilermakers, but as the matters in dispute are similar in each case, and as similar proceedings have been taken by the two Boards up to the present time, it is considered that both disputes may be dealt with in one report.

The Boards were composed of the Rev. J. W. Sparling of Winnipeg, Chairman, Thomas J. Murray of Winnipeg, appointed on the recommendation of the employés, and Wallace Nesbitt, K.C., of Toronto, appointed on the recommendation of the Company. Immediately upon the formation of the Boards it was found by the two members resident in Winnipeg, that the employés were considerably annoyed on account of the delays which had occurred in the granting and formation of the Boards. It appeared that the Boards had been applied for by the employés about August 1, but had not been granted until August 23. The formation of the Boards was not completed until September 5. The Chairman and Mr. Murray at once endeavoured to get into communication with Mr. Nesbitt, with a view to an early

Session, hoping by prompt action to allay the feelings of disappointment and dissatisfaction entertained by the employés towards the Department of Labour resulting from delays. It was found that Mr. Nesbitt had gone to Northern Ontario and could not be communicated with. It was felt that if the breach between the Company and its employés was not to be widened the Board should take up the matter of investigation without delay, and representations were then made to your Department with a view to having the Company nominate another representative who could act immediately. Word was then received from your Department that Mr. Nesbitt had withdrawn from the Board, and that his resignation had been accepted, and the Company had been requested to nominate a substitute. A week later, no nomination having been received from the Company, it was suggested to your Department that you appoint a third member under the provisions of the Act made for such a case. Then the Company withdrew the resignation of Mr. Nesbitt, and he was re-appointed a member of the Board. These negotiations occupied a period of two weeks and needless to say the further delay was very provoking to the employés. On September 18, the Chairman called a meeting of the Board to be held in Winnipeg, on October 2, feeling that the interval allowed would give the Company's representative every opportunity of being present. Your Department and Mr. Nesbitt were both notified of the meeting.

On October 2, the meeting called as above was held and there were present at this meeting the Chairman of the Board, Mr. Murray, the Committees representing both machinists and boilermakers and Mr. Robb, an official of the Company. Mr. Robb made it plain that he had not appeared in his official capacity, that he had no instructions or authority to represent the Company, that he could not bind the Company by any action of his, but that he was present simply because Mr. Murray had requested Mr. Chamberlin, the Vice-

President of the Company, to have some official of the Company present to meet the members of the Board.

Word had been received in the interval from Mr. Nesbitt to the effect that he could not be present at this meeting, but that he might be able to be present later on.

The representatives of the employés expressed themselves as ready and anxious to proceed with the investigation. After spending two days in going into some of the matters in dispute without being able to make any real progress, because of the fact that the Company was not represented officially, the Board adjourned. Before the adjournment the employés requested that we should make a report to your Department, but the Chairman did not feel inclined to do so without making a further attempt to secure the attendance of the Company's representative.

It was represented to the Board by the Committees of the employés that the latter were asking only for rates of pay and working rules similar to those existing on other Railway lines in the same territory. It was also represented to the Board by the Committees of the employés that Mr. Chamberlain, Vice-President of the Company, had stated that while the Company was willing to grant the same rates of pay as were being given by the other roads, the Company would not grant any set of worknig rules other than those to be granted by the Board of Conciliation, which it was expected would deal with the disputes now existing between the Grand Trunk Railway and its employés in the mechanical department, and that if the Board of Conciliation recommended anything more than the Company was willing to give in this regard, the Company would not accept the findings of this Board. The position taken by the employés was that if this statement of Mr. Chamberlin's correctly represented the attitude of the Company it was useless spending further time investigating the matter.

After the adjournment of the Board the representatives of the employés dispersed to their respective homes,

stating that it was not their intentions to return before the Board until some reasonable assurance was given on behalf of the Company that the requests of the men would be considered by this Board on their merits, without reference to Eatsern Disputes or the finding of the Board of Conciliation that may be appointed to deal with such disputes.

As the situation had begun to take on a serious aspect, and as it looked as though a strike might occur, the Chairman of the Board at once notified by wire both your Department and Mr. Nesbitt fully as to the situation. Since that time no official word has been received from Mr. Nesbitt. Word was however been received from your Department to the effect that Mr. Nesbitt had again resigned from the Board.

In the meantime we understand that pursuant to an ultimatum served on the Company by the men, a strike has been declared. We understand that the men claim that prior to the strike a virtual lockout was declared by the Company.

We believe that had it been possible to investigate the disputes before a full Board, with representatives of both parties to the dispute present, it would have been possible to avert open hostilities, even if not actually to settle the differences. While the investigation made at the Sessions of the Board held on October 2 and 3, possibly did not get to the root of the difficulty, nevertheless, judging from the attitude of the representatives of the employés present, had the Company been represented on the Board, and before the Board by someone in authority, we believe the two parties to the dispute could have been brought much closer together than they then appeared to be. We consider that the employés have shown great patience and forbearance in view of the many delays which occurred prior to and after the formation of the Board.

All of which is respectfully submitted.

(Sgd.) J. W. SPARLING,
Chairman.

THOS. J. MURRAY.

Final Report of Board.

The later report of the Board, under date of October 25, bearing signatures of all three members, is as follows:—

WINNIPEG, MAN., October 25, 1911.

HON. T. W. CROTHERS,
Minister of Labour,
Ottawa, Ont.

SIR,—In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of the disputes between the Grand Trunk Pacific Railway Company and the Machinists and Boilermakers in its employ.

The Board of Conciliation to whom the above disputes were referred, beg to report as follows:—

Two Boards were established, one to deal with the dispute between the Company and its Machinists, and the other to deal with the dispute between the Company and its boilermakers, but as the matters in dispute are similar in each case, and as similar proceedings were taken by both Boards, it is considered that both disputes may be dealt with in one report.

The Boards as originally formed, were composed of the Rev. J. W. Sparling, of Winnipeg, Chairman, Thomas J. Murray of Winnipeg, appointed on the recommendation of employés, and Wallace Nesbitt, K.C., of Toronto, appointed on the recommendation of the Company. Later, owing to the resignation of Mr. Nesbitt, the Rev. J. L. Gordon of Winnipeg, was appointed third member of the Board.

A very long delay occurred between the time of the application for the appointment of the Board, and the date when the work of investigation actually commenced, two months and a half. The views of the Board as to where the responsibility for delay should be placed, are all fully set out in a report prepared on October 11, immediately prior to the appointment of the Rev. J. L. Gordon, which appointment resulted in postponing the forwarding of such report.

It is now considered advisable, however, to accompany our present report by the earlier one.

Throughout these long delays the employés have shown a conciliatory and forbearing spirit, but apparently convinced that they would not be able to obtain an investigation, they decided, subsequent to the meetings of the Board, on October 2 and 3 (above referred to) to prepare for a strike. On October 4, the employés delivered an ultimatum to the Company asking for an acknowledgement of their right to a Schedule Agreement and a minimum wage, intimating that refusal means a strike, and asking for an answer by noon on the sixth. On the morning of October 6, there occurred what the employés claim was a lockout. The shops at Rivers and Edmonton, the two most important shops of the system were closed. The Company claims that there was no lockout, but that the shops were simply closed for repairs. No answer was given to the employés' ultimatum, and on October 10, a strike commenced.

On October 12, the Rev. J. L. Gordon was appointed the third member, and the real work of the Board at once commenced. The men were asked by the Board to facilitate the work of conciliation by returning to work, pending investigation of dispute, and the men agreed to do this providing that they were restored to their former positions "without discrimination and without prejudice. The Company was then asked by the Board to agree to the return of the men to work under these conditions, but up to this date the Board has received no answer to its request. The Rev. Dr. Gordon personally attended upon officials of the Company, with a view to ensuring their co-operation in the work of investigation and conciliation, but while they acknowledged him as the Company's representative, they failed to give him any assistance.

Pursuant to notice given to all parties, the Board began its sessions on October, 16. The investigation showed that the more important requests of the men are as follows:—

1. A schedule agreement.
2. A minimum rate of wage.
3. Committee representation on grievances.
4. Nine hour day.
5. Definition of trades.

Generally speaking, the men asked for conditions similar to those in existence on other roads in the same territory.

The investigation extended over a period of five days. The inquiry assumed a wide scope, and information was gained from every available source. Employés of the Company engaged in each of the trades involved in the dispute, were called from points extending over most of the road. Witnesses were also summoned from the Canadian Pacific and Canadian Northern Roads, and expert opinions obtained on the various matters under consideration. The investigation was extended so as to include in a general manner the Canadian Pacific Railway Company and Canadian Northern Railway Company, as well as the Grand Trunk Pacific Railway Company, and in a general way all other Canadian roads and many American roads. The Board took into consideration the fact that the Canadian Northern Railway Company and the Grand Trunk Pacific Railway Company are both new roads, that each is still to a large extent a road of extension and construction, that they extend practically over the same territory, and therefore the Board concluded that a careful comparison of the conditions affecting these Companies and their employés, and the relations existing between them would enable the Board to arrive at a reasonably definite conclusion as to the fairness of the demands of the men. The Board had before it in detail, the official answers given by the Company to the requests of the men, and the written arguments advanced by the Company to show why such requests should not be granted. These answers and arguments were most carefully investigated and considered, and independent advice regarding them obtained from experts summoned before the Board.

As a result of its inquiries the findings of the Board are as follows:—

The number of employés involved in the dispute is approximately 300. Their requests are of vital importance; they have been conceded by nearly all the railroads in Canada and the United States, and unless some satisfactory settlement is reached at the present time, it seems almost inevitable that the differences involved in this dispute must recur in the future and become more acute with the increasing number of employés.

Omitting certain minor details which the employés do not insist upon, the requests of the men are, in the opinion of the Board, fair and reasonable. Similar conditions were granted by the Canadian Northern Railway Company and Canadian Pacific Railway Company nearly ten years ago, and have ever since been conceded. They were allowed by the Canadian Northern Railway Company when that road's staff of mechanics was much smaller than is the present staff of the Grand Trunk Pacific Railway Company.

The conditions asked for are almost identical with those now in operation on other roads in same territory. We are informed that similar conditions prevail on all other important roads in Canada, except the Grand Trunk Railway Company, and on at least eighty-per cent of the American roads.

The Board can see no sufficient reason why the Grand Trunk Pacific Railway Company should be exempt from the necessity of granting to its employés an agreement and rates of pay such as are recognized as fair and reasonable by so many other roads. A number of the conditions asked for are already in effect on that portion of the Grand Trunk Pacific Railway under Government control, and apparently no difficulty or disadvantage to the Company accrues therefrom.

✱ The men asked for a Schedule Agreement such as other roads have. This involves no new principle. It has long been recognized that employés are entitled to have some voice in the decision as to conditions under which their services shall be performed and as to the rate at which they shall be compensated. Up to the present on the Grand Trunk

Pacific Railway the rates and conditions have been arranged by the Company, without any consultation whatever with the men. Co-operation in these matters between the employer and employé has worked out most satisfactorily on other roads, and has apparently tended to reduce friction and encourage harmony and contentment.

The Company, in its official reply to the requests of the men, has used as its chief objection the argument that the conditions asked for are impracticable, and would tend to produce friction. This objection is not sustained by the information laid before the Board. On the contrary, the Board considers, after a most thorough investigation, that the very opposite result would be achieved.

A minimum rate of pay is asked for. This is the system in operation on most railroads, including the Canadian Pacific and the Canadian Northern Railway Companies. The present sliding scale in operation on the Grand Trunk Pacific Railway tends to produce dissatisfaction and results in apparent injustice.

A difference was found in the statements before the Board as to the rate of wages actually being paid on the Grand Trunk Pacific Railway. The Company stated it was prepared to pay and was actually paying as high wages as the Canadian Pacific Railway Company. The employés, on the other hand, stated that such was not the case, that, about twenty-five per cent. of their number were in receipt of wages slightly less than the Canadian Pacific Railway Company's minimum wage, and that the remainder were receiving wages decidedly lower. By a careful examination of the pay sheets produced by the Company before the Board, it was found that the statements of the men were fully sustained and corroborated. The minimum wage asked by the employés is as low as the lowest minimum wage now paid west of the Lakes, and lower than some others now paid in same territory.

Committee representation is also asked for. The operation of this principle appears to be essential. It is almost in universal operation in Canada and the

United States. In practice it is found to be a most satisfactory method of adjusting differences important and unimportant which continually arise between employer and employé, especially where, as in the case of a railroad corporation, the employé rarely comes in direct contact with the higher officials. He should have the right to appeal from decisions of foremen and minor officials to higher officers through a regularly constituted grievance committee. The Company claims no grievance existed. Undoubtedly grievances have existed but perhaps they have not been presented through lack of facilities or through fear of results to the individual.

The employés asked for a nine hour day. The present working day on the Grand Trunk Pacific Railway is ten hours, although on other roads in the same territory it is only nine hours. Also a nine hour day is in operation on that portion of the Grand Trunk Pacific Railway under Government control. The Company claim a nine hour day is impracticable. It seems to work out very well on other roads, and we cannot see how conditions are so different as to make it impracticable for the Grand Trunk Pacific Railway Company. Through the system of overlapping, such as is in operation on other roads, it is possible to have employés in the shops at all hours even with a shorter working day. The Company also claims that their employés do not desire a shorter working day, but careful investigation has failed to show convincing evidence in favour of this contention. Satisfactory information, however, was received showing that a reasonable shortening of the working day usually results in increased efficiency and improved social, domestic, and intellectual conditions.

A definition of trades is asked for. This is something also acceded to by most railroads. Much of the present friction seems to have resulted from lack of proper definition of the duties of various classes of employés. The complaint of skilled mechanics is that the absence of this provision results in general lowering of wages. In answering this

request, the Company states that if granted, it would be necessary to dismiss many of the less skilled employés. The men hold that such a course would not be necessary, but that with proper definition of the duties of each, and with a reasonable minimum rate of wages, all present employés could be retained in the service without reduction in the wages of any. Your Board sees no good reason to dissent from this position.

The Board is of the opinion that the employés fully complied with the letter and spirit of the Industrial Disputes

Investigation Act, before declaring a strike. Without attempting to make a finding as to whether or not there was actually a lockout in existence prior to the strike, the Board is satisfied that the employés were convinced as to the existence of a lockout for some days before the strike was declared.

All of which is respectfully submitted.

(Sgd.) J. W. SPARLING,
Chairman.

" JAMES L. GORDON,
" THOS. J. MURRAY.

ALIEN LABOUR CASE AT VICTORIA, B.C.

THE Department of Labour was furnished on October 23, with the text of a recent conviction under the Alien Labour Act, in Victoria, B.C. The conviction was made under date of September 5, by the Police Magistrate of Victoria, B.C., who imposed a fine of \$100 on the firm of Grant, Smith and Company, contractors of that City, for bringing in from Seattle under contract one John Thompson, labourer, for employment at Victoria.

The magistrate's judgment is in the following terms:

Tuesday, September 5, 1911.

The charge is that on June 12, 1911, the accused did, knowingly, encourage one John Thompson, a citizen of the United States of America, to immigrate from the City of Seattle, in the State of Washington, one of the United States of America into the City of Victoria, in the Province of British Columbia, Dominion of Canada, under contract made previous to the importation or immigration of the said John Thompson into Canada, there to work as a labourer for Knowles & Thompson, a firm of sub-contractors on the Vancouver Island portion of the Canadian Northern Railroad, contrary to the "Alien Labour Act."

Section 2 of the "Alien Labour Act," Chapter 97, Revised Statutes of Canada, provides "It shall be unlawful for any person, Company, partnership or Cor-

poration in any manner to prepay the transportation or in any way to assist, encourage or solicit the importation or immigration of any alien or foreigner into Canada, under contract or agreement parole or special, express or implied, made previous to the importation or immigration of such alien or foreigner, to perform labour or service of any kind in Canada."

Section 3 of the Statute provides that for every violation of these provisions the person, partnership or Company violating the same by knowingly assisting, encouraging or soliciting such immigration, shall forfeit and pay a sum not exceeding \$1,000, and not less than \$50.

It was proved that Lilyman & Renard are employment agents having an office and carrying on business in Seattle, and further that Grant, Smith & Company are contractors for a section of the Canadian Northern Railway, while Knowles & Thompson are their sub-contractors, carrying on construction work at a camp about twenty-two miles from Victoria. It appeared from the evidence that John Thompson, who is a Norwegian by birth, but a naturalized citizen of the United States, in company with eight others, Norwegians and Swedes, went to the office of Lilyman & Renard June 12, where they were attracted by a notice to the effect that labourers were wanted for British Columbia. They each paid Lilyman \$5 and received from him a ticket. The ticket handed to

Thompson was produced and is as follows:

Deliver this ticket to the Employer.
Lilyman & Renard,
Employment Agents.

SEATTLE, WASHINGTON, June 12, 1911.

Name—John Thompson.
Hired as—Labourer.
For—Knowles & Thompson, cr. Grant, Smith & Co.
At—via Victoria.
Wages—\$2.50 per day. Board—\$5.25 per week.

LILYMAN & RENARD.

Signature) John Thompson.
Report at Office, 8 a.m., 6-13'11.

Lilyman & Renard—purchased their tickets for Victoria and on the same day put them on the steamer, and upon their arrival they were met by a man and taken to a hotel, and upon the following morning were driven out to Knowles & Thompson's camp, but upon their arrival they were informed by Mr. Thompson that no day-work men had been ordered. He endorsed a note to that effect on the ticket produced, and he told them that they were not required. The men then walked back to Victoria and went to the office of Grant, Smith & Company where they met Mr. A. R. Ringe, who describes himself as the manager and book-keeper of the Company. They then informed Mr. Ringe that they could not get work and showed him the tickets obtained from Lilyman & Renard, and were told by him that the only thing that he could do would be to send them to the other camps, where he offered to give them work and to pay their fares there. This offer was not accepted by the men, who demanded the return of the \$5 paid in Seattle and their return fare to that City, which was refused.

It is contended for the defence that there is no evidence connecting the defendants with Lilyman & Renard or whereby they are answerable for the action of that firm in Seattle, but in view of the close relationship existing between Grant, Smith & Company and their sub-contractors, Knowles & Thompson, and the admission of the defendants' manager that it is part of his work to keep the camps supplied with men, together with the endorsement upon the

ticket produced "No day work men ordered," from which it is apparent that the arrangement as between these firms is for the sub-contractors from time to time to order through Grant, Smith & Company, such men as they require, I can only come to the conclusion that Lilyman & Renard were acting as the authorized agents of Smith, Grant & Company and that the latter are guilty of a violation of the provisions of the "Alien Labour Act" in encouraging knowingly, through their agents, the immigration of the man John Thompson into Canada under a contract previously made to perform labour in Canada.

It is further contended for the defence, that by virtue of an Order-in-Council passed at Ottawa the regulations relating to immigration of railroad labourers had been relaxed until October 1 next, and a copy of a notice from the Superintendent of Immigration at Ottawa was produced by Mr. John W. Speed, a Dominion Immigration Inspector at Victoria.

A copy of the notice follows:

NOTICE.

594511 J. M. M.

OFFICE OF SUPERINTENDENT OF
IMMIGRATION.

OTTAWA, March 1, 1911.

In order to meet the demand for railroad labourers in Canada last year the regulations relating to money qualifications and "continuous journeys" were relaxed for a certain period.

This year railroad labourers going to assured permanent employment at construction will be admitted to Canada from May 1 until September 30, both dates inclusive, irrespective of money qualifications or continuous journey, provided they are natives or citizens of the countries, or some one of the countries, in which immigration effort is made by Canada, *i.e.*, Great Britain, Ireland, France, Belgium, Holland, Germany, Denmark, Iceland, Norway, Sweden, Switzerland, or the United States of America, and provided also that the immigrants are suited to railroad work and are in all other respects desirable,

have sufficient money to carry them to the work for which they have been engaged, and documentary or other sufficient evidence of definite employment to go to.

On October 1, 1911, this relaxation of the regulations will come to an end without further notice.

(Sgd.) W. D. SCOTT,
Superintendent of Immigration.

The Order-in-Council authorizing this notice was not produced, and in so far as the notice seeks to carry out any regulation formulated under the authority of the Immigration Act, it is not material to the present prosecution, which is under the provisions of the Alien Labour Act to which I have already referred.

The latter part of the notice, however, under which "documentary or other sufficient evidence of definite employment to go to" is required, has some bearing upon the case before me as a ground for leniency in the amount of the fine to be imposed.

It is clear that while the Executive-Council at Ottawa, has power under the authority of Section 37 of the Immigration Act by Order-in-Council to relax, within certain restrictions, the provisions governing the admission of immigrants into Canada, no power is reserved by the Alien Labour Act to the Executive, by regulation, to in anyway relax or suspend the operation of this Act, but it is evident that the Dominion Immigration officers at this Port accepted the notice as in effect a suspension of the Alien Labour Act, as appears from the following extract from the evidence of Mr. Creed.

Q. Do you know the firm of Grant, Smith & Company? A. No, I knew nothing about them only what I saw on the papers.

Q. Have you seen these contracts? A. Yes, I have seen one or two.

Q. How did you come to see these? What were the circumstances under which you had a glimpse of these contracts? A. I think, I had occasion to stop someone that I did not like the looks of and he produced one of these documents.

Q. And when he produced that, that was enough to let him in the country?

A. Yes, he went through.

Q. Did you have, from time to time, lists submitted to you by Lilyman, Renard & Company, of Seattle of men that they were going to send to you? A. The lists came on the boat to us.

Q. And would you look over it, and see if they were the same men? A. Yes, as far as possible.

Q. There was a similar order to this one last year? A. There was.

Q. Practically on the same terms? A. Yes.

Q. And you had a copy of that sent to you? A. Yes.

Q. And you acted under it? A. Yes.

Q. And for two years you have been admitting these labourers under instructions of the Superintendent of Immigration, notwithstanding the provisions of the Alien Labour Act. A. Yes.

It would appear from this evidence, that the authorities have accepted as a passport the evidence of documents that under the terms of the Alien Labour Act should have excluded the immigrants producing them from admission to this country.

Evidence of law in force in the United States, similar to this Act and applying to Canada, as required by Section 13 of this Act, was given by production of the United States Statutes at large of the Fifty-seventh Congress 1901 to 1903, Chapter 1012, Section 4.

The written consent of the Acting Attorney General dated July 26, was also produced in compliance with Section 5 of the Act.

Objection is taken by Counsel for the defence, that the consent of the Acting Attorney-General is not a sufficient compliance with the terms of the Statute, but I think that the objection is answered by the recent decision of the Appeal Court in *Rex V. Faulkner*.

The accused are convinced of a violation of the Act and will forfeit the sum of \$100 to be paid on or before the sixth instant, and in default of payment distress is to be levied to recover the said sum.

(Sgd.) GEO. JAY,
Police Magistrate.

FORMATION OF NATIONAL INDUSTRIAL COUNCIL IN GREAT BRITAIN.

AN official statement was issued by the British Board of Trade on October 10, relative to the establishment of an Industrial Council, representative of employers and workmen throughout the United Kingdom "for the purpose of considering and inquiring into matters referred to them affecting the principal trades of the country, or likely to cause disagreements, involving the ancillary trades, or which the parties before or after the breaking out of a dispute are themselves unable to settle." The statement in question is in the following terms:—

"His Majesty's Government have recently had under consideration the best means of strengthening and improving the existing official machinery for settling and for shortening industrial disputes by which the general public are adversely affected. With this in view, consultations have recently taken place between the Prime Minister and the President of the Board of Trade, and a number of representative employers and workmen specially conversant with the various methods adopted in these industries for the preservation of peaceful relations between employers and employed.

"Following on these consultations, and after consideration of the whole question, the President of the Board of Trade, on behalf of His Majesty's Government, has established an Industrial Council representative of employers and workmen. The Council has been established for the purpose of considering and of inquiring into matters referred to them affecting trade disputes, and especially of taking suitable action in regard to any dispute referred to them affecting the principal trades of the country, or likely to cause disagreement, involving the ancillary trades, or which the parties before or after the breaking out of a dispute are themselves unable to settle. In taking this course the Government does not desire to interfere with but rather to encourage, and to foster such voluntary methods or agreements as are now in force or are likely to be adopted for the preven-

tion of stoppage of work or for the settlement of disputes. But it is thought desirable that the operations of the Board of Trade, in the discharge of their duties under the Conciliation Act, 1896, should be supplemented and strengthened, and that effective means should be available for referring such difficulties as may arise in a trade to investigation, conciliation, or arbitration as the case may be. The Council will not have any compulsory powers.

The following gentlemen in their individual capacity have accepted Mr. Sydney Buxtons' invitation to serve on the Council.

Employers' Representatives.

Mr. Geogre Ainsworth, chairman of the Steel Ingot Makers' Association.

Sir Hugh Bell, president of the Iron Steel, and Allied Trades Federation, and chairman of the Cleveland Mine-owners' Association.

Mr. G. H. Claughton, chairman of the London and North-Western Railway Company.

Mr. W. A. Clowes, chairman of the London Master Printers' Association.

Mr. J. H. C. Crockett, president of the Incorporated Federated Associations of Boot and Shoe Manufacturers' of Great Britain and Ireland.

Mr. F. L. Davis, chairman of the South Wales Coal Conciliation Board.

Mr. T. L. Devitt, chairman of the Shipping Federation, Limited.

Sir T. Ratcliffe Ellis, secretary of the Lancashire and Cheshire Coalowners' Association, and joint secretary of the Board of Conciliation of the Coal Trade of the Federated Districts, &c.

Mr. F. W. Gibbins, chairman of the Welsh Plate and Sheet Manufacturers' Association.

Sir Charles Macara, president of the Federation of Master Cotton Spinners' Associations.

Mr. Robert Thompson, M.P., past president of the Ulster Flax Spinners' Association.

Mr. Alexander Siemens, chairman of the Executive Board of the Engineering Employers' Federation.

Mr. J. W. White, president of the National Building Trades Employers' Federation.

Workmen's Representatives.

Mr. Thomas Burt, M.P., general secretary of the Northumberland Miners' Association.

Mr. T. Ashton, secretary of the Miners' Federation of Great Britain and general secretary of the Lancashire and Cheshire Miners' Federation.

Mr. C. W. Bowerman, M.P., secretary of the Parliamentary Committee of the Trade Unions Congress and president of the Printing and Kindred Trades Federation.

Mr. F. Chandler, general secretary of the Amalgamated Society of Carpenters and Joiners.

Mr. J. R. Clynes, M.P., organising secretary of the National Union of Gas Workers and General Labourers.

Mr. H. Gosling, president of the National Transport Workers' Federation and general secretary of the Amalgamated Society of Watermen, Lightermen, and Watchmen of the River Thames.

Mr. Arthur Henderson, M.P., Friendly Society of Ironfounders.

Mr. John Hodge, M.P., general secretary of the British Steel Smelters' Association.

Mr. W. Mosses, general secretary of the Federation of Engineering and Shipbuilding Trades and of the United Pattern Makers' Association.

Mr. W. Mullin, president of the Textile Factory Workers' Association and general secretary of the Amalgamated Association of Card and Blowing Room Operatives.

Mr. E. L. Poulton, general secretary of the National Union of Boot and Shoe Operatives.

Mr. Alexander Wilkie, M.P., secretary of the Shipyard Standing Committee under the National Agreement of 1909, and general secretary of the Shipwrights' Society.

Mr. J. E. Williams, general secretary of the Amalgamated Society of Railway Servants.

Additions may be made to the above list. The members of the Council will in the first instance hold office for one year.

The Chairman.

Sir George Askwith, K.C., the present Controller General of the Labour Department of the Board of Trade, has been appointed chairman of the Industrial Council, with the title of Chief Industrial Commissioner, and Mr. H. J. Wilson, of the Board of Trade, to be Registrar of the Council.

Board of Trade, October 10, 1911."

THE CANADIAN MANUFACTURERS ASSOCIATION—FORTIETH ANNUAL CONVENTION.

THE Fortieth Annual Convention of the Canadian Manufacturers' Association was held at Toronto, Ont., on October 10-12. A large attendance was present, and many matters of importance were discussed.

Presidential Address.

The address of the retiring President, Mr. W. H. Rowley, of Hull, Que., was delivered on the first day of the con-

vention. In reviewing the past year, Mr. Rowley referred to remarkable freedom from strikes among the manufacturing industries in Canada, and stated that the relations between the manufacturers and their employes had seldom of late been more harmonious. The flow of immigration had been well sustained, and in nearly every branch of industry, growth and progress had held sway. In looking forward to the future, he expressed the view that there should

be stability of tariff and "practical" protection. In the latter term he included reforestation, conservation of all natural resources, experimental farms, seed inspection, elevators, cold storage, transportation, biological stations, fish hatcheries, geological surveys, fire ranging, and research of every kind. Pleasure was expressed at the prospect of an early appointment of a permanent tariff commission, and he hoped that the members of the Association would facilitate its work as far as they could, by giving such data as they would be able to supply. The transportation system of Canada was alluded to, and it was pointed out that the canal system which has cost the country over \$97,000,000, has added five or six cents to the value of every bushel of grain from the West, by reducing the cost of carriage. It was estimated that the Hudson's Bay Railway and the Georgian Bay Canal would reduce the through rate to Liverpool by another four cents per bushel. A protest was made against the system of licensing extra-provincial corporations in vogue in several provinces, on the ground that it was an obstacle to the free interchange of products between province and province, and that it placed corporate bodies under a serious handicap, while giving individuals and partnerships an open field. With regard to workmen's compensation, the view was expressed that there should be a ready means of ensuring prompt payment of compensation, as a form of insurance to the injured employé, or to his or her family if an accident should terminate fatally, and that the cost of carrying this insurance should be regarded as a legitimate charge upon production. Liability insurance, to which many of the manufacturers had had recourse was declared to be pernicious in principle.

With respect to immigration, the President said that if the bars were to be kept up to regulate, and where necessary, retard the dumping of foreign

manufactured goods, it was right that they should be kept up to regulate and to retard the dumping of foreign labour. But when it was impossible to secure artisans and workmen, for whom there was a pressing need and steady work, it was fair to ask organized labour either to supply the demand or to withdraw opposition to the admission of a sufficient supply of workpeople to meet the need. It was remarked that there was no general scarcity of skilled help at present, but it had happened that valuable business had been lost to Canada because of the inability of some manufacturers to secure an adequate supply of skilled help, and that in cases of this kind, capital and labour should work together to meet the situation.

Financial Statement.

The Treasurer's report showed receipts from all sources amounting to \$96,748.76, including a surplus of \$14,540.84 carried over from the previous year. The membership fees amounted to \$35,859.05, compared with \$32,131 in the previous year. The balance on hand was \$2,227.09.

Membership.

The membership of the Association for 1911 was 2,725, compared with 2,608 in 1910. During the year ending July 31, there were 152 resignations and 269 new members. Of the resignations, thirty were due to business amalgamations, thirty-nine to a discontinuance of operations, and twenty-one to business failures. An increase in the fees was made for the past year by restricting the \$25 fee to firms with from 100 to 500 employés, and making two new classes, those with from 500 to 1,000 employés paying a fee of \$35, and those with over 1,000 employés a fee of \$50.

The following table affords a comparison of the membership by Provinces on August 1, 1910 and August 1, 1911:

	1910				1911					
	\$10	\$15	\$25	Total	\$10	\$15	\$25	\$35	\$50	Total
Ontario.....	1,180	185	237	1,602	1,177	218	255	2	5	1,657
Quebec.....	446	62	127	635	472	82	129	1	6	690
Nova Scotia.....	70	4	14	88	64	5	14			83
British Columbia.....	80	12	21	113	80	11	21	1		113
New Brunswick.....	35	6	9	50	31	9	7			47
Manitoba.....	89	5	8	102	90	8	12			110
Alberta and Saskatchewan.....	14		2	16	19	2	1	1		23
Prince Edward Island.....	2			2	2					2
	1,916	274	418	2,608	1,935	335	439	5	11	2,746

A similar comparison of the membership on August 1, 1910, and August 1, 1911, by branches instead of by Provinces is presented in the next table:

	1910				1911					
	\$10	\$15	\$25	Total	\$10	\$15	\$25	\$35	\$50	Total
Totonto.....	494	72	95	661	499	88	105		1	693
Montreal.....	361	41	98	500	384	62	100	1	6	553
Quebec City.....	49	5	12	66	47	3	12			62
Nova Scotia.....	70	4	14	88	64	5	14			83
Manitoba.....	89	5	8	102	90	8	12			110
British Columbia.....	80	12	21	113	80	11	21	1		113
Hamilton.....					142	9	30	1	2	184
Niagara District.....	43	5	7	55	46	3	9			58
General.....	730	130	163	1,023	583	146	136	2	2	869
	1,916	274	418	2,608	1,935	335	439	5	11	2,725

No new branches were organized during the year, but a new section, the packers, was formed in February.

Reports of Standing Committees.

The following is a brief summary of the reports of the various standing committees as considered and adopted at the annual meeting.

The "Industrial Canada" Committee.—The circulation of *Industrial Canada* now amounts to 3,600 copies monthly, while 5,000 copies of the Convention number were distributed. The net profit for the year ending in July, was \$5,906.43, compared with a net profit of \$4,690.11 in the preceeding year. The revenue amounted to \$21,710.89, and the cost of publication to \$15,804.46.

The Railway and Transportation Committee.—A large number of subjects were dealt with by the Railway and Transportation Committee. A brief summary is given of the applications with regard to freight rates which were

brought before the Board of Railway Commissioners, as well as of one that came before the Interstate Commerce Commission, which will ultimately affect Canadian rates. No important changes in rates took place in Canada during the year. Upon applications from the cities of Regina and Edmonton, orders were issued by the Board of Railway Commissioners, that the Canadian Pacific and the Canadian Northern railway Companies should publish and file new freight tariffs from Eastern Canada to these places, but the Companies obtained leave to appeal against these orders to the Supreme Court, where the matter was to be heard at the October sittings. An application of the Vancouver Board of Trade for an order directing the Canadian Pacific Railway Company to cease from making discriminating freight and passenger rates, from Vancouver to points in British Columbia, Alberta, Saskatchewan and Manitoba, and from Alberta to the Pacific Coast, compared with rates to and from Eastern Canada,

was still pending before the Board. A proposal was made by the Canadian Freight Association on behalf of the railways, to increase the minimum carload weights, on the grounds that the present cars were larger than those formerly used when the weights were fixed, that under the new minimums there would be a more economical use of cars, and that many commodities were already being loaded up to, and in excess of the proposed minimums. The Committee, however, declined to agree to this proposal, on the ground that it seemed to be a plan to get the consent of the shippers to an increase in freight rates without offering them any compensating advantages in return.

An account is given of the action of the Board of Railway Commissioners, with respect to express companies who were made subject to the jurisdiction of the Board in July, 1906. Reference is made to changes effected in telegraph forms, and to an inquiry which is being made by the Board into the tariffs of tolls, and the forms of the telegraph companies.

Among other matters mentioned by the Committee, are the general inter-switching order of the Board of Railway Commissioners, the steamship service between Eastern Canada and Australia, which was begun last year, and a proposed steamship service between Canada and Argentina.

The Commercial Intelligence Committee.—The Commercial Intelligence Committee reported that their work had been exceedingly light during the past year, as manufacturers were devoting themselves more to the home market, which was rapidly expanding, owing to the growth of the wealth and population of the country. Negotiations are being carried on by the Committee with the Australian Government for a consignment of duty stamps, by which the duty required to be collected on advertising matter, such as catalogues, price lists, &c., may be paid in advance. Upon the recommendation of the Committee, the Council expressed its approval of a proposal originating with the Glasgow Chamber of Commerce, to adopt a trade

mark for all goods of British origin. The object of this is to put a stop to the masquerading of foreign goods as British, and to promote more readily the trade within the Empire.

For the convenience of members in need of skilled labour which they cannot secure in Canada, correspondence has been opened up with a number of reputable employment agencies in the United Kingdom, that have indicated their willingness to help in engaging men. A select list of similar agencies at Halifax, Quebec and Montreal, has also been prepared.

The Tariff Committee.—The report of the Tariff Committee dealt largely with trade relations with the United States, and contained the memorial of the Canadian Council of Agriculture in favour of reciprocity presented to the Government on December 16, 1910, and a summary of the statement of the Association with reference to the same matter presented to the Government on January 13, 1911.

The report contains a copy of the commercial treaty with Japan, which came into force on July 13, and in an Appendix are various Orders-in-Council, Board of Customs' declarations, and departmental decisions of interest to manufacturers.

The Parliamentary Committee.—An account is given of the first year's work of the legal department. The work is divided into two branches, the first of which is of a representative character in the interest of the Association as a body, while the other branch consists of services to individual members of the Association, either by way of supplying legal information or performing services usually undertaken by a solicitor. During the year ended June 30, over 1,700 personal letters advising on various branches of law were sent out, and about 400 consultations were held by members with the legal Secretary. In addition to this work, all bills brought before the Dominion Parliament and the various Provincial Legislatures are carefully examined, and members are notified of any provisions which would be inimical to them. Assistance is also given in drafting laws that may be

desired in the interests of the members, and in having them introduced. A pamphlet was prepared for free distribution to members, analyzing the provisions of the extra-provincial corporation laws which exist in nearly all the provinces, and citing cases that have arisen under them.

Among other matters referred to by this Committee, were the new Copyright Act, the Eight-Hour Day Bill, Immigration Regulations, Workmen's Compensation, Bulk Sales' Acts, and Quebec and Ontario Legislation.

The Insurance Committee.—The Insurance Committee reported that there had been an improvement in the matter of fire insurance rates and conditions in the last few years. This is attributable to a large extent, to an improvement in the character of the risks. The work with regard to the installation of automatic sprinklers has been steadily growing. During the year, the engineers of this department of the Association made plans for forty-four equipments, representing an outlay of \$298,200. Of these, twenty-one have been completed, and nine are under way, the total investment in which is about \$169,000 for the year.

With reference to a resolution passed at the Annual Convention of 1910, instructing the Parliamentary and Insurance Committees to investigate the legality of insurance associations as combines, it was reported that in the opinion of these Committees, nothing could be done until the stated cases submitted to the Supreme Court had been passed upon. A circular was sent to each member of the Association, calling attention to the provisions of the Insurance Act with regard to unlicensed insurance companies, and advice was given to over one hundred members to assist them in carrying out these provisions. In order to offset the action of the Canadian Fire Underwriters' Association, in restricting the use of insurance maps to the companies represented in their association, maps were draughted and printed as required, and there have now been issued, 163 complete sets without any charge to the Association.

The Technical Education Committee.—The Report of the Technical Education Committee dealt largely with the Technical Education Commission appointed by the Dominion Government, and it was stated that the Committee was organized in 1904, for the express purpose of securing the appointment of some such body. A copy of the memorial submitted to the Commission on behalf of the Association was given in the Report, and reference was made to the progress of technical education in the provinces of Quebec, Ontario and Manitoba.

Resolutions Adopted by the Association.

At the closing session of the Convention, the following resolutions were adopted by the Association:

Accident prevention and relief.—Resolved, that the conservation of industrial efficiency by organized and systematic means, for the protection of the life and health of wage workers, and compensation for the results of industrial accidents, is a matter which demands the careful attention of this Association.

That in view of the imminence of legislation upon the subject in some of the provinces, this Association ought to undertake a thorough investigation of the whole subject of accident prevention and relief, with a view to formulating a broad, general policy for future activities.

That recognizing the futility of repeating the experiments of other countries and the possibility of profiting by the failures and success of legislation of other jurisdictions, we urge upon those in authority that, without permitting any undue or unreasonable delay, any future legislation should be undertaken, only after the most thorough investigation of the whole subject from all standpoints.

That a committee be appointed to investigate the subject on behalf of this Association, and that this committee be authorized, under the direction of the Executive Council, to take such steps as may be deemed advisable to present the views of the Association, as occasion may arise during the coming year, to any legislative or other bodies dealing with the question.

Conservation.—In view of the great importance to Canada's continued prosperity of adequate conservation and intelligent utilization of our great natural resources, and in face of the growing temptation to discount our national future by their rapid exploitation;

We, the members of the Manufacturers' Association of Canada, in convention assembled, wish to compliment the Chairman and the members of the Dominion Conservation Commission on the splendid work they have so far accomplished, to express our opinion in favour of frequent publication of information on the subject, for the education of public sentiment, and to assure the Commission that it has our cordial support in the great and important work that remains for it to do.

Extra-provincial legislation.—Resolved, That as an Association representing 2,500 companies engaged in commerce in all parts of the Dominion, we deplore the existence and constant extension of the system of extra-provincial company legislation in the different provinces of Canada. We are willing at all times to bear our fair share of taxation, and it is not to this feature of the system that we object. But we regard it as entirely unreasonable and destructive of sound business conditions, that companies which may have, perhaps inadvertently, omitted to comply with these Acts should thereby be deprived of access to the courts for the enforcement of just business claims. We urge that it is no proper incident of any system of taxation that the non-payment of the tax should be penalized by incapacity to appeal to a court of justice, and we deprecate the policy involved in the passing of these Acts as being subversive to the best interests of our country.

We regret also the delays and hindrances that have thus far prevented the

constitutionality of these Acts being tested in the Supreme Court, and we recommend to the incoming Executive Council, that every effort be made to secure a determination of the legal questions involved in the reference which has been made.

Uniformity of provincial laws.—Whereas, in certain subjects affecting manufacturing and commercial business throughout the Dominion, the laws of the different provinces of Canada contain many needless and irritating diversities;

And whereas suggestions have been made from time to time for harmonizing and placing on a more uniform basis the laws of the different provinces on these and other subjects;

Be it resolved; That this Association strongly support any such movement for uniformity, and announce itself as prepared to co-operate with any other representative bodies to this end.

Notes.

On the evening of Tuesday, October 10, an illustrated lecture was delivered before the Association on the subject of Accident Prevention and Relief, by Mr. F. C. Schwedtmann of St. Louis, who for the past two years has made an exhaustive study of the subject as Commissioner of the National Association of Manufacturers of the United States. Between thirty and forty members of the Trades and Labour Council were present on the invitation of the Association.

At the annual banquet of the Association on the closing day, addresses were delivered by Mr. J. A. M. Aikins, K.C., Mr. R. Grigg, His Majesty's Trade Commissioner in Canada, Dr. W. J. Robertson, Chairman of the Royal Commission on Technical Education, Sir William Whyte, and others.

WORKMEN'S INSURANCE IN EUROPE.

A REPORT has recently been issued by the United States Bureau of Labour, relating to workmen's insurance and compensation systems in Europe.¹

¹Volumes 1 and 2, Washington, D.C., 1911.

It appears in two volumes, of which the first deals with the countries of Austria, Belgium, Denmark, France and Germany, and the second with Great Britain, Italy, Norway, Russia, Spain and Swe-

den. The present article is a brief review of the two volumes.

The various forms of workmen's insurance, for which the term "social insurance" is suggested, are designated as: (1) Accident; (2) Sickness; (3) Maternity; (4) Invalidity and old age; (5) Unemployment; (6) Insurance for widows and orphans.

Accident Insurance.

The principle of systematic compensation for industrial accidents was first adopted over a century ago in the mining industries of Europe, especially in Germany and Austria. Provision for compensation was next made in the industry of navigation, and later in railway transportation. A comprehensive system of accident compensation on a national scale was first adopted by Germany in 1884. Previous to the modern development of production on a large scale, a comparatively simple system of compensation for industrial accidents prevailed, in continental Europe under the Civil Code, and in Great Britain under the common law, but in each case the person liable was supposed to have committed some fault, which had to be proved by the plaintiff.

At present, three systems of compensation prevail: (1) Systems of pure compensation, in which the employer must provide a compensation according to a specified scale, without any obligation to insure; (2) Systems in which the law established the individual responsibility of the employer, and in addition, requires him to take out insurance either in recognized private companies, or in a state institution, or to furnish a guarantee sufficient to cover his responsibility; (3) Systems in which the law requires the employer to insure in a specified manner or in a specified institution.

Sickness Insurance.

The evolution of sickness insurance may be said to be by the following four stages: (1) Free and voluntary associations entirely unregulated by law; (2) Regulation by law, either compul-

sory for all, or optional with classification of societies into recognized and unrecognized; (3) Regulation combined with government assistance; (4) Compulsory insurance.

In no country are mutual benefit societies entirely unregulated, but in Spain they are only subject to the general association law of 1887, and in Russia, the principle of regulation has been applied only to isolated sections of industry. Government regulation of mutual benefit societies is found in Great Britain, Finland, the Netherlands, Italy, and Sweden. The countries which give assistance to these societies, in addition to regulating them are Belgium, Denmark, and France. In France and Belgium government subsidies only go to registered societies, but in Denmark, while the distinction is made between registered and unregistered societies, subsidies are given to both. Compulsory sickness insurance, which is the only method of benefiting the entire class of wage-earners, was first introduced in Germany in 1883 on a national scale. Austria, Hungary, Luxemburg and Norway, later adopted this system, and France, Italy, Russia and Switzerland have seriously considered its adoption.

Maternity Insurance.

Maternity Insurance is usually combined with the general system of sickness insurance, as is the case in Austria and Germany. In Russia, the legislation requiring employers to furnish medical help to their employés, is extended to cases of maternity, and regulations provide that in the larger establishments, special midwives be permanently employed in the hospitals. In Italy, a bill for the introduction of a comprehensive national maternity insurance system was brought in by the Government, and it has some prospect of becoming law. The plan proposed is the organization of one central fund for the insurance of all wage-earning women of child-bearing age employed in industrial establishments. The cost of the insurance is to be met by means of equal contributions from employers and employés concerned, and the benefits are to consist of three-

fourths of the pay during the period of twenty-eight days after confinement, during which period, work is prohibited to the mothers by the act of 1902.

Old Age Insurance.

The forms of old-age insurance now in operation are classified as voluntary insurance not subsidized by the Government, voluntary insurance receiving Government subsidies, compulsory insurance, and non-contributory insurance. Voluntary old-age insurance was first established in the mining districts of Austria, Belgium, France, Germany, Great Britain and Poland. In most cases, the income of these insurance funds was derived from contributions of both the workmen and the employers. Similar funds gradually sprang up in other industries where large groups of workmen were employed. When trade unions were organized, attempts were made by them to provide for their aged members. Mutual aid and friendly societies in various countries also instituted systems of old-age relief. The importance of encouraging persons of small means to provide for their old age has led the governments of a number of countries to grant subsidies to these societies. In Italy, Portugal and Spain, a grant is made to the insured persons engaged in manual or similar occupations. In Belgium and France, a special grant is made to workmen over sixty-five years of age, conditioned, however, in France, upon twenty-five years of membership.

The countries of Austria, France, and Germany have a nation-system of compulsory old-age insurance. In Austria it is limited to salaried persons only, but in France and Germany, the laws cover nearly all of the population receiving wages or salaries, as well as many independent persons of small means. The expense of the pensions in each of the countries is met by payments from the insured persons and the employers. In France and Germany the state grants an additional amount to the pension obtained, while in Austria, the State grants a subsidy towards the cost of administration. The payments of the insured persons are obligatory, and are deducted

from their earnings by their employer. In these countries persons not subject to the compulsory law are permitted to insure themselves under certain restrictions, thus receiving the benefit of the government grants.

In order to meet the difficulties arising from a national system of contributory old-age pensions due to the heavy cost of administration and the necessity for large accumulations of capital, several countries have introduced the system of non-contributory old-age pensions paid out of the general revenues of the state. This plan is followed in Denmark, France, Great Britain and certain Australasian states. In Belgium, France, Great Britain and Italy, the government has instituted the sale of old-age annuities to individuals in terms merely sufficient to defray the cost of the insurance, offering the advantages of a low cost of administration and the security of a government institution.

Invalidity Insurance.

The forms of invalidity insurance may be classified like old-age insurance as voluntary systems, compulsory systems, and non-contributory invalidity pensions. Comparatively few voluntary organizations provide special invalidity insurance, as it is usually included with old-age insurance or in some cases with sick benefits. Such insurance is provided in Great Britain by the friendly societies, in Germany by trade unions, and in Belgium, France and Italy by mutual benefit societies. In the three latter countries where government grants are made to institutions providing old-age insurance, similar grants or even higher ones are made to these institutions for invalidity pensions. Invalidity insurance is combined with old-age insurance under the compulsory laws in force in Austria, France and Germany. In Germany invalidity insurance is the dominant feature of the system, and at the present time there are in force about 100,000 old-age pensions compared with about 800,000 invalidity pensions. In Austria, the statistics of the operation of the law were not available at the time of writing the report, as it had been in

force for only a short time, and in France, the law had not yet come into force. Invalidity insurance, however, was compulsory in France for miners in the miners' relief funds and for railroad employés in the railway funds. In Belgium this form of insurance was also compulsory for railroad employés and seamen. Non-contributory systems of invalidity insurance are found in France, where by the law of 1905, persons over sixteen years of age are practically insured against invalidity without any previous action on the part of the workman, in Denmark and New South Wales, where invalids above a certain age are entitled to pensions, and in the Australian Commonwealth and the State of Victoria, where benefits similar to those in France are provided.

Unemployment Insurance.

The most successful systems of unemployment relief, are those in use by voluntary organizations of the workmen themselves, such as trade unions, &c. The only attempt to institute a system of compulsory unemployment insurance was made by the Swiss canton of St. Gall, but it had to be abandoned in a short time. The institutions providing insurance against unemployment are classified as voluntary organizations not receiving government subsidies, voluntary organizations receiving government subsidies, and other forms of insurance against unemployment. The first voluntary organizations to undertake this work were British trade unions, which recognized the importance of this form of provision against unemployment in preventing the lowering of wages. As early as 1831 a system of out-of-work benefits was instituted by one trade union, and this provision was later adopted in other countries. Some trade unions, notably in Belgium and France, have established workshops for unemployed members. The system of granting subsidies to trade-union and other funds providing unemployed benefits was first adopted by the municipalities of Belgium, where it has reached a considerable development and is known as the Ghent system. Municipalities in other countries gradual-

ly copied this method. In France, Norway and Denmark, national subsidies are granted annually, but in Norway the major part of this expenditure is paid back to the state by the local governments. A number of other methods to provide against unemployment are in vogue in various places. Some British and Belgian friendly societies remit the dues of their members when involuntarily unemployed. In Italy, a privately endowed organization known as the "Unanitaria" of Milan grant subsidies on the Ghent system to labour unions and other organizations providing unemployed benefits. A number of associations of employers in Belgium, France and Germany have collected assessments based on the number of their employés or on wages paid in order to establish a fund for the relief of unemployed workmen. One German establishment provides that when an employé is dismissed owing to lack of work, he becomes entitled to full wages or salary for a period of time based on his length of service in the establishment. In Germany and France a few private companies have undertaken to provide unemployment insurance as a business undertaking, but it is stated that they have not met with any great success.

Insurance of Widows and Orphans.

In order to provide for the widows and orphans of workmen who have died from illness, widow and orphan benefits were established by the miners' relief funds in various countries, especially in Austria, Belgium, France, Germany and Great Britain. Similar provision, usually amounting to half the pension to which the deceased was entitled or was receiving, is found in the case of some of the railway funds and seamen's funds. The German Government has now under consideration the creation of a national compulsory system of insurance for widows and orphans. Under the invalidity and old-age law of France, in case of death a small sum is paid to the children under sixteen years of age and to the widow. In Austria, the widow receives half the pension to which the husband was entitled at the time of death, and each

child under eighteen years of age receives a variable pension. In Germany, under the invalidity and old-age law, if a member dies before reaching a pension, the survivors become entitled to the dues paid in by the insured person up to the time of his death.

International Agreements.

The disabilities under which alien workmen suffer when they meet with industrial accidents with regard to compensation or insurance have led in recent years to a number of international agreements in order to remove them. The first agreement of this nature was made by France and Italy in 1904. It contained provisions as to national and private savings funds, and included declarations as to the reciprocal rights of workmen of the two nationalities in the

matter of benefits and pensions. The advantages of funds and organizations to provide for old age and invalidity were made reciprocally available for the citizens of the two countries. In the same year similar agreements were made between Italy and Switzerland, and Italy and Germany, and in the following year between Germany and Austria-Hungary, Germany and Luxemburg, and Belgium and Luxemburg. In 1906, agreements were made between Germany and Belgium, France and Belgium, and France and Luxemburg. Germany and the Netherlands formed an agreement in 1907, and in 1909 agreements were made between Italy and Hungary, Great Britain and France, and Great Britain and Sweden. The general effect of these agreements is to secure the reciprocal enjoyment of citizens' rights by workmen employed out of their own country.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published except where otherwise stated, by courtesy of the Department of the Interior, Canada.

Homestead Entries.

THE FOLLOWING STATEMENT SHOWS THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF SEPTEMBER, 1911, AS COMPARED WITH SEPTEMBER, 1910:

AGENCY.	Manitoba.		Saskatchewan.		Alberta.		British Columbia.

Number of souls represented by above entries 7,726.

Of the 920 homesteaders who came from the United States during September, 268 were from North Dakota, 151 from Michigan, 76 from South Dakota, 59 from Iowa and 56 from Wisconsin.

The total immigration to Canada during the six months from April to September, 1911, inclusive, was 241,930, compared with 204,382 in the corresponding months of the previous year, the increase amounting to eighteen per cent. Of the total arrivals during the six months, 158,614 were at ocean ports, compared with 128,937 in the corresponding months of last year, an increase of about twenty-three per cent. There was an increase in the arrivals from the United States from 75,445 during the months of April to September, 1910, to 83,316 during the same months of the present year.

Notes.

In the month of September, steps were taken by the Vancouver Board of Trade to form an association under its auspices, to be called "The Imperial Re-union Association of Vancouver, B.C.," and during the month of October, active progress was made in its organization. The object of the Association is to enable married British workmen to bring over their families as soon as they have steady employment, by advancing the passage money out of a guarantee fund subscribed for the purpose. The work is to be carried on along the lines of a similar organization which was formed in Winnipeg, Man., about a year ago, an account of which has already appeared in the *Labour Gazette*.¹ The chief difference between the two is that in Winnipeg there are eighty members, who contribute \$250

each to the guarantee fund, while in Vancouver there are 100 members contributing \$200 each.

The sales of farm lands by the Hudson's Bay Company for the quarter ended September 30, amounted approximately to 14,600 acres for \$274,000, as compared with 15,800 acres for \$240,000, and the sales of town lots to \$188,500, as compared with \$16,000 for the corresponding period of 1910. The receipts are \$343,500, as against \$249,000 in 1910. The sales for the six months ending September 30, are 24,100 acres for \$444,500, and town lots were sold for \$353,500, as compared with sales of farm lands, 72,200 acres for \$1,092,000, and town lots for \$107,000 for the corresponding period of 1910.

The total receipts for the six months ended September 30, amount to \$890,000, as compared with \$682,500 for the corresponding half of 1910.

¹See the *Labour Gazette*, December, 1910, page 655.

PRICES, WHOLESALE AND RETAIL, CANADA, OCTOBER, 1911.

I. WHOLESALE PRICES.

THE Department of Labour Index Number of wholesale prices stood at 130.3 for October, as compared with 128.5 in the preceding month, and 127.4 in the corresponding month last year. The numbers, it will be understood, are percentages in each case of the average price level prevailing during the decade 1890-1899, the period selected by the Department as the standard of comparison throughout its investigation into wholesale prices. Over 200 articles, carefully selected so as to represent Canadian production and consumption, are included in the calculation.

It will be seen that wholesale prices are slightly higher than in the preceding month, and considerably higher than at the same period of 1910, in which the index number reached its highest point during the year. The chief increases during the past year, contributing to

this result, occurred in grains and fodders, dairy products, miscellaneous foods and metals, there being a decrease in animals and meats, the other groups being for the most part steady.

The chief features of the price movement during September, as compared with the preceding month were as follows:

Grains and fodder.—The general rise in the price of grains continued, but there was a decline in western wheat during the latter part of the month, and flaxseed dropped 16 cents during the last week. The prices of hay, bran and shorts increased, the export demand being reported excellent.

The following is a table of the Department's Index Numbers arranged by the various groups of commodities into which the investigation has been divided, showing the average price level, for October, 1911, compared with that of the preceding month and with the same month last year.

TABLE SHOWING INDEX NUMBERS BY GROUPS OF COMMODITIES FOR OCTOBER, 1911, SEPTEMBER, 1911, AND OCTOBER, 1910.

(AVERAGE PRICES 1890-1899-100.)

Average of all commodities.....	214	130'3	128'5	127'4

Animals and meats.—In this group, the chief feature was a steady decline in the price of hogs, continuing from the middle of September, some authorities attributing it to the early marketing of hogs on account of the scarcity of feed in Ontario. Another interesting feature has been the decline in the price of cattle at Toronto; at Winnipeg the price rose in the early part of the month and declined during the latter part leaving the average on the same level. The prospect of a large quantity of feed wheat in Western Canada is said to be a strong factor in the live stock market. The price of sheep went up, probably on account of the better quality offered, but the price of mutton continued to decline. There were no changes in the price of beef or pork.

Dairy products.—A steady rise in the price of eggs, cheese and creamery butter has occurred during the last few weeks; about the middle of the month a sudden rise in the price of dairy butter took place. Stocks in all these commodities are reported light, while the demand for export has been good. At Montreal, the annual agreement with the producers put the price of milk up on October 1, for the winter months, and the same schedule of prices as last year prevailed. In Toronto, the price is raised on Nov-

ember 1, but since June, prices have ruled somewhat higher than last year, on account of dry weather and scarcity of feed.

Fish.—In Eastern Canada the price of dried cod, haddock and fresh halibut have risen on account of light catches and unfavourable weather for drying; the demand for export has not been encouraging. The price of British Columbia sockeye canned salmon has risen again on account of a short catch and good demand in all markets. The prices of other fish remained fairly steady.

Miscellaneous foods.—The feature of this group was a steady decline in the price of potatoes, due to the marketing of the fall crops; prices, however, remained relatively very high on account of crop failure in some districts, being \$1.20 at Toronto, whereas last year 75-80 cents was quoted. Sugar advanced again about the first of the month, on account of crop failure in Europe, but a slight decline in the last week of the month may indicate good prospects from the United States beet crop and the West Indian cane crop. An increase in the price of coffee followed rumors of a corner in Brazil. Poor crops in the East have caused a rise in the price of rice, and pepper also has gone up. Among fruits, apples and grapes have advanced in price, but evaporated apples

declined when the new crop was put on the market, stocks having been very low. The new crop of beans came on the market at a higher price, and although the late pack of corn and tomatoes was put on the market at a lower price, it rapidly advanced to nearly the previous level; the price of canned peas also advanced.

Hides, leather, boots, &c.—A slight decline in the price of calfskins and harness leather; and an advance in sole leather were the features in this group.

Textiles.—The price of wool advanced, but raw cotton declined, and there were reports of a possible reduction in the prices of cotton goods. There were no other changes in this group except in the price of jute which has advanced.

Metals and implements.—Another increase in the price of lead occurred, one account attributed it to the late troubles in Mexico, which curtailed the output there. Aluminium, quicksilver, and steel billets declined in price.

Fuel and lighting.—No changes were noted.

Paints, oils and glass.—Linseed oil advanced in price on account of the small supply of flaxseed from last year's crop. White lead also advanced again on account of the increase in the price of lead and oil. Shellac declined.

Lumber and miscellaneous building materials were steady throughout the month.

House furnishings.—The feature of the month was another increase in the price of brooms, due to the small supply of broom corn from last year's scant crop, and to the high prices secured by the producers for this year's crop.

Drugs and chemicals.—No changes were recorded.

Miscellaneous.—A decrease in the price of rubber was the main feature in this group. Prices of hops and wood pulp rose on account of small supplies on the market, in the case of pulp due to dry weather and low water. The price of malt rose in sympathy with the high level of barley.

II. RETAIL PRICES

A general advance in the price of eggs and butter was the chief feature of retail prices during October; this was reported by many correspondents to be usual at this season of the year, being accentuated in some localities by a shortage of feed. On the other hand, potatoes declined throughout the Dominion on account of the marketing of the fall crop, though in some parts of Ontario where the crop has been poor, the decrease was attributed to the shipment of large quantities from the Eastern Provinces. The rise in sugar noted last month was continued throughout Canada. Numerous changes in the price of mutton, pork, bacon and lard, both in the way of increases and decreases, were reported as due to local conditions of supply. A rise in the price of coal and milk, usual at this season, was recorded in many of the cities.

Notes on Retail Prices.

Beef.—The price of sirloin steak increased at Amherst, N.S., Belleville, Toronto and St. Catharines, Ont.; also at Edmonton, Alta., where fewer cattle than usual were brought in during the harvesting and threshing season. A decrease in shoulder roasts occurred at St. Thomas and Toronto, Ont., but the price advanced at Port Arthur, Ont., Brandon, Man., and Lethbridge, Alta.

Veal increased in price at St. Thomas, Ont., and at Edmonton and Lethbridge, Alta., decreasing at London and Sault Ste. Marie, Ont.

Mutton declined at Sydney and Westville, N.S.; St. John, N.B.; St. Catharines, Guelph and St. Thomas, Ont.; and increased at Ottawa and Toronto, Ont.; Lethbridge, Alta., and at Vancouver, B.C.

Fresh roasting *pork* advanced in price at Amherst and Westville, N.S., Port Arthur, Ont., Edmonton and Lethbridge, Alta., and at Vancouver, B.C. The price declined at Ottawa, St. Catharines, Woodstock, London, and St. Thomas, Ont. Salt pork rose at Amherst, N.S.,

RETAIL PRICES OF STAPLE ARTICLES OF

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month prevailing in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement usually occupied by workmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the the Department.

are sold at 20 cents per lb., 2 lbs. for 35 cents. ½At Sault Ste. Marie, Ont., coal oil is sold 22 cents per gallon, 5 gallons are quoted per 100 lbs. ¾At Montreal, Que., brown bread is quoted.

Belleville and Sault Ste. Marie, Ont., and also at Vancouver and Nanaimo, B.C., declining at St. John, and Newcastle, N.B.; St. Catharines, London, and St. Thomas, Ont.

Bacon increased in price at Toronto, Guelph, and St. Thomas, Ont.; at Regina, Sask., and Lethbridge, Alta., but a decrease occurred at St. Catharines, Hamilton, Woodstock, and London, Ont.

Fish.—Salmon Trout advanced from 16 cents to 18 cents at Lethbridge, Alta., and Halibut from three pounds for 25 cents to 10 cents per pound, at Vancouver, B.C.

Lard.—An advance in the price of lard occurred at Sydney, N.S., Moncton, N.B., at Toronto, Brantford, Guelph and Stratford, Ont.; and at Lethbridge, Alta. The price was lowered at Newcastle, N.B., St. Catharines and St. Thomas, Ont., and at Winnipeg. The increases were attributed to the scarcity of butter and also to the smaller number of fat hogs being marketed.

Eggs.—Fresh eggs advanced in price at all cities reporting except Sydney and Amherst, N.S.; Charlottetown, P.E.I.; Three Rivers and St. Johns, Que.; Sault Ste. Marie, Ont.; and Winnipeg. Packed eggs advanced in twenty-two of the cities.

Milk rose in price at Westville, N.S., St. Hyacinthe, Que., Ottawa, Toronto, and Hamilton, Ont., Brandon, Man. and Vancouver, B.C. Decreases were reported at Belleville, and Windsor, Ont.

Butter.—Dairy butter increased in price at twenty-two of the cities, decreasing at Edmonton, Alta. Creamery butter advanced in twenty-six of the cities.

Cheese.—Old cheese rose in price at Sydney, N.S. and Nanaimo, B.C. New cheese advanced at Moncton, N.B., St. John, N.B., and at Victoria, B.C. Both old and new cheese increased in price at Toronto, Brantford, London and Sault Ste. Marie, Ont.

Bread.—At St. Hyacinthe, Que., the price of bread decreased from 18 cents to 17 cents for a six pound loaf. The weight of a 5 cent loaf at London, Ont. was increased from $1\frac{1}{4}$ pounds to $1\frac{1}{2}$ pounds.

Flour.—The price of flour increased at Sydney, N.S.; and at Ottawa and Toronto, Ontario. At Winnipeg the price of a 98 pound bag of flour fell from \$2.85 to \$2.80.

Rolled Oats.—An increase in the price of rolled oats at Woodstock is attributed to the poor oat crop, and an increase is also reported at Nanaimo, B.C. At Vancouver, B.C. the price changed from 7 pounds for 35 cents to 10 pounds for 35 cents.

Rice.—At Ottawa an advance in the price of rice took place.

Beans also increased in price at Ottawa.

Evaporated *apples* increased in price at Westville, N.S., and decreased at Vancouver and Nanaimo, B.C.

Prunes.—An advance in the price of prunes took place at Westville, N.S., and Chatham, Ont., there being a decline at Newcastle, N.B.; at Ottawa, and Sault Ste. Marie, Ont.; and at Nanaimo, B.C.

Sugar.—The price of both granulated and yellow sugar increased at Sydney, N.S.; Westville, N.S.; Sorel, Maisonneuve, Montreal, and Hull, Que.; Windsor, and Port Arthur, Ont.; Brandon, Man.; Regina, Sask.; Edmonton, Alta.; and Nanaimo, B.C. The price of yellow sugar alone increased at St. John, N.B., and St. Hyacinthe, Que., and the price of granulated sugar alone increased at Victoria, B.C. Both granulated and yellow sugar are reported to have declined at Lethbridge, Alta. At Newcastle, N.B. and Belleville, Ont., yellow sugar declined.

Tea.—No changes in price were reported.

Coffee increased in price at Port Arthur, Ont., and at Brandon, Man.

Potatoes.—The price of potatoes decreased in twenty-seven of the cities, and increased at Sorel, Que., Hull, Que., Ottawa and Kingston, Ont., and at Victoria, B.C. Expectations of an increase next month were reported from several of the cities.

Vinegar.—At Vancouver, B.C., vinegar rose from 10 cents per quart to 15 cents per quart. In August it was sold at 15 cents per quart, or 50 cents per gallon.

Starch.—At Lethbridge, Alta., the price of starch was reported to have in-

creased from 10 cents to 12½ cents per pound.

Coal.—The price of anthracite coal increased at Halifax, N.S.; Moncton and St. John, N.B.; Sherbrooke and Maisonneuve, Que.; Belleville, Peterborough, Guelph, Windsor, and Port Arthur, Ont. An increase at Edmonton also was due to the heavy shipments of coal to the east, south and west, on account of the coal strike at Crow's Nest Pass. A decrease in price at Regina, Sask., took place for which no reason could be ascertained. Soft coal increased in price at Sorel, Que., Belleville, Sault Ste. Marie, and Port Arthur, Ont.; Regina, Sask.; and at Lethbridge, Alta.

Wood.—Hard wood increased in price at Edmonton, Alta. Soft wood advanced at Sorel, Que., and declined at Belleville, Ont.

Coal oil.—Decrease in the price of coal oil occurred at Belleville, and Port Arthur, Ont.; and at Brandon, Man., and increased at Hull, Que.

Rentals were reported upward in Kingston, Brantford, and Sault Ste. Marie, Ont.; and in Vancouver, B.C.

CONFERENCE ON LABOUR BUREAU.

On Tuesday, October 24, the City Council of Port Arthur met in conference with a deputation from the Port Arthur Trades and Labour Council, to discuss the desirability of establishing a city Labour Bureau. The Trades and Labour

Council was represented by a deputation consisting of a representative of every organized trade in the city, and of the Ministerial Association of Thunder Bay district, which is affiliated with the Council. The conference resulted in an improved understanding by the city, the following resolution being carried.

"That the representations contained in the Report of the Special Committee appointed by the Trades and Labour Council on the subject of the establishment of an exclusive Employment Bureau under the supervision and control of the Corporation of the City of Port Arthur having been duly considered, this Council is of opinion that it would be wise in the interests of the labouring classes, to give the proposed exclusive Employment Bureau a fair trial.

"It is further resolved that the City Solicitor be and is hereby instructed to prepare such By-law as may be necessary suspending all Employment Agency Licenses on and after the first day of May next, and otherwise giving effect to the desire of the Council to establish under due authority an Employment Bureau as recommended in the report of the Committee above mentioned. The salaries suggested by said Committee are hereby duly authorized as well as the charges for registration. The appointment of all officers engaged in such Bureau to be upon recommendation of the Trades and Labour Council and to be subject to the approval of the said City Council."

TRADE DISPUTES DURING THE MONTH OF OCTOBER, 1911.

THE only serious disturbances to industry through trade disputes during October, were caused by the continuance of the strike of coal miners in Alberta and Eastern British Columbia, and the commencement of a strike of machinists and boilermakers of the Grand Trunk Pacific Railway Company extending from the Province of Ontario to Alberta. Elsewhere harmonious conditions prevailed throughout the Dominion, with only a few unimportant exceptions.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The number of trade disputes reported to have been in existence in Canada during October was ten, one less than in September, and one more than in October, 1910. About thirty-five firms and 7,790 employés were involved in these disputes, three firms and about 325 employés being involved in new disputes.

Loss of time in working days.—The

loss of time to employes through trade disputes during October was approximately 191,200 working days, compared with a loss of about 189,750 days in September, and 42,400 days in October, 1910.

Trades affected by new disputes.—The following table shows the trades affected by new disputes of the month, and the number of employes affected in each group of trades.

Trade.	No. of Disputes	No. of Employes
Leather trades.....	1	15
Railway service.....	1	300
Unskilled labour.....	1	10
Total.....	3	325

Localities affected by new disputes.—Of the new disputes of the month one occurred in each of the Provinces of Ontario and Manitoba, and one took place in the four provinces of Ontario, Manitoba, Saskatchewan and Alberta.

Causes of disputes.—One of the disputes arose from a demand for higher wages, and immediate payment of wages due, one was caused through failure to reach an agreement as to hours, wages and conditions of employment, a third dispute was due to the refusal of the employes to sign an agreement presented to them by their employers.

Methods of settlement.—Of the ten disputes in existence during October, five were terminated, leaving five still in existence at the close of the month. One dispute was settled through negotiations between the parties concerned with respect to the majority of employers involved, and the remainder were terminated without negotiations, work being resumed in two cases, the places of strikers being filled in one, while in two cases industrial conditions ceased to be affected. In another dispute it was reported that normal conditions had been resumed at the factory early in September.

Results of disputes.—The employers were successful in two of the disputes that were terminated, and the employes, with few exceptions were successful in one. In the remaining disputes, the results were indefinite, conditions gradually ceasing to be affected by them.

Disputes which commenced Prior to the Beginning of the Month.

The trade disputes which had not been reported to have terminated in previous months comprised strikes of coal miners in Alberta and Eastern British Columbia, freight handlers at Montreal, Que., pulp mill hands at St. George, N.B., Carpenters at Calgary, Alta., painters at Port Arthur, Ont., electrical workers at Toronto, Ont., and iron moulders at London, Ont.

Strike of Coal Miners in Alberta and Eastern British Columbia.

The strike of coal miners in Alberta and Eastern British Columbia, which began on April 1, on account of failure to reach a new agreement, was in progress throughout October. Towards the end of the month, however, the Department was informed that a basis of settlement had been reached through the friendly mediation of the Hon. Robert Rogers, Minister of the Interior, and it was hoped that the mines would resume operations early in November. In this dispute there were involved sixteen firms and about 7,000 employes, and the effects of the prolonged cessation of mining operations were felt over a wide area of Western Canada.

Strike of Pulp Mill Hands at St. George, N. B.

No settlement was reported in a strike of fifty-two employes of a pulp mill at St. George, N.B., who went out on April 26, on account of the refusal of the employer to grant a demand for an eight hour day in place of days of thirteen and eleven hours, with an increase in the minimum wages.

Strike of Iron Moulders at London, Ont.

A strike of iron moulders at London, Ont., which began on June 5, continued throughout October. The cause of the dispute was the refusal of three firms to grant a demand for a nine-hours day instead of a day of ten hours with no reduction in minimum wages. About

sixty men were originally involved in this dispute, but at the end of October it was reported that only eight men were still on strike, the others having procured work elsewhere.

Other Disputes.

No definite settlements were reported with regard to a strike of eighty-eight carpenters at Calgary, Alta., which began on June 20, on account of their objection to the employment of a particular person, a strike of ninety painters at Port Arthur, Ont., who stopped work on April 17, on account of the refusal of the employers to grant an increase in wages from 35 to 40 cents an hour and recognition of their union, and a strike of thirty-five garment workers at Toronto, Ont., which began on June 28, on account of their desire for a change in the conditions of their employment. Industrial conditions, however, ceased to be affected by these disputes.

NEW DISPUTES.

Strike of Machinists and Boilermakers of the Grand Trunk Pacific Railway.

On October 10, a strike of machinists and boilermakers took place in Western Canada. For some months negotiations had been going on between the machinists and boilermakers' unions and the Grand Trunk Pacific Railway Company with reference to hours of labour, wages and working conditions, and the matter was being dealt with latterly under the Industrial Disputes Investigation Act, 1907. While the investigation was still pending, the employés at Rivers, Man., where about 180 men of these two trades were employed, were notified that the shops would be closed. The officers of the Unions then ordered a strike, and about 120 more men went out from

Westfort, Ont., to Edson, Alta. No settlement of the dispute was reached during the month.¹

Dispute of Horse Collar Makers at Winnipeg, Man.

The Department was informed that a lockout of horse collar makers of the Great West Saddlery Company, took place at Winnipeg, Man., on October 9. It was alleged by the men that ten of their number were locked out on that date on account of their refusal to sign an agreement to abstain from joining any labour union or to be in any way connected with one. It was further alleged that fourteen other employés were subsequently dismissed for attending a protest meeting. It was stated by the Company that they had just laid off twelve men as their services were not wanted any longer. At the close of the month it was reported that none of the employés had been taken back.

Strike of Labourers at St. Thomas, Ont.

On October 10, ten labourers employed on street paving at St. Thomas, Ont., stopped work on account of the refusal of the contractor to grant their demand for an increase in wages, and for the immediate payment of the wages due them. Ten other labourers continued at work, and the places of the strikers were all filled by October 13. The men who went out found employment elsewhere.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of October, and which have been reported to the Department.

¹Further reference to this dispute is given in the article on Proceedings under the Industrial Disputes Investigation Act, 1907, on another page.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES C, No. 133.

TABLE OF TRADE DISPUTES DURING THE MONTH OF OCTOBER.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employes affected.			Date of commencement.	Date of termination.	Result.
			Di-rectly.	Indi-rectly.	Directly.	Indirectly.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.										
Mining— Coal mines.....	Alberta and Eastern British Columbia	Failure to reach new agreement	16	7,000	April 1	No settlement reported, but steps were taken to end the strike through conciliation.
Building trades— Carpenters.....	Calgary, Alta.....	Against employment of a particular person.....	1	88	June 20	No settlement reported, but conditions had ceased to be affected.
Painters.....	Port Arthur, Ont...	For increase in wages from 35 to 40 cents per hour, and recognition of union.....	1	20	April 14	No settlement reported, but conditions had ceased to be effected.
Metal trades— Electrical workers	Toronto, Ont.....	For increase in wages from 35 to 40 cents per hour.....	6	June 21	No settlement reported, but conditions had ceased to be effected.
Iron Moulders	London, Ont.....	Men demanded that a minimum wage for ten-hour day be paid for a day of nine hours.....	3	8	June 5	No settlement reported at end of month.

<i>General transport—</i> Freight handlers ..	Montreal, Que.	For increase in wages.....	3	200	Sept. 28 Oct.	Work resumed.
<i>Miscellaneous trades</i> Pulpmill hands....	St. George, N.B.	For day of eight hours instead of thirteen and eleven with increase in minimum wages....	1	52	April 26.....	No settlement reported at end of month.
DISPUTES WHICH BEGAN DURING THE MONTH.							
<i>Leather trades—</i> Horse collar makers	Winnipeg, Man.	Refusal of men to sign an agreement.....	1	15	Oct. 9	No settlement reported. Company claimed men were discharged.
<i>Railway service—</i> Machinists and boiler-makers....	Westfort, Ont. to Edson, Alta.....	Failure to reach an agreement as to hours, wages, and conditions of employment.....	1	300	Oct. 10	No settlement reported at end of month.
<i>Unskilled labour—</i> Labourers.....	St. Thomas, Ont. ...	For higher wages and immediate payment of wages due	1	10	Oct. 10 Oct.	13 Places of strikers were filled.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

RECENT INDUSTRIAL AGREEMENT.

The following agreement was made and signed on October 24, between the members of the Provincial Workmen's Association and the Dominion Coal Company:—

† It is mutually agreed between the parties who accepted the within award¹ of the Board of Conciliation that the same agreement be continued in force for a further period of two (2) years from December 31, 1911, to December 31, 1913.

It is further mutually agreed that the supplementary agreements arrived at between the said parties to the within Award of the Board of Conciliation respecting the getting rates for the Emery Seam at Reserve, the rate of wages for day-labour, the wages of the shippers and trimmers at International and Louisburg Piers, and the rates for hand-pick and machine-mined coal at No. 12 and No. 14 Collieries are hereby confirmed and continued in force until December 31, 1913.

The said supplementary agreements are contained in letters written by the General Manager of the Dominion Coal

Company, Limited, addressed to the Grand Secretary of the Provincial Workmen's Association, bearing dates of November 4 and 5, 1909, and letters written by the Assistant General Manager of the Dominion Coal Company, Limited, addressed to the Grand Secretary of the Provincial Workmen's Association, bearing dates of March 25, May 17 and June 29, 1910, copies of which said letters and their acknowledgements by the Grand Secretary of the Provincial Workmen's Association are hereto attached.

Signed on behalf of the Dominion Coal Company, Limited, by D. H. MacDougall, Assistant General Manager.

(Sgd.) D. H. McDougall.

Signed on behalf of the Provincial Workmen's Association by Stephen B. McNeil, Grand Master

(Sgd.) S. B. McNEIL.

John Moffatt, Grand Secretary,

(Sgd.) JOHN MOFFATT, who were duly authorized to do so by Resolution of the Grand Council a copy of which is attached.

Dated at Glace Bay, October 24, 1911.

¹The award referred to is that given by a Board under the Industrial Disputes Investigation Act, on March 16, 1908. See the *Labour Gazette*, Volume VIII, page 1222.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR IN THE THIRD QUARTER OF 1911.

ALL the changes in wages that were reported to the Department to have taken place in Canada during the third quarter of the present year were increases, and all the changes in hours of labour were reductions. These changes affected upwards of 13,387 employés, and involved an aggregate increase of over \$1,872.55 in weekly earnings, and an aggregate reduction of 2,518 working hours. The number of changes reported was twenty-seven, of which twenty-four

involved changes in wages, and three, changes in hours.

In the following table an analysis is presented showing the approximate aggregate results according to industries and groups of trades of the several changes of the quarter, in so far as detailed information was obtained by the Department. The table, however, is only an approximation, as exact particulars were not in every case available.

TABLE SHOWING BY INDUSTRIES AND GROUPS OF TRADES, THE RESULTS OF CHANGES IN WAGES AND HOURS OF LABOUR IN CANADA, DURING THE SECOND QUARTER OF 1911.

Public employés.....	310	393.75			
Miscellaneous trades.....	85	254.00			
Total.....	13,387	4,852.55			2,718

Changes by Industries and Groups of Trades.

Building trades.—On July 20-24, about 200 carpenters in Montreal, Que., received an advance in wages from 30 to 35 cents an hour, and on August 18, about 110 more carpenters of Montreal received a similar advance. In the month of July, about 300 structural iron workers in Winnipeg, received an advance from 40 to 50 cents an hour, with a nine-hour day within a radius of ten miles from the City Hall, and a rate of 40 cents an hour and a ten-hour day on all road work. About 750 bricklayers and masons at Winnipeg also had their wages increased from 62½ to 67½ cents per hour. On August 22, six plasterers at Victoria, B.C., received an advance from \$5.50 to \$6 per day, and in the same month fifty plasterers' labourers in Ottawa, Ont., were granted an advance in wages from 25 to 30 cents per hour. In August, fourteen plumbers and steamfitters in Berlin, Ont., were granted a reduction in hours of five per week. On September 4, about seventy plumbers and steamfitters at Edmonton, Alta., received an advance from 57½ to 60 cents per hour.

Metal and shipbuilding trades.—During July, fifty iron moulders at Moncton, N.B., received an advance of twenty per cent on piece work prices, iron moulders at Guelph, Ont., received an advance from \$2.75 to \$3 per day for day workers, and from an average of \$3.50 to \$7.50 per day for day workers. On various dates in the months from June to September, thirty-three iron moulders at London, Ont., who had been

engaged in a strike for a shorter working day found work in other establishments where they were granted a day of nine hours instead of ten. During July, sixty-five sheet metal workers at Calgary, Alta., received an advance in wages from 42½ to 45 cents per hour. On July 11, about 115 shipbuilders and repairers at Levis, Que., were granted an increase in wages of twenty-five per cent. for permanent repairs and twenty-five cents per day for temporary repairs. The schedule of daily wages which they had been receiving was as follows:—

STEEL WORKERS.

Chief foreman.....	\$6.00
Foremen.....	2.75
Softsman.....	4.00
Fitters.....	2.75
Punchman.....	2.25
Planerman.....	2.00
Emery-stone man.....	1.75
Roller.....	\$2.25 to 2.27
Riveters.....	2.25
Holders up.....	1.80
Rivet heaters.....	\$1.00 to 1.20
Drillers (air machines).....	1.65
Drillers' helpers.....	1.50
Caulkers (air machines).....	2.25
Platers and cutters.....	2.00
Labourers.....	1.50

WOODWORKERS, MACHINISTS, AND OTHER CLASSES.

Chief foreman.....	\$3.50
Firemen.....	2.50
Modelers.....	2.50

Sundays, holidays and night work, after six p.m., were paid at the rate of double time.

The increases in wages granted did not apply to foremen and blacksmiths.

Printing trades.—On July 1, about 120 linotype operators and newspaper printers were granted an advance in wages amounting to from \$25 to \$29 for day work and from \$27 to \$31 for night work.

Food and tobacco preparation.—The only change reported in the trades of food and tobacco preparation was an advance in the average wages of brewery workers at Ottawa, Ont., from \$12 to \$13 per week.

Railway service.—On September 1, the wages of 215 carmen of the Grand Trunk Pacific Railway Company employed in the shops from Westfort, Ont., to Edson, Alta., were granted an advance in wages ranging from \$1.80 to \$3.60 per day for the different classes of employés¹. In the month of August, over 8,000 carmen, boilermakers and moulders of the Canadian Pacific Railway Company received an advance in wages amounting to from eight to ten per cent. In July, the checkers and freight foremen of the Intercolonial Railway were reported to have received an advance of \$5 per month. On July 1, the

wages of 2,500 employés of the Montreal Street Railway Company were voluntarily increased by one cent per hour from a scale of \$13.30, \$14. and \$14.70 per week to one of \$14, \$14.70 and \$15.

General transport.—During the month of August, 160 teamsters at Edmonton, Alta., were granted an increase in wages and a reduction in hours.

Civic employés.—In July, seventy-five cement workers at Victoria, B.C., received an advance in wages from \$2.75 to \$3.00 per day. On August 1, about 200 pavers, street repairers and drain diggers at Quebec, Que., were granted an advance from \$1.75 to \$2. per day.

On July 1, about thirty-five electrical workers employed by the Municipality of Edmonton, Alta., received an advance in wages under an agreement reached through the friendly offices of the Board appointed under the Industrial Disputes Investigation Act, 1907.¹

Miscellaneous trades.—On September 5, from seventy-five to eighty stage carpenters and sceneshifters at Toronto, Ont., were granted an advance in wages from a scale of \$14-\$18 to a scale of \$16-\$22 per week. On September 25, nine musicians were granted an increase from \$21 to \$24 per week for sidemen, and from \$28 to \$30 per week for the leader.

¹For details as to the changes made see accompanying table.

¹See the *Labour Gazette* for August, page 142.

RESOLUTIONS BY LABOUR ORGANIZATIONS.

Miners, Glace Bay.

THE Department received on November 3, from Mr. J. B. McLachlan, Glace Bay, N.S., Secretary Treasurer of District No. 26 United Mine Workers of America, a communication forwarding copy of a resolution which was stated to have been passed "at mass meeting of miners, employés of the Dominion Steel and Coal Company, held in the Dreamland Theatre, Glace Bay" on October 30. The terms of the resolution in question were as follows, viz.:

Whereas, according to press reports, but not yet officially stated, an alleged

wage agreement, covering two years is said to be entered into by John Moffatt, Stephen B. McNeil and the Dominion Coal Company, and

Whereas the great body of workmen have had no proposition made to them by the Dominion Coal Company, looking to any Agreement on wages and conditions. They have not, nor will they authorize any one to make any wage Agreement on their behalf for any period of time that does not carry with it a substantial increase in present rates, and submitted to all the employés for approval; and

Whereas the Association whose name

they use was voted out of existence on June 24, 1908, by its members; and

Whereas certain individuals failed to stand honourably by the decision of the majority and have since co-operated with the Company in efforts to deprive the workmen of their rights, and have violated every principle of labour unionism, which have caused progressive organized labour in Canada to go on record, condemning those men and repudiating them as Labour Unionists in any sense of the term, sentiments which this meeting heartily endorse; and

Whereas this meeting of the employés of the Dominion Coal Company believe that the Company and John Moffatt and Stephen B. McNeil have mutual interests to serve and pecuniary advantages to gain by binding the men over to wages which are greatly less than those paid to other mine workers in Canada, and altogether inadequate to meet the increasingly high cost of living.

Therefore, be it resolved that this meeting of the employés of the Dominion Coal Company place ourselves on record as absolutely refusing to be bound by any such proposed agreement, and pledge ourselves to co-operate with each other at the earliest convenient time to secure an increase of wages with better conditions of employment.

Be it further resolved that copies of this resolution be sent to the Minister of Labour, to the press, and the Dominion Coal Company.

Miner, Dominion No. 6.

The Department also received on November 7, from Mr. J. B. McLachlan, Glace Bay, N.S., Secretary Treasurer of District No. 26, United Mine Workers of America, copy of a resolution stated to have been passed "at a public meeting of miners, employés working the Dominion Coal Company No. 6 Colliery, held in the Orange Hall, Dominion No. 6, November 3." The terms of the resolution in question were as follows:—

Resolved that we, the employés working in the Dominion Coal Company's No. 6 mine, refuse to be bound by any

wage agreement for any period of time which does not carry with it a substantial increase on the present rates paid, and we pledge ourselves to co-operate with other employés of the Company to enforce an increase at the earliest possible opportunity.

We also endorse the resolution passed at the miners' meeting held in Glace Bay, October 30.

Be it further resolved that copies of this resolution be sent to the Dominion Coal Company, the Minister of Labour, and the press.

Miners, Sydney Mines.

The Department received from the Secretary of District No. 26, United Mine Workers of America, Glace Bay, N.S., copy of the following resolution passed at a mass meeting of miners held on the evening of November 9, in Sydney Mines, the miners attending this meeting being said to be employés of the Nova Scotia Steel and Coal Company:

Whereas the abounding prosperity of the coal market, both in respect to the volume of trade done and price obtained, warrants the mine workers of Nova Scotia uniting their forces for the purpose of securing a share of that prosperity, and

Whereas the Dominion Coal Company and its paid henchmen, masquerading as trade unionists, are reported through the press to have signed an arrangement, binding the employés of that Company for two years to a rate of wages greatly lower than that paid other mine workers of the country;

Therefore, be it resolved, that this meeting of the miners of Sydney Mines recognize such an arrangement as nothing more than the work of paid betrayers of the working class and endorse the resolution passed by the miners of Glace Bay, October 30; and pledge them our active co-operation and support in enforcing a substantial increase to all mine workers of Nova Scotia at the earliest convenient time.

Be it further resolved that copies of this be sent to the Minister of Labour, the press, and Dominion Coal Company.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 344 individual work people in Canada during the month of October, 1911, were reported to the Department of Labour. Of these, 101 were fatal and 243 resulted in serious injuries. In addition seven fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before October, 1911.

In the preceding month there were fifty-eight fatal and 122 non-fatal accidents reported, a total of 180, and in October, 1910, there were 115 fatal and 295 non-fatal accidents, a total of 390. The number of fatal accidents reported in October, 1911, was, therefore, forty-three more than in the preceding month, and fourteen less than in October, 1910. The number of non-fatal accidents reported in October, 1911, was 121 more than in the preceding month, and thirty-two less than in October, 1910. Altogether there were 164 industrial accidents reported in October, 1911, more than in the preceding month, and forty-six less than in the same month of the preceding year.

Of 275 returns received during the month giving the ages of the victims of industrial accidents, forty referred to persons under twenty-one years of age, 100 to persons between twenty-one and forty-five, and thirty-three to persons over forty-five; 102 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

NATURE OF FATALITIES AND ACCIDENTS.

Four Men Killed in Explosives Factory.

The chief disaster of the month, causing the death of more than one workman, occurred on October 19, in the high explosives factory operated by Messrs. Curtis and Harvey, situated four miles from the village of Rigaud, Que., In this disaster four young men, employés of the above concern, were blown to atoms. The exact cause of the accident has not been ascertained.

Two Construction Hands Killed at Colwood, B.C.

In a premature blast which occurred on October 9, at Colwood, B.C., on the line of the Canadian Northern Railway, two railway construction hands were killed and five others badly injured. It was thought that the accident was due to a charge having been accidentally struck by a pick or shovel.

Two Construction Hands Killed at Kitsilas, B.C.

On October 24, two construction hands employed on the line of the Grand Trunk

Pacific Railway near Kitsilas, B.C., were buried alive in a mud slide which occurred in a mountain tunnel.

Two Men Buried in Cave-in at East Sherbrooke, Que.

On October 14, two men who were engaged in digging a trench for the purpose of laying water pipes were crushed to death beneath tons of earth and rock due to the sides of the trench they were excavating caving in.

Record by Industries and Groups of Trades.

A detailed record of the industrial accidents of the month, by industries and groups of trades, is as follows:—

Agriculture.—There were two fatal and twenty-five non-fatal accidents recorded during the month of October, 1911, as compared with seven fatal and five non-fatal accidents in September, and nineteen fatal and thirty-seven non-fatal accidents in October, 1910. Of the fatal accidents, five were caused by falls; five by kicks from horses; three to machinery; two each, to being gored by bulls, and struck by trains; and one each to a runaway, exposure, falling material, and a bursting emery wheel.

Fishing and hunting.—There was one fatality recorded during the month of October, compared with one non-fatal accident in the preceding month, and four fatal accidents in October, 1910. The fatality was due to the accidental discharge of a rifle.

Lumbering.—There were six fatal and ten non-fatal accidents recorded during the month of October, compared with five fatal and five non-fatal accidents in the preceding month and eight fatal and nine non-fatal accidents in October 1910. Of the fatal accidents, four were caused by falling trees, one to being crushed between cars and one by falling logs.

Mining.—There were four fatal and five non-fatal accidents recorded during October, compared with three fatal and six non-fatal in September, and ten fatal and nineteen non-fatal accidents in October, 1910. Of the fatal accidents,

one was due to a premature explosion one to a fall, one to a runaway load of mine timber and one to a runaway ore car.

Building trades.—There were ten fatal and thirty-nine non-fatal accidents recorded during October, as compared with six fatal and seventeen non-fatal accidents in September, and six fatal and thirty-one non-fatal accidents in October, 1910. Of the fatal accidents, four were caused by falls, four to falling material, one each to the collapse of a scaffold, and electrocution.

Metal, engineering and shipbuilding trades.—There were five fatal and thirty-eight non-fatal accidents recorded during October, as compared with three fatal and twenty-three non-fatal accidents in the preceding month, and six fatal and fifty-four non-fatal accidents in October, 1910. Of the fatal accidents, two were caused by electrocution, and one each to asphyxiation, falling material and a fall.

Woodworking trades.—There were thirteen non-fatal accidents recorded during October, compared with one fatal and eight non-fatal accidents in September, and twenty-five non-fatal accidents in October, 1910.

Printing and allied trades.—There were no accidents recorded during October, as compared with two non-fatal accidents in September, and one non-fatal accident in October, 1910.

Clothing.—There was one non-fatal accident reported during October, compared with one non-fatal accident in the preceding month, and none in October, 1910.

Textile.—There was one non-fatal accident recorded during October, compared with none in September, and four non-fatal during October, 1910.

Food and tobacco preparation.—There were one fatal and five non-fatal accidents recorded during October, as compared with one fatal and four non-fatal accidents during September, and two fatal and five non-fatal accidents during October, 1910. The fatality was caused by victim getting caught in belt of machinery.

Leather.—There was one non-fatal acci-

STATISTICAL TABLE, SERIES F., No. 97.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer.....	Stirling, Ont.....	Oct. 1	1	Bursting emery wheel.
".....	Thamesford, Ont.....	" 10	1	Fell from ladder, picking apples.
".....	Rockwood, Ont.....	" 10	1	Kicked by a horse.
".....	Elphinstone, Man.....	" 27	1	Trampled and gored by a bull.
".....	La Prairie, Que.....	" 13	1	Gored by a bull.
".....	Erbsville, Ont.....	" 18	1	Kicked by a horse.
".....	Toronto, Ont.....	" 19	1	Struck by a train.
".....	Pembroke, Ont.....	" 11	2	Fell from load of lumber.
Farmer's son.....	Loggieville, N.B.....	" 3	1	Kicked by a horse.
".....	Goderich, Ont.....	" 31	1	In runaway, thrown from buggy.
".....	Streetsville, Ont.....	" 30	1	Struck by a train.
Farm hand.....	Virden, Man.....	" 17	1	By belt on gasoline engine.
".....	Pilot Mound, Ont.....	" 21	1	Crushed by separator.
".....	Casselman, Ont.....	" 10	1	Fell from wagon
".....	Sedley, Sask.....	" 27	1	Kicked by a horse.
Farmer.....	Strassburg, Sask.....	" 30	1	Thrown from buggy.
".....	North Dunwich, Ont.....	" 19	1	Crushed between separator and engine.
".....	Near Souris, Man.....	" 24	1	Exposure, frozen to death on prairie, horse ran away.
".....	Upton, Que.....	" 31	1	Kicked by a horse.
".....	Lindsay, Ont.....	" 25	1	Load of lumber fell.
Fishing and hunting—				
Hunter (Indian).....	Saanick, B.C.....	" 1	1	Accidental discharge of rifle.
Lumbering—				
Lumberman.....	East Kootenay, B.C.....	Oct. 3	1	Head crushed between logs on train.
".....	Otter Lake, Ont.....	" 6	1	Struck by pile of logs.
".....	North Bay, Ont.....	" 16	1	Tree fell
".....	Fort Caulonge, Que.....	" 4	1	Falling tree.
".....	Joliette, Que.....	" 23	1	Falling tree.
".....	St. Paulin, Que.....	" 20	1	Falling tree.
Mining—				
Prospector.....	Hope Summit.....	" 9	1	Killed by dynamite.
Miner.....	Rossland, B.C.....	" 9	1	Fell down shaft.
".....	Westville, N.S.....	" 14	1	Struck by load of timber.
".....	Glacé Bay, N.S.....	" 19	1	Crushed under a runaway car.
Building trades—				
Painter.....	Vancouver, B.C.....	" 19	1	Scaffold collapsed; fell 40 feet.
Structural iron worker.....	Niagara Canyon, B.C.....	" 21	1	Struck by girder.
".....	Victoria, B.C.....	" 16	1	Fell from a roof (50 feet).
Roofer.....	Arthabasca, Que.....	" 19	1	Fell from roof.
Hoist operator.....	Toronto, Ont.....	" 4	1	Electrocuted; derrick came into con- tact with live wires.
Builders' labourer.....	Montreal, Que.....	" 23	1	Struck by falling stone.
".....	Edmonton, Alta.....	" 16	1	Fell 80 feet down elevator shaft
".....	Ottawa, Ont.....	" 31	1	Crushed by falling stone.
".....	St. Thimothee, Que.....	" 14	1	Struck by falling derrick.
".....	Winnipeg, Man.....	" 25	1	Fell from scaffold.
Metal, Engineering, and shipbuilding trades—				
Electrician.....	Montreal, Que.....	" 19	1	Electrocuted.
Lineman.....	Vancouver, B.C.....	" 20	1	Electrocuted.
Ship carpenter.....	Levis, Que.....	" 25	1	Fell from a scaffold.
Labourer (steel plant).....	Hamilton, Ont.....	" 10	1	Struck on head by a falling brick.
".....	Sydney, N.S.....	" 14	1	Asphyxiated in a man hole

Farmers.....	Thetis Island, B.C.....	" 25	3	Drowned, boat capsized.

[—¹See October issue of the *Labour Gazette* in which, through a typographical error the number of fatalities was reported as twenty-one, instead of two, which with the above brings the death list to three.

dent recorded during October, compared with one non-fatal accident in September, and one non-fatal accident in October, 1910.

Railway service.—There were eighteen fatal and thirty-eight non-fatal accidents recorded during October, as compared with eleven fatal and fourteen non-fatal accidents during September, and twenty fatal and twenty-six non-fatal accidents during October, 1910. Of the fatal accidents, six were caused by victims being run over, four to collisions, three to getting struck by trains, two to crushing between cars, and one each to derailment, explosion and falling material.

Railway construction.—There were six fatal and eleven non-fatal accidents recorded during October, as compared with three fatal and four non-fatal accidents in September, and none in October, 1910. Of the fatal accidents, two were caused by premature explosions, two to suffocation in a cave-in, and one each to run over by train and struck by train.

Navigation.—There were two fatal and

three non-fatal accidents recorded during October, as compared with four fatal and two non-fatal accidents in September, and nine fatal and six non-fatal in October, 1910. Of the fatal accidents, two were caused by drowning, and one to a fall and one to falling material.

General transport.—There were nine fatal and twenty-three non-fatal accidents recorded during October, as compared with two fatal and nine non-fatal during September, and ten fatal and eighteen non-fatal accidents in October, 1910. Of the fatal accidents, four were caused by drowning, three to falls from vehicles, and one each to run over, struck by a train and falling material.

Civic employés.—There were one fatal and six non-fatal accidents recorded during October, as compared with one non-fatal accident in September, and one fatal and twelve non-fatal during October, 1910. The fatality was caused by the collapse of a burning building.

Miscellaneous.—There were eleven fatal and ten non-fatal accidents recorded

during the month of October, as compared with nine fatal and nine non-fatal accidents in September, and thirteen fatal and nine non-fatal accidents during October, 1910. Of the fatal accidents, six were caused by explosions, two to suffocation in a cave-in, and one each to asphyxiation and machinery.

Unskilled labour.—There were six fatal

and fourteen non-fatal accidents recorded during the month of October, as compared with three fatal and ten non-fatal accidents in September, and seven fatal and eighteen non-fatal accidents during October, 1910. Of the fatal accidents, one each was due to asphyxiation, fall of roof, drowning, fall, crushed between cars, and run over by a train.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF OCTOBER, 1911.

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals, and the Department of Marine and Fisheries which has received the signatures of both parties, together with the fair wages schedules inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

RENEWAL AND RECONSTRUCTION OF WHARVES, KINGSTON, ONT.

Renewal and reconstruction of superstructure of wharves, &c., Royal Military College, Kingston, Ont. Names of contractors, Gowan and Whitney, Brockville, Ont. Date of contract, October 10, 1911. Amount of contract, \$15,909.70.

Department of Railways and Canals.

Contracts awarded by the Department, and which received the signatures of

both parties to them during the month of October, 1911, together with the minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the "Fair Wages Schedule" inserted in the contract.

BUILDING OF THE ALGOMA CENTRAL AND HUDSON BAY RAILWAY COMPANY'S LINE.

From Michipicoten Harbour, Lake Superior, towards the main line of the Canadian Pacific Railway, not exceeding 25 miles. Date of subsidy agreement, October 21, 1911. Amount of subsidy, \$3,200 per mile, not exceeding \$6,400 per mile. Railway Company, The Algoma Central and Hudson Bay Railway Company.

WOODEN LIGHTHOUSE TOWER AT MAN OF WAR POINT, BRAS D'OR LAKES, COUNTY OF CAPE BRETON, N.S.

The construction of a wooden lighthouse tower at Man of War Point, Bras d'Or Lakes, County of Cape Breton, N.S. Name of Contractor, P. L. McFarlane, of Baddeck, N.S. Amount of contract, \$974. Date of contract, September 22, 1911.

Post Office Department.

During the month of October orders were given by the Port Office Department for the supplies below mentioned, subject to the regulations for the suppression of the Sweating System, and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type, and making other hand stamps and brass crown seals.....	\$ 438.18
Making and repairing rubber dating stamps and type, also other stamps.....	59.00
Supplying stamping material and wooden boxes, and repairing stamping pads.....	644.87
Supplying mail bags.....	8,605.70
Repairing mail bags.....	1,997.21
Making and repairing Post Office Scales....	251.00
Making and repairing mail locks and supplying mail bag fittings.....	9,628.05
Repairing portable letter boxes, parcel receptacles, railway mail clerks' tin travelling boxes and street letter boxes.....	225.40
Making and repairing miscellaneous articles of Postal Stores.....	168.80
Making and supplying articles of official uniform.....	485.30

MINING CONDITIONS IN ONTARIO.

THE report of the Ontario Bureau of Mines which has recently been issued shows an increase of over nineteen per cent. in mineral production during the year 1910, as compared with the previous year, the mineral value of mineral production having amounted to \$32,981,375 in 1909, and \$39,313,895 in 1910. The following table contains a summary

of the mineral production for 1910, giving the quantity and value of the various products, as well as the number of employes, and the total amount of wages paid. There figures have reference only to the mines and plants actually engaged in the work of production, and do not include labour and wages in casual or preliminary work.

TABLE I.—MINERAL PRODUCTION OF ONTARIO, 1910.

Total production.....		39,313,895	16,688	10,532,257

The mineral production of the whole Dominion is given by the Department of Mines in its preliminary report for 1910, at \$105,040,958, and the output for Ontario is, therefore, nearly forty-one per cent. of the whole. Compared with 1909, the chief features were the increases in the production of silver, which amounted to \$3,016,600, and of nickel, which amounted to \$1,215,163, and pig iron amounting to \$673,890.

An interesting section of the report deals with the mining accidents which occurred in Ontario during 1910. The total number of serious accidents in the mines of Ontario reported to the Bureau of Mines was 107, resulting in forty-eight men killed and sixty-seven injured. Of these accidents sixty-nine occurred below ground, and thirty-eight above ground. The fatal accidents took place at mines operated by thirty-four different companies. Of the forty-eight fatalities, 14.6 resulted from falls of ground; 16.6 from shaft accidents; 20.8 per cent. from explosives; 8.4 per cent. from miscellaneous causes underground, and 39.6 per cent. from accidents on the surface. In discussing the causes of the accidents, it is stated that the mining companies in the initial stage of development work on their properties are often more negligent than after the mines have begun

production. The matters in which negligence is most often shown and which have resulted in many serious and fatal accidents are as follows:—

1. The erection and maintenance of approved thawing houses.
2. Guards for shaft openings.
3. Guards for dangerous machinery.
4. Leaving loose powder in underground workings.
5. Maintaining auxiliary ladders in the shaft while sinking.
6. Reporting of careless practices by the workmen.
7. Drilling and picking into old bottoms of holes that have been blasted.
8. Guarding and proper insulation of electric wires and apparatus.

For the prevention of accidents, the need of appointing technically trained men in charge of mines is pointed out, for by such means a greater efficiency from all workmen will be obtained through a better organization of work, and increased efficiency means a more intelligent class of workmen, and a lower accident rate.

Among the other subjects discussed in the annual report are, silver in the Thunder Bay district; the Sturgeon Lake goldfield; gold fields of Lake of the Woods, Manitou and Dryden; Vermillion lake pyrite deposits; iron and lignite in the Mattagami basin; the salt industry of Ontario, the mining law of Ontario, and the Laurentian system. A number of maps and plans accompanied the report.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during March, 1911.

DOMINION REPORTS.

Public Accounts.

Public Accounts for the fiscal year ended March 31, 1911. Ottawa: King's Printer, 1911; Pages 210. Price 15 cents.

THE report on the Public Accounts of Canada for the last fiscal year shows that the receipts on account of consolidated fund amounted to \$117,780,409.78, and expenditure to \$87,774,198.32, leaving a surplus of \$30,006,211.46. The capital expenditure amounted to

\$35,022,430.29, and there was an increase in the National Debt of \$3,773,505.70, which at the close of the fiscal year was \$340,042,052.03. The principal expenditures were: \$23,487,986.19 on the National Transcontinental Railway; \$7,364,977.19 on other railways, canals and public works, of which amount \$2,349,474.49 were spent on canals. Railway subsidies were paid to the amount of \$1,284,892.04, and the sum of \$1,597,663.48 on account of bounties. At the close of the fiscal year, the balance to the credit of depositors in the Government savings banks amounted to \$58,094,331.03, a decrease of \$169,898.87 compared with the balance held on March 31, 1910.

The Dairying Industry.

Report of the Dairy and Cold Storage Commissioner for the fiscal year ending March 31, 1911. Ottawa: King's Printer, 1911. Pages 141.

The report of the Dairy and Cold Storage Commissioner for the fiscal year ending March 31, 1911 is divided into four parts: Part I. Dairying; Part II. Extension of Markets; Part III. Fruit; and Part IV. Cold Storage.

With respect to the dairying industry it is stated that the season of 1910 did not show any marked features. Notwithstanding a continued increase in the home consumption of dairy products, and the somewhat lower price for cheese, there was an increase in the total value of exports for the fiscal year, as compared with the preceding year, the value of exports being \$23,159,336 in 1909-10 and \$23,709,014 in 1910-11. There was a very large increase in the export of cream to the United States and the total value of dairy products exported to that country increased from \$445,295 in 1909-10 to \$1,893,615 in 1910-11. There was an increased demand for casein, and the price has risen sufficiently to make it a profitable by-product of the separator creamery.

The apple crop in 1910, except in British Columbia, was the smallest in several years, and high prices prevailed. There were sixty convictions for illegal marking and packing of fruit in 1910, compared with 216 in 1909. Trial shipments of peaches were made to Great Britain and they arrived in excellent condition, and netted the growers about three times as much as they could obtain in the local markets, after deducting all expenses incurred by the Department. The quantity of tender fruit exported in 1910 greatly exceeded that of any previous year.

QUEBEC REPORT.

Mining Operations in Quebec.

Report on Mining Operations in the Province of Quebec during 1910. King's Printer: Quebec, 1911. Pages 104.

The report on Mining Operations in the Province of Quebec gives the total value

of mineral production for 1910 as \$7,323,281, compared with \$5,552,062 in the previous year. The shipments of asbestos increased from 63,965 tons in 1909 to 80,605 tons in 1910. The production, however, showed a still greater increase as the stock on hand on December 31, 1910, amounted to 41,159 tons. There was great activity in asbestos mining during the first seven months of the year, but the demand did not keep pace with the output, and towards the end of the year several mines discontinued operations temporarily. There was a marked increase in the shipments of mica, the value in 1910 amounting to \$58,668, against \$27,034 in the preceding year. The statistics of mica production since 1899 show very great fluctuations, the greatest quantity having been produced in 1907 when the value of that year's production amounted to \$223,878, while, in 1909 the value was the lowest in the last twelve years. Large increases were shown in the production of building materials and clay products, compared with 1909, brick showing an increase of fifty-five per cent., lime over 200 per cent., garnite ninety per cent., marble sixteen per cent., limestone ten per cent., and cement forty-eight per cent. These large increases, however, are said to be in a measure due to the fact that more complete returns were received at the Mine's Branch than in the previous year, when such returns were received for the first time from producers.

BRITISH REPORTS.

Workmen's Compensation.

Statistics of Compensation and of Proceedings under the Workmen's Compensation Act, 1906, and the Employers' Liability Act, 1880, during the year 1910. London: Wyman and Sons, Limited, 1911. Pages 67. Price 6½ d.

In the statistics of compensation under the Workmen's Compensation Act and the Employers' Liability Act during 1910, particulars are given with reference to seven groups of industries: mines; quarries; railways; factories; harbours and docks, constructional works; and shipping. In these industries the number of employers included in the returns

was 134,820, and the number of employes coming within the provisions of the Compensation Act of 1906, was over seven millions, of whom nearly five millions came under the heading of factories. The total amount of compensation paid under the Act in these industries during the year, was £2,700,325, as compared with £2,274,238 during the previous year, but it was estimated that, adding the costs of management, commission, legal and medical expenses, the total charge borne by these industries probably amounted to £4,000,000.

The average charge for compensation, taking all the industries together, was 7s. 8d. per person employed. It was lowest in the case of persons employed in factories, being only 4s. 3d., per head, and it was highest in docks where it amounted to 20s. 6d., per head and in mines where it was 20s., 2d. In the coal mining industry the charge was about 9d. per ton of coal raised. During 1910, compensation was paid in 3,510 cases of death, and 378,340 cases of disablement. The average payment in case of death was £153, and in each case of disablement £4. These figures included, in addition to accidents, twenty-four cases of the various industrial diseases that come under the Act. Compensation was paid in thirty-six cases of death from disease, and 4,438 cases of disablement. Of these cases, 85.2 per cent. occurred in the mining industry, and of the remainder, 519 were cases of lead poisoning. Only a very small proportion of the claims under the Act became a subject for litigation. The total number of original claims for compensation, finally settled by the courts in England and Wales was only 3,862. In Scotland the number was 486, and in Ireland 868. Of these 5,006 cases settled judicially under the Act in the United Kingdom, the decision was in favour of the applicant: that is, the workman, in 3,938 cases or 78.6 per cent. Only 217 cases were brought into court under the Employers' Liability Act, 1880, being a reduction from 604 in 1907, 406 in 1908, 298 in 1909. These figures show a tendency of the remedy provided by the older Act

to fall into disuse since the Act of 1906 came into full operation.

Strikes and Lockouts in Great Britain.

Report on Strikes and Lockouts and on Conciliation and Arbitration Boards in the United Kingdom in 1910, with Comparative Statistics for 1901-1909. London: Darling and Son, 1911, pages 136. Price 6½ d.

In a report of the British Board of Trade on Strikes and Lockouts, it is stated there were 515,165 workpeople involved in disputes which commenced during 1910, the highest number since 1893, while the aggregate duration of the disputes in progress during the year amounted to 9,894,831 working days and has been exceeded on only four occasions during the last eighteen years. The high figures in 1910 were caused by great disputes in the coal trade of Northumberland, Durham and South Wales; in the shipbuilding industry in the north of England and in Scotland, and in the cotton-spinning industry of Lancashire and Cheshire. These five disputes alone, affected 265,100 workpeople, and caused a loss of over six and one half million working days. Thirty per cent. of the workpeople directly affected in 1910, were involved in disputes as to the employment of particular classes or persons, and twenty-four per cent. as to hours of labour, these percentages being exceptionally high. Questions of wages involved only twenty per cent. of the workpeople directly affected. With regard to the results of the disputes, compromises were arranged for about two-thirds of the total number of workpeople, and of the remainder that were settled about half of the workpeople were successful and half unsuccessful.

UNITED STATES REPORTS.

Employment of Women in the Metal Trades.

Report on Condition of Woman and Child Wage-earners in the United States in nineteen volumes. Vol. XI: Employment of Women in the Metal Trades. Washington: Government Printing Office, 1911. Pages 107.

The eleventh volume of the report on Women and Child Wage-earners in the

United States deals with the employment of women in the Metal Trades. For the purpose of the report, information was secured from 246 establishments in the States of Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, Maryland, Ohio, Illinois, Indiana, Michigan, Minnesota, Iowa and Missouri. The investigation also included paper-box factories, since similar machines are used in them as are used in the metal industries, and also many of the metal manufacturers make their own boxes. In the 246 establishments investigated, there were 23,542 female employes under sixteen years of age. The female employes included 287 per cent. of the total number of the more important metal working industries. The largest proportion of women was found in jewellery establishments.

The report contains a summary of the laws affecting the conditions of employment of women and children. This includes divisions as to the age limit, hours of labour, operation of elevators and machines, the provision of seats for females, exhausts and fans on buffing and grinding wheels, and for dusty occupations, and provisions as to ventilation, light, and sanitation. An account is given of the general factory conditions, with a description of the individual industries, and the dangers of industrial employment, with statistics of accidents in the metal trades. The following conclusions with regard to accidents in the metal trades are drawn:

1. The hazard to women in these industries is distinct and considerable.
2. When men and women work at the same task, its dangers menace the women much more seriously.
3. The employments of children have in general only those dangers common to all factory work. Their employment at dangerous tasks is scarce and seems to be decreasing.
4. Negligence of the worker, as a cause of accident, has been greatly over emphasized.
5. The accidents of most frequent occurrence are largely preventable.

Railway Wages in the United States.

Bureau of Railway Economics. Railway Wage Increases for the Year ending June 30, 1911. Retrenchment in the Railway Labour Force in 1911. Bulletin Number 17, Washington, D.C., 1911.

The Bureau of Railway Economics of the United States has issued in Bulletin Number 17, a summary of the estimates made by ten railway systems of the United States as to the increase in their wage bill for the fiscal year of 1911, as compared with 1910. The railways furnishing statistics represented an operated railway mileage of 47,500 miles. The estimates included only such increases as were due to increased rates of pay, excluding those due to enlargement in labour force. The records of the Bureau, however, showed that on five miles in every six of operated railway mileage of the United States, a smaller force was employed in 1911 than in 1910. The returns covering sixty per cent. of the total operated mileage showed a decrease in the total employes from 1,069,570 on June 30, 1910, to 987,790 in 1911. Wages paid out in 1910, by the ten railway systems furnishing returns, amounted to \$300,527,000, while the estimated wage bill for 1911 computed for the same force of employes as in 1910, is \$315,163,000, an increase of \$14,636,000 or 4.87 per cent. The increase in wages represented an advance of 6.4 per cent. for trainmen; 3.16 per cent. for stationmen; 5.58 per cent. for shopmen; 2.18 per cent. for trackmen, and 4.88 per cent., for telegraph operators and dispatchers.

OTHER REPORT RECEIVED.

Canada.—Report of the Select Standing Committee on Agriculture and Colonization. Third Session. Eleventh Parliament, 1910-11. Ottawa: King's Printer, 1911.

Reports of the Veterinary Director-General and Live Stock Commissioner, J. G. Rutherford, for the years ending March 31, 1909, 1910: Ottawa: King's Printer, 1911. Price 10 cents.

Ontario.—Eleventh annual report of

the Agricultural Societies of Ontario, and of the Convention of the Ontario Association of Fairs and Exhibitions for the years, 1911. Toronto: King's Printer, 1911.

Great Britain.—Reports of the Chief Registrar of Friendly Societies for the year ending December 31, 1910. Part A. Appendix (0). London. King's Printer, 1911. (Pages 73.) Price, 7½d.

Summary of returns of persons employed in 1907 in workshops (including statistics of marriage-state of women

over eighteen). London: Darling & Son, 1911. Pages 13. Price 2d.

National Insurance Bill.—Further Replies to Letters addressed to the Chancellor of the Exchequer, with a statement of the principal amendments which it is proposed to embody in the Bill. London: King's Printer, 1911. Pages 27. Price 3d.

National Insurance Bill.—Reports of deputations to the Chancellor of the Exchequer. London: King's Printer, 1911. Price 6d.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

QUEBEC CASES.

Building By-law—Dangerous Constructions—Order to Repair.

APPEAL to the Supreme Court of Canada from the judgement of the Court of King's Bench, appeal side, affirming the judgement of the Superior Court, District of Montreal, by which the plaintiff's action was dismissed, except as to the amount of \$394 awarded to him, with costs.

The action was for damages for trespass to land. It was admitted that the servants of the corporation of the city of Montreal, entered upon the plaintiff's property against his will, and there, demolished a building in the course of erection. The forcible entry was justified, on the ground that the building was defectively constructed with improper materials, and by incompetent workmen; that the corporation had legal authority for what it did; and that it acted throughout in conformity with the directions or allowance of the legislature. Certain sections of the municipal charter of the city—were invoked to justify the proceedings of the municipal employés.

It appeared that, in virtue of authority conferred by the legislature, the municipi-

pal council enacted "The Montreal Building By-Law", making regulations in respect of dangerous structures, and providing that if, after notice by the inspector of buildings, the owner of any such structure should fail, as speedily as the nature of the case might require, to comply with the requisitions in such notice, the inspector might order its demolition, and, upon default of demolition within the time specified in the order, he might cause the structure to be demolished. The inspector gave notices to the plaintiff with respect to his buildings, alleged to be dangerous, but failed to give him definite orders with regard to the nature of the demolition required, and subsequently entered upon the plaintiff's property and demolished the buildings on his default to comply with the requisitions contained in the notices.

The Court held, Mr. Justice Davies dissenting, that the conditions prescribed as necessary before the exercise of the right of forcible entry and demolition of the structure, had not been fully observed, and that, in consequence of omission strictly to comply with the conditions, the municipal corporation was responsible for the damages sustained by the plaintiff through the unauthorized destruction of his property.

In the exercise of extraordinary powers conferred by legislation authorizing interference with private rights, all conditions precedent to the exercise of such powers must be strictly complied with,

prior to the performance of acts which if done without special authority so conferred, would be wrongful

(Riopelle vs. City of Montreal, 44 Sup. Ct., Repts., 579.)

Justifying a Blow—Right to Enforce Discipline.

The law says that, "a superintendent of works is entitled to enforce discipline amongst the men under his control, and is further justified in making use of all reasonable means to have his orders obeyed." This was cited by Mr. Justice Greenshields when giving judgement in the case of I. Macpherson, who sued Charles H. Allan, of the Peter Lyall Company, for \$200 damages caused by a blow.

It seems that when the Yorkshire Insurance building was in course of erection on St. James street, Montreal, Macpherson, who was employed as a carter, by Peter Lyall, entered the building and was ordered to get out. On refusing, he was struck on the right temple by Allan, with the iron part of a hoe.

Defendant admitted striking the blow, but stated that the language of the plaintiff was so obnoxious to both the defendant and the foreman, that the blow was justified. On the above principle Mr. Justice Greenshields dismissed the case without costs.

His Own Negligence.

Louis L'Archeveque was engaged by Gaspard Thouin, who keeps a hotel in Montreal, to look after the furnace, for which he was to receive his rent free. The room which L'Archeveque occupied was heated by the furnace which he tended, and formed part of Thouin's hotel. On a recent date, however, something went wrong with the furnace, and L'Archeveque was nearly asphyxiated. He sued Thouin in the civil court for \$200 damages to his constitution, caused by the escaping gas. Mr. Justice Greenshields, who heard the case, found that L'Archeveque was himself to blame

for the escaping gas, and dismissed the case.

Ship Firemen Claim Damages.

The prosecution at Quebec, arising out of the arrest of six firemen of the steamer *Melville*, on a charge of having deserted their ship, entered into a new phase when the accused presented alleged claims against the owners of the steamer, and applied to the Exchequer Court in Quebec (Admiralty Division), for the issue of a warrant to place the vessel under arrest, pending a settlement of the dispute. Accordingly the Court Registrar signed the warrant and gave it to the sheriff, with the result that the ship was placed under bonds. The claimants transferred all their claims to one of their number, who applied for the warrant. The aggregate amount claimed by the men was \$337. The trouble arose over a misunderstanding as to the nature of the contract signed by the men, when they became part of the crew.

Pilot and Captain Blamed for Collision.

In a judgement delivered by Captain L. A. Demers, Dominion Commissioner of Wrecks, regarding the sinking of the lake steamer, *Chieftain* III, above Quebec, by the steamer *Hero*, on the night of August 20 last, self styled pilot, Onesime Hamelin, who was in charge of the ill-fated vessel, was held to be responsible both for the collision and the resultant loss of four lives.

Captain Phelix, the master of the *Chieftain* was, on account of having seven other people other than his crew on board, adjudged guilty of a serious contravention of the Canadian Shipping Act, and was sentenced to a suspension of his certificate for two years from August 30. It was recommended, however, that Captain Phelix be granted a mate's certificate in minor waters, until such time as his own parchment is restored to him.

Captain Olsen, the master of the *Hero*, who also came in for his share of censure, will be reported to the Nor-

wegian marine authorities for failing to stand by, and render assistance, in searching for the four men reported missing from the *Chieftain* after the collision.

ONTARIO CASES.

Damages for Loss of Both Legs.

Lewis Martin, night yardmaster for the Grand Trunk Railway Company, who in an accident last November lost both legs, was awarded \$6,600 damages at the recent sittings of the High Court at Brantford. Judgement, however, was reserved on points of law by Chief Justice Mulock. Martin, prior to the accident, ordered the switch turned, and it was through the failure of an employé to carry out the order that he was struck by the yard engine on the tracks on which he was walking.

Damages for Incompetent Motorman.

A jury at the Civil Assizes in Toronto have awarded Wm. Fleming \$1,200 damages against the Toronto Railway Company. Fleming asked \$5,000. He was injured when a fuse blew out on a King street car, in August, 1910.

In charging the jury, Mr. Justice Middleton pointed out that the car was equipped with the most up-to-date appliances, the question being, whether this equipment was in good order.

The jury found that the motorman was not competent, blaming him for not applying the airbrake when the accident happened. They also found that the car had not been properly inspected.

A Verdict in Part for and in part against a Workman.

In the action of Mrs. P. Mangini against the Oliver Chilled Plow Company, and the Toronto, Hamilton and Buffalo Railway Company, for the recovery of \$5,000 damages for the death of her husband, a workman, the jury returned a verdict in favour of the widow for \$1,000.

The verdict exonerated the plow company, and laid the blame on the railway

company, but, having found want of reasonable care on the part of deceased, judgement was reserved on the legal question thereby involved.

The finding of the jury was, that the railway company's train which killed the deceased was travelling at an excessive rate of speed, and also, that if the deceased had exercised reasonable care, the accident might have been avoided. Under these circumstances, the lawyers for the Toronto, Hamilton and Buffalo Railway Company made application for a non-suit.

The accident which caused the death of Mangini, and the launching of the high court action, occurred about three months ago on the property of the Oliver Chilled Plow Company. The Toronto, Hamilton and Buffalo Railway Company have a siding to the works, and the tracks are laid between two of the buildings in connection with the plant. Mangini was carrying some bars of steel, and as he emerged from one of the buildings, the freight train of three cars and an engine approached. The evidence showed that the train commenced to move only about fifty feet from the spot where it struck Mangini. However, he failed to notice it, and was ground to death under the wheels.

Damages for Death of Railway Employé.

A verdict of \$6,000 in favour of Mrs. Gilbert Jones, the widow of a Canadian Pacific Railway Company employé, who was killed in a collision on the road at Guelph Junction in February last, was returned by the jury in the case after two hours' consideration at the recent Assizes at London.

The following answers were returned by the jurors to questions propounded by Mr. Justice Clute the trial judge:

1. Were the defendants guilty of negligence that caused the death of Gilbert Jones? Answer: Yes.

2. If so, what was the negligence? Answer: By not having a competent employé in charge of the snowplow train.

3. Did the defendants permit Wey-

mark to engage in the operation of the train on which Jones was when he came to his death, without first requiring such employé to pass the examination on train rules, and undergo a satisfactory eye and ear test by a competent examiner? Answer: Yes.

4. Did the plaintiffs suffer the damage complained of thereby? Answer: Yes.

5. Did the deceased come to his death by reason of the defendants operating their railway by a negligent system? Answer: Yes.

6. If so, what was the negligent system? Answer: By allowing Weymark to operate a snowplow train without having passed the eye and ear test.

7. Might the deceased, Gilbert Jones, have avoided the accident by the exercise of reasonable care? Answer: No.

8. At what sum do you assess the damages? Answer: \$6,000; to be apportioned as follows: (a) to the widow, \$3,500; (b) to the daughter, \$500; (c) to the son, \$2,000.

The daughter is about twenty-one years of age, and the son about twelve. It was stated by defendants, counsel that an appeal would in all probability be taken.

Fined for Watering Milk.

Charged with sending watered milk to the Prouse cheese factory, Luno Melbourne, a Dereham farmer who had sixteen cows milking, was fined \$40 by the police magistrate at Woodstock. He pleaded that the adulteration must have been done by some one without his knowledge, but the magistrate imposed the fine.

MANITOBA CASES.

Building Contract—Mechanics' Lien—Enforcement—Delay caused by Strikes, etc.

In an action by the assignees of the contractors for the erection of a building

against the owner and the mortgagees, to enforce a mechanics' lien, the plaintiffs claimed \$2,767.84. The owner pleaded that the employment was under an agreement in writing, in which it was provided that the production of the architect's certificate and evidence that no other liens existed were, conditions precedent to payment, and that such certificate and evidence were not produced or tendered; that the agreement provided for a penalty if the work was not completed by July 1, 1909, and that the work was not completed by that date; that the work done and material used, were defective; and the owner counterclaimed for damages for delay and defective work and material. The plaintiffs replied that the delay, if any, was occasioned by the owner, and that, if the architect's certificate was a condition precedent, the condition had been waived and cancelled. The mortgagees claimed priority over the plaintiffs' lien. At the trial, the owner was allowed to amend by setting up that, since the action was at issue, the architect had issued his final certificate for \$1,718.70, and stated her willingness to pay that amount into Court, on certain terms as to costs. The plaintiffs then said they would accept the \$1,718.70 in full satisfaction, but with costs to date. This the owner declined, and the trial was proceeded with, but no money was paid into Court.

Mr. Justice Prendergast, who tried the action, held upon the evidence, that the plaintiffs were entitled to recover for all work and material, including extras, \$1,788.70, and also that the owner was not entitled to damages for delay, as the delay was caused by strikes.

The written contract provided that the work and material must be to the satisfaction of the architect; but under Article nine, when the contractors considered that they had completed the work, they were to notify the architect, and it then became his duty, within seventy-two hours, to issue either a final certificate that the work was completed, or a written statement showing

in what respect it was incomplete; and the contract, after providing that payments should be made only upon the written certificate of the architect, added, "unless the architect is in default in issuing the same."

As to this the judge held, that "default" meant the omission to do something which the architect was called upon to do; that, upon the evidence, he had neglected to give a certificate within the proper time after notice from the plaintiffs; and that there was such prolonged inaction and default, as dispensed with the certificate as a condition precedent; and that the plaintiff's reply was sufficient to raise the point.

He also decided (1) that, as it appeared that the architect was satisfied by affidavits that there were no other liens, the plaintiffs were not barred by the want of a certificate as to that; (2) that the mortgagees were not entitled to priority over the plaintiff's lien, as they took their mortgage on the security of the house; and (3) that the plaintiffs were entitled to costs against both owner and mortgagees.

(*Alsip vs. Robinson*, 18 W.L.R. 39.)

BRITISH COLUMBIA CASES.

A Miner's Damage for Loss of Sight.

Nine thousand dollars was the jury's verdict for Peter Collins in the recent suit against the Britannia Mining and Smelting Company, for the loss of the sight of both eyes by an explosion at the mines. "An employer is not an insurer of his employés," said Mr. Justice Morrison to the jury, "but he must adopt reasonable precautions which will ensure the safety of his employés. You must also remember that an employé is not an inspector of his employer's plant."

Limitation of Employers' Liability.

That a logging camp, as operated under ordinary conditions, does not constitute engineering works, and that men employed there cannot come under the scope of the Employers' Liability Act, is the opinion of Judge McInnes, expressed in a judgement dismissing the case of George Weaver against Alexander Barber. Weaver sought \$1,500 damages for injuries received in an accident at Barber's logging camp at Bute Inlet.

THE

LABOUR GAZETTE

DECEMBER, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF
NOVEMBER, 1911.

1.—GENERAL SUMMARY.

A SUDDEN drop in temperatures about the middle of November brought the season of outdoor activity to a close in several sections of the Dominion. Navigation on inland waters had for the most part ceased at the end of the month, and lumber mills had nearly all closed down. There was some cessation also of work in the railway construction camps. General employment, however, continued active, and there were few reports of any over-supply of labour. The lumber camps absorbed a considerable number of men, while in the building trades the exceptional activity of the past few months left a large amount of interior finishing on hand. Fishing and mining operations were curtailed in certain branches by the advance of the season, though one of the most favourable incidents of the month was the return to work of the striking coal miners of Alberta and eastern British Columbia and the general activity of the coal trade throughout Canada, together with expansion in the outputs of the metal mines of the interior of British Columbia. Wages and prices showed little change, both being very firm. Immigration returns continued to show a large increase as compared with last year.

Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning

which was received at the Department of Labour during October, 1911.

Mining.—Coal miners in Alberta and Eastern British Columbia (7,000) received an increase in wages amounting to from five to ten per cent.

General Transport.—Freight handlers of the Canadian Pacific Railway at St. John, N.B., received an advance from seventeen to twenty-one cents per hour.

Public employees.—Civic firemen at Chatham, Ont., received an advance of from \$100 to \$175 per year over their previous salary. Cement workers (100) employed by the municipality of Victoria, B.C., were granted an increase from \$2.75 to \$3.00 per day, dating back from July 14.

Other industries.—Employees of the Consumers' Gas Company of Toronto, Ont., received an increase in wages from \$2.25 to \$2.40 per day for inside men and from \$2.00 to \$2.10 per day for outside men.

Interruptions to Industry.

The number of strikes and lockouts which were reported to the Department to have been in existence during November was four more than in the previous month and seven more than in November 1910. The loss of time to employees through trade disputes during November was approximately 140,600 working days, a decrease of about 50,000 days compared with the previous month, but an increase of over 100,000 days compared with November, 1910.

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

Among industrial establishments, &c., destroyed by fire or through other causes, during November, 1911, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Schoolhouse at Arichat, loss \$2,500; drygoods store at Bridgetown, loss \$20,000; barn, 100 tons of hay and 20 head of cattle at Middle Musquodoboit; livery stable and 16 horses at Halifax, loss \$8,000; power company's station at Mac-can, loss \$3,500; printing establishment at New Glasgow; section of town burned, loss \$6,000.

New Brunswick.—Grocery store and repair shop at Chatham, loss \$6,000; barn, containing season's crop and implements at Newcastle; hotel at St. Martin, loss \$7,000; 6 buildings at St. Stephen, loss \$21,000; business block at Woodstock.

Quebec.—Residence and barns with contents at Danville, loss \$7,000; barns, stables and granary at Cote St. Lake, loss \$19,000; golf clubhouse at Deschenes, loss \$15,000; business portion of Disraeli, loss \$75,000; pulpmill at Hervey Junction, loss \$15,000; boat houses, 20 gasoline launches, bakery and machine shop at Lachine, loss \$15,000; furniture store at Montreal, loss \$50,000; jewelry store at Montreal, loss \$35,000; convent at St. Jerome, loss \$20,000; sawmill at St. Barnabé, loss \$2,000; portion of convent premises at Parc Laval, loss \$6,000; flour mill at Quyon; hotel at Quebec, loss \$50,000.

Ontario.—Sawmill at Beamsville, loss \$10,000; business block at Belleville, loss \$20,000; business section of Bethany, loss \$35,000; townhall at Clayton, loss \$7,000; business section of Cobourg, loss \$6,000; chemical manufacturing plant at Fenelon Falls; bakery and general store at Fort Erie; barrel factory at Keewatin; mattress factory at Hamilton, loss \$5,000; slaughterhouse and barn at Ingersoll; business section of London, loss \$800,000, and 300 persons out of work; hotel at Mattawa, loss \$12,000; sawmill and shingle mill at Markdale, loss \$6,000; barrel factory, sawmill and grist mill at Melville, loss \$19,000; carriage shop at Norwich, loss \$2,000; refrigerator factory at North Bay, loss \$2,200; business block at North Bay, loss \$10,000; garage and 25 automobiles at Ottawa, loss \$85,000; woollen mill at Progression, loss \$10,000; tool factory at Pembroke, loss \$35,000; general store at Rodney, loss \$4,500; planing mill at South Clinton, loss \$10,000; portion of packing company's premises at St. Thomas, loss \$12,000; tailoring establishment at Toronto, loss \$2,700; harness factory at Toronto, loss \$10,000; general store at Wilberforce, loss \$2,000; hotel at West Lorne, loss \$9,000.

Manitoba.—Barn and twenty horses, cattle and season's crops at Foxwarren; livery and implement barn and 14 horses, loss \$15,000; garage and 5 taxicabs at Winnipeg, loss \$11,000.

Saskatchewan.—Barns and contents at Davidson; church at Fairlight, loss \$2,500; implement warehouse at Regina, loss \$150,000.

Alberta.—Restaurant at Edmonton, loss \$5,000; building and plant of publishing company at Edmonton, loss \$20,000; business section of Irma, loss \$30,000.

British Columbia.—Barns with valuable live stock at Chilliwack; business section of Duncan, loss \$140,000; business section of Golden, loss \$12,000; general store at Port Haney, loss \$10,000; lumber-mills at Pings-ton Creek, loss \$100,000; registration office (provincial) at Prince Rupert; manufacturing stationers' establishment at Victoria, loss \$100,000.

Conditions in the Industries and Trades.

Conditions of employment during November in the several industries and groups of trades throughout Canada, as indicated by reports of correspondent to the *Labour Gazette*, and by information received by the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

The somewhat sudden advent of cold weather in the second half of the month brought outside operations to a close but found agriculturists generally well prepared for winter. Fall plowing had not been completed in some localities and in Western Canada threshing and marketing were hampered. Losses were in consequence reported from some localities; elsewhere the good snow road facilitated marketing and farmers were enabled to take advantage of the ruling high prices, grains having advanced as compared with the preceding month, and livestock, though somewhat lower in the opening week of the month, advancing at the close. The amount of grain coming forward from Western Canada was larger than last year, but the grade have been lower.

Reports up to the third week of the month indicated that in Manitoba about 75 per cent. of the wheat had been threshed; about 50 per cent. in Saskatchewan; and from 35 to 40 per cent. in Alberta. Up to the end of October fifty million bushels of wheat had been inspected at Winnipeg; and it was estimated that there were 20,000,000 bushels in store in elevators. Owing to the fact that wheat prices were high, it was estimated that farmers would make well on their low-grade wheat.

A dearth of farm help is reported in Middlesex, Perth, and adjoining counties of Ontario. During the harvest season the average wages were \$70 per month for farm hands, but in some places wages reached \$90 per month. It was reported there would be a good demand for farm help in this district during the coming winter, and that the

rate likely to be offered would be \$40 per month, with board and lodging.

The report for the month ending October 31, and published in the November issue of the Census and Statistics Monthly, shows that the total area for Canada in potatoes, turnips and other roots, fodder corn, hay and clover and sugar beets this year was 8,895,679 acres, with a total product value of \$219,129,000. This is an increase of \$1,679,000 over last year, although there was a decrease to the value of \$3,120,000 in hay and clover. The largest increase is shown in potatoes, which is nearly \$6,000,000 more than last year, although the product is less by 8,000,000 bushels,—the average selling price being 60 cents per bushel as compared with 45 cents a year ago. The quality of the crops is 90 per cent., and over, except in the case of sugar beet, which is 86 per cent. Last year the quality of the crops was over 90 per cent., except in the case of potatoes, turnips and other roots. The area sown in fall wheat this year is 1,097,900 acres, which is 2.93 per cent. less than a year ago. The percentage of fall plowing completed in October ranged over 73.57 in Ontario to 90.40 in Prince Edward Island for the eastern provinces, and from 18.73 to 34.12 in Manitoba for the western provinces.

In the reports of Commercial Agents of the Dominion, issued by the Department of Agriculture, it was stated there is a good market in British South Africa for wheat, which is at present chiefly supplied by importations from various countries. The quantity locally grown is short of requirements by nearly four million bushels.

Fishing.

Rough weather interfered with coast fishing in Nova Scotia, and catches of cod, mackerel, and herring were somewhat light. Smelts and eels were taken in abundance in Prince Edward Island. The sardine catch of southern New Brunswick has been exceptionally heavy. Operations were quiet on the Great Lakes. In British Columbia the herring season has opened at Nanaimo, but

catches were comparatively light up to the close of the month, though the outlook is regarded as favourable. About 9,500 tons of smoked herring were produced by these fisheries last year, being only about twenty-five per cent. of the average catch of the preceding year. A few salmon were taken in the Fraser River.

Large improvements are being made to the canneries of the Canadian Northern Pacific Fisheries, Limited, at Uchukdesit, B.C.; a large storage plant being installed.

Sealing.—The Victoria sealing fleet of four vessels—the smallest ever sent from the port—has returned with a total catch of 2,708 skins, which is a little more than half the number taken last year, when five vessels took 4,232 seals and 9 sea otters. The sealers attribute the small catch to unusually rough weather in Behring Sea. The seals were plentiful. As the new treaty between Great Britain, the United States, Japan, and Russia, under which sealing at sea is to be stopped for fifteen years, comes into effect on December 15th, this is the last year of the seal hunter, and an industry which has been a profitable one to Victoria will pass away. It is expected that the sealers operating from Victoria will put forward a claim for compensation to the extent of about \$500,000. The price of seal skins has advanced rapidly in recent years. Skins which sold for \$10 or \$12 a few years ago now bring \$30 and more at the annual sales held in London, England.

The close season for beaver in British Columbia, which has extended for six years, was ended early in November, and will remain open until April. A license of \$100 is required by non-residents of the province for trapping privileges.

Lumbering.

The sawmills in Ontario and the eastern provinces had practically all closed down by the end of November, and the men had found work in the camps and elsewhere. There was little change in the outlook as to the winter season in

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the of employment in the several trades and industries throughout the Dominion. The table has reference only to phenomena treated under separate headings in *The Gazette*. In tabulating the information in question, the tions were favourable or unfavourable, as follows: (1) fair, active and very active; (2) quiet and very

present issue and is intended to present, in brief and accessible form, a generalized statement as to the state of the amount of employment prevailing, no account being taken as to wage changes, trade disputes and kindred matters. The firms employed are divided into two groups, the order indicating in each, the degree to which general conditions affect them.

[illegible]

the camps; the concensus being that some curtailment of the cut might be expected, especially in the maritime provinces. The cold weather and abundant snow-fall greatly facilitated operations during the month. In British Columbia the coast mills were running to full capacity, but logging operations were hampered by the advancing season. The mills of the mountain sections had for the most part closed down. There will be a heavy cut of ties and other lumber in northern Manitoba and Saskatchewan, and experienced men were in demand for work in these camps.

The Forestry Branch of the Department of Interior, Canada, is conducting an exhaustive statistical study of the industries of Ontario which in any way use wood in the manufacture of their product. The data obtained will be issued in bulletin form.

Mining.

The feature in coal mining throughout Canada was the return to work on November 20 of the coal miners of the Crow's Nest Pass district in British Columbia and in western Alberta, who had been on strike since April 1. The effect was to improve materially the general industrial tone of the districts affected. In Nova Scotia also and on Vancouver Island an active month was reported from the collieries. The shipments of the Dominion Coal Company to Montreal during the present season are said to show an increase of 150,000 tons over the best previous year, 1908, when the total shipments were 1,350,000 tons. The Company has twenty-six steamboats in service. The output of the Dominion Coal Company for the six months from May 1 to October 31 was estimated at 2,125,000 tons. The highest point was reached in the month of August, when the output amounted to 3,879,275 tons. There was a decline in the months of September and October, owing to dullness in the coal market. Development work on an extensive scale has been begun in Nova Scotia. The outlook on Vancouver Island is for a continuance of the active conditions for sometime to come.

Metalliferous camps throughout Canada had a fair month. In Ontario and Quebec outputs were well maintained notwithstanding the severe weather, while in the interior of British Columbia there was a continuance of the marked buoyancy noted in September and October, a large number of new and old properties having been recently brought into operation.

Manufacturing.

The general activity and expansion of the past few months was continued. Garment making, boot and shoe making, and confectionery establishments were among those which reported an increase in activity due to seasonal causes. Canning factories, on the other hand, had nearly all closed down. Steel and iron outputs were very heavy; the new wire and nail mills of the Dominion Steel Company are approaching completion, while large extensions at Hamilton, Ont., are being planned by the Steel Company of Canada.

General Transport.

The usual rush of traffic in anticipation of the close of navigation occurred during November. Railway train crews were very actively employed, especially in western Canada where the railways were taxed to their utmost capacity in moving the grain crop, and a shortage of cars was reported in many sections. Railway earnings have recently showed large increases over the corresponding months of 1910. Navigation had for the most part closed up to the end of the month; longshoremen and shiplabourers were very active during the first three weeks of the month.

The Utilities Commission of the Province of Quebec has announced its findings with regard to the proposed amalgamation of the Montreal Street Railway Company, the Montreal Terminal Railway Company, the Montreal Park and Island Railway Company and the Public Service Corporations. The commissioners found no warrant for refusing to allow the merger to be carried out.

The annual report of the Canadian Northern Railway Company shows an increase of 15 million dollars in capital stock, which now amounts to 70 million dollars. The gross earnings showed an increase of 18¼ per cent., while the net earnings increased 14.87 per cent. The increase in working expenses was contributed to the cost of operating new lines over which over 400 were added during the year. There is an increase in the assets of 47 million dollars, and an increase of \$4,500,000 in the bonded debt, an increase of 6 millions in the perpetual consolidated debenture stock and a new issue of \$15,000,000 5 per cent. convertible debenture stock.

On November 1 the annual meeting of the Montreal Street Railway Company was held. The annual report showed gross earnings for the year of \$4,775,300, an increase of \$422,749 over 1910. The operating expenses were \$2,679,805, being an increase of \$224,504

over 1910, making the net earnings \$2,095,495, or an increase of \$198,245 over 1910. The number of passengers carried amounted to 158,756,625, against 143,678,259 in 1910. The expenses were 56.12 per cent. of the earnings as compared with 56.41 last year.

The Winnipeg Board of Trade passed a resolution declaring that the time has arrived when the Dominion Government would be asked to make an investigation with a view to remedying matters as regards freight rates west of the Great Lakes, which it was claimed were unfair and out of all proportion to the eastern rates. In this regard also it was resolved to ask the co-operation of western boards of trade in the presentation of facts relating to freight rates.

The accompanying table gives a summary of lake commerce through the canals at Sault Ste. Marie, Michigan and Ontario, for the month of October, 1911:—

COMMERCE THROUGH SAULT STE. MARIE CANALS, OCTOBER, 1911.

		U. S. Canal	Canadian Canal.	
Vessel Passages	Number	1,624	949	2,573
Registered Tonnage	Net	3,349,560	2,821,581	6,171,141
Freight—				
East Bound	Short tons	1,662,763	3,937,749	5,600,512
West Bound	Short tons	1,780,172	540,888	2,321,060
Total Freight	Short tons	3,442,935	4,478,637	7,921,572

Short tons are tons of 2,000 pounds.

Compiled at St. Marys Falls Canal, Michigan, under direction of Colonel C. McD. TOWNSEND, Corps of Engineers, U.S. Army.

L. C. SABIN,
General Superintendent.

Railway Construction.

With cold weather, work in the camps east of the Rocky mountains was considerably curtailed, and a large number of men returned to the cities. The outlook, however, is for an exceptionally active winter in British Columbia.

The Hon. the Minister of Railways approved during November of the location and routes of thirty-three branch lines in western Canada.

The Canadian Northern Pacific Railway is about to award a contract for the construction of 40 additional miles of railway on Vancouver Island. The Canadian Pacific Railway has decided to extend the Esquimalt and Nanaimo Railway to the northern end of Vancouver Island.

The Trades.

Building.—The advent of cold wea-

ther caused a cessation of outdoor operations in many localities about the middle of the month, but indoor work was actively carried on, as many more buildings were in process of erection than in former years. The following is a partial list of the number of building permits issued in Canada during November, with the estimated value which they represent:—

Locality.	No. of Permits.	Value.
Halifax, N.S.	38	\$ 24,725
Peterborough, Ont.	19	12,300
Hamilton, Ont.	143	278,800
Guelph, Ont.	1	800
Berlin, Ont.	9	9,875
London, Ont.	57	25,640
Chatham, Ont.	7	8,900
Winnipeg, Man.	167	404,200
Total for eight cities..	441	\$765,240

Metal and Woodworking trades. — These trades had on the whole active employment throughout the month.

Printing and allied trades.—With the buoyant tone of general industry and trade, news and job printing offices and bookbinding establishments had a very active month; only a few localities reporting otherwise.

Clothing.—Journeymen tailors were busy; garment workers and boot and shoe establishments had a very active month.

Textile.—Cotton and woollen mills and carpet weavers were on the whole well employed.

Leather.—Tanners and couriers had a fair month and leather workers an active one.

Food and tobacco preparation.—Bak-

ers, confectioners, cigarmakers and tobacco workers were very busy.

Miscellaneous.—Retail clerks were becoming very busy on the holiday trade; hotel, restaurant and theatre employees, laundry workers and barbers, etc., were very active.

Unskilled labour.—In nearly all the cities there was employment for the entire supply of labour of this class, notwithstanding that the closing down of railway construction work, lumber mills and agricultural work had thrown large numbers on the market. The past season, moreover, has offered such continuous employment that the workmen generally are in exceptionally favourable circumstances in view of the approaching winter.

Canadian Trade and Revenue.

During October, 1911 there was an increase in the total value of imports entered for consumption into the Dominion of Canada of \$8,110,790 over the corresponding month of 1910. During the first seven months of the fiscal year, ending October 31, there was an increase of \$35,765,782 over the corresponding period of 1910. The total value of domestic exports during October, 1911 showed a decrease of \$1,215,191 as compared with October, 1910. The total value of domestic exports during the first seven months of the fiscal year, ending October 31, showed an increase of \$766,359 over the same period of 1910. During October there were increases in the exports of the products of mines and fisheries, and a decrease in the exports of the forest, animals and their produce, agriculture, manufactures and miscellaneous merchandise. The accompanying table contains the latest official summary of Canadian foreign trade.

Canadian Trade, October 1911.

TOTAL IMPORTS ENTERED FOR CONSUMPTION IN THE DOMINION OF CANADA.

	ENTERED FOR CONSUMPTION			
	Month of October		7 Months ending Oct.	
	1910	1911	1910	1911

Grand Total Exports	30,595,683	3,205,574	29,280,492	2,383,847	158,121,115	12,490,771	158,887,474	14,641,626

In the reports of the Trade Commissioners and Commercial Agents of the Department of Trade and Commerce a summary is given of the trade of the Commonwealth of Australia for 1910. It is shown that in recent years there has been a large extension of trade in that country owing to the number of good seasons. The total trade for 1910 was £134,505,501. Of this amount, £60,014,351 represented the total imports, of which £802,045 represents the total value of imports from Canada, and which consisted mostly of agricul-

tural implements and printing paper. Of the former the imports from Canada amounted to £258,042, compared with imports to the value of £242,995 from the United States and a total value of imports out of a total value of imports amounting to £590,085. The total imports of printing paper from Canada has increased from £62,060 in 1906 to £158,624 in 1910. It was reported that Venezuela offers a good market for Canadian traders in flour, codfish, paper, white pine and pitch pine.

Domestic Trade.—Wholesale and retail trade was active and the outlook generally is bright, with indications for a large Christmas trade. The fall trade has been good and a satisfactory sorting-up business is under way. According to R. G. Dun and Company, business failures during the five weeks ending November 30, numbered 148 as compared with 145 during the same period of 1910.

The bank statement for October showed an increase of \$1,771,269 in paid up capital over the previous year, the total at the end of October being \$106,163,549. Notes in circulation amounted to a value of \$105,855,021 being an increase of \$8,657,845 over the previous month and \$8,736,534 over the corresponding month last year. Deposits in Canada payable on demand showed an increase of \$18,368,669 over the previous month and current loans and discounts in Canada showed an increase of \$19,434,401 over September.

The following are the figures for the Canadian Clearing Houses for month of November, 1911:

Montreal	\$217,916,065
Toronto	169,419,034
Winnipeg	145,034,254
Vancouver	49,111,708
Ottawa	19,448,179
Calgary	21,444,150
Quebec	12,493,381
Victoria	11,840,000
Hamilton	11,466,650
Halifax	8,149,656
St. John	5,428,658*
Edmonton	13,012,329
Saskatoon	8,244,674
London	6,035,413
Regina	7,880,309
Brandon	3,469,262
Lethbridge	2,936,372
Brantford	2,281,386
Moosejaw	5,716,922
Ft. William	2,020,873

*For three weeks only.

The annual statement of the Bank of Montreal for the year ending October 31, 1911, shows profits for the year amounting to \$2,276,519, against \$1,797,993 in the previous year. Of this sum, \$1,400,000 is absorbed in dividends and \$3,000,000 is placed to the reserve. Deposits not bearing interest increased from \$43,425,978 in 1910 to

\$46,187,555 in 1911, but the deposits bearing interest decreased from \$154,117,878 in 1910 to \$135,538,261 in 1911. The circulation increased from \$14,502,591 to \$15,914,654.

Canadian Revenue.—Canadian revenue for the month of October, 1911, amounted to \$12,221,653.27, compared with \$9,666,192.95 in October, 1910. The total revenue from April 1 to October 31 amounted to \$76,291,178.04, compared with \$65,814,386.28 to October, 1910. The total expenditure on capital account during October, 1911, was \$2,561,812.30, compared with an expenditure of \$3,548,278.93 in October, 1910. The total expenditure to October 31 was \$14,889,839.43, as against \$15,978,415.24 in the corresponding period of last year. The items of expenditure during October, 1911, comprised \$2,505,062.55 on public works and \$66,749.75 on railway subsidies.

Notes.

A merger of the Niagara Navigation Company and the Hamilton Steamboat Company was announced.

Incorporation has been granted to the British North American Dry Dock Company with headquarters at Quebec, and with a capitalization of \$1,000,000.

On November 1, the contract of the City of Toronto with the Toronto Electric Light Company for lighting the city expired, and since that date Toronto has been lighted exclusively by the new municipal plant.

The Civic Power Commission of Winnipeg, Man., has closed a contract with the Canadian Pacific Railway Company to supply 500 horse power from Points du Bois. It is understood that the company will soon be taking 18,000 horse power.

In the Counties of Welland and Haldimand it is estimated there are about 500 natural gas producing wells, some of which furnish 1,500,000 cubic ft. daily. The depth of the wells ranges from 550 to 3,000 feet. Prices for gas are 15 to 45 cents per 1,000 feet, according to quantity used. Gas

is piped to Hamilton, Niagara Falls, Ont., and as far west as Brantford and Paris.

The seventh annual convention of the Union of British Columbia Municipalities was held at Victoria. At the opening session the Mayor of Ottawa read a paper on "Civic Government by Commissioner." There was a discussion on the subject of government and municipal ownership of telephones, the matter being referred to the executive. Another question debated was that any person holding an agreement of sale and having registered it, be given the right to vote upon all money by-laws; present legislation restricts this to the registered owner of land only. The convention expressed itself favorably in regard to the commission form of government.

A Provincial Council of the St. John's Ambulance Association was formed at Montreal on November 8, 1911. The work of this association is to provide instruction for its members in first aid to the injured. The civic authorities of Montreal promised to encourage the formation of a civic branch in order that employees of the city might obtain instruction in first aid.

A merger of the natural gas companies of western Ontario has been formed, the control of which is in the hands of Canadian and Buffalo interests, with a capital of \$3,000,000. The companies which have united are the United Fuel Supply Company, The Ridgeway Fuel Supply Company, the Northern Pipe Line Company, and the Volcanic Oil and Gas Company. It was reported that this organization will control franchises which have been secured from twenty cities and towns in western Ontario.

At the quarterly meeting of the Glace Bay Co-operative Society, Limited, a financial statement was presented which showed the total amount of business for the quarter ending October 6, 1911, as \$48,126.49, compared with \$47,039.86 in the previous quarter. The membership amounted to 676

persons, and the annual dividend to \$3,042.46. There was a reserve fund of \$3,017.72, an increase of \$135 over the previous quarter. The capital and deposits amounted to \$33,501.09, an increase of \$5,000 compared with the previous quarter. During the past four years the grand total of \$608,653.67 worth of business was transacted. The total amount of dividends in that period was \$41,850.48.

In the speech from the Throne on the assembling of the Dominion Parliament on November 15, reference was made to the abundance of the harvest, notwithstanding losses in certain districts, the increase in population disclosed by the census returns, and the expanding trade and revenues of the country. Negotiations have been opened for improved trade relations with the West Indies. Legislation will be introduced to encourage agricultural production, to establish a system of government elevators upon the Great Lakes, to establish a permanent Tariff Commission, and looking to the improvement of public highways.

The sixth annual convention of the Canadian Independent Telephone Association was held at Toronto, Ont., on November 15. The following resolution was passed: "That we memorialize the Ontario Government to undertake the purchase of or the construction of long-distance telephone lines, believing that universal connection is in the interests of the public, and that Government ownership of long-distance lines will be the only satisfactory solution of the telephone situation; that the Government be petitioned asking that the law controlling the telephone situation, so far as the Dominion Board is concerned, be so amended that orders may be made by the Commission which may affect the construction of independent telephones for local as well as long-distance service. The Association disapproved of the agreement submitted by the Bell Telephone Company to the Dominion Board of Railway Commissioners with reference to connections with inde-

pendent telephone companies, and a committee was appointed to prepare a counter agreement to be presented to the Commission. In the Presidential address, Dr. W. Doan stated that there were about 340 independent telephone systems in Ontario, of which less than half are incorporated.

Canadian ports on the Pacific Ocean are steadily increasing their business. The following new ships are in building for the trade with British Columbia ports. The C. P. R. is building two 150,000 ton vessels for addition to its Pacific fleet; these are each 570 feet long and are being built in Scotland. A passenger liner of 13,500 tons register is under construction for the Canadian-Australian line. Two Blue-

Funnel liners are being completed for addition to the All-Round-the-World line. Three steamers are being built for the Harrison Direct Line which some months ago inaugurated a service to Victoria from Liverpool, Glasgow and Antwerp, by way of San Pedro and San Francisco with the intention of utilizing the Panama canal when that waterway is completed. The chief Japanese line plying between Japan and this country has ordered in Japanese ship-yards six new steamers of about 8,000 tons register to replace the vessels now used, and it was recently announced from San Francisco that new vessels would be built for the Pacific Coast steamship company's service.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Work was abundant and all classes of labour were well employed. The steel and coal trades were brisk and large outputs were produced. The Dominion Collieries were busy filling the last of their contract in the St. Lawrence market, as navigation closes in the last week in November. The year's output is the largest in the history of the Company. Preparations are being made for a still better year in 1912 as new collieries are being prospected and will be opened up as soon as a proper site is located. The Sydney Steel Works had a busy month. Work on the rail and wire mill was sufficiently completed to permit of the installation of machinery. Other construction work is being pushed forward as rapidly as weather conditions and the labour supply will permit. The Sydney Foundry Company is improving its plant, which it is intended to use to meet the demands of a growing business. The Sydney Mines Steel plant had a very good month, the furnaces continuing to give good results; year's output will largely exceed that of last year. The collieries continued active

and prospects are fairly good for the winter. Rail transportation fell off considerably but will become heavier as soon as navigation in the St. Lawrence closes. Water shipments were fairly heavy, a large number of schooners being loaded with coal for the coast towns. Considerable produce from P. E. Island was brought into port. The building trades had a good month and building operations will continue active as long as the season permits. The wholesale and retail trades did a large volume of business. The early approach of winter caused a good deal of buying of dry goods. The labour market is well supplied and apart from particular construction work, there is an abundance of labour for the winter.

WESTVILLE, N.S., AND DISTRICT.

The labour market continues brisk in all departments. The building trade is still been carried on in good weather. In many places labour is reported scarce. The farmers are well through with their fall ploughing and preparations for the winter months. The other industries throughout the district continue steady. At most of the collieries

preparations are being made by installing new machinery for an increase in output. The shipments from the collieries in this town and district for the month of October, 1911, was about 50,000 tons being an increase of a few thousand tons over the corresponding month of 1910.

Mining.—Shipments by water to the Quebec and Montreal markets are ended for the season. The Drummond Colliery, Westville, is installing two new winding engines.

HALIFAX, N.S., AND DISTRICT.

November fully maintained the activity shown in the labour market during October, and was probably a busier month than any corresponding period for some years. The building trade was a strong factor in the activity. Building permits during the month covered alterations in the main, but permits were taken out for a \$3,000 dwelling and a \$2,500 vault. But it was not these contracts that were the principal cause of the briskness. There were several unfinished structures, the chief being: The Merchants' Bank of Canada and Union Bank of Canada buildings; the Tower Road School, the big factory for Moirs, Ltd. the addition to the Nova Scotia Hospital (which is to afford modern conveniences for 70 patients), new piers and freight sheds on the water front. On all these operations work was advanced several stages, while the smaller jobs and more than the average output of most manufacturing concerns kept mechanics generally fairly well employed. There was, with the exception of a few days early in the month, considerable activity on the water front. The shipments of apples, which have reached upwards of 500,000 barrels, was responsible for much of this. Not only was there a good proportion of work by steamers, but the railroads were taxed to their utmost through the great demand for cars. During October, 1910, the number of freight and passenger cars arriving at and leaving Halifax was 8,714, while in October, 1911, the num-

ber was 11,501. In November, 1910, the number was 8,459, while for the first three weeks of November, 1911, it is estimated that the number is almost 9,000, which indicates that November will be as far in excess of the similar period in 1910, as was October, 1911, over October, 1910.

AMHERST, N.S., AND DISTRICT.

There was a strong demand for labour, especially in the building trades, and there was also a great demand for unskilled labour. Contractors reported men very scarce and were offering unusually high wages with the view of securing sufficient men to finish the season's building operations. All the industries were working steadily and many of them were increasing their staffs. The Canada Car Company began work on a new galvanizing shop; a building about 35 feet by 45 feet. It is the aim of this company to manufacture everything in connection with the cars in their own plant here. The Malleable Iron department also began the erection of a further extension to their foundries, which will be a brick structure over one hundred feet long. This plant was re-opened about eighteen months ago after an idleness of two or three years. The superintendent commenced with eight men but has now about two hundred employed and expects to have one hundred additional hands at work during the winter months. The Canada Car Company is also calling for more employees. Cabinet makers are especially in demand. When the extension to the passenger shed, now under construction, is completed, about one hundred and fifty men will find employment. It is expected that this shed will be finished early in the year. The winter promises to be a busy and prosperous one as all the industries have ample orders ahead. Retail and wholesale men reported trade well up to the average with collections good. Mining operations at Springhill, are improving from week to week. The Dominion Coal Company which now owns

these mines is making extensive borings on their areas with the intention of locating new seams and opening them up. The Maritime Coal Company and the Kimberly mine were also in active operation.

The Stanfield Knitting Co., at Truro, the largest industry of its kind in the Maritime Provinces, effected a union with the Hewson Woollen Mills of this town. Both industries will be run under separate names. The name of the Hewson Woollen Company being changed to Hewson's, Ltd. The capitalization of the joint companies is in the vicinity of one million, five hundred thousand dollars.

The crops have all been harvested and it may be said that on the whole this section of the province has been favored with a good yield. The hay crop was light compared with the previous year but there was a large quantity of last year's hay carried over, so that there will be an ample supply for the coming winter. Farm produce continues high and there is an ample market for all that our farmers' produce.

In October the general feeling was that the lumber cut in this vicinity would be very light but during November there was a decided stir in lumber circles and although a large quantity of lumber was not shipped to any market this year but is being held over for next year's shipment, yet it is now expected that the cut this winter will be as large as in any previous season. Several valuable properties have lately changed hands and the new operators are anticipating a busy winter and without exception they report business greater than ever before. The Amherst Boot and Shoe Company, Hewson's Ltd., and a number of our other industries have invaded the West with splendid success and are finding profitable markets for the output of our local factories.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

The general condition of the labour

market differed little from October although the supply was somewhat in excess of the demand, the normal condition at this time of year. The first part of the month was fine, enabling out-door building operations to be carried on, but the closing days were stormy. The first week found work at the Elmira Branch Railway completed for the season, and also several other contracts, including the Tracadie Breakwater. Shipping was fairly brisk, and wholesale and retail men report business conditions satisfactory. Fishermen had a very quiet month, with the exception of the smelt and eel fishermen, who were fairly successful. Several new stations were completed and the branch railway at Elmira was taken off the contractors' hands by the Government.

MONCTON, N.B., AND DISTRICT.

The mild weather during November was very favourable for out-door operations and labour conditions were active. Supply and demand were fairly well balanced and but few unemployed noticed. The grading of the yards for the National Transcontinental Railway is about completed. This work has furnished employment to about 100 labourers during the past four months. The work upon the permanent sidewalks is also completed. The rails for the Tramway have been laid from the new Intercolonial Railway shops to the terminal sheds upon Mechanic street and the trolley wire along the same line nearly completed. It is expected to have the cars running over this part of the system before Nov. 30th. The main pipe line conveying the gas from the Coverdale wells to the city, a distance of nine miles, has been completed. The pipe was carried across the Petitcodiac River upon the abutments of the bridge and connection is now being made with the system of mains laid throughout the city. Building operations have been brisk and the contracts are all well advanced particularly in the case of the new ell to the Government Rail-

ways General Offices, which is now enclosed and ready for interior work. Much repair and enlargement work, in addition to new buildings, has been in progress throughout the city and suburbs and carpenters have been in active demand. All manufacturing plants have been in active operation and foundry and machine shops busy. In all cases operating staffs remain the same and there has been no intimation of reduction. The Maritime Hat and Cap Company has commenced operations in the old Lock factory and is employing about thirty hands. Retail trade has been fair and wholesale trade firm. Rents show a reduction with a fair line of houses to choose from. Real estate remains quiet. The City Council has been asked by a Committee of the Board of Trade and the Moncton Trades and Labour Council to endorse the resolution passed recently by the Union of New Brunswick Municipalities, providing for the submission of a Bill to the Local Government giving Municipalities the power within themselves of adopting the single tax system on a majority vote of ratepayers. The Saturday half holiday in the Intercolonial Railway shops existent during the summer ceased with the commencement of November and the men will work the full six days during the winter.

Agriculture.—Considerable hay is being pressed and shipped, price being \$18.00 per ton. The New Brunswick Fruit Growers' Association held their annual meeting and exhibit of fruit at St. John, Oct. 30th and 31st, attendance being large and the exhibit exceptionally fine. Pork is quoted at 7½¢ per carcass; Chickens, 16-20¢ per lb.; eggs, 30¢ per dozen; butter, 26-28¢ per lb.; and potatoes, 50¢ per bushel.

The overhead bridge upon St. George street being built by the I.C.R. is now finished and open to traffic. Work upon the subway at the north crossing of Main street has been suspended.

ST. JOHN N.B., AND DISTRICT.

The building trades continued brisk notwithstanding the inclemency of the weather, and with the opening of the winter port business the shiplabourers will be well employed until spring. The Union Foundry Company of West St. John has secured a lease from the city of several lots, and has started tearing down the old buildings preparatory to the erection of a large addition. Work is progressing on the new warehouses for the C. P. R. on Mill street. The Keith-Albee Company recently purchased several lots of land on the south side of King Square, and workmen are now dismantling the buildings. An up-to-date playhouse will be erected next spring. Messrs. T. S. Simms & Company, brush and broom manufacturers, have purchased a large strip of land between the Suspension Bridge Road and Union Point, and will build a large factory as soon as possible on this site. The Bank of British North America has purchased the Melick building, corner of Market Square and Dock street, and will have it fitted up as a bank building. Bank clearings for the four weeks ending November 23 were \$6,245,965, and for the corresponding period last year \$6,312,501, being \$66,536 less in 1911 than in 1910, and \$1,128,614 less than during the five weeks ending October 26 of the current year. The city cashier paid out \$11,757.55 in wages to workmen, and \$10,569.05 in salaries to civic employees, making a total of \$22,326.60 for the four weeks ending November 24. The wages of the C. P. R. freight handlers has been increased from 17 to 21 cents per hour. On the evening of November 22 the longshoremen of the Allan Line and the members of the new shiplabourers' society at a joint meeting unanimously decided to join the International Longshoremen's Union. Brooms were advanced 25 cents per dozen on November 15. Dealers say that the cheapest broom on the market sells wholesale at 26 cents. Within the last two months brooms have advanced \$1 per dozen, a

shortage in the broom corn crop being the cause. The New Brunswick Fruit Growers' Association exhibit opened on October 30, and closed on November 2. The annual meeting of the St. John Agricultural Society was held on November 24.

There was shipped from St. John on November 9 one hundred and forty-eight hogsheads of sardine herring to Lubec and Eastport, valued at \$1,186. It is predicted that dry fish will be scarce and high during the coming winter. Medium and large cod are selling at the schooner side for \$6.30 per quintal.

The lumber cut in the vicinity of Sussex will be smaller than usual this season. The Pejepscot Lumber Company will cut about 6,000,000 feet of logs on the Salmon River, and about 2,500,000 feet at Martin's Head. This company has spent \$7,000 on facilities for carrying on its operations, and intend to erect a new mill at Martin's Head next spring.

Fredericton.—The Phœnic Mills have been closed down for the winter, after a successful season's work manufacturing shingles.

Northampton.—Messrs. Gibson Bros. have sold out their valuable lumber property to a joint stock company. The property consists of a block of 1,200 acres inside of Bull Lake, Carleton County, heavily timbered with fine spruce and hardwood, 500 acres in the rear, and various smaller lots of spruce and cedar, and five miles of New Brunswick Land Company rights.

St. Andrews.—The contract for the erection of the new kitchen annex to the Algonquin Hotel has been awarded to Peter Lyall & Sons, of Montreal. It will provide fifty-six more sleeping rooms.

NEWCASTLE, N.B., AND DISTRICT.

The labour market was particularly dull as the mills have all closed for the season and there was not the demand for men for the lumber woods there has been last year and the year before. Wages were high but there was poor

demand for sawn lumber therefor there is a large amount of it on hand and quite a number of the drives were hung up last spring. Good woodsmen, however, are getting very good wages.

Farmers had very little to do but look after their stock. There was very little fishing. Oyster fishing was good all the season.

QUEBEC, QUE., AND DISTRICT.

Labour has been well employed, though the cold weather in the middle of the month retarded outside operations in connection with railway construction, building, and the work on the Quebec bridge. The Canadian Northern Railway Company has commenced work at Limoilou on its car building shops, to be completed November 1, 1912. Tenders for the new 40 inch main from Lorette to Quebec at a cost of \$750,000 are being called for. Most of the vessels are now laid up for the winter. The contract for the new wing of the seminary at Chicoutimi to cost \$123,000 has been awarded. Several gangs of men have left for the lumber camps; all the sawmills having closed down. Shoe and leather factories are now busy. Fall plowing was brought to a close by the severe weather.

THREE RIVERS, QUE., AND DISTRICT.

A decline in general activity took effect during the last half of November due partly to the cessation of some outdoor operations and the closing of the saw mills. The contractors Messrs. Page & Germain have completed the two concrete piers for the iron bridge over the St. Maurice River between the two Islands Caron and de la Poterie. Trade was good this month and showed an improvement over November, 1910. Rates of wages remained the same but those working out-doors had to stop work at 4.30 p.m. making an 9 hrs. day instead of ten as before.

SHERBROOKE, QUE., AND DISTRICT.

With favourable weather for this time of the year the labour market has been active, as outside work was continued until a later period than is generally the case. The different machine shops are very busy, and more help is being taken on. The Canadian Sand Company are employing more men than for the past two years, and when the extensions are completed still more will be given employment. The woollen mills are busier than they have been for some time past, and machines that were standing idle for some years are now running, and more would be started up if only help could be secured.

The Board of Trade and the Industrial Commissioner are now in communication with one or two concerns that are considering locating here. One iron industry has gone so far that the only question at issue is a suitable site. It is expected that this will be secured and will be satisfactory to the concern indicated. The establishment of this industry will mean a considerable addition to iron workers and machinists in this city.

All other industries are running full time, and there is every prospect that this condition of affairs will last throughout the winter.

The question of governing the city by commission government is becoming a live one. The Council of the Board of Trade has had the matter under consideration, and at the last meeting of the City Council one of the aldermen broached the subject and in the amendments to be sought to the charter this will be asked for, as well as the establishment of a Board of Revisors.

The annual financial statement of the Eastern Townships Agricultural Association showed a deficit of about \$3,000. This was brought about by a smaller attendance owing to the bad weather. The association paid out over \$14,000 in prize money, and the Provincial Government recognizing the good work the association is doing

to further agriculture has decided to increase the annual grant from \$8,000 to \$10,000.

SOREL, QUE., AND DISTRICT.

There was very little change in the labour market during the month. The buildings started during the spring and summer were nearly completed. A number of boats and dredges have entered the harbour, to undergo repairs during the coming winter, which will employ workmen formerly engaged in the building trades. In all the other industries, labour was very active. The local machine shop were very busy, with large orders in hand. The government shipyards were also very active, and will soon start building a number of boats, giving employment to 150 or 200 additional men. Dry goods, millinery and grocery stores had a good month. The meat, vegetable, fruit and dairy produce market was very active, but prices were going up. There was an abundance of apples, of a good quality, but no winter apples, and they sold for from \$4.00 to \$4.50 for a three bushel barrel. Imported fruits were high and in little demand.

ST. HYACINTHE, QUE., AND DISTRICT.

The favourable conditions of last summer continued during November, and except for the usual slackening up of work in certain branches at this time of the year, there was very little change. The building trades were a little less active than during the preceding month, but sash and door factories were very busy and will employ a large number of men all winter. The iron industry and musical instrument factories were active and the activity in the leather industry was increased. Business, wholesale and retail was satisfactory. In the hay trade there was a very large demand for export, especially to England. Banks reported a good month with easy collections. All farm and garden products sold well at high prices. Dairy products had a

tendency to rise. Work on the farm was quiet. There was no demand except for threshers, and this was well met.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

The labour market continued very active and the month was much better than the corresponding month of 1910. All the manufactures were busy and everything points out to an abundance of work during the winter, there being large orders on hand. Wholesale as well as retail trade was excellent. The hay trade was very good, the last boats carrying abroad large quantities of it. Banks reported an active month with easy collections and larger deposits than during the corresponding month of last year. There was no trouble between capital and labour and no change in the rates of wages or hours of labour.

Farm products were plentiful in the local market and prices still high. Fishing was fair. The Canadian Pacific is making extensive improvements on its road and, it is said, will have it double-tracked as far as Farnham next spring. The newly opened Cluett-Peabody factory is already employing nearly 400 hands.

MAISONNEUVE, QUE., AND DISTRICT.

November continued as active as October or any of the summer months. All industries are in full operation, and there was but very little slackening up in the building trades. There were four strikes during the month: one of women employed in the Hochelaga cotton factory; one of the boilermakers at the Locomotive Works at Longue Pointe; one of 350 men in Kellert & Co's. clothing factory, and a strike of the longshoremen employed by the steamship companies doing business in the Port of Montreal.

MONTREAL, QUE. AND DISTRICT.

The activity in building operations

during October was unprecedented. Building permits valued at a million and a half were taken out, while in October of last year the value was \$600,000. Since the opening of navigation nearly twenty-five million bushels of corn, wheat and oats have entered Montreal through the Lachine canal, being an increase of more than five million bushels over the same period of last year.

The trade in agricultural products was very satisfactory. Timber was in great demand as a consequence of building activity. Manufactures in general were very busy. All other industries reported a good month. The skilled trades, as well as unskilled labour, were active.

HULL, QUE., AND DISTRICT.

Open weather during November permitted a continuance of the season's marked activity in building and in the work on the municipal water works and sewage systems. Messrs. Bisson & Carrière who have a large number of contracts for the city are actually employing 180 labourers and shall do so all winter, extending the water service and repairing some of the old pipes.

Owing to the water of the Ottawa river being low, the mills at Chaudière Falls and other places, depending on water from the river, had to close much sooner than usual. Gilmour & Hughson's large saw mill closed on November 18, while the ones of G. R. Booth closed in the last week of November. At the E. B. Eddy Company's mills only the small saw mill was running, besides the paper and match factories.

This early closing of the season in the lumber industry has permitted Messrs. Bisson & Carrière to get all the laborers they need in Hull. It was too early for the men to go to the shanties, and the prospects are that the lumbermen will not send this winter as large number of men to the bush as in the previous years. Mr. P. Wilson also has contracts for the city to the extent of about \$40,000. The

saw mills at Aylmer, Perkins Mills and Buckingham have closed for the winter. Navigation was officially declared closed on the 29th of November, when the water was drawn from the canals on both Ottawa and Rideau rivers.

The local banks reports a scarcity of money, partly due to the fact that the last weeks of the season for the lumber industry were dull for both the employers and the employees. The latter lost a good deal of time.

The Civic Committee created to look into this question of the toll gates around Hull, has reported that it would take \$200,000 to buy the interest of the parties owning rights over the suburban roads.

KINGSTON, ONT., AND DISTRICT.

The month was a very active one industrially in Kingston, opportunities for employment of all kinds being abundant. Work on the dock at the Royal Military College was commenced and afforded considerable employment. Work on the smelter site was rushed along. The construction of the new street pavements was concluded toward the end of the month. On the 16th of the month a by-law to guarantee a bond issue of \$100,000 to promote the erection of a new summer hotel was carried by the property owners. It is expected work will commence at once. The new Nicol building at Queen's University is nearing completion. The Carruther's building is also practically renewed. All the interior having been reconstructed. Property owners in the east end of the city have been notified by the Grand Trunk Railway Company that the option which the company secured some time ago, has been accepted. The company intends to build new freight sheds. This move will afford considerable employment to Kingstonians. During the month a company was formed, and ground broken for the starting of a new and modern brick-making plant, in the north end of the city. The company have abundant capital, and the management of the

concern is under able management. From tests made large quantities of suitable clay have been found on the site within the city limits. Sample bricks already made are of the best quality. The foundation is well under way, and the plans show a plant modern and up to date in every way for the production of a first-class article. Kingston has long needed a plant of this kind. Several important jobs have been held up for want of a supply of good brick.

Since January 1st of this year the value of the building operations completed, and in progress in Kingston, \$399,229, over double those of last year. If the new hotel is started this month, as it no doubt will be, the half-million dollar mark for building operations begun, here in less than a year will have been reached. Navigation is practically at an end. The season generally was reported the best in years. Wholesale and retail merchants reported heavy sales during the month. While there was a slight falling off in opportunities for employment in some lines, the month considered in its entirety, was an inactive one. The building trades continued active, slackening a little towards the close of the month. The International Harvester Company is taking over the binder twine department at the Canadian Cordage Company factory they expect to start work about the end of this year, about one hundred and thirty hands will be employed. The Canadian General Electric Company's new power house, at the water works dam, is now completed. The city gives the company the right to use the location and water for which it built at its own expense the power house, installed the machinery and keeps same in repair for twenty years besides paying the city \$2,000 per annum and the taxes, at the end of the twenty years the plant becomes the property of the city. The new dam and power house at Auburn is about completed, it is expected to be in operation by December 1. The corner stone for a new Protestant Home was laid on October 28. The

city gave the site and ten thousand dollars, the balance being subscribed by the citizens and friends. It will be opened some time in the spring.

Caring for stock and marketing produce occupied the farmers' attention. Prices in all lines of produce ranged high. Hay will be scarce, it is selling now for \$14.00 a ton.

Lumbering was active in the northern part of the county, the lumber companies found some difficulty in getting men as the farmers were monopolizing all the available hired help. Construction companies also complained of the scarcity of labour.

Lindsay.—The Council have appointed an industrial commissioner at a salary of \$100 per week, he will pay his own expenses.

TORONTO, ONT., AND DISTRICT.

Active conditions continued to prevail during November, the weather being generally mild and favorable for outdoor employment. Both skilled and unskilled workers were better employed than usual at this season. The customary influx of laborers from outside districts, has set in and many of the new arrivals are out of work. The approach of the holiday season, buying for which has begun early, will give temporary employment to many as extra help in connection with the retail trade. Building continues active. Permits were issued in October for 804 buildings, representing an approximate value of \$1,798,042, as against 862 permits representing a value of \$2,914,980, in October, 1911. The approximate value represented by the permits issued for the 10 months ending with October was \$20,306,697, as against \$17,734,488 for the corresponding period last year.

On New Year's Day the ratepayers will be asked to vote on by-laws to raise the amount of \$2,200,000 for the extension of the hydro electric system of power distribution, and \$1,800,000 for the construction of a viaduct of concrete and steel from Bloor street

East to the Danforth avenue with an extension of Parliament street.

The cost of the new General Hospital now in course of erection will be \$3,500,000, which will require an additional \$1,250,000 to be obtained in order to secure the completion of the work.

On the 1st inst. the street lights of the Hydro-Electric system were formally turned on throughout the city, replacing the lights of the Toronto Electric Light Co.

The total cost of the proposed tube railway system connecting the centre with the northern part of the city is estimated by the City Engineer at \$5,171,395 including the tender of Haney, Quinlan & Roberts for construction, \$2,474,781, and the cost of the re-arrangement of water mains, sewers and other public utilities, land damages and other incidental expenses.

Work on track-laying on the civic street railway line on Gerrard St. East was inaugurated on the 14th, when Mayor Geary and Ald. Chisholm performed the ceremony of driving in the first two spikes.

The open weather which prevailed during the greater part of the month enabled farmers to finish up their fall plowing and also permitted the grazing of stock, shortening considerably the time in which they will require to be fed in the stable. The roads were in very bad condition, interfering greatly with the marketing of produce. As a result of the action of milk producers in raising the wholesale price of milk, the retail price in Toronto for the six winter months has been fixed at 10c per quart.

Manufacturing establishments in nearly all lines were busy with plenty of orders in hand and every prospect of a continuance of activity for some time.

The Canadian Hanson & Van Winkle Co., Ltd., has secured a site on Morrow Ave., on which they are erecting several factory buildings, including a nickel foundry, the first to be built in Canada for the manufacture of nickel castings; a four-storey building in

which dynamos and electrical apparatus will be made, and a plant for the production of foundry facings. W. B. Levack has purchased a site on Eastern Ave., on which he will erect a tanning factory. The Copland Brewing Co. have taken out a permit for a brewery on King and Ontario streets to cost \$50,000. The Wm. Davies Co. will build an addition to their factory on Front St. East to cost \$20,000. Grand & Foy, manufacturing stationers, will erect a new warehouse on Bay street.

NIAGARA FALLS, ONT., AND DISTRICT.

General industrial activity continued, and the outlook for the remainder of the year is good. Cold weather forced a cessation of some lines of outdoor work and a few factories reduced staffs. An important development was the commencement by the Ontario Power Company of a new section of their works. The power house will be extended ninety feet in length and two new units, having a combined capacity of 25,000 horsepower, will be installed. Excavations for the building, the new shaft and the spillway were actively commenced. The city assessment shows an increase of over two million dollars from last year. Reports on transportation, wholesale and retail trade and financial conditions were satisfactory. There were rumors of railway extensions and the building of one or more new bridges across the Niagara river during 1912, but no definite announcements were made. The construction of granolithic sidewalks was discontinued for the season, leaving much work for the spring. Building contracts let during the month included those for a \$3,000 curling rink, greenhouses and a large shelter building in the Provincial park and a number of dwellings of good class. Contractors on the Niagara boulevard finished the season's work, leaving very little of the heavy work unfinished. Next season the chief work will be final grading, seeding and

planting of the park lands bordering the twenty miles of completed driveway. Very cold weather forced a cessation of fall ploughing and agricultural work came to a standstill, save for the marketing of late crops. Manufacturing concerns were generally active. Certain ones, the business of which is affected by the change of season, reduced the number of their employees, others were running over-time on holiday orders. On the railways freight traffic was heavy and passenger business good for the time of year. Extra trackmen were employed in preparing the road-beds for winter. No construction was going on in the district except that of the street railway in Welland.

Bridgeburg.—A by-law was carried granting a fixed assessment and a reduced water-rate to the Lautz Manufacturing Company, which has commenced the erection of a marble-working plant here. The buildings will cost \$7,000 and will have 12,000 square feet of floor space. The machinery will cost \$35,000.

Fonthill.—An excavating and hoisting plant of large capacity is being installed to work the extensive sand and gravel deposits here.

Chippawa.—The Dominion government is erecting a lighthouse on Hog Island, at the mouth of the Welland river.

Welland.—Work on the new street railway was well advanced. All the track material, wires, poles and the cars were received. The line may be running by the end of the year. Manufacturing concerns were all busy and building contractors were active. The price of milk was advanced from 7 to 8 cents per quart.

Port Colborne.—The new mill of the Maple Leaf Milling Company was formally opened. It is built on a rock and concrete pier in the harbour and has a dock frontage of half a mile, with water 23 feet deep. The mill building and elevator are 600 feet long, 60 feet wide and 125 feet high while the warehouse is 425 feet long, 72 feet wide and three stories high. The total

floor-space in the three buildings is nearly five acres. The elevator has 60 bins with a total capacity of a million bushels of wheat and can elevate 30,000 bushels per hour, the mill will turn out 4,000 barrels of flour per day and the warehouse will accommodate 400,000 barrels of flour. For the supply of the mill during the coming winter the elevator will be filled to its capacity and several of the largest grain-carrying steamers on the lakes will lie up in the harbour with full cargoes. The mill and elevator are operated entirely by electricity. When the full plans of the plant are carried out the storage capacity will be 1,600,000 bushels of grain and the milling capacity 9,000 barrels of flour per day.

Lythmore (Haldimand County). — The Crown Gypsum Company let contract for a new mill to replace that destroyed by fire. It will be 244 feet long and 70 feet wide, with up-to-date machinery.

ST. CATHARINES, ONT., AND DISTRICT.

The labour market was active to busy, with rushed conditions prevailing in some branches. Labour generally was well employed. The civic work is lessening as severe weather sets in. Sewer work still gives employment to a number of men. Work on the new 24 in. water service main for the city is progressing favorably. The new buildings in course of erection for the Steel and Radiation Co., are being pushed to completion with all possible dispatch, as the company is anxious to be in operation at the earliest possible date. The foundry will be 120x240 feet, the cleaning room 80x160 ft., the machinery building 120x240. There will be a pattern shop and shipping warehouse. The plant will cover 17 acres; it will have a productive capacity of 3,000 hot water boilers and 3,500 radiators a year, and will bring 200 skilled workmen to St. Catharines. Near it the Steel and Radiation Company's plant the new buildings for the Yale and Town lock factory are in

course of erection. The new building for the General and Marine Hospital has been completed and was formally opened by His Honor the Lieutenant-Governor of Ontario, November 24th.

Trade both wholesale and retail was good.

HAMILTON, ONT., AND DISTRICT.

Very active conditions prevailed in most of the branches of employment, the building trades being especially busy. Conditions were more favorable than during the previous month in several manufacturing establishments. The Canada Hart Wheel Company finds its present premises on Barton street too small for its growing business and has purchased a new site in the eastern section of the city. Among the companies incorporated during the month were the MacKay-Paulin Construction Company, which is empowered to do all sorts of dredging and construction work and to operate boats for that purpose. The share capital of the company is \$40,000. Inglewood, Limited, is the name of a new company incorporated for the purpose of carrying on a land building business, with a share capital \$125,000. The walls of the high level reservoir have been completed and the work of roofing the place over is now under way. The contract for the underground conduits for the municipal power and lighting plant has been awarded to the Clermont Company of Buffalo; the amount of the contract is between \$18,000 and \$20,000.

The rate payers will be asked to vote on the following by-laws on Jan. 1st:

Waterworks system	\$650,000
New fire station	65,000
New parks	100,000
New central convenience ...	18,000

The annual report of building inspector Anderson shows that the year which closed on Oct. 31 was the most active in respect to building operations in the city's history. A total of 1,675 permits for new buildings were

issued with a value of \$4,004,925 and in addition to these 212 permits for alterations were issued, the value of these being \$168,280, making a grand total of \$4,173,105, an increase of \$1,626,825 over those issued during the previous year.

The Hamilton Bridge Works has taken out a permit for a brick powerhouse and pattern vault, frame office building and steel corrugated iron factory building to be erected on Waterburg Lane west of Depew street to cost \$30,000.

The Laidlaw Bale Tie Company has secured a permit for a brick factory building on Lottridge street north, to cost \$30,000.

The International Harvester Company is building a brick power house on Sherman avenue north. The Grassillé Chemical Company has taken out a permit for a corrugated iron storage building and a frame building on Lottridge street, to cost \$9,000.

The net reduction from the assessment roll of 1912 amounted to \$68,970. The total assessment as it now stands is \$52,749,884.

Both wholesale and retail trade has been good during the month. Many wholesale and retail merchants who depend on the British export markets for their merchandise have been considerably handicapped by the slowness of shipments caused by the recent English dock strikes. The petition of the members of the fire department for a general increase in salaries of 15 per cent. has been endorsed by the Fire and Water Committee and passed on to the Council with the idea of having next year's administration grant the request. Seven deckhands employed on the steamer Macassa refused to turn out of their bunks and assist in coaling up at 4.30 a.m. on Nov. 21 when ordered to do so by the commanding officer and were placed under arrest and charged before the magistrate with a breach of the Marine Act. The magistrate allowed them to go with a warning. The company did not wish the men punished but refused to take them back. The

Provincial Game and Fisheries Dept. will permit the sperring of fish through the ice here as usual this winter. Many men whose occupations cannot be followed during the severe winter months find employment at this.

BRANTFORD, ONT., AND DISTRICT.

Labour generally was well employed and not many were out of work, although conditions were not quite so good as in October or in the corresponding month of last year. The building trades were very busy for this season and many men will be employed for some time yet. The iron trades on the whole were not quite so active, and some men in certain lines of manufacture were laid off toward the close of the month. One of the largest factories, however, took on a few more men.

The Barber-Ellis Company have plans completed for the erection of an entirely new factory, which will be the Dominion headquarters of the company. The main factory building will be 300 ft. by 70 ft. and a wing 264 ft. long. They expect to employ eventually 250 persons. Merchants had a good month. The city continues to employ a large force of men on local improvement work, principally in the construction of sewers. Farmers were employed chiefly in the feeding of stock and the marketing of produce.

Paris.—Labour was well employed.

The price of milk has been advanced by the local dealers from 6c to 8c per quart, 14 quart tickets are sold for \$1.00, previously 33 pint tickets were sold for \$1.00.

The City Engineer's department issued 30 building permits to the value of \$46,000 during the month. For the corresponding month last year 24 permits were issued to the value of \$97,000. This amount represented several large factory additions. For the eleven months 513 permits were issued to the value of \$598,880. For the corresponding period of last year 355 per-

mits were issued to the value of \$617,530.

The amount of bank clearings for the month was \$2,544,767.

GUELPH, ONT., AND DISTRICT.

Labour conditions while not so active as during the preceding month were very favourable. Considerable delay to outside contracts was caused by inclement weather. Many buildings yet remain unfinished and prospects for those engaged in the building trades, are good for a steady winter's work.

The Guelph Stove Company is calling for tenders for a new factory which will be 500 ft. x 80 ft. and will cost \$35,000. to be completed by May 1st, 1912. The company now employs 90 hands and in its new factory will give employment to about 150. Exterior work on the new jail and jailer's residence is about completed. The Board of Education will erect a four-room addition to St. Patrick's Ward School at a cost of about \$12,000. The fine new passenger station of the Grand Trunk Railway Company has been opened for traffic, but much work yet remains to be done on subways and sidings and a large force of men are engaged thereon. The City Council will submit three bylaws to the rate-payers at the January elections. These are: for a new fire hall and auto equipment to cost \$40,000; a loan of \$25,000 to the Dominion Casket Company, which will locate in the old Burr factory; and \$13,000 for the further extension of the Radial Railway into the St. Patrick's Ward factory district. The Entomological Society of Ontario held their annual convention at the Ontario Agricultural College. After an interesting session Dr. E. M. Walker of Toronto was re-elected president. Wholesale and retail merchants report trade good.

The recent heavy rains put the land in good condition and filled the wells and swamps. Manufacturing establishments were very busy several of them being obliged to work over-time. The

Guelph Carpet Company is installing ten additional looms in the Brussels department.

BERLIN, ONT., AND DISTRICT.

The month of November was a busy one in labour circles, all classes being fully employed, with the exception of a few bricklayers and a few labourers that were called off at the close of the month. While factory employment was very busy with but one exception, good progress was made on new buildings under way. The second large addition to the Lang Tanning Company was completed at the close of the month, and the large addition to the Kaufman Rubber Company is nearly completed. Shipment and bank clearings being favourable, business both wholesale and retail was good.

WOODSTOCK, ONT., AND DISTRICT.

With the finishing of the work on the farms and the slackening of the local building operations, there was at least the beginning of a demand for work among unskilled labourers. The factories, where there had been a demand for unskilled labour all summer were now fully supplied. The number of unemployed, however, did not seem to be very noticeable. Practically all the big factories working full time and some of them over-time. A few skilled men could find employment, especially cabinet-makers for pipe-organ work, and good machinists for both wood and iron work.

There was still some work going on in the building trades, but the bulk of it was over for the season. On the whole it has been a fairly good season for those employed in that work.

STRATFORD, ONT., AND DISTRICT.

General activity prevailed in all branches. In the building trades they were rushing outside work. Building permits for the month of October to-

talled \$14,000 compared with \$5,000 for the same month last year.

All the factories were running full time and in some cases there was a demand for more help.

Street paving operations and civic improvements for this season is nearly finished, leaving a supply of labourers.

Wholesale and retail merchants report business very good and bright prospects for the holiday trade.

Farmers have finished thrashing, the yield of grain being somewhat light in some localities. They are busy marketing, they receive good prices, potatoes selling for \$1.25 to \$1.50 per bag, wheat, 90c per bus.; oats, 42c per bus.; barley, 70c to 80c per bus.; peas, \$1 to \$1.10 per bus.; hay, \$15 to \$17 per ton.

LONDON, ONT., AND DISTRICT.

Activity continued in nearly all branches. In the building trades everyone was busy, although some time was lost to bricklayers through the falls of snow. Owing to not being able to get enough carpenters at the G.T.R. shops, they imported some from Montreal. In the factories and foundries business is brisk, and over-time is being worked. On the morning of Friday, Nov. 23rd, one of the most disastrous fires which ever visited this district took place, six retail stores being wiped out at a loss of \$800,000, throwing 300 people out of work temporarily. A number of the firms have already opened up in new premises, and two of them have let contracts for new buildings in place where old ones stood. The domestic help problem continues to embarrass numerous homes. A number of the larger factories are also advertising for female help. The Board of Education have decided to establish night classes for Industrial training in this city, and have appointed a principal, who will commence his duties at the first of the year. The early advent of snow caught numerous farmers without their fall ploughing complete. The prices of a number of articles has again taken a rise.

Wingham.—On Nov. 24 the ratepay-

ers of this town carried a by-law by 365 to 16 to loan the Western Foundry Company \$10,000 to assist them in building a big new plant; and to give the company a fixed assessment of \$15,000.

ST. THOMAS, ONT., AND DISTRICT.

Favourable weather permitted almost uninterrupted work in the building trades. All classes were well employed. Local industries report a good average month. The Pere Marquette shop employees were busy and a number of hands were added. The men are now working 54 hours a week. In the Michigan Central shops conditions corresponded with the preceding month. It is expected, however, that the advent of cold weather will see a general revival of business. Men employed in the traffic departments of the railroads entering the city report the month steady for regular men. The Michigan Central advanced a number of crews in the service, towards the latter part of the month. However, the fair weather permitted the haulage of long trains and as a result the spare men were not as well employed as they otherwise would have been. A gang of men are at work on the Hydro-Electric line to Port Stanley. The Street Railway receipts show a substantial increase in business for November over the corresponding month of last year. Work is progressing rapidly on the new Michigan Central Railway roundhouse. When completed, this structure will be one of the most up-to-date engine houses in Canada. Norsworthy & Company, foundrymen, report the month of November a busy one. The new foundry is now running, and fourteen additional men have been added to the staff over the corresponding month of last year. A considerable quantity of fish is being shipped from Port Stanley to New York, via the Traction Line and the M. C. Ry.

CHATHAM, ONT., AND DISTRICT.

November saw few changes in the

labour market. All branches were active. The unsettled weather towards the last of the month was a disadvantage to contractors and many buildings were held back. Factories were working to full capacity but outside mechanics started on shorter hours. The City Council were unable to carry out the proposed sewer improvement, owing to heavy rains. The J. D. O'Keefe new abattoir the largest in the West commenced operations on the 29th of the month and will employ a large number of hands. The City Council advanced the following salaries of the city firemen at the last council meeting: Chief, from \$825 to \$1,000; foreman, from \$650 to \$800; and three permanent men from \$650 to \$750 each. Retail trade was very good and merchants report prospects bright. Hay sold during the month as high as \$20 per ton. Live hogs \$6.50 first of the month dropped to \$6 the last few days. \$5,000 being paid out to farmers for hogs in one day.

ST. THOMAS, ONT., AND DISTRICT.

Labour in all branches was never so well employed in Windsor, Ont., as during November 1911. Many factories were advertising for more help, and great activity prevailed in the building trades; lathers and plasterers being in good demand. Planing mills and lumber dealers were behind with their orders.

Farmers were busy gathering in the roots and doing fall plowing. The Essex Terminal Railway Company are building a line from Walkerville to Sandwich to connect with the factory district and all railroads that run into Windsor, and expect to have it completed about the beginning of next year. All branches of skilled trades, as well as unskilled labour, were well employed, and there was a demand for more garment workers, delivery employees, and for skilled men in some branches of the woodworking trades.

Walkerville.—All classes of labour were well employed. Manufacturing

establishments were very busy and there was great activity in building.

SAULT STE. MARIE, ONT., AND DISTRICT.

Labour was well employed during the month. Business, wholesale and retail in all branches was reported good. Application will be made by the municipality to the Provincial Legislature for a city charter. At the next municipal election, the ratepayers will be asked to vote on the following money by-laws:

Roads	\$125,000
Schools	75,000
Sewers	45,000
Sidewalks	32,000
Parks	30,000
Fire hall	10,000

Steeltown.—The various manufacturing plants are working over-time with full staffs and the prospect for an active winter is bright. About \$80,000 was spent this year on local improvements included among which were electric and fire alarm systems, roads, school and drainage works; it is estimated that \$50,000 will be spent next year on improvements.

WINNIPEG, MAN., AND DISTRICT

Labour has continued in good request and no complaints are heard of to inability to get employment. There has been a slight contraction in the number employed in the building trades, but taking the season into consideration conditions from the workmen's standpoint are very favorable.

In the railroad repair shops there has been some slackness due to so much of the rolling stock of the road being employed. This is especially the case with engines. Some trades in both the Canadian Northern and the Canadian Pacific shops have been working short time because of the small percentage of engines available for overhauling and repairs. This is due to heavy traffic at present, a available rolling stock, especially engines, as a result, being kept in use.

Work on the cement plant being constructed by the Canada Cement Company is progressing very rapidly. This plant, it is understood, will be in operation next summer, when it will give employment to a large number of workpeople. The Midland Railway Company has increased the number of men at work in hastening the completion of their Winnipeg terminals and the lines leading into them. Three new contracts were let in conjunction with the work on these terminals during the latter part of November.

The municipal power plant built at Point du Bois on the Winnipeg river is now practically completed and will be taken off the hands of the construction department at a very early date.

Trades connected with the building industry as foundries, woodworking establishments and paint factories are very busy. Indications point to a busy building year in 1912 as many large buildings at Winnipeg as well as throughout the West are projected.

A serious interruption to trade in Winnipeg has resulted through congestion of traffic. The Board of Trade sent a deputation to interview the vice-president of the C. P. R. at Winnipeg to lay before him the serious state of affairs. Mr. Bury, the official in question, in reply to the deputation said that the company had many more cars in use as well as engines than they had at the corresponding period of a year ago. Towards the end of the month there was an improvement in the movement of traffic. Receipts of grain though slightly heavier than for the corresponding period of a year ago are as large as anticipated. The reason given by grainmen is that at important shipping points in the West the companies cannot supply cars fast enough to enable the farmers to deliver the grain.

Banks clearings continue to reach higher levels than they have hitherto done at Winnipeg. For November the aggregate was \$159,586,897 as compared with \$126,717,720 a year ago. The increase for the month is \$33,869,177 or 26.7 per cent.

Retail trade was never better in Winnipeg than it has been during the month of November. Storekeepers generally are very optimistic. Christmas shopping started in earlier than usual and the volume as well as the quality of the trade is proving to be very satisfactory.

Wholesalers though somewhat disappointed earlier in the year are finding orders from the West arriving in quantities they find difficulty in coping with. The practice of not ordering until the crop returns are assured appears to have become the rule in the West.

Wage questions generally have been absent to a marked degree during November. The dispute between the Great West Saddlery Company and some striking employees has not been settled. The company has made the statement that they are not affected. The men state that the dispute is still on and that some of the men who left their employment with the saddlery company have not as yet found other work.

No settlement between the Grand Trunk Pacific Railway Company and its machinists has as yet been announced.

Farmers in Manitoba have practically completed their thrashing. There is still some crop in stock and more in stack but only to a limited extent. Deliveries are light because of the roads and the traffic congestion.

Men are being sought for operations in the woods and those with experience are hard to get. Plans of lumbermen are on a larger scale than usual.

Railroad Construction.—On the prairies operations is practically suspended for the winter. Gangs and plant are being transferred to the mountains where operations will be more than usually extensive.

Rates for Domestic Lighting.—A committee of the Winnipeg City Council appointed to formulate a schedule of rates to be charged for electric light has reported as follows:

Domestic Lighting.—A base charge of 4 cents per 100 square feet of floor space, and a flat rate of 3 1-3

cents per Kilowatt hour for actual current used. 10 per cent. discount for payment within 10 days. Minimum monthly bills 50 cents. Yearly contracts.

Commercial Lighting (Stores, Offices, Factories, etc.)—The present rate of 7½ cents, with large graduated discounts according to amount of current used.

Commercial Power.—Special rates according to amount and conditions of load, contracts to be passed upon by special standing committee consisting of mayor, chairman of power committee and one member of board of control.

Domestic Power (heating, cooking, fans, irons, etc.)—Where a second meter is installed, a special rate of 1 cent per K.W. hour, less 10 per cent discount, with minimum of 75 cents per month per Kilowatt of connected load.

It is estimated that on the basis of the above schedule the actual cost to consumers will be 4½ cents per kilowatt hour as compared with a net charge at present made by the Winnipeg Electric Railway Company of 6¾ cents. This refers only to lighting. The rate for domestic power, at one cent per kilowatt, with a minimum charge per month of 75 cents, is unprecedentedly low and is designed to encourage the use of electric current for domestic uses.

BRANDON, MAN., AND DISTRICT.

Labour generally was well employed. There has not yet been much cessation of work. The sash and door factories are still working over-time. The building trades are very busy and there is considerable work yet to be completed. The outside work on the new station for the Canadian Pacific is completed, and the outside work on the new Asylum power house. The winter Fair Board has decided to build a large auditorium to cost \$80,000. Plasterers, carpenters and plumbers are busy getting the new hospital for the insane ready for occupation by Jan. 15th. A large force of men are employed on the hotel for the C. M. B. and it is expected that it will be ready early in the year. Railroad transport is very busy and there is considerable congestion of freight traffic.

A vote was taken recently to decide whether the new street railway should be municipally owned or a franchise given. There was a large majority in favor of a franchise.

The Hanbury Manufacturing Com-

pany and also the McDiarmid & Clark Company are working over-time. Railroad workers are very busy. Construction work on the street railway was closed down for the winter.

REGINA, SASK., AND DISTRICT.

There has been a general slackening since the beginning of the month, particularly in the building trades, this being attributed to the severity with which winter set in. Not only in the city has this been felt, but throughout the surrounding district where it has, at times made agricultural operations impossible. Generally speaking there has been little demanded for labour; in the case of carpenters and bricklayers and stone masons many have been idle during the month. There are at present several large buildings under construction, some of which, are all but at a standstill owing to a shortage of material. The new Union Depot although going forward steadily, suffers to a certain extent, on account of the inability of the builders to secure stone of the right kind in sufficient quantity.

According to the latest report of the Department of Agriculture for the Province of Saskatchewan, only 73 per cent. of the grain has been thrashed, and of the balance fully 18 per cent. will remain in stock over winter.

With the exception of one or two places the recent cold weather has put a complete, though temporary stop to threshing operations, especially where gasoline power was being used. The fact that very many of the Eastern harvesters have left or are leaving, will militate against further work being rushed, even should weather permit. Farmers are suffering owing to a shortage of cars; reports to this effect are received throughout the province.

EDMONTON, ALTA., AND DISTRICT.

The labour market was active, a large number of men being employed on new buildings as well as city work. Skilled workmen were in demand.

There was more activity in all trades than during the corresponding month of 1910. A large number of labourers came into the city from railway construction camps but found no great difficulty in procuring employment. Opportunities of employment for labourers no doubt will be better during the coming winter than in previous years owing to the erection of the steel work on the Canadian Pacific Railway bridge and the erection of a traffic bridge in the east end. Transportation companies reported a very active month. Business wholesale and retail was very good.

On the 18th inst. the union carpenters inaugurated the Saturday half holiday, which makes a forty four hour week for about six hundred men.

Wheat crops have turned out excellent, about twenty bushels to the acre apparently being the minimum, while crops making yields of 30, 35, 40 and 45 bushels and over have frequently been reported. Very little of the wheat that has come on to the local market, either by farmers' wagon or by rail, has shown frost damage. While no doubt there is some low grade wheat, the bulk of the crop is in the northern grade. The harvesting of potatoes and other root crops has shown enormous yields and fine sample to be the rule.

Owing to a few days of very cold weather during the first part of the month, many householders found it very difficult to procure coal as the supply was not equal to the demand. As the latter part of the month was mild dealers have been able to supply the demand and report that there is no danger of a further shortage during the winter.

Railroad construction is confined mostly to track laying excepting in the mountains where considerable rock work is being done.

Track laying on the main line of the C. T. P. is practically done in Alberta and the tracklayers are now working in British Columbia.

LETHBRIDGE, ALTA., AND DISTRICT.

The labour market was dull during the first half of the month, the miners strike and the stormy weather keeping work back. Now all is changed. The coal miners are at work and with the coming of mild weather the building trades are busy again. Threshing has commenced and there is a constant demand for more help. The opportunities for employment are good and likely to be so up to the new year. There are at least half a million dollars' worth of buildings to be started as soon as the winter is passed; some may be started at once. Work on the streets is being pushed. There is great activity in the storing of farm implements. The bank clearings for October were \$2,737,941 as compared with \$2,013,409 for the corresponding month of last year. For the present week ending 23, the clearings were \$742,297 as compared with \$716,554 last, and \$560,663 for the corresponding week last year.

There has been very little ploughing done this fall which means a very busy spring. The output of coal will keep on increasing as development goes on in the new mines. All the mines are fitted up with the most modern machinery. The "Labor Times" reports that 500 miners are required in that town. Many of the men who went into lumbering are returning to the mines.

NELSON, B.C., AND DISTRICT.

The general demand for labour has been above the average. Many of the Slocan mines which have been idle for years through litigation and other causes, have again commenced operations and they comprise some of the best dividend payers in the Kootenays; whilst many of the regular shippers have increased their output. Whilst it is generally believed that should the present prospects of an early solution of the line problem be brought to a satisfactory conclusion, the Slocan

district will be the busiest mining camp in the Kootenays, as it formerly was. Strike is a thing of the past, and the coal miners all busy at work again, the one dark spot on the industrial horizon has disappeared. Coal and coke trains will soon fill up the tracks in local C. P. R. yards, and some of the local train crews, that left to work on the main line, will be back at their homes in Nelson. Whilst the hundreds of regular hands at the Granby Mines and Smelter will also return to Phoenix and Grand Forks. It is a general opinion throughout the Kootenays that we are entering upon an era of sound industrial activity.

Sawmills have mostly shut down for the winter and transferred their centres of activity to the logging camps. A large amount of bush clearing is being done upon the fruit ranches all over the country. Whilst every day brings reports of recent purchases of land for fruit growing.

The recent establishment of two large jam factories in Nelson, has given a great impetus to the small fruit industry, many fruit ranchers having doubled their acreage under strawberries. The improved transportation service which the C. P. R. inaugurated last season by putting on a boat to carry the ranchers' berries to meet the Crows Nest train at Kuskanook Landing, has also done much to increase the berry industry, as it gives every rancher along the lake a chance to get his fruit placed in first class condition on the markets of the Northwest Provinces. All ranch work was suddenly brought to a standstill about ten days ago, by an exceptionally heavy fall of snow, but it went almost as quickly as it came. Many new buildings are going ahead and street work and other city improvements are being pushed forward whilst the weather is favorable.

NEW WESTMINSTER, B.C., AND DISTRICT.

The state of the weather as is usual at this season has caused a falling off

in the number of men employed on outside work. The principal commodity moving now is real estate. Business on the whole has been quiet.

The farm work is practically finished for the year. Crops have been good and prices high. A few salmon are being caught and bring top prices.

The output of lumber is as usual at the full capacity of the mills and shipments are constantly being made to the prairies also to Australia and the Orient. The sash and door factories which have been rushed are now entering their slack season as building operations have been held up for the greater part of the month owing to wet weather and a heavy snow storm which stopped road construction tramway extension, etc., as well as building.

VANCOUVER, B.C., AND DISTRICT.

The civic building department estimates that the \$18,000,000 mark in building permits will be reached by the end of the year. Early in November a fall of snow interfered with outside work, so much that no large contracts will be started till the new year. The outside work under way will be continued, subject to stoppages on account of the wet weather. Where roofs are on buildings, inside work will be carried on without stoppages. The volume of work in hand exceeds that of November last year, but owing to large numbers of new arrivals there are more men out of employment this month than 12 months ago. While this slump in the building trade was noticeable, commercial activity experienced a change; retail trade was expanding on the eve of the holiday trade.

Real estate, closely connected with the building crafts, showed a rather sluggish tendency towards the latter end of the month, and the sales recorded were for the most part insignificant. This was not felt very much on bank clearances, which were swelled by the increased retail business.

The meat and vegetable market was inactive. The fruit market was partic-

ularly dull. The weather accounts for that, for it found the dealers almost unprepared for the occasion.

Work will be started about January on the erection of a five-storey apartment building. It will cost about \$150,000.

A large trunk factory on Eighth avenue and Glen Drive was started. This is the first concern of its kind opened in British Columbia.

The civic Water Works Committee decided that the additional sum of money required to finish the work started last spring on extensions would amount to \$661,880, and as \$300,000 has already been passed it would leave a further sum of \$360,000 to be secured. It was decided that a by-law should be prepared for that amount, and that tenders for 240,000 feet of 24-inch pipe, to be in by the end of the year, should be called for.

Shipping in all branches was very active.

The printers reported about 60 hands out of employment. The job offices were exceedingly quiet.

The bakers reported that the membership were having a hard fight as bread machines were being installed in some of the American coast cities; but the prospects for Vancouver were good for the winter.

The bartenders reported that too many licenses were being granted by the License Commissioners to bartenders. Some 423 had been granted, though only 269 were working.

The electrical workers reported all fairly well employed.

The iron moulders reported trade fair.

The stone cutters reported more members of their union working than ever before. Moving picture operators reported work good. The carpenters reported that the contractors have all the men at work they need. No new work is being started. The tinsmiths and sheet metal workers report trade very quiet and will remain so till the spring opens. The tailors report work very slack.

North Vancouver.—The City under

the administration of Mayor McNeish, has established a civic information and free labour bureau.

Wallace's ship building yards are active.

Penticton.—Tracklaying is reported to be in progress beyond this town, through the Tulameen canyons by the Vancouver, Victoria & Eastern Railway and Navigation Company. About five miles of track has been laid and three bridges are being built. It is expected that track will be laid to Coal-mountain, 14 miles from Princeton, within a few days. As soon as this is finished the bridge over the Similkameen River west of Maplehurst will be built.

VICTORIA, B.C., AND DISTRICT.*

Owing to the inclement weather all engaged in out-door work were very irregularly employed, although there was a large amount of work in hand and, in sight, and several hundred men have been laid off until weather conditions become more settled. The British Columbia Labour and Statistical Bureau had several hundred applications for employment, principally from labourers and persons desiring positions as clerks, porters, etc., in commercial houses. The supply of this class of help is much greater than the demand. The applicants for the most part are new comers from Great Britain and a considerable number are from the Northwest Provinces.

For the month of October 115 building permits were issued amounting in value to \$541,325, as against \$124,275 for October, 1910. The bank clearings for October amounted to \$11,527,732, as compared with \$8,750,129 for the same month last year. The total customs collections for October were \$169,500. The collection of the Chinese head tax has been transferred from the Customs to the Immigration Depart-

*In the September issue of the *Labour Gazette* it was stated that, at the request of the Union, the Master Plasterers of Victoria had agreed to dispense with Chinese labourers. On further inquiry it is learned that this clause in the agreement between the masters and men is not being carried out.

ment. During October 249 Chinese paid the \$500 head tax amounting to \$124,500.

Both wholesale and retail trade continues in a healthy condition.

The Canadian Pacific Railway has awarded a contract for the construction of a new steel passenger steamer to the B. C. Marine Ry. Co., to cost in the neighborhood of \$250,000.

The ratepayers voted favourably on a by-law granting \$45,000 additional to complete the Dallas Road Sea Wall. By-laws asking \$290,000 for parks and \$25,000 for annual maintenance of the city library were defeated.

The cement workers employed by the city have been granted an increase in wages from \$2.75 to \$3.00 per day, dating from July 14th.

As yet no settlement has been made in the dispute between the Musicians Union and the Empress Theatre, in regard to wages.

NANAIMO, B.C., AND DISTRICT.

The conditions of the labour market in this district have not been as favourable for outside work as last month owing to bad weather, but there is still a lot of work on hand for fine days. The general trades have been steadily employed but there are a lot of men looking for work. The coal trade continues active. A clam canning factory has started up on a small scale. Commercial activity shows a steady increase. Business men wholesale and retail report trade good for the time of year.

PRINCE RUPERT, B.C., AND DISTRICT.

There is no special activity in any branch of labour in the city. Work on

the Woodworth Lake water works and Hydro-Electric scheme has been delayed temporarily. Street grading work is not extensive at present. The largest buildings under construction are a new Fire Hall and City Hall of cost (together) about \$30,000. There is little residential building going on now. (Buildings to the value of \$230,000 were erected during the past ten months in Prince Rupert).

The sale by the Grand Trunk Pacific Development Company of Section Two of the Townsite, hitherto held in reserve is expected to increase activity in real estate, and all branches of business. Sale takes place November 29th. The only change in wage rate is the proposed reduction of longshoremen's wages from 50 cents per hour to 40 cents. Arrangements are pending. There was a temporary cessation of work by the men for a day or two but no disturbance.

The management of the Standard Fish and Fertiliser Company of Queen Charlotte Islands is considering the extension of its plant and the employment of more trawlers in the spring of 1912. Present weather affects the fishing industry adversely one local gasoline fishing boat having had to jettison cargo to save lives, and hauls running small.

Miners and muckers to number of some 75 left Goose Bay—"Hidden Creek." Copper, Gold low grade ore mine under development by Granby Smelter Company, on 16th inst. Reason given dissatisfaction with wages paid said to be same rate as paid at Granby, and heavy snowfall making conditions difficult.
